American Railroad Journal.

New York, Saturday, January 4, 1868.

A Railroad from Memphis to St. Louis.

The Memphis *Post* says that the Memphis and St. Louis Railroad has recently received a new impetus. The part of the line extending from the present termination of the Iron Mountain Railroad to the Arkansas and Missouri state line is already pushing forward rapidly, the road having been purchased from the state of Missouri by Thomas H. Allen. The entire work to the state line is under contract, and fifteen hundred men at work. The portion from Memphis to the line, which was yet to be provided for, has recently been given out to responsible persons, who are preparing to enter upon the work as soon as the location of the line is completed by the engineers of the company and specifications of the work made. The entire work is to be completed in fifteen months. It will be begun as soon as the necessary surveys can be made and the line definitely located.

One of the peculiar features of this road will be that it will have no bridges or breaks of any kind. The line will serve the purpose of a levee. It will follow the swell or ridge which extends nearly parallel with the river, at an average perhaps of three to five miles from it, and the embankment will be of sufficient height to prevent the waters of the Mississippi from extending beyond the road. The country west of the line will thus be drained by the St. Francis and other rivers, and the back water from the Mississippi in times of floods being restrained from spreading over it, an immense amount of the richest and most fertile alluvial lands will thus be reclaimed and made exceedingly valuable. Colonel Porter estimates the extent of land which will thus be rendered available for agricultural purposes at over two millions of acres.

McGregor and Sioux City Railway.

A company has lately been organized for the construction of a railroad from a point on the Iowa and Minnesota Division of the Milwakee and St. Paul Railway where that road turns to the north, west to Sioux City in northwestern Iowa. The stock is subscribed, and the road will be commenced early in 1868. The directors of the new company are substantially the same as those of the Milwaukee and St. Paul Company, of whom Alexander Mitchell and S. S. Merrill are members from Milwaukee.

The proposed line runs nearly due west from McGregor on the Mississippi river to Sioux City, a distance of about 250 miles. At Sioux City a connection will be had with the Pacific Railroad, by a branch to Omaha. The line follows substantially the forty-third parallel (the latitude of Milwaukee) as designated by the act granting lands to aid in its construction. We learn from a gentleman who has passed through the country to be traversed by this new road, that it is the finest land in Iowa or any other state.

☞ Negotiations are pending for the sale of the Washington Iron Works Newburgh, to the Boston, Hartford and Fishkill Railroad Co., which company intends converting it into a car and repairing shop. The establishment was sold but a short time ago to Messrs. Carson Brothers of this city.

☞ There will be a meeting of the friends of the project of building a railroad from Louisville by way of Shelbyville, Lawrenceburg, Harodsburg, and Danville, in Frankfort, Ky., on the 9th inst., to consider of and perfect a charter and a plan for the prosecution of the work.

Erie and New England Railroad Co.

A company has recently been organized in this city with the above title. The object is to connect the Erie Railway at Turner's station, about eighteen miles west of the Hudson River, by a line as nearly direct as practicable, with New Haven *via* Derby. From Turner's to Port Jarvis, on the Erie road, is forty miles, and the whole distance from the latter place to Derby is estimated not to exceed 120 miles, thus placing Derby practically about as near as Elizabethport, one of the great coal shipping ports of New Jersey, to the great coal regions of Pennsylvania. A suspension bridge over the Hudson, near Anthony's Nose, 1,600 feet long, and 150 feet above the river level, is proposed; and one of the advantages to be gained is the expected transportation of coal from the mines without breaking bulk. The company is organized under the general railroad law of New York, and capital sufficient for its preliminary operations is already paid in.

Railroads of the United States.

In accordance with custom we present our readers in another part of this day's JOURNAL with our annual list of railroads, their length and cost. The following tables are a recapitulation of these by States and sections, and will be of interest as showing the progress we are making in every direction.

In the detailed tables, above referred to, the several railroads are ranged under the States in which the companies owning them are legally domiciled; and hence in instances in which a railroad traverses two or more States, a proper allowance must be allotted to each State. Thus the Atlantic and St. Lawrence, which in the tables aforesaid, is attributed wholly to Maine is finally distributed in the table which follows to Maine, New Hampshire and Vermont, the States through which it has its route, (and so with all other inter-state Railroads.) It must therefore be understood in reading the table given below that it represents the *actual* length and cost of railroads in the separate States, ascertained by making the proper deductions and additions.

Length and Cost of Railroads.

	Miles. Total.	Miles. Open.	Cost of Road &c. Total.	Cost of Road &c. Per mile.
Maine	638.29	512.57	$18,039,779	$34,539
New Hampshire	667.36	667.36	22,230,387	34,829

11. North Interior States	20,475.73	14,763.95	639,807,946	43,336
3. Pacific or Western States	1,898.30	432.00	29,590,000	68,495
Aggregate	54,556.85	38,821.81	$1,660,460,809	$42,797

In reducing the total cost to cost per mile, the completed mileage has been used as the divisor; but in consequence of the total cost containing sums of greater or less magnitude, expended on unfinished road, the reduction by the method adopted results in a greater or less error. Thus in the North Eastern group of States the result obtained is nearly correct, the difference between completed and progressing roads being comparatively small. In the newer States, however, in which large amounts have been expended on roads yet incomplete, the difference is necessarily wider apart. In order, then, to obtain an approximate accuracy it will be necessary to make deductions in accordance with the actual condition of things in the States respectively. The following is based on this proposition and will more nearly estimate the average cost of roads than that shown in the foregoing table.

States.	Cost as above.	Deduct per cent.	Approximate cost.	States.	Cost as above.	Deduct per cent.	Approximate cost.
Maine	$34,539	0	$34,539	Louisiana	$43,160	20	$34,531

The annual progress of railroads for the last forty years, is shown in the following table:

Year.	Miles.	Year.	Miles.
1828	8	1849	6,350
1829	28	1850	7,475
1830	41	1851	8,589
1831	54	1852	11,027
1832	131	1853	13,497
1833	576	1854	15,672
1834	762	1855	17,398
1835	918	1856	19,251
1836	1,102	1857	22,625
1837	1,421	1858	25,090
1838	1,843	1859	26,755
1839	1,920	1860	28,771
1840	2,197	1861	30,593
1841	3,319	1862	31,769
1842	3,877	1863	32,471
1843	4,174	1864	33,860
1844	4,311	1865	34,442
1845	4,522	1866	35,361
1846	4,870	1867	36,896
1847	5,336	1868	38,822
1848	5,682		

The above tables have no reference to the passenger railroads now in use in all our principal cities. These in the aggregate make a large mileage, probably not far from 2,000 miles, or including double track not far from twice that length.

Nor is the second track on any of the railroads estimated in the tables. Nearly all the great lines of the country, however, are in part or wholly double, and the additional track is being yearly increased to the very great advantage of business. We may estimate the double track, sidings and turnouts at 25 to 30 per cent. of the length of roads, which added to the above, will give us a total equivalent single track of not less than 50,000 to 55,000 miles in length.

The present activity in construction will bring into use many hundreds of miles of road in 1868. Perhaps at no former period have so many great enterprises been in hand.

☞ The Marquette (Mich.) *Journal* says the Collins iron furnace made, from December 5, 1866, to December 5, 1867, 4,104 tons of pig, being eighty-one tons more than for any year before. The Cleveland iron mine has shipped the past year 75,822 tons, and the Marquette 83,649 tons.

Pacific Mail Steamship Co.

The following is an abstract from the Report of Louis McLane, President *pro tempore*, to the Board of Directors of the Pacific Mail Steamship Company. It is dated December 3, 1867, and was presented at a meeting of the directors on the 6th, by whom it was ordered to be printed. At a meeting of the new board of directors on the 23d, it was resolved that the report be issued, with the understanding that a more complete report will be prepared and sent to the stockholders on the return of Mr. Allen McLane, President.

To the Board of Directors of the Pacific Mail Steamship Company.

Gentlemen: In accordance with your resolution of Nov. 18, I have the honor to report that our receipts from all sources for the year ending Oct. 31, 1867, have been as follows:

From passengers	$3,085,407 59
Freights	2,788,468 89
United States mails	262,252 45
Interest, and premiums on gold	833,994 50
Dividends on investments	538,818 00
Various credits to profit and loss	180,766 56
Total	$7,689,707 99

And our disbursements during the same period have been:

For running expenses of steamers, including the voyages of the Great Republic and China from New York to San Francisco, those of the Costa Rica and New York from New York to Hong Kong, and that of the Hermann from San Francisco to Yokahama		$4,078,719 00
Repairs of steamers, including the double planking of the Costa Rica, New York, Colorado, Sacramento, and Constitution	426,472 70	
Office and agency expenses in New York, including salaries and rent.	105,003 10	
All other agency expenses, including wharf rents and salaries	364,376 84	
Benicia Depot	21,622 26	
Dividends—One of five per cent. on $15,000,000 and three of three per cent. on $20,000,000	2,550,000 00	
	$7,546,193 90	
Leaving excess of receipts over disbursements	93,514 09	
	$7,639,707 99	

During the year we have maintained three monthly lines between New York and San Francisco making 86 through voyages each way, without serious accident or detention of any kind, carrying the following number of passengers and amounts of merchandise and treasure freight:

PASSENGERS.

Through from New York to San Francisco.	18,477
Through from San Francisco to New York.	8,383
Total number of through passengers	26,860
Way outward	1,729
Way homeward	2,517
	4,246
Total number of passengers	31,106

MERCHANDISE FREIGHT.

From New York to San Francisco, tons	29,716
From San Francisco to New York, tons	16,712
Total through Merchandise Freight, tons	46,428
Way, outward, tons	8,719
Way, homeward, tons	5,445
	14,164
Total Merchandise Freight, tons	60,592

TREASURE FREIGHT.

From San Francisco to New York, value	$30,371,604
From San Francisco to Foreign Ports, value	11,920,315
Total value of Treasure	$42,291,919

From the 3d of July until the 1st of October, our steamers arriving from Aspinwall were detained at Quarantine, and required to land their passengers, baggage and mails from the quarantine tug at the Battery, and to discharge cargo in the stream off the company's wharf; whereby our current expenses were increased many thousands of dollars, and our home freights and travel reduced.

The China Line was inaugurated by the Colorado, leaving San Francisco January 1, 1867. She made three voyages to Yokohama and Hong Kong, and is now in the Panama line, having been relieved in the China service by the Great Republic and China, which will continue to make six weekly trips to Yokohama, connecting at that port with the New York and Costa Rica, for Hong Kong and Shanghai, respectively, until the Japan takes her place in the line, say about July next; after which monthly trips will be made in accordance with the terms of our contract with the Post Office Department. The fourth ship, to complete the China line, is now building, and is expected to be ready for service during the Spring of 1869. I prefer leaving to the President, on his return in February, to report in detail on the organization of our China line, and the cost of coal depots, wharves and offices at San Francisco, Yokohama and Hong Kong; premising that, to this date, we have expended upward of four millions of dollars in steamers and depots for this line; that the receipts from passengers, freights and mails are in excess of the current expenses; and that about one and a half millions of dollars more will be required to complete the Japan, the fourth large steamer, not yet named, and the depots at San Francisco, Yokohama and Hong Kong.

The company's assets on the 1st of November, as per Ledger balances, verified by the Auditing Committee, were as follows:

Cash, United States Bonds, New York State and San Francisco City Bonds, 4,063 shares Panama Railroad Stock, and £1,000 Atlantic Telegraph Stock, costing		$3,778,124 20
Loans on collateral, including $500,000 to Novelty Iron Works, secured by bond and mortgage covering all the real estate and other property of that company and guaranteed by James Brown, due December 31, 1868		1,230,790 20
Bills receivable		302,556 84
Amounting to and good for the aggregate		$5,311,471 24
116,529 tons of coal in depots and in transit, on which has been paid		1,457,542 91
Outfits and supplies in store at agencies and in transit		394,435 94
26,653 shares of the company's stock at cost		3,993,035 50
Real estate, wharves, warehouses, and offices at New York, San Francisco, Benicia, Oregon, San Diego, Acapulco, Panama, Aspinwall, Yokohama and Hong Kong.		1,044,266 47
20 steamers and 2 tugs		8,978,962 67
4 unfinished steamers, on which has been paid		1,292,969 99
		$22,472,684 72

Our liabilities are to Brown, Shipley & Co., for sterling credits used in purchases of coals and supplies, $437,708 18; and for freights on coal in transit, and to complete unfinished steamers for the China and Aspinwall lines.

The steamers stand on the books at much less than their real value, in consequence of reducing their cost price each quarter in lieu of insuring, the company preferring to be its own insurer, as the safest, most economical, and most profitable policy to the shareholders. Our steamers rate A 1; those on the Panama route have an average capacity of 1,000 tons of through freight and 1,000 passengers, while those of the China line have capacity for 1,500 passengers and 2,000 tons of freight; and all are fitted with independent donkey engine boilers and fire apparatus, and in every particular adapted to the trade in which they are employed.

Metropolitan (Horse) Railroad.

The receipts of this company during the year ending November 30, 1867, were:

From passengers, and tickets sold		$714,991 46
From other roads, as tolls or rent for use of road		10,365 25
From other sources		11,352 54
Total earnings		$736,709 25
The total expenses have been		607,074 60
Net earnings		$129,634 65
Add surplus of 1866		73,034 31
Total		$202,668 96
From which paid dividends, January and July	$125,000 00	
U.S. Int. Rev. tax on same	6,578 94	
		131,578 94
Leaving a surplus of		$71,090 02

Assets:

Road		$911,260 59
Real estate and buildings		266,794 80
152 cars		118,618 92
Four steam passenger cars		24,579 02
791 horses		98,294 69
Sleighs and coaches		59,823 35
General equipment, consisting of engines, machinery, grist mill, tools, snow plows, harnesses, &c		43,854 23
Hay, straw and grain	$7,558 91	
Cash and sundry accounts	13,791 92	
	$21,350 83	
Land on Tremont street	32,671 85	
		54,022 68
		$1,577,248 28

Liabilities:

Capital stock	$1,250,000 00	
Notes payable	167,770 54	
Sundry acc'ts payable	2,452 79	
Outstanding tickets	12,975 02	
		1,433,198 35
Excess of assets		$144,049 93

The practice of stating all the above assets at their cost is continued; revaluations thereof would increase the above excess considerably.

Everything in the nature of repairs, whether of road, buildings, cars or equipment, is charged off monthly to the expense account.

The cars and other vehicles of the company have run during the year ending November 30, 1867, 287,402½ round trips, a total distance of 1,823,174 miles, and have carried in all 12,366,831 passengers, being an average of 4,995 miles run, and 33,882 passengers carried, for each day in the year.

COMPARATIVE BUSINESS OF THE ROAD.

	Passengers.	Receipts.
1861	5,810,119	$286,270 15
1862	6,163,877	300,806 52
1863	8,153,110	388,616 51
1864	11,298,074	580,043 01
1865	11,263,118	651,602 75
1866	12,236,395	753,414 57
1867	12,366,831	736,709 25

The cost for each mile run has been as follows:

1862	18 14-100 cents.
1863	21 57-100 cents.
1864	27 65-100 cents.
1865	34 92-100 cents.
1866	31 90-100 cents.
1867	33 24-100 cents.

Important Decision in an Express Case.

In January, 1866, Edward H. Buckland & Co., of Springfield, Mass., delivered a case of pistols, valued at four hundred and twelve dollars, to the Adams' Express Company, to be sent to a firm in Vicksburg, Miss. While on the way to that city in charge of the company the pistols were lost by the blowing up of a Mississippi steamer. Claim was made for the value of the pistols, but refused by the express company, on the ground that the terms of the receipt given at the time the goods were received by the company exonerated it from dangers arising from river navigation and steam. Suit was brought before the Superior Court on the ground that the company was a common carrier, and the Court decided in favor of the plaintiffs, but the defendants appealed to the Supreme Court of Massachusetts, which has now sustained the decision, and made declaration in fact that express companies are common carriers, and are responsible for the safety of goods which they are paid to transport.

☞ The Albany and Susquehanna Railroad was opened on the 26th ult. to Ninevah and Harpersville, 120 miles from Albany.

American Railroad Journal.

Saturday, January 4, 1868.

Stock Exchange and Money Market.

The Money Market has been fairly active, since our last. The speculative call has been more animated, particularly toward the close; but it has been very generally met with promptness at 6@7 chiefly at 7 per cent. on call. The discount business has been of a less urgent nature, as usual at this season of the year. All really prime paper offered has found a ready market within a range of from 7@8½ per cent. per annum. The Sub-Treasury revenues, since our last, have been more extensive than its expenditures; and its cash balances have been considerably augmented. On the 31st ult. it commenced disbursing the January coin-interest on the public debt. With the opening business day of the new year, it begins the redemption of the matured bonds of 1847, both principal and accrued interest being paid in coin, dollar for dollar, in strict conformity with the terms of the original contract. This is the third prompt reimbursement, in Gold, of the principal of the Public Debt, since the general suspension of specie payments and the establishment of greenbacks as legal tender for all other payments than for customs duties and the interest on and principal of the funded debt of the United States, to which the Customs Revenues (made receivable exclusively in Gold,) are specifically pledged. The practice has never been departed from before or since the Act of February, 1862, and undoubtedly the same strict and honorable faith will be observed thirteen or fourteen years hence in regard to the principal of the loans of 1861 and of 1862. An easy monetary movement is looked for through the current month of January, and on probably to the resumption of active business in the spring. On Thursday, unusually heavy disbursements commenced to be made in gold from the Treasury Office, a large portion of which will go into bank. The amount of currency dividends —Bank, State, Railway, &c.—which will be paid out to private parties will also be large. As the banks close on the business of the day following, Friday night, Jan. 3, so will their returns show to the Deparment at Washington, on Monday morning, (before the clearances of Monday are made,) Jan. 6. The city banks in their last weekly statement, show a further gain of $2,346,500 in greenbacks, while losing $2,496,140 of their gold and gold deposits by reason of the export demand for Europe. The general deposit line is $1,080,000 higher. The loans increase $454,000. The specie reserve of the city banks is now $10,971,969, against $13,185,222 same time last year. The city bank deposits are now $178,713,191, against $200,811,290 week ending Dec. 29, 1866. The legal tender reserve amounts to $60,657,932, against $63,000,687 same time last year. The circulation now stands at $34,134,400, against $32,664,526 same time last year. The loans are now $244,620,312, against $259,354,761 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $74,856,717 a day, against a daily average of $78,858,584 the preceding week, and $74,607,310 the week ending with Dec. 14. The current week's exchanges average about $85,148,000 a day. The city banks, last week, gained $2,346,500 of legal tender, and $1,080,608 of deposits while they lost $2,496,140 of specie. They increased their loans, $454,959; and their circulation, $115,299.

The Philadelphia Bank movement the past week shows a increase in loans, of $238,988; a decrease of $8,895 in specie; an increase in legal tenders of $287,108; an increase of $320,897 in deposits; and a decrease of $4,236 in circulation. The Bank Clearings show a decrease of $5,211,869, and the balances, a decrease of $725,171.

The U. S. Sub-Treasury receipts, week ending with Dec. 28, were $10,317,157, including $1,057,760 from customs duties; payments, $8,301,206, including $105,000 of coin interest; balance at the close of the week, $104,249,547, against $102,233,596, at the close of the preceding week, showing an increase of $2,015,951. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,809,828 including $184,649 from customs; and payments, $2,199,607; on Tuesday, receipts, $3,074,887 including $289,000 from customs, and

payments, $7,850,882. The balance at the close of business on Tuesday stood at $101,683,223, against $103,565,841 a week previous; and $103,176,365 on Dec. 15.

The United States Sub-Treasurer in New York, has given notice that on and after 2d January, 1868, bonds of the loan of 1847 (act Jan. 28, 1847,) will be redeemed at his office on presentation of certificates. The latter must be assigned to "The Secretary of the Treasury for redemption," and endorsed by the party to whom payment is required to be made. Where such assignments are executed in a representative or fiduciary capacity, the evidence of authority to make the assignment must accompany the certificates. Should that evidence be already filed with the Department, the date of its transmission, and the bureau in which it was lodged should be stated. Certificates presented should be listed in a schedule, in which the numbers, denominations, names of payees, and other data above required, should be set forth.

The total receipts of the Sub Treasury in December were $81,524,145, including $5,448,244 from customs; total disbursements, $87,496,905 including $1,438,753 of coin interest.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to Dec. 23, was $238,184,380; aggregate redemptions, $206,585,000; leaving outstanding certificates to the amount of $31,599,380.

National Bank notes to the amount of $55,650 were issued last week, making the total issue to 1,673 banks thus far, $305,486,161, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,625,555, leaving, with the existing 1,639 banks, (having an aggregate capital of $424,394,861,) an actual circulation at this date of $299,833,606. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,997,750; and for the public deposits, $37,817,950—making a total of $378,815,700. The Treasury Department last week redeemed and destroyed $253,600 of worn and mutilated fractional currency, and issued $1,072,000 of new.

Government revenues show no improvement as yet, but there are indications of an early increase in the yield of both excises and customs. The excises, last week, yielded $2,225,000, against $2,254,000, the preceding week; customs at the port of New York $1,057,760, and at the outports, about $328,000 (in coin) more, making the grand total income for the week equal about $4,086,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $101,000,000.

Government received $7,194,910 from customs, through the port of San Francisco, from Jan. 1, to Dec. 8, 1867.

Gold has been rather more active, since our last. The speculative inquiry has been brisker, and the export demand considerably beyond the usual average of late. The customs call has been comparatively light, however. The highest sales of the week were at 134¼, and the latest at 133⅝@133¾. The California steamer, on Tuesday, delivered $1,111,741 in treasure at this port. Government commences disbursing, with this week, some thirty millions of coin, on the public debt account, both principal and interest. It paid out about two and a half millions on Tuesday, in this way. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1867, have been $3,145,592, against $9,624,432 same time last year. The customs demand for Gold last week, averaged $211,552 a day; thus far, this week, it has been equal to $185,000 a day, or equal to a weekly aggregate of $1,110,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $48,723, and from California, $1,111,741. The total customs revenue of the Government, in coin, at this port, thus far in the current calendar year commencing with Jan. 1, 1867, has been $116,513,410, against $129,961,017 same time in the preceding calendar year. The total receipts of California gold at this port since Jan. 1, 1867, have been $28,789,297, against $42,110,796 same time last year, showing a decrease this year, of $13,321,449. The exports of specie from this port, last week, were $3,226,677. The total outflow of specie from the port, since Jan. 1, 1867, has been $51,791,278, against $62,553,700 same time in the preceding year. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $105,000, making the total coin interest disbursements through the Government office, since Jan. 1, 1867, $61,823,595, against $48,429,171 for the preceding calendar year. The specie exports from San Francisco, from Jan. 1, to Dec. 8, reached $37,942,265, against $40,851,469 same time last year, showing a decrease, in 1867, of $2,909,204.

We annex a statement of the gold disbursements from the Treasury in January, about three-fourths of which will be paid at New York:

Principal of loan of 1847–'67	$6,670,000
Interest thereon	190,100
Interest on loan of 1848–'68	246,030
Interest on loans of 1861–'81	8,481,946
Interest on 5-20s of 1865–'67	14,692,830
Interest on 5 per cent. of 1871–'74	675,550
Grand total	$30,956,456

Foreign exchange has been less freely dealt in, and has been less firm in price. The offerings of bills have been fair and increasing gradually. Bankers' 60 day bills on London closed on Tuesday at 109⅞@110⅛, and on Paris to 5.20@5.12½; sight bills on London to 110⅜@110⅝ and on Paris to 5.11¾@5.10. The offering of produce bills have been rather light, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,607,233, making the total value of exports since Jan. 1, 1867, $186,051,093, against $185,099,711 same time in the preceding year.

Government securities have been in decidedly better demand, chiefly for home investment purposes, though partly on speculative account, and prices have steadily favored sellers. The offerings of the funded obligations have been moderate, those of the Five-twenties of all issues, especially the earliest and latest series, have been really light. U. S. sixes of 1881 closed here on Tuesday at 112½@112⅝; U. S. Five-twenties of 1862, 108⅛@108¾; U. S. Five twenties of 1864 at 105⅛@105¾; U. S. Five-twenties of 1865 at 105⅞@106; U. S. Five-twenties of 1865, consolidated, 108½@108⅝; U. S. Five-twenties of 1867, 108⅝@108¾; U. S. Ten-forties at 101⅞@102, and U. S. Seven-thirties at 104⅝@104⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	117⅜	September, 1865	116
August, 1865	116⅜	October, 1865	115¾

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 18.	Dec. 24.	Dec. 31.
Consols	92⅝	92⅛	92
U. S. 5-20's of 1862	72	72⅜	72⅛
Erie	50	49½	48¾
Ill. Central	89⅞	87¾	89¾

General business has not been very brisk, outside of the Cotton line, in which there has been a marked revival of activity at improved prices, closing buoyantly on Tuesday on the basis of 16 for middling uplands, per lb. The stock of cotton now here is estimated at about 55,000 bales. The receipts at the port this week, have averaged about 3,200 bales a day. The receipts during the cotton year, ending Sept. 1, 1867, were 657,431 bales, against exports of 470,596 bales. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 774,000 bales, against 704,000 bales same time last year; exports, same time, 379,000 bales, against 275,000 bales same time last year; stock on hand at latest dates, 295,000 bales, against 525,000 bales same date last year. Beeves have been in light supply and demand this week, ranging in price from 12@19c.; veal calves, from 8@12c.; sheep, from 4@7½c.; lambs, from 5@7¼c.; swine, from 6¾@7c. per pound, all live weight. The week's receipts have been 3,420 beeves, 408 calves, 14,147 sheep and lambs, and 16,284 swine. Breadstuffs and provisions have been held with more firmness, but have been inactive. Foreign merchandise has been in light demand generally, and prices have been depressed. Dry goods have been lightly dealt in. Domestic cottons and woollens have been in most favor. The total imports of foreign dry goods, last week, were $501,948, and the total amount marketed $454,133. The value of foreign merchandise imported last week, was $1,956,545—making the grand total specie value of last week's imports of dry goods and merchandise, $2,458,493, and since Jan. 1, 1867, $235,439,840, against $282,247,972 same time in the preceding fiscal year. The ocean freight market has been quiet, but steady since our last. For Liverpool we quote flour at 2s. 3d. @2s. 6d. per bbl.; grain at 5d.@5½d. per bushel; cotton at ¼d.@⅜d. per lb.; and heavy goods at 20s.@30s. per ton, all by sailing vessel.

The New York exports, exclusive of specie, for the week ending Dec. 31, and since the beginning of the year, compare as follows:

	1866.	1867.
For the week.....	$2,875,002	$2,514,442
Prev. reported.....	185,815,620	185,535,176
Since January 1.....	$188,690,622	$188,049,618

Finances of Kansas.

The receipts into the State Treasury from taxes from 1861 to 1866, inclusive, and from the sale of bonds, school and railroad lands, etc., were $400,074 28; and the total disbursements, $454,462 27—leaving a balance on hand December 1, 1867, of $35,612 01. The amount of scrip outstanding was in round numbers $148,000, against $15,000 the previous year. The total bonded indebtedness of the State is $744,000. The assets, including taxes unpaid, etc., is $390,000.

Notice to Contractors.

Proposals will be received by the Dunleith and Dubuque Bridge Company at their office, in the city of Dubuque, Iowa, after January 1st, and until January 13th, 1868, at 10 o'clock A. M., for the construction of a bridge across the Mississippi river between Dubuque and Dunleith, and for connecting the west end of said Bridge with the Dubuque and Sioux City Railroad.

The piers and abutments will be of first class masonry resting on piled foundations, capped with timber, except the east abutment, which will be on rock.

The superstructure will be entirely of Iron. The draw of all wrought iron, and the remainder of the bridge of all wrought iron except the top chord which may be of cast iron.

Proposals will be received on Post's, Pratt's Bollman's, Linville & Piper, or any other approved plan of superstructure, with some slight modifications.

No single bid will be received for the whole work. But they must be separate for the superstructure, for masonry, foundations, and protection to Draw Pier, and for the work connecting West end of Bridge with the Dubuque and Sioux City Railroad.

Plans and specifications for said work may be seen at the office of the company in Dubuque, Iowa, on and after December 16th, 1867, or information relative to the work may be obtained on application to the undersigned at Chicago, Illinois.

Materials for the construction of the Bridge will be transported free from Chicago and from other points on the Illinois Central Railroad to Dunleith.

Satisfactory security will be required for the faithful performance of the work.

The Dunleith and Dubuque Bridge Company reserve the right to reject any or all bids if deemed best for the interest of the company.

R. B. MASON,
Engineer.

Kent County Railroad.

The Chestertown (Md.) *News* states that a contract for the Kent and Queen Anne's Railroad has already been made at $12,000 per mile, the work to be commenced in the early spring.

☞ The Toledo *Blade* says that for a month past Saginaw City, East Saginaw and Bay City have had a continuous ovation, having in that time opened three distinct railroads, viz: The Bay City and East Saginaw, 23d November; the 2d division of Flint and Pere Marquette, November 30, and the Jackson, Lansing and Saginaw December 17.

☞ The State of Missouri has instructed the Bank of Commerce to pay the January coupons on its bonds and given notice that the remaining seven overdue coupons, amounting to twenty-one per cent., will be funded into new six per cent. bonds having twenty years to run. The exchange of coupons for bonds will be made for new bonds at the bank after the necessary blanks and instructions are received.

☞ The following gentlemen have been elected directors of the Dorchester and Delaware Railroad Company for the ensuing year: President, W. Wilson Byrn; Treasurer, Thomas W. Anderson, Directors, John Webster, John W. Brown, Daniel M. Henry, R. F. Thompson, Edward W. Lecompte, James Gore and Isaac W. Fisher. The office of the company is at Cambridge, Md.

Railroad Earnings.—Weekly.

The earnings of the Michigan Central Railroad for the 3d week in Dec., 1867, were..$75,107 05
Corresponding week of previous year.. 73,303 25

Increase $1,803 80

The earnings of the Western Union Railroad for the 3d week in Dec., 1867 ..... $11,974 59
Corresponding week previous year.... 9,382 42

Increase $2,592 17

The earnings of the Marietta and Cincinnati Railroad the 3d week in Dec., 1867...$30,029 00
Corresponding week previous year.... 28,758 00

Decrease.. ..... $1,271 00

The earnings of the Chicago and Rock Island Railroad for the third week in December, 1867, were $98,000 00
Corresponding week of previous year.. 62,124 00

Increase $35,876 00

The earnings of the Atlantic and Great Western Railway for the third week in Dec., 1867, were $96,076 00
Corresponding week previous year.... 84,119 00

Increase $11,957 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for the third week in December, 1867, were $37,843 87
Corresponding week of previous year. 39,714 47

Increase..... $1,870 60

The earnings of the Toledo, Wabash and Western Railroad for the 3d week of Dec., 1867, were $73,347 58
Same week in 1866.. ..... 60,057 80

Increase $13,289 78

Coal Tonnage Forwarded down the Lehigh Valley.

The quantity of coal transported over the Lehigh Valley Railroad from Mauch Chunk during the years ending November 30, 1866 and 1867, and over the Lehigh Canal from Mauch Chunk during the last two seasons of navigation (the items representing the quantity supplied from each contributing mining region,) as given in the *U. S. R. R. & Mining Register*, was as follows:

Lehigh Valley R. R.:	1867. Tons. cwt.	1866. Tons. cwt.
Beaver Meadow Region.	473,302 01	418,389 00
Hazleton Region.....	775,053 06	864,784 08

By Schuylkill Canal.....	1,029,178 09
Total down Schuylkill.....	4,476,004 15

Internal Revenue.

EXTRACTS FROM THE REPORT OF THE COMMISSIONER.

The internal revenue laws, as amended by the act of March, 1865, were in operation without substantial change during the entire fiscal year of 1866. The tabular statements, therefore, which accompanied my last annual report exhibited the revenue from different sources under a uniform taxation through the entire year. The amendments of July 13, 1866, and of March 2, 1867, very materially reduced the productive power of the law, adding largely to the free list and modifying the rates upon many objects of taxation. The definite and permanent effect which these and other changes have produced cannot be stated because of the nature of some of them and the little time which has elapsed since their adoption. I shall endeavor, however, in this the sixth annual report of this office, among other subjects the discussion of which seems appropriate, to present as clearly as possible the results of the present law as compared with those which have preceded it, and, with recommendations of such changes as a careful observation of its operations suggests, will furnish an estimate of its probable productiveness for the current fiscal year. After the passage of the act of July 1, 1862, and until the suppression of the rebellion, the legislation of Congress relating to internal revenue was substantially for its increase. Since that time, however, the revenues from taxation have been regarded as in excess of the current expenditures of the Government and the judicious payment of its indebtedness, and recent acts have been for their reduction.

The statute of July 13, 1866, was intended to reduce the revenue about sixty-five million dollars per annum, and from the act of March last a further annual reduction of forty millions was expected. The receipts of the last fiscal year were, therefore, of course, less than those of the year preceding, while they were larger than were anticipated at the passage of the acts providing for the reduction.

AGGREGATE RECEIPTS.

The aggregate receipts of internal revenue, exclusive of the direct tax upon lands and the duty upon the circulation and deposits of national bank, were for the year

1865	$211,129,529
1866	310,906,984
1867	265,920,475

These amounts include drawback upon goods exported and sums refunded as erroneously assessed and collected.

The amounts of drawback and sums refunded were as follows:

	Drawback.	Amounts Refunded.
1865.....	$698,655	$422,734
1866.....	798,867	514,844
1867.....	1,864,642	706,582

The increase of the amount of drawback for the past year was largely due to the increased exportation of cotton goods and of spirits of turpentine, and the presentation of claims on account of goods exported prior to June 30, 1864, which was made necessary by the statute of limitations barring their payment unless the same were presented prior to October, 1866. From the amount of drawback allowed up to this time during the present fiscal year it is probable that the whole amount for the year will not much exceed $1,000,000.

BANKS, TRUST COMPANIES AND SAVINGS INSTITUTIONS.

	1865.	1866.	1867.
Dividends and additions to surplus.....	$3,987,209	$4,186,024	$3,774,975
Circulation	1,993,662	990,328	208,276
Deposits	2,043,841	2,099,635	1,355,396
Capital	903,868	374,074	476,868

The reduction of receipts from capital, circulation and deposits is due to the conversion of State banks into National institutions, paying taxes to the Treasury of the United States.

Deposits of savings having no capital stock have been largely relieved from taxation by the act of July 13, 1866.

RAILROADS.

	1865.	1866.	1867.
Dividends....	$2,470,817	$2,205,804	$3,379,262
Inter't on b'ds	847,684	1,255,917	
Gross receipts	5,917,293	7,614,448	4,128,255

The returns of the taxes upon dividends and interest on bonds were made to the office of the Commissioner until the act of July, 1866, took effect. Since that time they have been made only to the assessors, and the tax has been paid to collectors. The monthly abstracts of the collectors have not given the amounts received from the two sources separately. The reduction of amount from gross receipts is due to the exemption of receipts for the transportation of property from tax after July, 1866.

INSURANCE COMPANIES.

	1865.	1866.	1867.
Dividends and additions to surplus	$764,658	$767,231	$563,474
Premiums and assessments.....	961,503	1,169,722	1,326,504

The rate of tax upon dividends of banks, railroads and insurance companies has been five per cent. during the last three years; that upon premiums one and a half per cent.

GROSS RECEIPTS OF TELEGRAPH COMPANIES.

1865	$215,051
1866	308,437
1867	239,595

After July, 1866, the tax was reduced from 5 to 3 per cent.

GROSS RECEIPTS OF EXPRESS COMPANIES.

1865	$529,276
1866	645,769
1867	558,359

The rate has remained unchanged during the three years.

REVENUE STAMPS.

1865	$11,162,392
1866	15,444,373
1867	16,094,718

The excess of the revenue of 1866 over that for 1865 was due to the use of stamps in that portion of the country prior to that time in rebellion. Since August 1, 1866, affidavits, receipts for the delivery of property, appeals, confessions of judgments, writs and other original processes have been exempt from duty, while the tax upon bankers' and brokers' sales of stocks, bonds, &c., has been added to the stamp schedule.

Sales of beer stamps are not included in the receipts above given.

During the year the sum of $1,927,117 56 was received from the sale of one cent stamps and $3,231,247 27 for stamps from special dies for matches, perfumery, cosmetics, medicines and other proprietary articles.

LEGACIES AND SUCCESSIONS.

1865	$545,807
1866	1,168,766
1867	1,861,429

From the infrequency with which returns of successions and legacies are due from tax payers, they are often ignorant of their liabilities, and while frauds, perhaps, are seldom perpetrated, the receipts of the several districts depend very much upon the diligence and faithfulness of their local officers. Now that the annual list is completed, assessors have been instructed to give early and special attention to this subject.

INCOME.

1865	$20,567,350
1866	60,894,135
1867	57,040,640

Income, articles in schedule A, and special taxes, except wholesale dealers and wholesale dealers in liquor, are subject only to annual assessment. The income tax of the fiscal year 1865 was mainly from the income of the calendar year 1863, and that of 1866 from the calendar year 1864. By the statute of March last, the annual assessment was changed from May to March, so that of the $57,040,640 collected in the fiscal year 1867, $9,773,858 were from the income of the calendar year 1866, and $47,266,782 from the year 1865. The entire tax collected from the income of 1865, was $48,101,467. The amount collected during the present fiscal year from the income of 1866, is $14,611,234, which, added to the $9,773,858 before collected, make thus far collected from the income of 1866, $24,385.092. This sum is as large, I think, as was generally expected, for incomes were usually less than for the year preceding, and the increase of the exemption to $1,000, and the reduction of one-half in the rate upon incomes exceeding $5,000, were intended to decrease the receipts nearly $20,000,000.

The number of persons whose income tax on the annual list in 1867 was

Twenty dollars or less	63,085
Over $20 and not over $50	42,947
Over $50 and not over 100	28,936
Over $100 and not over $500	54,778
Over $500	50,388
Total number	240,134

No reports of the number of persons assessed for income tax on the annual list of 1867, have been received from the following districts, viz:—First Arkansas, California, Second Indiana, Third Louisiana, First North Carolina, Third and Fourth Texas, Idaho, Montana, Nevada, Oregon and Washington.

The whole number of persons assessed on the annual list for 1866, was 460,170. The difference is attributable to the amount exempt from tax.

ARTICLES IN SCHEDULE A.

1865	$779,902
1866	1,692,792
1867	2,116,495

Carriages below the value of $300, yachts and pianofortes and other musical instruments were exempted by the act of July, 1866. The receipts during the year from assessments upon those articles, made prior to their exemption, were $1,005,152. The receipts from watches in 1866, were $426,557; in 1867, $619,062. The change in the time of making the annual assessment, heretofore described, increased the amount of collections from this source during 1867. Of this amount $1,807,157 were derived from the assessment of 1866, and $309,338 from that of 1867. Since July 1, $496,180 have been collected, making the receipts thus far from the last annual assessments $805,518.

SPECIAL TAXES.

1865	$12,598,681
1866	18,015,743
1867	18,103,616

What I have said in relation to the time of the assessment of income and schedule A applies as well to special taxes. Of the receipts for the last fiscal year, $12,516,461 were derived from the annual assessment of 1866, and the balance from that of 1867. The total receipts thus far from the assessment of 1867, are $11,830,959.

Wholesale dealers and wholesale dealers in liquor, until the act of July, 1866, paid their license taxes upon their probable sales for the year as determined by their sales of the year preceding. After the payment of fifty dollars by wholesale dealers and one hundred dollars by wholesale dealers in liquor, their returns are now made and their taxes paid upon their monthly sales. This change in the law accounts for the apparent reduction of the aggregate receipts from special taxes. The difference, however, will be recovered during the current year and will be reported as sales.

The following tables exhibiting the comparative receipts for three years from several sources may not be, in this connection, unprofitable:

	1865.	1866.	1867.
Apothecaries	$32,872	$43,712	$55,447
Assayers	10,883	12,889	12,211
Auctioneers	80,545	89,724	98,084
Bankers	846,686	1,262,649	1,433,715
Brewers	77,747	105,412	238,155
Brokers of various sorts	581,450	673,260	598,854
Claim agents	56,782	70,637	84,627
Dealers, retail	1,606,788	1,949,017	2,047,860
Wholesale	3,543,104	5,428,344	3,880,281
Retail liquor	2,205,366	2,807.225	2,966,683
Wholesale liq'r.	400,692	801,531	982,134
Distillers, coal, oil, &c	16,024	17,350	21,809
Spiritu's liquors	46,661	81,295	174,445
Apples, grapes.	13,236	20,239	67,332
Hotels	415.279	580,021	663,656
Insurance agents.	21,609	104,866	148.647
Lawyers	190,377	264,836	357,648
Manufacturers	625,115	1,043,030	1,296,487
Pedlers	459,298	679,013	708,113
Physicians & surgeons	302,847	425,596	549,368
Rectifiers	48,781	61,300	80,470

Prior to the act of July 13, 1866, brewers paid $50 for each license, and where their product was less than five hundred barrels per year, $25. After that time the rates were doubled, as was the tax upon distillers of spirituous liquors.

Manufacturers of tobacco, snuff and cigars were by that act classed as tobacconists instead of manufacturers, and during the past year paid a special tax of $59,321.

The number of persons paying tax as pedlers during 1865 were 27,878; 1866, 43,196; 1867 45,649.

RAW COTTON.

1865	$1,772,983
1866	18,409,655
1867	23,769,079

The tax was two cents per pound until August 1, 1866, when it was increased to three cents, where it remained until September, 1867, when it was reduced to two and a half cents per pound. The receipts during 1866 represent cotton grown at different times which could not, by reason of the war, before that time reach the market. The receipts of 1867 substantially represent the product of that year—nearly two million bales.

REFINED PETROLEUM AND COAL OIL.

1865	$3,147,213
1866	5,317,396
1867	4,904,762

Oil distilled from coal, asphaltum or shale paid fifteen cents per gallon until August, 1866; after that ten cents. Naptha and the lighter oils have, at different times, been variously taxed, but at successively lower rates.

In 1864, 22,015,732 gallons of refined petroleum were brought to charge, and 671,945 gallons of refined coal oil; in 1865, 14,756,069 gallons of refined petrolenm, and 64,992 gallons of refined ceal oil; in 1866, 25,890,694 gallons of petroleum, and 928,380 gallons of coal oil; in 1867, 24,993,535 gallons of petroleum, and 768,925 gallons of coal oil.

The amount in bonded warehouse on the 30th of June, 1867, was in excess of that at the close of the preceding fiscal year; the amount exported during 1867 was nearly double that for 1866.

It is believed that the tax has not only been avoided in various ways through a defect in the law, but that the law itself has been frequently violated with great loss to the revenue. The high rate of tax offers strong temptation both to refiners and officers.

CIGARS, CIGARETTES AND CHEROOTS.

1865	$3,087,421
1866	3,476,237
1867	3,661,984

For ten months of the year 1865 the receipts were from specific taxes graduated by different values of the cigars. On March 3, 1865, a uniform rate of $10 per thousand was imposed. By the statute of July 13, 1866, the tax became partly specific and in part ad valorem, and by that of March last the tax of $5 per thousand was adopted, which was a very large reduction from the then existing duty.

CHEWING AND SMOKING TOBACCO.

1865	$8,017,021
1866	12,339,922
1867	15,245,478

The tax upon smoking tobacco, except that made exclusively of stems, was increased in March, 1865, from 25 cents to 35 cents per pound. Fine cut chewing and plug, in March, 1865, was increased from 35 cents to 40 cents per pound, where it still remains. The tax upon smoking tobacco not sweetened, stemmed or butted, was reduced in 1865 to 15 cents per pound. 11,075,568 pounds of the manufactured article were exported in bond during the last fiscal year, while the amount in bonded warehouse was increased from 4,123,631 pounds, on the 1st of July, 1866, to 7,625,001 pounds on the 1st of July, 1867. The taxed production of tobacco in 1865 was 36,689,020 pounds; in 1866, 35,748,351 pounds and in 1867, 45,635,581 pounds. The product of 1866 was largely prejudiced by tobacco manufactured in the South before the war and during its progress, and after its close brought to Northern markets. Notwithstanding the heavy loss by fraud the increase of the receipts has been quite satisfactory.

FERMENTED LIQUORS.

1865	$3,657,181
1866	5,115,140
1867	5,819,345

The tax of one dollar per barrel has been continued during the three years.

DISTILLED SPIRITS AND BRANDY.

	Distilled spirits.	Brandy.
1865	$15,995,702	$12,005
1866	29,198,578	283,500
1867	28,296,264	868,145

For the first six months of the fiscal year 1865 the tax on distilled spirits was $1 50 per gallon, afterwards $2. The tax on brandy has varied from 50 cents to $2.

The amount of spirits forfeited has been largely in excess of that during any year preceding, and probably equals the whole amount prior to June 30, 1866. The receipts from forfeited spirits are not included in the above.

The frauds connected with the production and removal of spirits are of very alarming extent and character, and will be considered more fully in another part of this report. The amount of spirits in bonded warehouse on the 1st of July, 1866, was 6,081,551 gallons; on the 1st of July, 1867, 17,887,272 gallons. The amount out of warehouse under transportation bonds on July 1, 1866, was 3,133,211 gallons, and on July 1, 1867, was 3,931,444 gallons. The amount of spirits received into "class 2 warehouses" so called, for the manufacture of medicines, cosmetics, cordials, &c., for exportation, was 892,727 gallons. The amount exported in bond was 4,654,816 gallons. The amount upon which tax was paid was 14,148,132 gallons. From this it will appear that the amount of distilled spirits which was reported to revenue officers during the year 1867, and which can be accounted for is 32,299,629 gallons. The difference between this amount and the actual production measures the product which reached the market through fraud.

EXPENSE OF COLLECTING THE REVENUE.

The expense of collecting the internal revenue has always been a matter of interest to the public, who at the time of payment of taxes have not the present means of ascertaining their actual advantages to the government. From the great extent of territory, and the almost numberless objects of taxation, it was variously estimated during the pendency of the first Internal Revenue bill in the

Thirty-seventh Congress that the charges of collection would be from seven to twelve per cent., and it was freely argued that the excise proper could not reach the Treasury for less than fifteen or twenty per cent. of its amount. It is a cause of no small satisfaction, therefore, that the accounts of the department, as exhibited by the accounting officers of the Treasury, have shown the most moderate estimate to be largely in excess of the actual expenditures. The manner of adjustment and payment of expenses, as prescribed by law, has been variously changed from time to time, and I cannot well present comparative tables except for the year 1866 and 1867.

	1866.	1867.
Compensation and expens's of assessors and assistant assessors	$4,034,043	$3,849,914
Collectors' compensation & expenses	2,161,710	2,144,206
Superintendents of exports and drawbacks	16,714	15,435
Revenue agents	35,456	45,542
Special agents assigned to this office	17,227	39,812
Revenue inspectors	121,079	189,271
Special revenue commission	22,080	1,229
Officers and clerks of this bureau	277,673	296,910
Stamps and cotton tags	177,089	186,235
Other incidental expenses of this office	40,093	87,999
Commission on sale of stamps	786,536	855,536
Total	$7,689.700	$7,712,089

PROBABLE RECEIPTS FOR THE PRESENT FISCAL YEAR.

Experience has shown that the estimates of future revenues, even when made by those best qualified to make them, are liable to great inaccuracy. Changes in the law have been so frequent, and production by reason of the disturbed condition of the country so uneven, that no certain and absolute conclusion can be argued from the statistics of the past.

From a careful consideration of such data, however, as are in possession of the office, an approximation to the aggregate collections for the year may be made.

I herewith present a tabular statement of the receipts during July, August, September and October, of the fiscal years 1865 and 1866 and 1867 respectively, as appears from the certificates of deposit received at this office:

	1865.	1866.	1867.
July	$21,693,471	$27,079,103	$24,734,656
August	34,087,539	88,343,341	17,848,651
September	37,939,416	33,714,719	13,183,607
October	30,457,983	26,414,430	14,486,636

Of the amount collected during the four months of 1865 $52,948,561 were from incomes, and of that in 1866 $43,463,655, while of that in 1867 only $17,733,714 came from these sources.

☞ At the recent annual meeting of the Vineyard Sound Railroad Company the following Directors were chosen for the ensuing year, viz: Oliver C. Swift, Stephen Dillingham, Erasmus Gould, A. S. Tobey, T. H. Lawrence, Wm. Nye, Jr., P. S. Crowell. At a subsequent meeting of the stockholders, P. S. Crowell was elected President.

☞ The following gentlemen have been elected directors of the Pacific Mail Steamship Co.: Allen McLane, Howard Potter, William Dennistoun, James M. Brown, Louis McLane, Jonathan Thorne, Abiel A. Low, George B. Hartson and Lamuel G. Wheeler, Jr. Each received 158,328 votes—all the votes cast, out of 175,928 shares entitled to vote.

Finances of Michigan.

The total receipts into the Treasury of Michigan during the fiscal year ending November 30, 1867, including $579,007 32 from the previous year, were $2,276,397 64; and the disbursements, $1,964,283 68—leaving a balance in the treasury of $582,113 96, with which to pay interest on the state debt, appropriations, current expenses, etc., and to retire the balance of the Two Million Loan bonds due Jan. 1, 1863, amounting to $192,000.

In accordance with law the following sums are applicable to, and have been set apart for the several sinking funds during the fiscal year:

War Loan Sinking Fund, 1-16th mill tax	$19,247 87
Two Million Loan Sinking Fund, 1/8 mill tax	38,495 73
Two Million Loan "Surplus Interest," (derived by anticipating the payment upon $58,000 of $2,000,000 loan bonds, due Jan. 1, 1868)	2,651 31
Primary School Fund, receipts from July 1, 1866, to July 1, 1867	146,717 74
Five per cent. Primary School Fund, receipts from Jan. 1, 1864, to July 1, 1867	44,800 83
University Fund, receipts from July 1, 1866, to July 1, 1867	16,818 22
Normal School Fund, receipts from July 1, 1866, to July 1, 1867	1,896 52
	$270,628 22

The amounts charged and chargeable to the funds are as follows:

Two million Loan Bonds due Jan. 1, 1868	$250,000 00
War Loan Bonds, drawn Oct. 1, 1867, (Act 5, Extra Session, 1861,)	19,000 00
Overdrawn Nov. 30, 1866	94,879 11
Total	$363,879 11
Showing the Sinking Funds overdr'wn	$93,250 89

The bonded interest-bearing debt of the State is as follows:

Sault Canal Bonds, 6s, due July 1, 1879	$100,000 00
Renewal Loan Bonds, 6s, due July 1, 1878	216,000 00
Two Million Loan Bonds, 7s, due Jan. 1, 1868	192,000 00
Two Million Loan Bonds, 6s, due Jan. 1, 1878	500,000 00
Two Million Loan Bonds, 6s, due Jan. 1, 1878	500,000 00
Two Million Loan Bonds, 6s, due Jan. 1, 1883	750,000 00
War Loan Bonds, 7s, due Jan. 1, 1886	1,100,500 00
War Bounty Loan Bonds, 7s, due May 1, 1890	463,000 00
Total interest bearing debt	$3,821,500 00

The non-interest bearing debt of the State is as follows:

Adjusted bonds, past due	$4,000 00	
Full-paid five million loan bonds, past due	12,000 00	
War loan bond, drawn for sinking fund	100 00	
$110,000 unrecognized five million loan bonds, adjustable at	63,642 70	
		79,742 70
Total bonded debt of the State		$3,901,242 70

During the year, $15,000 of the unrecognized five million loan bonds have been adjusted and paid at $8,678 55.

The Trust Fund debt of the State is composed of the following funds and amounts

Primary school fund	$1,381,166 07
Five per cent. primary school fund	151,824 15
University fund	298,847 59
Normal school fund	43,701 95
Railroad deposits	2,157 32
Total	$1,877,697 08

Winchester and Potomac Railroad.

The following is a copy of an agreement recently concluded between this company and the Baltimore and Ohio R. R. Co.:

1st. That the Baltimore and Ohio Railroad Company shall hold the undisturbed possession and control of the road for twenty years from the 1st day of July last—receiving to their own use during that time all the revenues of the road, with the option of continuing to hold it indefinitely thereafter for any succeeding term or terms of like duration.

2d. That the Baltimore and Ohio Railroad Company shall pay to the Winchester Company, in equal semi-annual installments, the sum of $27,000 per annum during the continuance of the contract.

3d. That the amount remaining due to the Baltimore Company on the 1st of July last for advances made in the renewal and repairs of road, &c., shall be treated as a loan to the Winchester Company during the continuance of the contract, and that the former company will also advance to the latter a sum not exceeding $20,000 to provide for what is known as its floating debt, being debts contracted prior to or at an early stage of the late war, and such further sum as will enable the Winchester Company to extinguish its indebtedness to the commonwealth, in pursuance of the terms of the act passed April 25, 1867.

4th. That the Baltimore and Ohio Company shall guarantee the bonds of the Winchester and Potomac Company for a sum not exceeding the principal and one half the interest in arrear to the 1st of July last, of the 7 per cent. bonds of the latter—such guaranteed bonds to bear 6 per cent. interest from the last named date, and which it is proposed to offer to the holders of the 7 per cent. bonds in exchange for the latter. The subsisting lien on the road for the security of the 7 per cent. bonds to be continued as a security for the guaranteed bonds in the hands of the holder; and also to the Baltimore and Ohio Company for such amount of them as they may be required to pay.

5th. The Baltimore and Ohio Company is to retain out of its semi-annual payments to the Winchester and Potomac Company an amount equal to 6 per cent. interest on its advances, and also to provide for the semi-annual payment of interest on the guaranteed bonds, which it is expected will reach about $150,000.

6th. That company assumes "all the legal obligations of the Winchester and Potomac Company under its charter, is to pay all State and Federal taxes, and keep the road and its appurtenances during the continuance of the term, and deliver them up at its expiration in as good repair (necessary wear and tear excepted) as when they take charge of them."

525 MILES

OF THE

Union Pacific Railroad

Running West from Omaha

Across the Continent,

ARE NOW COMPLETED.

This brings the line to the eastern base of the Rocky Mountains, and it is expected that the track will be laid thirty miles further, to Evans Pass, the highest point on the road, by January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the

mile, while that of many eastern roads is over one hundred. Work in the rock-cuttings on the western slope will continue through the winter, and there is now no reason to doubt that the entire grand line to the Pacific will be open for business in 1870.

The means provided for the construction of this Great National Work are ample. The United States grants its Six Per Cent. Bonds at the rate of from $16,000 to $48,000 per mile, for which it takes a *second lien* as security, and receives payment to a large if not to the full extent of its claim in services. These bonds are issued as each twenty-mile section is finished, and after it has been examined by United States Commissioners and pronounced to be in all respects a first-class road, thoroughly supplied with depots, repair shops, stations, and all the necessary rolling stock and other equipments.

The United States also makes a donation of 12,800 acres of land to the mile, which will be a source of large revenue to the Company. Much of this land in the Platte Valley is among the most fertile in the world, and other large portions are covered with heavy pine forests and abound in coal of the best quality.

The company is also authorized to issue its own First Mortgage Bonds to an amount equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Oakes Ames are Trustees for the Bondholders, and deliver the Bonds to the Company only as the work progresses, so that they always represent an actual and productive value.

The authorized capital of the Company is One Hundred Million Dollars, of which over five millions have been paid in upon the work already done.

EARNINGS OF THE COMPANY.

At present, the profits of the company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a *Government Work*, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

First Mortgage Bonds

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent. lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment, and have thirty years to run before maturity. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.
November 23d, 1867.

IRON BRIDGES.

THE undersigned is prepared to Manufacture and Build in any part of the United States, at reasonable terms, Fink's Patent Iron Bridges, Plate and Lattice Bridges, Plate Girders for Fireproof Buildings, Iron Roofs, Bo's etc For plans and particulars apply to

C. J. SCHULTZ,
Cor. of Wayne St. & Duquesne Way.
PITTSBURGH, PA.

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS,** Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

—o—

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21ST, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

ESTABLISHED IN 1836.

NEW YORK Dec. 16, 1867.

THE BOARD OF DIRECTORS OF THIS COMPANY have declared a dividend of five per cent. in cash, free of Government tax, to be paid on the first day of February next to the holders of the full-paid shares registered upon the books of the Company on the 18th day of January next. The transfer-books to be closed from the 18th day of January until the 5th day of February next.
THOMAS E. WALKER, Treasurer.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

COLLINS & CO., 212 Water Street, New York.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base	18 ft.	Slop. 1½ to 1
2.	For Side Hill Cuts and Fills.			14.	"	20 "	" 1½ to 1
3.	Base	12 ft.	Slopes 1½ to 1	15.	"	22 "	" ¾ to 1
4.	"	14	" 1½ to 1	16.	"	24 "	" 1½ to 1
5.	"	15	" ¾ to 1	17.	"	25 "	" 1½ to 1
6.	"	15	" 1 to 1	18.	"	26 "	" 1½ to 1
7.	"	15	" 1½ to 1	19.	"	28 "	" ¾ to 1

Car Wheels, their Formation and Causes of Breakage.

With the frequent accidents caused by the breaking of car wheels, we know of no subject connected with railways, demanding greater attention on the part of engineers, than the use of the strongest wheels.

In most treatises on iron, the texture of cast iron is said to be granular, it is in fact chrystalized as found by chemical experimont and microscopic investigation. Chrystals of gray iron being octahedral, their maximum limit when cubic being $\frac{1}{15000}$ of an inch in linear dimension, and about $\frac{1}{3000000000}$ of a grain in weight; chrystals in white or chilled iron are smaller, and most frequently occur in six sided prisms, sometimes connected in fascicles by their ends, at other by their sides, in a sort of stellated or radiated arrangement, as may be readily observed in a fragment from the tread of a chilled wheel.

The density of cast iron is from 7.1 to 7.5, of a porous nature, under hydraulic pressure water having been forced through four inches of metal. By remelting in an air furnace, its strength has been increased up to twelve meltings, though the same result has not been found with the cupola.

The purer the iron is from foreign particles the greater cohesion its crystals have with each other, which constitutes the difference between strong and weak irons. So great is its affinity for other substances, that its ores are seldom found pure, and as the foreign matters form the quality of the metal smelted from the ores, it is evident, that each peculiarity of the ore is imparted to the iron made from it.

The best qualities of charcoal pig iron, give by analysis: Iron, 96.992 per cent.; Carbon, 2.800; Silicon, 0.208, with traces of manganese and copper. The tensile strength of the pig, from 18,000 to 28,000 pounds per square inch. Remelted iron from 31,000 to 41,000 pounds.

Charcoal, the fuel with which the ores are smelted, when new and pure, consist of carbon 97 parts, ashes 3 parts. When old, carbon 85 parts, water 12 parts, ashes 3 parts. The best qualities of ores and the fuel show an entire freedom from either sulphur, or phosphorus.

The effect of sulphur on iron is to cause brittleness at all temperatures, red shortness when hot, to such a degree that experiment has shown that even $\frac{1}{3000}$ of sulphur is enough to produce brittleness, and $\frac{1}{10000}$ red shortness.

Phosphorus imparts the quality of cold shortness at low temperatures, and there are but few irons in which a trace of this substance cannot be found. One per cent. of phosporus rendering iron to be of a very bad quality and of limited use.

In the manufacture of car wheels, the pig metal is melted with anthracite coal in the cupola. Anthracite coal contains carbon 88.50 parts, volatile matter 7.50 parts, ashes 4.00. Average specimens of white ash anthracite coal from Pennsylvania contains in 100 parts, sulphur 0.91 per cent. All varieties of hard coal contain sulphur in a more or less degree, combined with iron in the form of iron pyrites, disseminated through the coal. Anthracite iron, or iron smelted with anthracite coal, from its want of strength owing to the sulphur and other impurities in it, is never used for car wheels.

Having noted the peculiarities of the best charcoal irons, and charcoal, as compared with anthracite iron and anthracite coal, it becomes a matter of much importance to inquire how far these elements effect the car wheels as generally supplied to Railroad Companies.

But few, if any, railroads would be willing to risk the use of car wheels made from anthracite iron, even if a proper chill could be put on them to ensure wear. The general practice is to remelt the old car wheels with anthracite coal, using from one-third to two-thirds of new metal. With each remelting, the affinity of the iron for foreign substances absorbs the sulphur from the coal, resulting, with each remelting of the old wheels, in a weaker iron, and thus the process goes on from year to year.

How near the mixture thus made, claimed to be pure charcoal iron, is to the genuine article, can readily be conjectured; but with this process comes poor wheels, breakage and loss of life.

Cast iron when in constant vibration, as in a car wheel in use under express cars, soon wear out, or "become tired," the granular formation is disturbed by the repeated jar of continued motion, as is evident by the failure of wheels under express cars, with less mileage than wheels under cars or engines with frequent stops or long periods of rest.

Another great cause of breakage is due to the extreme pressure used in pushing the wheels upon the axle; a pressure of 10 to 12 tons per wheel holding it fast, as well as 30 or 40 tons as is frequently used, which strains the wheel, ending in a cracked wheel after a short time in use.

With a knowledge of these facts, the Ramapo Wheel and Foundry Co., in connection with the Richmond Iron Works of Berkshire County Mass., in 1866, established an extensive car wheel works at Ramapo, N. Y., on the Erie Railway, for the purpose of making wheels entirely of pure metal from the Richmond and Salisbury Mines.

The Richmond iron famous for ordnance—the U. S. Government having used not less than twelve thousand tons for guns—and recently so successfully tried in the Rodman Gun trial at Shoeburyness, England, having a tensile strength of from 31,000 to 41,000 pounds per square inch, has proved itself to be one of the strongest of cast irons for guns.

To ascertain its relative strength in car wheels, experiments were made by the Pennsylvania Rail-

road Co., July 17th, 1867, in comparison with the wheels in use on this road as follows:

No.	Maker.	Size. in.	Weight. lbs.	*Blows. on each wheel.			Total. No. of Blows.
1	Omitted	33	496	49	24	13	86
2	"	33	631	21	21	45	87
3	"	33	546	9	7	23	39
4	Ramapo	33	519	59	152	80	291
5	Omitted	33	549	36	28	..	64
6	"	32	513	51	43	..	94
7	"	33	510	20	9	12	41

* Each wheel was tested in three places, if not destroyed by previous blows.

By the first set of blows given, all of the wheels, with the exception of the Ramapo wheel, were entirely destroyed, the subsequent blows being given to test various portions of the remaining plates.

The Ramapo wheel, with each trial was only dented or crushed in, and after many repeated blows on the rim, a portion was broken out to show the texture of the iron.

As to the wearing qualities of the Ramapo wheel, the Erie Railway Company report them equal to any in use.

On the Morris and Essex Railroad, out of 700 wheels in constant use over nine months, with a constant load of 10 tons per car, running 400 miles a week, but one wheel has failed, and that caused by accident. Similar results are reported from other roads using them. We learn that the Erie, Pennsylvania, Central Railroad of New Jersey, N. J. R. R. and Transp. Co., Morris and Essex, Atlantic and Great Western, etc., are using them for their passenger equipment. The cost is somewhat higher than the ordinary class of wheels, but the wear and great security amply repay it.

Montreal Ocean Steamship Co.

We notice that the Montreal Ocean Steamship Company is building two new vessels of 3,000 tons each, to be respectively called the "European" and "Abyssinian." It may not generally known, but it is nevertheless a fact, that the Messrs. Allans are now the largest steamship owners on the continent. Their Liverpool line may now be said to comprise 11 vessels, of a total of 27,168 tons, and their Glasgow line 4 vessels, of 5,757, or together 15 splendid full powered iron screw steamers, of an aggregate of 32,925 tons. No other company on this side of the Atlantic can show such a large and fine fleet, for it may be said to be principally owned in this city. There is another fact in this connection which we would draw attention to. These 3,000 ton vessels are intended to come up to Montreal. Ship owners abroad may therefore form some idea of the capacity of our harbor and the channel which leads up to it.—*Montreal Gazette.*

Railroad from Omro to Oshkosh.

The vote of the city of Oshkosh in favor of a loan of $30,000 dollars of its credit for the purpose of completing the St. Paul road from Omro to Oshkosh is really an important event in the railway history of our city. The Chicago and Northwestern has heretofore reaped nearly all the profits on the business of the thriving towns on and around Lake Winnebago. Oshkosh alone is one of the thriftiest and largest business centers in the state. As soon as the direct connection is completed *via* Omro, our city will secure a good portion of that business. Of that there seems to be no doubt. The railroad should have been constructed before, but better late than never, and now our business men may rejoice at the certain prospect of a railroad connection with the Winnebago country.

The Oshkosh people have a promise from the St. Paul railroad that so soon as they secured a certain amount of money for the construction of the road, the ten miles would be put under contract without delay. As the requisite amount has been secured it is probable that the direct connection will be formed with Oshkosh by the first of July next, and it can be said without exaggeration that the St. Paul company never entered upon the laying of ten miles of additional rail that will add more to their business or secure a greater per centage upon the cost than this same link between Omro and Oshkosh. The distance to that city by a route that looks circuitous is only seven miles further than by the Northwestern, *via* the Minnesota Junction and the old La Crosse railway.—*Milwaukee Wisconsin* Jan. 1.

Boston and Providence Railroad.

The earnings of this road for the fiscal year ending ending November 30, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$651,756 12	$640,441 73
" freight	490,334 67	380,301 52
" rents	11,421 96	13,531 08
" expresses	13,983 07	12,970 04
" mails	9,575 00	9,175 00
" interest received	6,763 22	8,527 98
" divid'ds on stock	7,000 00	6,200 00
Totals	$1,190,784 04	$1,066,147 35
Expenses, viz:		
Coal, wood and water.	$92,625 54	$85,585 25

Total, as above		$818,003 84

Compared with the previous year, the gross earnings show a decrease of $124,636 69; with a decrease in expenses of $15,945 10—making a decrease in net earnings of $108,691 59. The report says:

This apparent diminution of the net earnings of the road for the year, is so far attributable to exceptional causes, that the directors have not deemed it expedient to diminish the rate of the customary dividends, nor to withhold the necessary expenditures required to meet the reasonable claims of the public for increased facilities of travel and transportation, and of keeping the road and all its appointments in a condition for first-class service.

That they have been enabled to pursue this course, consistently with a prudent regard to the permanent interests of the corporation, is due to the system adopted by its managers in previous years, and to which the attention of the stockholders has been repeatedly called in the annual reports, of laying aside a portion of the earnings from year to year, to meet the exigencies which must inevitably arise from the fluctuations of business, and thereby to secure an approximation to uniformity in the operations and results of this species of property.

The comparatively less prosperous results of our last year's operations, as compared with those immediately preceding, are susceptible of an obvious and satisfactory explanation.

In addition to the anticipated reduction of our gross receipts consequent upon the termination of the civil war, when all our resources were taxed to their utmost to meet the demands of the Government, as well as of the general public, we have felt to a very considerable extent, in common with other railroads, the influence of an unusually depressed condition of the commercial and manufacturing interests of the country.

But the special causes to which this exceptional exhibit of our operations for the year are due, are to be found in the fact, that for more than one half of the entire year, owing to the breaking up of the Stonington Line by the destruction of its steamers, we were deprived of a very large proportion, especially in freight, of our through business to New York. This with the further diminution of our Boston and New York freight business arising out of the establishment of new outside lines, and the more strenuous competition and reduced rates resulting therefrom, has made a difference in our gross receipts for the year, nearly, if not quite equal to the whole amount of the net decrease in the earnings of the road. The principal of these causes has now ceased to operate, and the result is apparent in the increase of our receipts in the latter over the earlier period of the year. The establishment of the new Bristol Line, with its unequalled attractions as a through line between Boston and New York, both in its magnificent steamers, and in the first class railroad service we have contributed to it, together with the early resumption of our connection with the old and favorite Stonington Line, by the placing of new steamers on that route, cannot fail to make large additions to our business for the coming year.

During the year there have been carried in the cars 2,128,246 passengers, against 2,003,447 carried in 1866, an increase of 124,799— of whom no one was injured while in the cars, or from any cause involving a want of care on the part of any one in the service of the corporation.

There have been laid during the year about a thousand tons of new rails, seven hundred of which are of steel. The greatly enhanced cost of these over iron, although requiring a large present outlay, will so diminish the cost of renewals as to sensibly reduce this formidable item in the expense account of future years.

We have largely increased the equipment of the road both in passenger and freight cars, the former of a quality unsurpassed by any in the country —and have added to our motive power one new engine by purchase, and have substantially rebuilt another at our own works.

The last instalment of our bonds was paid on the 1st inst., and the directors congratulate the stockholders that the road is now free from debt, funded or floating.

The equipment of the road consists of: 81 locomotives, 46¾ passenger, 12 baggage, 200 house, 87 platform, 48 coal and 115 gravel cars. Miles

run by engines, 448,521. Cost of fuel per mile, 18.59 cents.

President.—JOHN H. CLIFFORD.

Directors.—John H. Clifford, C. H. Warren, G. W. Hallet, Sam'l T. Dana, J. Huntington Wolcott, T. P. I. Goddard.

Superintendent—A. A. FOLSOM.

Cumberland Valley Railroad.

The earnings of this road for the years ending September 30, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$276,186 84	$190,359 20
" freight	270,874 00	320,731 78
" mails	6,300 00	6,300 00
	$553,360 84	$517,390 98
Expenses, viz:		
Motive power	$63,337 05	$68,559 59
Conducting transp	66,701 98	84,134 91
Maintenance of way	90,647 95	146,837 98
Maintenance of cars	14,632 45	20,081 55
General expenses	12,262 16	11,250 00
Materials	16,547 46	2,129 42
Construction and equipment	110,363 77	107,154 81
	$374,492 82	$440,148 26
Net earnings	$178,868 02	$77,242 72

The receipts of the company from all sources during the years named have been as follows:

	1866.	1867.
Balance from previous year	$161,615 08	$251,191 78
Earnings as above	553,360 84	517,390 98
Interest, rents, etc.	11,047 06	18,604 38
	$726,022 98	$787,187 14
Expenditures, viz:		
Dividends	$69,635 50	$79,193 20
Interest on bonds	25,880 40	26,633 90
Trustees of S. F	4,419 16	7,783 50
Expenses as above	374,492 82	440,148 26
Miscellaneous	403 32	1,705 95
Balance of accounts	16,673 43	21,644 46
Cash on hand	234,518 35	210,077 87
	$726,022 98	$787,187 14

During the last year, sidings have been extended, at White Hill, 3,321 feet; at Shiremanstown, 948 feet; at Mechanicsburg, 2,451 feet; at Chambersburg, 3,000; at Greencastle, 477 feet, making a total of 10,203 feet. Twenty miles of the main track have been thoroughly ballasted; an iron viaduct over the Valley and Letort Spring, at Carlisle, 554 feet; two new passengers cars have been built; seventy-two eight-wheeled freight cars have been added to our stock, and several new tools to our machine shop. There has been purchased real estate at Kingston, Greason, Scotland, Chambersburg and Marion Stations. There have been expended in these improvements—

For real estate	$12,477 58
Buildings, passenger, freight, dwelling and machine shop	18,171 69
Laying and grading new sidings	8,331 63
Two passenger cars built	7,419 99
Seventy-two eight-wheeled freight cars	51,971 50
Ballasting twenty miles track	42,500 07
New tools in machine shop	2,776 61
Masonry on bridge at Carlisle	3,692 75
Total	$147,341 82

In addition to this there has been purchased one new locomotive, at a cost of $12,600. There have been put into the road during the past year, one hundred tons of steel rails, of 56 lbs. to the yard, and three hundred and eighty-four tons of re-rolled rails, 6,010 new wrought iron chairs, and 26,259 cross ties. The percentage of required renewal of iron rails increases annually, and we may require eight hundred tons for the next year; and with our present experience, it would be impolitic to put any other than steel rails into the road. For although the first cost is nearly double that of iron rails, there is no room to doubt they are far the cheaper because of their durability.

To meet the constantly increasing business of the road we must increase our stock of freight cars, and add one new locomotive to do the business of the next year economically; and an increase of sidings at Bridgeport will be required to facilitate our business at that crowded point, where a coal house, water station, and passenger depot must be erected.

The termination of our road at Hagerstown is within six miles of the Chesapeake and Ohio Canal at Williamsport. We have a charter from the Legislature of Maryland authorizing us to build a road between these points. A road is about being constructed from Hagerstown directly to Baltimore called the Western Maryland Railroad and much work has been done upon it, under the patronage of the City of Baltimore, and a subsequent charter from the State of Maryland was granted to build the road from Hagerstown to Williamsport. This link connecting us with the Chesapeake and Ohio Canal, and thus with the bituminous coal mines of Cumberland and the timber country of the Allegheny mountains, to say nothing of the connection which is in prospect with the great southwest, though the Virginia and Tennessee roads to Memphis and New Orleans, presents the question to us whether we should not immediately make this connection. That it will be made, and that within a very short time, is absolutely certain; the trade it offers now, with that which is in prospect requires its completion. Shall we make it, or shall it be made by the Western Maryland Company is a question now presented to us. We have caused a careful and accurate survey and location of a road to be made from the termination of the Cumberland Valley Railroad at Hagerstown to the Chesapeake and Ohio Canal at Williamsport, a distance of six miles and fifteen hundred and ninety-seven feet through the middle of the Cumberland Valley, a country very similar to that of the whole length of the road from Harrisburg; to construct which, is estimated to cost $304,898 45. Another road diverging from a point about two miles west of the Pennsylvania line and running thence directly to the same point at Williamsport, a distance of nine miles three hundred and sixty-nine feet and through a country very similar to the other route, would cost $315,928 27, and the grades upon either of these routes are about the same as that of the present road from Hagerstown to Chambersburg; the maximum being 52.8 feet to the mile.

The company have 15 locomotives. Number of miles run with passenger trains, 131,704, with freight trains, 87,982, with other trains, 16,352—total, 236,048. Passengers carried east, 135,916 do., west, 145,789—total, 281,655.

GENERAL STATEMENT.

Cost of road	$1,691,037 05

President.—FREDERICK WATTS.

Directors.—Frederick Watts, Thomas A. Biddle, Thomas A. Scott, Washington Butcher, Wistar Morris, Josiah Bacon, H. J. Lombaert, Daniel O. Gehr, Thomas B. Kennedy, Edmund Smith, J. Edgar Thomson.

Secretary and Treasurer.—EDWARD M. BIDDLE.

Superintendent.—O. N. LULL.

New York Central Railroad.

PRESIDENT'S OFFICE,
ALBANY, January 1st, 1868.

Mr. Harlow W. Chittenden will, from this date, act as Superintendent of the line between Albany and Syracuse—"Eastern Division."

Mr. John Newell has been appointed, and will, from this date, act as Superintendent of the line between Syracuse and Buffalo—"Western Division."

Mr. Newell has, also, been appointed, and will, from this date, act as Chief Engineer of the entire line, in place of Mr. William B. Gilbert, resigned.

DANIEL TORRANCE, Vice President.

Iron Ore of Lake Superior.

The Lake Superior *Mining News* gives the following as the approximate amounts of ores mined in the Marquette district for the year 1867:

Mines.	Tons.
Jackson, including Gray's	125,000
Lake Superior	115,000
Cleveland	90,000
Pitts. and Lake Angeline	52,000
New York	50,000
Washington	24,000
New England	10,000
Marquette	6,000
Edward	5,000
Iron Mountain	2,000
Champion	500
Sent to local furnaces	33,000
Total tons	512,500

☞ The income of the Taunton Branch Railroad during the past year was $217,955; expenditures, $191,123; balance, $26,872. Dividend paid (8 per cent.) $21,052; added to surplus $5,792; paid Boston and Providence Railroad $101,626.

☞ The income of the Middleboro and Taunton Railroad during the past year was $45,387; the expenditures $38,435; added to surplus fund $4,247. The total surplus fund is now $18,942.

Ogdensburg and Lake Champlain R. R.

In the matter of the Northern Railroad Company *vs.* the Ogdensburg and Lake Champlain Railroad Company, Mr. Justice Ingraham, at a special term of the Supreme Court, held at the Chambers of the said Court, at the City Hall, in this city, on the 2d inst., dissolved the injunction restraining the defendant from making any further issue of its eight per cent. guaranteed preferred stock, and also from declaring or paying any further dividend on said preferred stock, or on the common stock of said company, until the further order of the Court, which had previously been obtained by the Northern Railroad Company, who were the original builders of the road, and has denied the motion to continue the injunction. His opinion is as follows:

INGRAHAM, J.—After a careful examination of the pleadings and affidavits used on this motion, I have not been able to see sufficient grounds for continuing the injunction. The proceedings complained of appear to have been made in a proceeding regularly brought before the Supreme Court in the Fourth and Fifth Districts, and in pursuance of acts of the legislature, authorizing such proceedings between 1854 and 1865, and apparently after a full notice and publication of their proceedings. If there was in any wrong in those proceedings, the proper course for redress was an application to the Court to vacate them, or to allow the plaintiffs to be heard therein. No such application has been made. Instead thereof, the company (the plaintiffs) have remained quiet and ceased to exercise their corporate rights for more than ten years past, and the defendants have been allowed to go on with the use of the road and the management thereof, paying the interest and expenses and working the road. The allegations on which the fraud is based are mainly denied in the answer so far, at least, as to relieve these defendants from the imputations against them in the plaintiff's papers. I do not deem it necessary for me to decide as to the matters on which the plaintiffs seek relief. Those questions will be better understood and decided after proof has been taken and the case properly tried, if this action can be maintained in any respect.

The great delay in seeking relief, the *nonuser* by the plaintiffs of their corporate rights, and the acquiescence in the possession and use of the road by the defendants, the omission to seek relief in the orginal action, the denial by the defendants in their answer of the principal matters relied on by the plaintiffs, the damage that would follow to the defendants, and I may say, also, to the plaintiffs, if they have any rights in the road, from any order that would suspend the operations of the road, convince me that the interests of the parties is best promoted by allowing the operations of the corporation to proceed.

The proposed issue of bonds is for the purpose of providing for the payment of the first mortgage bonds coming due within a short time, and can work no evil to either of the parties: while an injunction restraining such issue would expose the parties to the risk of being unprovided for their payment, and to a foreclosure of the bonds and mortgage on the road.

There is no allegation that the affairs of the road are not now properly administered, and in consideration of these matters above suggested, as well as others which might be stated, I do not think there are any grounds on which a preliminary injunction should be continued. So far as the plaintiffs seek to recover for property not included in the mortgage, there is no propriety in issuing an injunction. If the plaintiffs succeed they will have a judgment against the defendants which would be amply secured, and until recovery of judgment no such provisional remedy is proper.

I think also there is good ground for the conclusion that the Northern Railroad Company has by *nonuser* lost its corporate rights, and cannot maintain an action in its corporate name. If there is any property or rights belonging to it, proceedings to obtain them should be taken through a receiver, and not by corporation. Motion for an injunction denied and temporary injunction dissolved, with $10 costs.

Debt of the City and County of New York.

The following extract from the Message of the Mayor, shows in detail the items which make up the aggregate of the funded and temporary debt of the City and County of New York, as it stood on the 31st of December, 1867:

CITY FUNDED DEBT.

Water stocks—Issued on account of introducing the Croton water into the city and distributing the same	$11,030,800 00
Central Park Stocks—Issued on account of Central Park and the improvement on the same	9,923,571 00
Fire Indemnity Stock—Issued for payment of damages for blowing up buildings, December, 1835	402,768 00
Building Loan Stock—Issued on account of building workhouse on Blackwell's Island	190,000 00
Real Estate Bonds—Issued in settlement with State lessees of West Washington Market, for payment to the State for sundry lands filled in beyond the boundary line of the Montgomery charter, and for purchase of Fort Gansevoort property	1,183,487 50
Stock for Docks and Slips—Issued for rebuilding and repairing public docks and slips	450,000 00
Floating Debt Fund Stock—Issued for liquidating and funding floating debt in 1859	2,478,000 00
Public Education Stock—Issued for payment of debt of Public School Society	154,000 00
Stock for Rebuilding Tompkins Market—Issued, as its title indicates, for rebuilding Tompkins Market	24,000 00
Volunteer Soldiers' Family Aid Fund Bonds—Issued to provide for the families of soldiers in the United States army	3,766,500 00
Vo unteer Soldiers' Family Aid Fund Redemption Bonds—Issued to extend the time of payment of Volunteer Soldiers' Family Aid Fund Bonds No. 3..	500,000 00
Total funded debt of city..	$30,333,076 50

COUNTY FUNDED DEBT.

Harlem Bridge Bonds—Issued for erecting a bridge across Harlem River, at McComb's Dam	$20,000 00
County Court-house Stock—Issued, as its title indicates, for the erection of the new Court house in Chambers street	1,800,000 00
Soldiers' Substitute Bounty Redemption Bonds	2,000,000 00
Soldiers' Substitute and Relief Redemption Bonds	946,700 00
Soldiers' Bounty Fund Bonds	4,000,000 00
Soldiers' Bounty Fund Bonds No. 2	876,600 00
Soldiers' Bounty Fund Bonds No. 3	745,800 00
Riot Damages Redemption Bonds	1,000,000 00
Riot Damages Indemnity Bonds	685,000 00
Bonds for repayment of taxes. Issued to refund taxes of 1863 and 1864, levied on securities of the United States held by banks and insurance companies, decided by the Courts to be non-taxable	1,727,600 00
Total funded debt of county .	$18,251,700 00

RECAPITULATION—FUNDED DEBT.

City.	
Amount payable from Sink'g Fund	$22,689,576 50
Amount payable from taxation	8,652,500 00
	$30,333,076 50
County.	
Amount payable from taxation	18,251,700 00
Total	$48,584,776 50
The Commissioners of the Sinking Fund hold on account of the above debt the sum of	18,984,313 12
Net amount City and County Funded Debt, December 31, 1867	$29,600,463 38

Of the foregoing debt it will be perceived that $11,030,800 is for Croton Water Works; $9,923,571 for Central Park; and $13,970,600 for expenses growing out of and connected with the war.

TEMPORARY CITY DEBT.

Revenue bonds of 1867—Issued in anticipation of collection of taxes of 1867	$217,825 65
Street Improvement Fund Bonds—Issued to pay contractors for improving streets in anticipation of the collection of assessments therefor	3,442,600 00
Assessment Fund Bonds—Issued to pay for opening, widening, etc., of streets, in anticipation of the collection of assessment therefor	400,000 00
Assessment Bonds—Issued for the improvement of Seventh avenue, in anticipation of the collection of assessments therefor	61,472 80
Total temporary debt of city..	$3,121,897 95

TEMPORARY COUNTY DEBT.

Revenue bonds of 1867 issued in anticipation of collection of taxes of 1867	200,000 00
Tot. temporary debt, city & county.	$3,321,897 95

For the payment of this temporary debt the city holds assets in the shape of assessment liens, unpaid taxes, etc., etc.

The increase of the temporary debt $287,797 95, the past year, was caused by the large amount required for the payment of expenses for "Improvement of Streets," in anticipation of the collection of the assessments therefor.

Notwithstanding the creation of a debt of $1,727,600 in 1867, to refund taxes collected improperly from banks and on Government securities, in 1863 and 1864, the net funded debt has been reduced in said year (1867,) $1,301,415 01.

The whole debt is well secured, for it is a lien upon the whole property of the city, both public and private. The sinking fund (provided for payment of the principal and interest of a large portion of it) is in a sound condition. The revenues for payment of the interest on that portion of it payable from this fund are greatly in excess of what is required for that purpose, and the accumulations for payment of the principal will be ample to pay it long before its maturity.

The following is an analysis of the tax for State purposes:

Common schools for State, ¾ of a mill	$455,088 27
General purposes, 1¾ mills	1,061,872 62
Canals, 9-16 mills	341,316 19
Extension of Chenango Canal, 3-16 of a mill	113,772 07
Champlain Canal, 3-16 of a mill	113,772 07
For bounty, 2⅛ of a mill	1,289,416 75
Deficiency in State tax of 1865	515,306 44
	$3,890,544 41

The following is an analysis of the tax for County purposes:

For support of Metropolitan Police in this county		$2,613,754 99
For construction of Harlem Bridge		87,000 00
For Metropolitan Board of Health.		74,876 47
For College of the City of New York		114,000 00
For interest on the County, war and riot debt		583,508 00
For interest on the County debt		867,900 00
General expenses of the County	$3,350,037 89	
Deduct revenues of the County not otherwise specifically appropriated by law	120,000 00	
		3,230,037 89
Tax levied for county purposes		$7,071,077 85

The following is an analysis of the tax for city purposes:

Board of Commissioners of Central Park		$241,095 00
Interest on the Central Park debt		605,321 24
Metropolitan Fire Department		780,290 00
Metropolitan Police, in addition to amount on county account		47,500 00
Public Charities and Correction		1,095,267 51
Public instruction	$2,939,348 00	
Less school money received from State	247,441 58	
		2,691,906 42
Laying out the city north of One Hundred and Fifty-Fifth street		15,000 00
Sundry additions by the legislature, including donations, $199,500		814,517 00
		$6,290,897 17
For interest on the city war debt		273,055 00
For interest on the city debt		352,266 64
For redemption of the city debt		692,420 86
General expenses	$4,743,278 28	
Less revenue of the city not otherwise specifically appropriated by law, including the surplus of the sinking fund for the payment of interest on the city debt	1,752,558 42	
		2,990,719 86
Tax levied for city purposes		$10,599,359 03

The total increase of tax in 1867 over 1866, is $4,938,888 10; of which $987,695 04 is for State purposes, $1,507,495 89 for county purposes, and $2,443,697 17 for city purposes.

The assessed valuation of property for purposes of taxation from 1861 to 1867 inclusive, was as follows, viz:

1861	$581,579,971 00
1862	572,655,045 00
1863	594,300,193 00
1864	634,495,040 00
1865	608,792,335 00
1866	736,989,908 00
1867	830,594,718 00

Troy and Greenfield Railroad.

That portion of the Troy and Greenfield Railroad extending west from Greenfield (where it connects with the Vermont and Massachusetts Railroad) to Shelburne Falls—thirteen and one-half miles, was opened for traffic on the 1st inst. Hereafter two daily trains will be run between Boston and Shelburne Falls, *via* Fitchburg and Vermont and Massachusetts Railroads. The Troy and Greenfield Railroad will be run by the Vermont and Massachusetts Railroad; and by July next, at which time the Troy and Greenfield Railroad will be completed to the east portal of the tunnel, there will be a first-class stage line running between that point and North Adams, connecting with the Troy and Boston Road to Troy.

Movements of Produce.

The receipts of certain leading articles of domestic produce at the port of New York for the years 1866 and 1867, have been as follows:

	1866.	1867.
Ashes, bbls.	5,766	5,363
Breadstuffs—		
Wheat flour, bbls.	2,720,835	2,602,892
Cornmeal, bbls.	263,833	228,417
Wheat, bush.	5,729,912	9,640,131
Rye, bush.	1,314,943	765,376
Oats, bush	8,811,064	8,030,807
Barley, bush.	5,695,485	2,669,724
Peas, bush	552,730	668,457
Corn, bush	22,189,532	14,979,277
Cotton, bales	671,794	658,911
Naval Stores—		
Crude turp., bbls.	34,497	13,575
Spirits turp., bbls	58,002	62,816
Rosin, bbls	390,461	411,825
Tar, bbls.	46,622	23,475
Pitch, bbls	3,258	5,271
Provisions—		
Pork, pkgs	129,880	160,014
Beef, bbls.	70,855	104,635
Cutmeats, pkgs	100,629	105,134
Butter, pkgs.	493,061	551,791
Cheese, pkgs	742,441	1,302,132
Lard, tcs. and bbls	96,750	155,025

Petroleum, galls	33,992,394	33,431,778

☞ The first section of thirty miles of the Lawrence and Galveston Railroad was opened for business on the 31st ult.

The Coal Supply.—Gt. Britain vs. United States.

Ten years ago the quantity of coal mined in Great Britain amounted to sixty millions of tons per annum. The increase since that time has been fifty per cent., so that at present the quantity of coal annually mined in Great Britain amounts to one hundred millions of tons, large quantities of which are every year exported to Continental Europe, and even to this country.

In a speech made in Parliament last year by Mr. Gladstone, he dwelt at length upon the importance of coal as the motive power of factories and commerce. He stated that the commercial and manufacturing superiority of Great Britain was based on coal; that with the exhaustion of coal in Great Britain, the commerce and manufacture of Great Britain must decline; and that as the United States contained the largest deposits of coal in the world, this country in course of time must surpass all others in commerce and in manufactures.

While the exhaustion of coal in Great Britain has become a question of serious consideration to her statesman, it is most gratifying to know that the coal fields of the United States are without a parallel for the great extent and superior quality of their coal.

Pennsylvania, east of the Alleghanies, supplies the Atlantic towns and cities with anthracite coal, while Pennsylvania, west of the Alleghanies, supplies the towns and cities on the Ohio and Mississippi Rivers with superior bituminous coal. The valley of the great Kanawha River, in West Virginia, contains the finest deposits of splint and coal known anywhere; and we are pleased to see that parties in this City owning coal lands in the Kanawha regions are taking steps to insure the improvement of the Kanawha navigation, whereby this City can be supplied with cannel coal equal to the best English cannel, and at about one-half of the cost thereof. The plan is to improve the Kanawha navigation, and ship coal to this City *via* New-Orleans.

A most favorable charter for that purpose has been granted by the Legislature of West Virginia to Messrs. Pierrepont, Aspinwall, Crosby and others of this city.

A copy of the prospectus, containing the charter and setting forth fully the plan of operations has been recently issued, and in it is stated that Great Britain exported to this City last year 214,000 tons of coal—a large portion of which was Cannel coal. Thus, it seems that this City pays every year to Great Britain for Cannel coal sufficient money to improve the navigation of the great Kanawha River, and thereby open to market the finest Cannel coal deposits known in America.

Kansas and Neosho Valley Railrood.

The Kansas City *Journal* of the 21st ult., says that the prospects are now fair for the vigorous prosecution of this important railway. Some $800,000 are to be furnished at once to pay for the neutral lands, and $220,000 to be used in building the road. Arrangements are being vigorously made for carrying forward the work, and by next Spring the iron horse will be on its southward-bound track.

☞ The Kalamazoo *Telegraph* learns from an official source that the Michigan Central Railroad Company have voted to guarantee the bonds of the Kalamazoo and Grand Rapids Railroad, similar to the guarantee of the bonds of the Jackson, Lansing and Saginaw Railroad, and that this arrangement insures the immediate construction of a road between Kalamazoo and Grand Rapids.

American Railroad Journal.

Saturday, January 11, 1868.

Stock Exchange and Money Market.

The Money Market has been much more liberally supplied with capital, since our last, chiefly because of the interest and dividend payments of the 1st inst., which have been unusually heavy, this year. Lenders have been more willing to aid all responsible borrowers, both for speculative and for mercantile purposes. The demand for accommodation has been somewhat brisker, chiefly from the street houses, for use at the Stock and Gold Boards, to whom money has been readily advanced at 6@7, generally at 6 per cent. on call. Commercial paper has not been particularly abundant, and for prime to good grades, there there has been a freer currency at 7@8⅓ per cent. per annum. The Sub-Treasury, last week, reduced its cash balances $6,684,818, nearly all of which represented disbursements on interest account. According to the last debt statement of the Treasury Department, the cash reserve of the department was reduced $3,976,217 in December, or to $134,200,603 on the 1st inst., against $133,176,821 on Dec. 1, and $133,998,398 on Nov. 1, 1867. The reduction in December was exclusively in the currency line, amounting to full $11,116,826, against a gain of $7,739,608 in the coin reserve. Some $53,346 worth (chiefly old and worn out notes,) of plain greenbacks was retired from circulation in December. Of matured compound interest notes, $16,004,580 were redeemed; some $10,410,000 by conversion into the three per cent. certificates, and most of the balance by direct purchase for cash. Of the 134¼ millions of cash in the Treasury on the 1st inst., 101¾ millions were in the Sub-Treasury vaults in this city. The city banks reported a marked increase in their resources, as the result of the past week's business. The actual increase in the deposits was $8,357,000; in the legal tender reserve, $1,453,000; and in the specie hoard, $1,752,000. The loan averages were also augmented $4,879,000. The specie reserve of the city banks is now $12,724,614, against $12,794,792 same time last year. The city bank deposits are now $187,070,786, against $202,533,564 week ending Jan. 5, 1867. The legal tender reserve amounts to $62,111,201, against $65,026,121 same time last year. The circulation now stands at $34,134,391, against $32,762,779 same time last year. The loans are now $249,741,297, against $257,852,460 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $96,653,261 a day, against a daily average of $74,856,717 the preceding week, and $78,858,584 the week ending with Dec. 21. The current week's exchanges average about $92,960,920 a day. The city banks, last week, gained $1,458,269 of legal tender, and $8,357,595 of deposits, and $1,752,645 of specie. They increased their loans, $5,120,985; and reduced their circulation, $9.

The Philadelphia Bank movement the past week shows a increase in loans, of $734,035; an increase of $39,165 in specie; an increase in legal tenders of $174,941; an increase of $1,821,049 in deposits; and an increase of $6,404 in circulation. The Bank Clearings show an increase of $8,057,283, and the balances, an increase of $1,125,546.

National Bank notes to the amount of $74,770 were issued last week, making the total issue to 1,673 banks thus far, $305,560,931, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,726,955, leaving, with the existing 1,639 banks, (having an aggregate capital of $424,894,861,) an actual circulation at this date, of $299,833,976. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $340,942,750; and for the public deposits, $37,817,950—making a total of $378,760,700. The Treasury Department last week redeemed and destroyed $391,400 of worn and mutilated fractional currency, and issued $434,000 of new.

The U. S. Sub-Treasury receipts, week ending with Jan. 4, were $12,582,647, including $1,158,796 from customs duties; payments, $19,267,465, including $6,491,000 of coin interest; balance at the close of the week, $97,564,728, against

$104,249,547, at the close of the preceding week, showing a decrease of $6,684,818. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $4,088,716 including $314,626 from customs; and payments, $4,490,436; on Tuesday, receipts, $1,677,848 including $437,000 from customs, and payments, $1,244,343. The balance at the close of business on Tuesday stood at $97,596,514, against $101,683,223 a week previous; and $103,565 841 on Dec. 22.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to Jan. 4, was $242,733,660; aggregate redemptions, $208,578,000; leaving outstanding certificates to the amount of $34,155,660.

Government revenues have been more liberal, since our last, in the line of both excises and customs. The excises, last week, yielded $6,251,172, against $2,225,000, the preceding week; customs at the port of New York $1,158,796, and at the outports, about $370,000 (in coin) more, making the grand total income for the week equal about $8,353,547 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $107,000,000.

Government received $7,194,910 from customs, through the port of San Francisco, from Jan. 1, to Dec. 8, 1867.

The Gold Market has been more than usually brisk and buoyant, since our last. The speculative inquiry has been very much more confident. Inflation reports and rumors from Washington are talked of as the stimulating cause of the active call and sharp advance. The export call has been moderate. There has been some increase in the customs demand. The range of the week's sales has been from 134¼ up to 137½. Wednesday's business was on a less firm basis; the opening figure on that day having been 137⅜, the lowest quotation 136½, and the latest price 136⅝. The specie exports on Wednesday were $1,435,000, full two-thirds of which amount were in the form of double eagles. The Treasury Department increased its coin reserve in December, $7,739,608, or from $100,690,645 Dec. 1, 1867, to $108,430,253 Jan. 1, 1868. Of the latter amount, private depositors owned $20,104,580, represented by outstanding coin certificates. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $159,550, against $12,233 same time last year. The customs demand for Gold last week, averaged $231,759 a day; thus far, this week, it has been equal to $373,813 a day, or equal to a weekly aggregate of $2,242,878. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $159,550, and from California, none. The total customs revenue of the Government, in coin, at this port, during the calendar year of 1867, was $116,958,654, against $130,222,092 same time in the preceding calendar year. The total receipts of California gold at this port in 1867, was $27,677,556, against $42,740,913 in 1866, showing a decrease in 1867, of $15,063,357. The exports of specie from this port, last week, were $2,787,143, against $784,512 same week last year. The total outflow of specie from the port, in 1867, was $51,841,678, against $62,553,700 in 1866. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $6,491,000, against $3,934,000 same week last year. The total coin interest disbursements through the Government office, in 1867, was $61,871,348, against $48,680,377 in 1866. The specie exports from San Francisco, from Jan. 1, to Dec. 8, 1867, reached $37,942,265, against $40,851,469 same time in 1866, showing a decrease, in 1867, of $4,289,204.

Foreign exchange has been more abundant and in less request, since our last, closing rather languidly. Bankers' 60 day bills on London closed on Wednesday at 109⅞@110⅛, and on Paris to 5.13¾@5.12½; sight bills on London to 110¼@110½, and on Paris to 5.11½@5.10. The offering of produce bills have been moderate, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,500,234, against $3,716,624 same week last year. The total value of exports of produce and merchandise in 1867, was $189,688,044, against $192,329,554 in 1866.

Government securities have been in much better demand, chiefly for investment purposes, since our last, and prices have favored sellers, the market closing firm and buoyant, as a rule. Six per cent. 1881 bonds have been in more request. Fearly a million of these were added to the outstanding issue in December, the aggregate being now $283,676,600 against $282,731,550 a month ago. Five Twenties, however, have been in most favor, with both home and foreign buyers. The outstanding volume of the Five Twenties was augmented to the extent of $49,392,200, in December, exclusively in the form of the consolidated issue of 1867. The aggregate is now up $1,873,804,750 against $1,824,412,550 on the 1st ult. Ten Forties are again attracting the attention of purchasers. The aggregate issue of these bonds is now $603,050 less than it was a month since. There has been a fair call for Seven Thirties, of which the Treasury Department redeemed in December by conversion or direct purchase, some $47,318,650, reducing the outstanding aggregate to $238,268,450 or nearly six hundred millions less than the original grand total issue of 830 millions.

U. S. sixes of 1881 closed here on Wednesday at 108⅝@108⅞; U. S. Five-twenties of 1862, 108⅜@108½; U. S. Five-twenties of 1864 at 106@106⅛; U. S. Five-twenties of 1865 at 106⅛@106⅝; U. S. Five-twenties of 1865, consolidated, 104¾@109⅞; U. S. Five-twenties of 1867, 104⅞@105; U. S. Ten-forties at 102⅛@102¼, and U. S. Seven-thirties at 104¾@104⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	117⅜	September, 1865	116
August, 1865	116⅜	October, 1865	115¾

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 24.	Dec. 31.	Jan. 8.
Consols	92½	92	92¼
U.S. 5-20's of 1862	72⅜	72⅛	71⅞
Erie	49½	48¾	48¾
Ill. Central	87¾	89¾	88½

The railway and miscellaneous general stock market has been much more active, since our last, speculative demand having grown rapidly, under the fostering influence of the prevailing ease in money. Prices have generally advanced, closing, as a rule, firmly on Wednesday.

Business in Produce and Merchandise has been on a somewhat more extensive scale, since our last. Breadstuffs have improved in price, and have been in good request for home use and shipment. Provisions have been held with more firmness, though they have been only moderately dealt in. Cotton has been fairly active but variable in price, closing heavily at 16 cents for middling uplands, per lb. The stock of cotton now here is estimated at about 57,500 bales. The receipts at the port this week, have averaged about 5,100 bales a day. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 862,000 bales, against 770,000 bales same time last year; exports, same time, 453,000 bales, against 300,000 bales same time last year; stock on hand at latest dates, 327,000 bales, against 506,000 bales same date last year. At the auction sale of Scranton Coal on Wednesday, 40,000 tons were disposed of to a less spirited company of buyers at less buoyant prices, ranging from $3.57½@5.27½ per ton of 2.240 lbs. delivered at Elizabethport N. J. At the Live stock markets this week beeves have been in fair request and buoyant in price at from 12@20c., as extremes. Calves, at from 8@13c. Sheep, at from 4@7½c. Lambs, at from 5@7¾c. Swine, at 7¼@7¾c. per pound, all live weight. The week's receipts have been 3,567 beeves, 446 veal calves, 8,075 sheep and lambs, and 13,584 swine. In foreign merchandise trade has not improved much, in the wholesale line. Groceries have been in moderate request. Metals have been inactive. Dry Goods have have been rather sparingly sought after. Prices of most articles have been quoted about the same. The total imports of foreign dry goods, last week, were $753,265, and the total amount marketed $555,524. The value of foreign merchandise imported last week, was $2,342,877—making the grand total specie value of last week's imports of dry goods and merchandise, $3,095,642, against $1,458,493, same week last year. The aggregate for the year 1867, was $242,478,575 against $277,043,050 in 1866. The ocean freight market has been moderately active and buoyant since our last. For Liverpool we quote flour at 2s. 3d. @2s. 6d. per bbl.; grain at 6¼d.@7½d. per bushel; cotton at $\frac{5}{16}$d.@$\frac{3}{8}$d. per lb.; and heavy goods at 20s.@40s. per ton, all by sailing vessel. Total number of vessels in port on Wednesday 523.

The New York exports, exclusive of specie, for the week ending Jan. 7, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$3,716,624	$2,500,234

The balance in the Sub-Treasury on Wedensday was $94,871,615 03.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

American Natural Lubricating Oils.

We invite attention to the advertisement of the Volcanic Oil and Coal Co. in another column. These Natural Oils are not put upon the market in the condition in which they are pumped from the earth, but, by a mechanical process, are rendered entirely free from all grit, gummy or parrafinous deposits and water; so that the company are prepared to guarantee them, under all circumstances, as to uniformity of grade and cleanliness.

The Volcanic Oil and Coal Company, of West Virginia, produce a greater variety of oils than any other company in that State, (whence all oils of this nature come,) hence they are prepared to furnish the different grades suited to every kind of machinery, light, medium or heavy, insuring the most economical results in lubrication.

Pamphlets containing full information in relation to these oils can be had upon application to S. St. John, 7 Broadway, New York, who is Agent for the company.

Atlantic and Great Western Railway.

The annual election for directors of this company took place in Meadville, Pa., on the 7th inst., and resulted in the choice of the following gentlemen: Hon. Henry G. Stebbins, John S. Eldridge, Gen. A. S. Diven, T. W. Kennard, E. F. Satterthwaite, W. A. O'Doherty, Samuel Wann, John Gardner, C. E. E. Blakesley, Gen. Rush C. Hawkins, Timothy G. Churchill, John D. Lawson, Alexander McAndrew, Mortimer L. Mackenzie, New York: T. Haskins Dupuy, Tatlow Jackson, Philadelphia: Charles Day, Henry Martin, Buffalo; Jacob Riblet, Galion, Ohio; Jacob Crall, Ashland, Ohio; Wm. Lee Randolph, N. Y.

The Board organized by electing Hon. Henry G. Stebbins, President, and T. Haskins Dupuy, Vice-President.

Cleveland and Pittsburg Railroad.

At the annual meeting of the stockholders of this company held in Cleveland on the 1st inst., the following gentlemen were elected directors for the ensuing year: J. N. McCulloch of Wellsville; A. Stone, Jr., Cleveland; S. Witt, Cleveland; J. H. Wade, Cleveland; T. P. Handy, Cleveland; J. H. Banker, New York; James Steward, New York; H. C. Simson, New York; Thomas Slocumb, New York; J. H. Devereux, Cleveland; B. F. Jones, Pittsburgh, and J. W. Calfant, Pittsburgh.

At a subsequent meeting of the Board of Directors, the following officers were elected; J. N. McCullough, President; J. H. Devereux, Vice-President; G. A. Ingersoll, Secretary.

☞ The Dunleith and Dubuque Bridge Co. will receive proposals at their office in Dubuque, Iowa, until the 13th inst., for the construction of a bridge across the Mississippi river between Dubuque and Dunleith, and for connecting the west end of said Bridge with the Dubuque and Sioux City Railroad. For particulars, see Advertisement on page 51 of this week's issue.

☞ The West Branch of the North Missouri Railroad was completed to Brunswick on the 23d ult.

Railroad Earnings.—Weekly.

The earnings of the Atlantic and Great Western Railway for the fourth week in Dec., 1867, were $97,428 00
Corresponding week previous year 98,318 00

Decrease $890 00

The earnings of the Toledo, Wabash and Western Railroad for the 4th week of Dec., 1867, were $111,517 17
Same week in 1866 ..... 87,377 54

Increase $24,139 69

The earnings of the Chicago and Alton Railroad for the fourth week in December, 1867, were $61,006 47
Corresponding period previous year .. 69,163 74

Decrease $8,157 27

The earnings of the Chicago and Rock Island Railroad for the fourth week in December, 1867, were $68,100 00
Corresponding week of previous year .. 59,616 00

Increase $8,484 00

The earnings of the Chicago and Northwestern Railroad for 4th week in Dec., 1867 .. $240,319 00
Corresponding week previous year .. 204,623 00

Increase $95,696 00

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in Dec., 1867, were $110,318 00
Corresponding week of 1866 ..... 101,964 00

Increase $8,354 00

The earnings of the Detroit and Milwaukee Railroad for the week ending January 2, 1868, were $24,558 00
Corresponding week of 1867 ..... 24,865 00

Decrease $307 00

The earnings of the Marietta and Cincinnati Railroad the 4th week in Dec., 1867 .. $35,148 00
Corresponding week previous year 32,466 00

Increase $2,682 00

Exports of Petroleum from Philadelphia.

The following is a statement of the destination, quality and value of the Petroleum exported from Philadelphia during the year 1867, also a comparison with previous years:

	Gallons.	Value.
Great Britain	6,074,040	$1,796,038
Antwerp	7,966,514	2,278,789
France	4,264,725	1,128,315
Bremen	4,302,377	1,147,603
Hamburg	985,958	254,131
Prussia	668,440	181,414
Spain	169,830	48,233
Russia	696,315	184,423
Portugal	118,055	31,901
Sweden	82,654	10,940
Rotterdam	1,838,502	520,261
Italy	1,397,955	404,900
West Indies	186,030	66,285
Total, 1867	28,751,445	$8,053,233
" 1866	26,836,088	11,274,597
" 1865	12,032,934	6,441,274
" 1864	7,566,925	4,294,724
" 1863	4,930,708	1,382,080

☞ Messrs. Williams and Page have admitted Mr. Allan J. Chase as partner in their firm. The business will be conducted as heretofore, at 91 Water street, Boston, under the style of Williams, Page & Co.

☞ The Portland and Rochester Railroad is graded to Quaker Pond, within two miles of Alfred, and all but three miles are gravelled. The track will be laid in the spring.

Imports of Dry Goods.

The imports of foreign dry goods at the port of New York for each month of the years 1866 and 1867, are officially stated as follows:

	1866.	1867.
January	$15,769,091	$11,928,872
February	16,701,578	9,786,615
March	15,833,273	10,227,579
April	7,336,564	5,274,455
May	7,299,112	5,436,451
June	6,775,214	4,245,313
July	10,727,463	6,582,575
August	14,870,338	12,608,019
September	9,175,675	7,351,223
October	8,485,550	5,382,793
November	7,259,236	4,397,398
December	5,989,731	3,092,350
Total	$126,222,855	$86,263,643

The following will show the relative proportion of the different classes of fabrics:

	1866.	1867.
Manufaturers of wool	$50,405,179	$31,357,833
" cotton	21,287,490	15,800,894
" silk	24,837,734	18,565,817
" flax	20,456,870	12,949,561
Miscell's dry goods	9,235,582	7,589,538
Total imports	$126,222,855	$86,263,643

The value of foreign dry goods entered directly for consumption at the port of New York is as follows:

	1866.	1867.
January	$10,738,030	$5,836,470
February	11,979,918	6,125,167
March	10,548,433	6,428,843
April	4,966,626	3,305,827
May	4,850,893	3,384,648
June	3,873,573	2,374,570
July	7,862,548	3,724,269
August	9,096,521	8,782,015
September	6,348,181	5,908,490
October	5,462,752	3,297,079
November	3,788,539	2,903,081
December	2,417,692	1,585,591
Total	$81,933,706	$53,605,545

The value of foreign dry goods entered for warehousing at the port of New York, is as follows:

	1866.	1867.
January	$5,031,061	$6,092,402
February	4,721,660	3,661,448
March	5,284,840	3,799,236
April	2,369,038	1,968,628
May	2,448,219	2,051,808
June	2,901,671	1,870,743
July	2,864,915	2,808,306
August	5,773,817	3,826,004
September	2,827,494	1,442,733
October	3,022,798	2,085,714
November	3,470,697	1,494,317
December	3,572,039	1,556,759
Total	$44,289,149	$32,658,098

The value of foreign dry goods withdrawn from warehousing at the port of New York, is as follows:

	1866.	1867.
January	$3,775,612	$3,060,973
February	3,238,900	7,009,274
March	3,943,181	6,942,758
April	3,569,177	2,652,699
May	2,351,454	2,255,601
June	3,104,174	1,338,874
July	2,220,508	1,254,419
August	5,512,279	5,731,940
September	3,708,415	3,243,421
October	1,983,305	1,851,593
November	1,945,666	1,516,484
December	1,289,565	780,394
Total	$36,658,236	$37,687,430

The total imports of foreign dry goods at New York, since 1850 compare as follows:

Year.	Invoiced Value.	Year.	Invoiced Value.
1850	$60,106,375	1859	$118,152,624
1851	62,846,731	1860	103,927,100
1852	61,654,144	1861	43,636,689
1853	98,704,211	1862	56,121,227
1854	80,842,936	1863	67,274,547
1855	64,974,062	1864	71,589,752
1856	93,362,893	1865	91,965,138
1857	90,534,129	1866	126,222,855
1858	60,154,509	1867	86,263,643

Journal of Railroad Law.

COMMON CARRIERS MUST PROVIDE SAFE CARS FOR CATTLE—MEASURE OF DAMAGES.

The facts in the late case of Chester Smith *vs* New Haven and Northampton R. R. Co., (12 Allen 531) were that the defendant received of plaintiff eight cattle at Northampton for transportation on their own and connecting roads to New York. On Saturday the cattle were taken on board a train which reached New York the same night. Five arrived safely. When the train reached Westfield —about 20 miles from Northampton—it was discovered that the barriers of a door of the car in which the cattle were confined, were broken, and three of the cattle were missing. However, these were forwarded somewhat injured by the next train which reached New York on Monday night. The market value of the cattle in New York was less on Tuesday than on Monday.

The action was brought against the defendants as common carriers, to recover damages for this failure to transport safely and reasonably three fat cattle.

The defendants on the trial contended that they used due care, and that the injury was occasioned by the viciousness and unruliness of the cattle. On this point there was conflicting testimony.

The Jury returned a verdict for the plaintiff.

Foster, J.—In this action against a railroad company for injuries received by cattle, while being transported to market, it appeared that when the train arrived at Westfield, the barriers of a car door were found to be broken down and three of the cattle were missing.

The defendants requested the presiding Judge to rule, that if the corporation used due care, and the injury was occasioned by the unruliness of the cattle, the plaintiff could not recover. This instruction was properly refused.

The common law liability of a carrier for the delivery of live animals, is the same as that for the delivery of the merchandise. Upon undertaking their transportation, he assumes the obligation to deliver them safely against all contingencies, except such as would excuse the non-delivery of other property. Wilson *vs.* Hamilton 4 Ohio (N. S.) 722. Palmer *vs.* Grand Junction Railway 4 M. & W. 749. White *vs.* Winnissimmet Co., 7 Cush. 155.

To this general rule there is an apparent exception, supported by authority, and which we adopt, that the liability of the carrier does not extend to injuries caused by the peculiar character and propensities of the animals to themselves or each other. Perhaps this qualification is in principle only an application to live freight, of the familiar rule which relieves the carrier from responsibility, where fruit perishes by natural decay, or the inherent defects of merchandise destroy its value. Although the carrier insures the arrival of the

property at the point of destination against everything but "the act of God and of public enemies," yet the condition in which it shall arrive there, must depend on the nature of the article to be transported. He does not absolutely warrant live freight against the consequences of its own vitality. Hall *vs.* Renfro 8 Met. (Ky.) 51; Clarke *vs.* Rochester and Syracuse R. R. 4 Kern. 570.

Vicious or unruly animals may injure or destroy themselves or each other; or frightened animals may die of terror, or starve themselves by refusing food, notwithstanding every precaution it is possible to use. For such occurrences the carrier is not answerable. He will be relieved from responsibility for casualties of this description, if he can show that he has provided all suitable means of transportation, and exercised that degree of care which the nature of the property requires. In arrangements and precautions to guard against injuries occasioned by the faults and vices of animals to themselves or each other, the carrier is bound to use an amount of diligence analogous to that required of passenger carriers in the transportation of human beings. But the sufficiency of a car door to resist the struggles of animals, however unruly, it is in the power of a railroad company to secure. And its obligation in this respect is not satisfied by furnishing a reasonably strong car. The company is bound to have one absolutely and actually sufficient. It is practicable to make a car so thoroughly strong that cattle cannot break it down and fall out. For any failure to do so the carrier is responsible.

We should have no difficulty in sustaining the verdict for the plaintiff, were it not broadly and unqualifiedly stated in the instructions given, that the defendant corporation was liable as a common carrier for injuries occasioned by the viciousness and unruly conduct of the cattle. So far as the sufficiency of the car was concerned, we assent to this statement. In its application to unavoidable injuries done by the cattle to themselves or each other, we regard it as incorrect.

There are two other qualifications of the liability of common carriers which may be referred to, not because of any fact appearing in the present case, but for completeness of statement and to avoid misapprehension. Where the owner of animals or goods retains the custody of them during their transit, the carrier is not as absolutely liable as he otherwise would be. White *vs.* Winnisimmet Co. above cited. Also where the owner of animals or other property is aware of any circumstances, which render peculiar care and attention necessary to safe transportation, and which the carrier does not or is not presumed to know, he must give notice of such peculiarities, in order that suitable precautions may be employed. Wilson *vs.* Hamilton above cited.

Perhaps the facts at the trial furnished no room for the distinction, in consequence of the omission of which we are constrained to set aside the present verdict. But of this we cannot be sure, and on that narrow ground only the exceptions are sustained.

The rule of damages was accurately stated. If as we understand from the exceptions, the defendants received the cattle, knowing that they were designed to reach New York in season for a particular market day, the loss sustained by wrongful delay in transportation is the difference in market value between the time when they ought to have arrived, and when they actually did arrive at the terminus of the road. Whether without such knowledge, in a case of unreasonable detention or delay, the rule would not be the same, we need not now decide.

Exceptions sustained.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States December 1, 1867, and January 1, 1868:

	Dec. 1, 1867.	Jan. 1, 1868.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$205,552,850.00	$204,929,500.00
Six per cent. bonds of 1867 and 1868	14,690,941.80	14,690,941.80
Six per cent. bonds of 1881	282,731,550.00	283,676,600.00
Six per cent. Five-twenty bonds	1,324,412,550.00	1,373,804,750.00
Navy pension fund	13,000,000 00	13,000,000.00
Total	$1,840,367,891.80	$1,890,102,091.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$18,601,000.00	$20,713,000.00
Three-year compound interest notes	62,249,360.00	46,244,780.00
Three-year seven-thirty notes	285,587,100.00	238,268,450.00
Three per cent. certificates	12,855,000.00	23,265,000.00
Total	$379,292,460.00	$328,491,230.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 15, 1867	$2,855,400.00	$2,022,950.00
Compound interest notes matured June 10th, July 15, Aug. 15, and Oct. 15, '67	7,065,750.00	9,952,810.00
Bonds of Texas indemnity	260,000.00	257,000.00
Treasury notes, acts July 17, 1861, and prior thereto	163,011.64	162,811.64
Bonds, April 15, 1842	54,061.64	54,061.64
Treasury notes, March 3, 1863	868,240.00	716,192.00
Temporary loan	2,880,900.55	2,674,815.55
Certificates of indebtedness	31,000.00	31,000.00
Total	$14,178,363.83	$15,871,640.83
DEBT BEARING NO INTEREST.		
United States notes	$356,212,473.00	$356,159,127.00
Fractional currency	30,929,984.05	31,597,583.85
Gold certificates of deposit	18,401,400.00	20,104,580.00
Total	$405,543,857.05	$407,861,290.85
Total debt	$2,639,382,572.68	$2,642,326,253.48
AMOUNT IN THE TREASURY.		
Coin	$100,690,645.69	$108,430,253.67
Currency	37,486,175.24	25,770,349.71
Total	$138,176,820.93	$134,200,603.38
Amount of debt less cash in the Treasury	$2,501,205,751.75	$2,508,125,650.10

By comparing this with the statement of December 1, it is shown that the debt bearing coin interest has increased $49,734,200; the debt bearing currency interest has decreased $50,801,230; the matured debt not presented for payment has increased $1,693,277; and the debt bearing no interest has increased $2,317,433 80—making the increase in the total debt since December 1, 1867, $2,943,680 80. The amount of coin in the Treasury during the same period has increased $7,739,607 98, and the amount of currency has decreased $11,715,825 53—leaving the amount of debt less cash in the Treasury January 1, $6,919,898 35 more than on December 1.

☞ The Council Bluffs and St. Joseph Railroad is finished to Hamburg, Iowa.

Maine Railroads.

A correspondent of the Boston *Journal*, writing from Augusta, Me., says that during the past season several important surveys have been made of proposed routes, and the work of building has commenced. Probably the most important scheme that will engage the attention of the incoming Legislature will be that of consolidating and uniting in one corporation the Maine Central and Portland and Kennebec roads, which for two winters past has been attempted without success. A petition will be presented by the Directors of the European and North American Railway Company, asking that an act passed Feb. 20, 1866, authorizing the city of Bangor to loan its credit to the company, may be so modified as to limit the lien or security to be made or given to that city for the loan authorized by the act to a mortgage lien or security on the railway and franchise of the company between Bangor and Winn; also for an extension of time for the completion of the road from Bangor to a point ten miles above Milford depot. Application will be made for the charter of a railroad company to build a railroad or connect with the railroad now built or contemplated, so as to connect Rockland with Bangor by rail. This will command the traffic on the Penobscot river and bay, either by supplying the needed links in case the Belfast and Moosehead road shall be built, or by running the whole distance, and thus afford to Belfast railroad communication with both Bangor and Rockland. The road from Bath to Rockland will complete the shore road, so as to form a continuous line of railroad from Boston to Bangor. The Kennebec and Wiscasset Railroad Company will apply for authority to make its western terminus and connections with the Portland and Kennebec or Somerset and Kennebec roads at some point northward of Richmond, its present limit. A petition will be presented for the revival of an act incorporating a horse railroad company from the Bangor and Piscataquis Railroad to different state and iron works in Piscataquis county.

Useful Information for Railway Men.

We have received from the Ramapo Wheel and Foundry Co., a hand book of Useful Information for Railway Men, intended to bring prominently before the public peculiar advantages, and treating of most of the subjects bearing on railways and their construction. It was compiled by Mr. Wm. G. Hamilton, late Engineer of the Jersey City Locomotive Works, the agent of the Ramapo Wheel and Foundry Co., and will doubtless prove a valuable compendium to the railway community.

Cedar Rapids and Burlington Railroad.

The line of this road, which has recently been surveyed, crosses the Iowa River at Wapello, over the old line of the American Central, thence *via* Grandview and Ononwa to the junction of the Iowa and Cedar Rivers, crossing the Cedar at a point near Brown's Ferry, making a common point with the previous survey at West Liberty. The grades were found favorable, and the work would not be heavy except at the crossings of the Iowa and Cedar Rivers.

☞ The second vote on the question of subscribing $2,000,000 to the Chesapeake and Ohio Railroad was taken in Richmond on the 31st ult., and resulted in favor of the subscription.

Receivers of a Railroad not Common Carriers.

The Burlington (Vt.) *Free Press* reports the particulars and decision of a railroad case, in which the receivers of the Vermont Central Railroad were sued as common carriers to recover the value of a car load of hay which was destroyed by fire while in their custody. The plaintiff claimed that the defendants agreed to carry the hay at a certain price, he furnishing box cars with covering to them; that the cars were furnished and the hay loaded. Before reaching St. Albans the defendants were notified that the hay was very near the engine and in danger of being destroyed by fire therefrom, but no heed was given to the notice, and the hay was burnt from that cause. The defendants denied their liability—that they are common carriers—or that they are trustees of, or are, in fact, the Vermont Central Railroad; but said that they are the receivers of the road, appointed such by the Court, were therefore officers of the Court, and, being such, they do not assume the duties and responsibilities of common carriers, and cannot be held liable as such. The Court sustained this view of the case, and ordered a verdict entered for the defendants.

Middlesex Horse Railroad.

The income of this company for the year ending Nov. 30, 1867, was as follows:

From passengers, and tickets sold	$186,444 27
From other sources	1,641 06
Total receipts	$188,085 33

The total expenses have been $177,997 80, leaving $10,087 53 as the net earnings for the year; adding to this the surplus of 1866, $10,565 23, we have a total of $20,652 76.

The whole number of miles run during the year was 553,343; cost per mile run 3.13 cents. Number of passengers carried 2,939,656; besides these there were 75,285 passengers carried in the Chelsea cars. The number of trips made was 98,409; the average number of passengers per trip was 29.87.

The business of the road has been steadily increasing for the past few years. The amount of receipts in 1865, when running over the same lines as during the past year, was $173,212 44.

Dubuque, Bellevue and Sabula Railroad.

A company has been recently organized at Dubuque, Iowa, with W. H. Sheffield, Wm. Hyde Clark, W. W. Woodworth, T. C. Roberts, R. A. Babbage, and C. C. Gilman of Dubuque, and John Stewart of Bellevue, as directors. The object of this new company is to renew the work of the old Dubuque and Pacific Company, and complete it in the construction of the road, securing thus the grant of land, six sections per mile, amounting to something over forty thousand acres of land. To make the road available it is necessary to extend it to a connection with some road affording an eastern outlet. This connection is secured at Sabula, opposite Savanna. The distance to Tete des Mortes is eleven miles, nine miles further to Bellevue, and fifteen miles further to Sabula, so that the length of the road proposed by the Dubuque, Bellevue and Sabula Railroad Company will be about thirty-five miles. The officers of the new company are: C. C. Gilman, President, R. A. Babbage, Treasurer, and Captain Charles Collins, Secretary.

Illinois and St. Louis Bridge Co.

The Directors of this company are: Daniel R. Garrison, James Harrison, Charles P. Chouteau, H. C. Creveling, Luther C. Clark, J. R. Stanford, W. R. Morrison, David Gillespie, George Judd, R. P. Tansey, Robert M. Renick. The officers are: Daniel R. Garrison, President; James Harrison, Vice President; R. P. Tansey, Secretary and Treasurer; S. S. Post, Engineer. The office of the company is at 320 North Third Street, St. Louis.

☞ The Shamokin (Pa.) *Herald* says that the Enterprise Railroad Company recently purchased the Big Mountain road and its laterals at the Buck Ridge colliery. The company has agreed to have the Enterprise road opened as far as the Buck Ridge colliery by the first of May next.

☞ The Albany and Susquehanna Railroad has just obtained a new and powerful locomotive engine, No. 16. It was built in Scranton, and cost $17,000.

☞ Two hundred men have been put at work on the Fishkill end of the Boston, Hartford and Erie Railroad.

525 MILES

OF THE

Union Pacific Railroad

Running West from Omaha

Across the Continent,

ARE NOW COMPLETED.

This brings the line to the eastern base of the Rocky Mountains, and it is expected that the track will be laid thirty miles further, to Evans Pass, the highest point on the road, by January. The maximum grade from the foot of the mountains to the summit is but eighty feet to the mile, while that of many eastern roads is over one hundred. Work in the rock-cuttings on the western slope will continue through the winter, and there is now no reason to doubt that the entire grand line to the Pacific will be open for business in 1870.

The means provided for the construction of this Great National Work are ample. The United States grants its Six Per Cent. Bonds at the rate of from $16,000 to $48,000 per mile, for which it takes a *second lien* as security, and receives payment to a large if not to the full extent of its claim in services. These bonds are issued as each twenty-mile section is finished, and after it has been examined by United States Commissioners and pronounced to be in all respects a first-class road, thoroughly supplied with depots, repair shops, stations, and all the necessary rolling stock and other equipments.

The United States also makes a donation of 12,800 acres of land to the mile, which will be a source of large revenue to the Company. Much of this land in the Platte Valley is among the most fertile in the world, and other large portions are covered with heavy pine forests and abound in coal of the best quality.

The company is also authorized to issue its own First Mortgage Bonds to an amount equal to the issue of the Government and no more. Hon. E. D. Morgan and Hon. Oakes Ames are Trustees for the Bondholders, and deliver the Bonds to the Company only as the work progresses, so that they always represent an actual and productive value.

The authorized capital of the Company is One Hundred Million Dollars, of which over five millions have been paid in upon the work already done.

EARNINGS OF THE COMPANY.

At present, the profits of the company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a *Government Work*, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

First Mortgage Bonds

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent. lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment, and have thirty years to run before maturity. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.
November 23d, 1867.

DEAKIN & JOHNSON'S PATENT PUNCHED STEEL,

For

STEAM & HORSE HOLLOW SHAFTING; LOCOMOTIVE, MARINE & OTHER TUBES,

HYDRAULIC CYLINDERS, SPINDLES, AXLE BOXES,

GUN BARRELS, GUN JACKETS AND ORDNANCE,

COMMISSION MERCHANTS FOR THE SALE OF

Pig, Merchant Bar & Railroad Iron & Supplies

OF EVERY DESCRIPTION.

Sole Agents for the Sale of Atkins Bros' make of Railroad Iron. Their Works being located in the coal & iron districts of Pennsylvania, & having their own Ore Mines, Blast Furnaces and Machine Shops, all under their ownership and control, in connection with their extensive Mills, which have recently been greatly enlarged and improved, enables them, with their long experience, to produce Rails, which for evenness and regularity of quality and finish, cannot be excelled anywhere.

Rails of any desired weight or pattern furnished on short notice.

CHAS. J. PUSEY,
HANSON E. ATKINS,
CALEB H. MALIN.

Notice to Contractors.

Proposals will be received by the Dunleith and Dubuque Bridge Company at their office, in the city of Dubuque, Iowa, after January 1st, and until January 13th, 1868, at 10 o'clock A. M., for the construction of a bridge across the Mississippi river between Dubuque and Dunleith, and for connecting the west end of said Bridge with the Dubuque and Sioux City Railroad.

The piers and abutments will be of first class masonry resting on piled foundations, capped with timber, except the east abutment, which will be on rock.

The superstructure will be entirely of Iron. The draw of all wrought iron, and the remainder of the bridge of all wrought iron except the top chord which may be of cast iron.

Proposals will be received on Post's, Pratt's Bollman's, Linville & Piper, or any other approved plan of superstructure, with some slight modifications.

No single bid will be received for the whole work. But they must be separate for the superstructure, for masonry, foundations, and protection to Draw Pier, and for the work connecting West end of Bridge with the Dubuque and Sioux City Railroad.

Plans and specifications for said work may be seen at the office of the company in Dubuque, Iowa, on and after December 16th, 1867, or information relative to the work may be obtained on application to the undersigned at Chicago, Illinois.

Materials for the construction of the Bridge will be transported free from Chicago and from other points on the Illinois Central Railroad to Dunleith.

Satisfactory security will be required for the faithful performance of the work.

The Dunleith and Dubuque Bridge Company reserve the right to reject any or all bids if deemed best for the interest of the company.

R. B. MASON,
Engineer.

TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS**, Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

PLASTIC SLATE
FOR
Roofing & Other Purposes.

The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.

As a Roofing Material it Stands Unrivalled.

A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.

Frost does not Crack nor Heat Dissolve it.

The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and

Perfectly Fire-Proof,

It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.

ESTABLISHED IN 1836.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.

THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail**, upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.		SHEET No	
1.	General Table for all Bases and all Slopes.	13.	for Base 18 ft. Slop 1½ to 1
2.	For Side Hill Cuts and Fills.	14.	" " 20 " 1½ to 1
3.	Base 18 ft. Slopes 1½ to 1	15.	" " 24 " 1½ to 1
4.	" 14 " 1½ to 1	16.	" " 24 " 1½ to 1
5.	" 15 " ¼ to 1	17.	" " 25 " 1½ to 1
6.	" 15 " 1 to 1	18.	" " 26 " 1½ to 1
7.	" 16 " 1½ to 1	19.	" " 28 " ¼ to 1
8.	" 16 " ¼ to 1	20.	" " 30 " 1 to 1
9	" 16 " 1 to 1	21.	" " 30 " 1½ to 1
10.	" 18 " ¼ to 1	22.	" " 30 " 1½ to 1

American Railroad Journal.

New York, Saturday, January 18, 1868.

Cotton and Railways in India.

Mr. Campbell, a gentleman connected with railways in India, and recently returned to England from that country, has collected some valuable information respecting the capabilities of the Punjaub and other parts of India for growing cotton, and the means by which irrigation may be made more extensively available, and additional facilities for the transport of cotton be secured. His residence at Umritsur, which he described as the Manchester of the Punjaub for commerce and enterprise, gave him opportunities of witnessing the marvellous changes effected on the opening of the Punjaub Railway from Lahore to Moultan. He never saw anything like it, though engaged in railway work in England for more than a quarter of a century. He is of opinion that the Punjaub could compete with any part of the world in growth of cotton, both as regards quantity and quality. Scinde and the Punjaub, including the States under control, cover an area of 130,000 square miles, with a population of about 25,000,000 of people, industrious and hardy for labor. The water power is immense during the hot season, caused by the melting of the snow on the Himalayas. Cotton grown on the banks of the rivers could be easily conveyed by water, or rail, or road, in different directions, and canals made from these rivers for irrigating purposes would make the Punjaub one of the most fertile countries in the world. It is fully expected that by the beginning of 1869 continuous railway communication between Calcutta, Madras, Bombay, and the Punjaub will be established. When the Presidencies are joined by the railway system each with the other, the Commander-in-Chief can, in the event of mutiny, invasion, or war, telegraph to all the military stations, and order, if necessary, from Bombay, Madras and Bengal, simultaneously by the various railways, an army of 100,000 soldiers, including every arm of the service. This army can be landed in one week at the Khyber Pass, or in any part of India to which the railway system will be extended. Every new mile of railway, canal or road, opened for traffic, will tend to lessen the price of cotton in India. The number of miles of railway sanctioned in India is 5,641.

Peninsular Railway.

A meeting of the Board of Directors of the Peninsular Railway Company, and of the Peninsular Railway Extension Company, was held at the office of the President of those companies, in this city, on the second and third inst.

The proceeding of those meetings will have an important bearing upon the business interests, not only of this city, but of the section of country traversed by this line of road, and on the commerce of the West. Forming, as this line does, a new thoroughfare between the East and West, its importance cannot be over-estimated for shortening distances, and cheapening rates of freight and travel.

The organization of the Peninsular Railway Extension Company, was completed, and L. D. Dibble of this city was elected President, John S. Jacks of Edwardsburgh, Secretary, S. T. Read of Cassopolis, Treasurer and C. F. Miller of this city, Chief Engineer.

An agreement for the consolidation of the two companies into one company, was unanimously entered into by the Directors of the companies, respectively, which will be submitted to the stockholders for ratification on the 13th of February next, in this city, at 2 o'clock, P. M. When consolidated, the company will form one connected line from Lansing, the State Capital, *via* Battle Creek, and Cassopolis, to the Indiana State Line, of the length of one hundred and nine miles. Mr. Miller, the Chief Engineer of the company, also, during the same week, relocated a portion of the line of the Peninsular Railway of Indiana, and connected the line of that company, at the State line, with the line in this State.

The Board of Directors also directed the President to advertise for sealed proposals, for the letting of contracts for preparing the road bed for the iron, from Battle Creek to the State line, the bids to be opened by the Board at this city, on Monday, the 27th inst., at 12 o'clock, M. The work will be commenced on the State line and proceed Eastward, as rapidly as possible, and in the Spring, at this city, and proceed Westward. Agents were also appointed to let contracts for ties for the West end of the line.

On the 10th of December last the Board of Directors of the company in Indiana, passed resolutions to let contracts for grading, &c., from the State line to South Bend, and to commence work, simultaneously with the work in Michigan. The City of Laporte has very recently subscribed $100,000 to the stock of the company in Indiana, and the means necessary for carrying the work through that State are nearly or quite raised.

From the West line of Indiana, the line into Chicago is provided for.

Fifty miles or more from Port Huron, Westward, is now ready for iron, and the iron provided, and during the coming summer it is confidently expected that iron will be laid to Flint, and that line graded to Lansing. In the Spring the entire line between Battle Creek and Lansing will be graded and ready for ironing.

Opponents of this line, need no longer oppose its progress, or flatter themselves that they can defeat it. Its early success is beyond a peradventure or doubt. The more promptly subscriptions to the line are made, and those already made, paid in, the sooner will all reap its benefits. In connection with the Detroit and Howell and

Howell and Lansing Railroad, now under contract, and soon to be built, it will furnish a new line to compete with the Michigan Central, for through business between Detroit and Chicago, and for Battle Creek, a competing line, both to Detroit and Chicago, it being but eight miles further from this city to Detroit, *via* Lansing, than by the Central, and about the same distance to Chicago.

When the Detroit and Howell road is completed to Lansing, it gives us a short route to the plaster of Grand Rapids, and when the Grand Rapids and Indiana Road is completed from Grand Rapids to Kalamazoo, we shall have competing lines not only for the plaster, but also the pine lumber of Grand Rapids.

No project was ever in contemplation that bid as fair as this to improve the condition of the country through which it passes, nor was any road ever projected, the stock of which presented so favorable an investment for money, with a certy of large dividends, and returns. Along its entire line, the feeling for its early completion is intense, and the utmost confidence in its complete success is felt. DELTA.

Battle Creek, Mich., January 4, 1868.

Benedict up Broadway.

For the convenience of their innumerable patrons who, with their watches, are kept on time and regulated, the Brothers Benedict, watchmakers and jewellers, (as we before remarked,) have opened a branch establishment at No. 691 Broadway. We do not know how the large and old established houses will be affected by this movement, for the Messrs. Benedict have an unsullied reputation, and it was only necessary for them to get into a good location to secure the best class of Broadway and upper-ten patronage. As regards the history and character of the house, the daily *Times* tells us:—"A noteworthy feature in our restless and shifting state of society is a business house which has established itself as a hereditary institution, exhibiting all the vigor of youth at the beginning of its second half century. Samuel W. Benedict enjoyed the confidence of the fathers and even grandfathers of the present generation in New York, as keeper of the city time from before the city was large enough to require omnibusses. His sons, walking in his ways, have maintained the solid probity and business application which first made their house, and are now keepers not only of the city time, but of the recognized railroad standards, which indirectly time most of the business of the whole country. Benedict Brothers have just opened, at No. 691 Broadway, their fourth establishment, for the convenience of people up-town, who rely on them for standard time, time-keepers and jewelry. The secret of their success is that the honesty of the Benedict house has always been worth the same to their customers as an expert knowledge of the trade itself."—*Home Journal.*

Chesapeake and Ohio Railroad.

The re-affirmation by a late vote in Richmond of her former vote of $2,000,000 subscription to the Chesapeake and Ohio Railroad, announced last week, was deemed expedient on account of the objections by some to the first vote, alleging that it was illegal because voters unknown to the laws of Virginia (negroes) were allowed to vote, while others, entitled under the State laws to vote, (the non-registered whites,) were excluded from the polls. The gentlemen thus objecting threatened to test the legality of the vote in the Courts. The Richmond *Dispatch* states that the President of the Central road, and the friends of the extension of that road to the Ohio, perceiving that the credit of the city bonds, issued under a vote thus to be contested must be seriously affected, determined to appeal to the council to authorize a second vote upon the proposition, in which the non-registered whites should be allowed to vote. This appeal was granted, and General Schofield concurring and authorizing the use of the registry of voters in the city for the occasion, the election was fixed for the 31st ult., and came off accordingly, with a result more decisively favorable to the subscription than that of the first election. The previously disfranchised gave some seven to one votes in favor of the subscription, and the subscription was carried so decidedly by the white vote alone that no further ground is left for cavil. The completion of this road, to which the subscription has been voted, is looked upon as of great importance to the interests of Virginia, being an extension of the Virginia Central Railroad to the Ohio, and it is thought to be secured by the subscription which Richmond has made to the work.

Philadelphia and Reading Railroad.

At the annual meeting of the stockholders of this company in Philadelphia on the 13th inst., the following report was presented:

To the Stockholders of the Philadelphia and Reading Railroad Company:

The managers submit the following report of the receipts and expenditures for the year ending November 30, 1867, with the Treasurer's general balance sheet, exhibiting the financial condition of the company at that date.

The following tabular statement in detail for each branch of traffic shows the comparative results of the year:

	1866—Passengers.		1867—Passengers.		
	Tons.		Tons.		
Travel	384,802	$1,026,217	345,970	$1,005,647	Decrease. $20,570
Merchandise	1,037,121	1,421,589	1,185,996	1,525,551	104,012*
Coal	3,714,684	8,245,697	3,446,826	6,404,878	1,840,819
Mail		27,719		33,085	5,666*
Miscellaneous		181,647		187,395	44,312
Gross receipts		$10,902,819		$9,108,496	$1,798,323
Gross expenses		6,788,747		6,266,434	472,213
Net profits		$4,164,072		$2,840,662	$1,324,010
Gross expenses, including renewal fund, in the year 1866 were 61.80 per cent. of gross receipts.					16.5
" " " in the year 1867 were 68.81 per cent. of gross receipts.					7

The increase of 7 per ct. on the proportion which the expenses bear to the gross receipts is caused by a reduction of 36 cts. per ton, or 16 per ct. on the charge for transporting coal.

The receipts and expenses, per passenger and per ton, have been as follows:

1866.	Received.	Cost.	1867.	Received.	Cost.	p. c.
Per passenger	$2 67	$1 53.6		$2 91.8	$1 81.7	2.0
Merchandise, per ton	1 37	66.4		1 28.6	64.8	7.8
Coal	2 21.9	97.1		1 85.8	94.9	22.8
						9.4
						24.4

* Increase.

The result of the year's business, as condensed from transportation and income account, may be stated thus:

Receipts over cost of working the road		$2,840,062 15
From which deduct—		
Interest on bonded debt	$356,844 00	
Interest on b'ds & mort.	38,336 56	
Sinking funds	68,600 00	
Cost of new engines and cars	60,991 17	
Cost of new branches to laterals	96,918 34	
Cost of new coaling stations at Palo Alto, Reading, Monocacy, Richmond and Philadelphia	60,085 73	
Cost of Eighth street bridge, Reading	27,585 24	
Cost of grading at Reading	31,523 41	
Cost of Burnettising-house and machinery, Pottstown	14,776 13	
Cost of bridge at Norristown Tunnel	13,050 41	
Cost of propeller "Pusey"	7,500 00	
Cost of teams on Delaware & Raritan Canal	18,932 87	
Cost of City Avenue bridge	5,156 49	
		800,300 35
Dividend fund, 1867		$2,039,761 80
Amount to credit of reserved fund, 1866	$2,920,118 01	
Deduct dividends, December, 1866, $1,137,193 36, and U. S. and State taxes, $174,398 07	1,311,591 43	
	$1,608,526 58	
Add balance of accounts, rents, &c., paid by the Schuylkill Navigation Co., 1867	116,192 12	
		1,724,718 70
Total reserved fund, 1867		$3,764,480 50
Out of which has been paid in July, 1867, 5 per ct. dividend on $23,856,101 35	$1,192,805 07	
United States & State taxes on ditto	122,419 47	
		1,315,224 54
		$2,449,255 96
There has been declared a dividend payable in common stock on Jan. 20, 1868, of five per cent. on the preferred and common stock, $23,856,101 35	$1,192,805 07	
To meet this, in part, there is stock created in lieu of bonds cancelled	320,000 00	
	$872,805 07	
United States & State taxes on dividend	122,419 47	
		995,224 54
Balance reserve fund		$1,454,031 42

The depression in the coal trade at the close of the year 1866, to which reference was made in the last report, continued during 1867. This can hardly be regarded as unforeseen. The exceedingly high prices for coal and large profits which prevailed during some years of the recent war, and which, owing to great irregularities in the labor market, continued for some time after its cessation, caused the erection of collieries capable of a production largely in excess of the consumption, thus leading to great competition and conse-

quent low prices. The very large reduction in the price of coal in 1866 compared with that of several previous years, induced unusually heavy purchases; the increased production of that year having been very largely in excess of that of any former one.

The increase during the two years is fully equal to the usual average, which statement is equally applicable to the business of this company, and there is no reason to doubt its continuance.

The Mahanoy and Broad Mountain Railroad and its branches, from which so large a proportion of the supplies of coal are now derived, has been materially extended.

The trust created for payment of all claims on the Allentown railroad has been canceled, and the work of grading the road between Port Clinton and Topton has been resumed.

The Burnettizing apparatus was completed in April last, since which time 91,898 sills have been prepared, at an average cost of 10 68-100 cents each.

The new mill for the manufacture of rails, the intended erection of which was announced in the last report, will be completed and in full operation during the ensuing spring. Great advantages are confidently expected from this expenditure.

Additions have been made to the real estate, rolling stock, and other things necessary for increased capacity and economical working, the details of which are elsewhere stated.

The advantages to result from these and similar expenditures cannot be realized during the year of their construction.

The usual detailed statement of the Treasurer of the Transportation and Engineering Departments is appended.

In July last sterling bonds, payable in London, amounting to $408,000, became due. The high rate of exchange then current rendered it judicious, in the opinion of the managers, to pay only $120,000 of them, the amount required for the sinking fund, and to extend $110,400 for five years, $43,200 for seven years, and the remainder, $134,400, for ten years. In addition to the bonds thus paid $5,000 of the loan due in 1870 have been purchased, and $57,000 of the convertible loan due in 1866, have been converted in stock, thus reducing the bonded debt $182,000.

About a year ago the Perkiomen Railroad Company applied for assistance in the construction of their railway. The proposed line of road extends from the point where the Perkiomen creek empties into the Schuylkill, twenty-five miles from Philadelphia, to Emaus, on the line of the East Pennsylvania Railroad, a distance of thirty-six and a half miles. The country through which it will pass has a fertile soil, and is rich in iron ore. By the use of six miles of the East Pennsylvania Railroad, a connection will be thus formed between the Schuylkill and Lehigh valleys. Great advantages, direct and indirect, are confidently anticipated from this new development of the resources of this section of the State, and the railway connections which will thus be made. The aid which has been extended to this new and important feeder is as follows:

A mortgage on the property of the company has been made, amounting to $1,000,000, payable in 1887, with six per cent. interest, semi-annually.

Bonds thus secured are issued, a portion of which have the following endorsement:

"Know all men by these presents, That the Philadelphia and Reading Railroad Company for a valuable consideration paid by the Perkiomen Railroad Company, do hereby guarantee to the lawful holder of the several interest warrants annexed to the within bond the punctual payment thereof, as the same severally become due and payable, according to the terms of the said bond."

Others bear the following agreement: "Know all men by these presents, That the Philadelphia and Reading Railroad Company, for a valuable consideration paid by the Perkiomen Railroad Company, do hereby agree to accept the within bond (all coupons not matured at the date of such acceptance being attached) at the par of the principal of said bond, and all due and unpaid coupons of the said bond at the par of said coupons, in payment, to the extent of thirty-three and one-third per centum, of all sums due the said the Philadelphia and Reading Railroad Company, for tolls and charges for transportation of freight from any point on one of said railroads to any point on the other.

"In witness whereof, etc."

As subscriptions are made, the work to that extent is put under contract. A sufficient amount of these bonds, with the stock subscribed, has been taken to secure the construction of ten miles of road northward from the river Schuylkill, which will be completed and in operation early next spring. It has been a subject of much gratification to observe the interest and readiness to furnish the required capital which have been manifested by the residents in the vicinity of the new road. They evidently appreciate the advantages of the increased facilities and the augmented value of their property which will surely ensue from this investment of their capital. It is proposed to continue the prosecution of the work, which is under the direction of the officers of this company, to completion as fast as the funds are thus furnished.

The preceding statements, together with the annexed general account of the Treasurer, exhibit the financial position and transactions of the company. They also show that a portion of the profits have been invested in permanent improvements, which should be rightfully represented in the capital stock, and which explains why the last semi-annual dividend was declared payable in stock at par.

The design to maintain a gold basis for any increase of the capital stock has been fully carried out, and as the accounts show, the addition to capital resulting from the declaration of a dividend in stock has yielded the same result to the company as the negotiation or issue of so much stock at par *in gold*.

The Managers believe that the policy which has been adopted is only open to the question of the wisdom and good judgment exhibited in making the expenditures.

On this point they have no doubt, and confidently submit it to the determination of the future.

The Managers would also point out the great reduction in the funded debt, amounting to six millions of dollars in five years, and its very small amount in comparison with the value of the property.

By order of the Board of Managers.

CHARLES E. SMITH, President.

PHILADELPHIA, Jan. 13, 1868.

At the annual meeting of the stockholders of the Philadelphia and Reading Railroad Company, held January 13, 1868, the following resolutions were adopted:

1. *Resolved*, That the Report of the Board of Managers, this day presented and read, be and the same is hereby approved, accepted, and adopted.

2. *Resolved*, That the Board of Managers be and they are hereby authorized, at their discretion, to carry into effect any of the measures proposed in their report, and, if in their opinion needful, to enter into any contracts or agreements for that purpose.

3. *Resolved*, That the powers and authorities conferred upon and granted to the Board of Managers by the resolutions passed at prior annual meetings be and the same are hereby continued.

4. *Resolved*, That a vote of thanks be and the same is hereby presented to the President and Board of Managers for the able manner in which the business of the road has been conducted during the past year.

The following gentlemen were unanimously elected officers for 1868:

President.—Charles E. Smith.

Managers.—Messrs. H. Pratt McKean, A. E. Borie, R. B. Cabeen, J. B. Lippincott, John Ashhurst, and Stephen Colwell.

Treasurer.—Samuel Bradford.

Secretary.—William H. Webb.

Milwaukee and St. Paul Railway.

For some weeks past the western press has been speculating upon the probable nature of certain railway arrangements in New York affecting the future prosperity of the St. Paul Railway. We are now enabled to remove all apprehension on the part of the friends of railway improvements in Wisconsin by stating on reliable authority the precise result of all the negotiations on the subject.

The first and most important of these results is the fact that the St. Paul company has purchased the Prairie du Chien road outright, and that all questions of difference in regard to that important line are now harmonized and permanently settled. The St. Paul company previously owned the common stock and a portion of the preferred stock of the Prairie du Chien. The complete ownership of the road was secured by a purchase of the amount of preferred stock and bonds not previously owned by the St. Paul company, amounting to over three million dollars. The entire aggregate of the preferred stock and bonds is nearly four and a half millions, for which the St. Paul company exchanged its own bonds at par, secured by a mortgage for the sum of five millions. This arrangement was finally consummated by the execution of the papers on the 30th of December, and completely merges the Prairie du Chien road in the St. Paul.

It is also proposed to proceed with the construction of the proposed road from a point west of McGregor to Sioux City, thus forming a direct air line connection between Milwaukee and the northern branch of the Pacific road at Sioux City—a distance of five hundred miles. Arrangements are completed for constructing a portion of this important connecting link the present year. The survey is already made and in this work the company is aided by a valuable land grant from the federal Government.

It is further the intention of the company to supply the missing link from Sun Prairie to Madison—thus furnishing an air line connection with the State capital by way of Watertown, and it is expected that the company will be able to prosecute this work the present summer.

The Oshkosh branch is also to be built in accordance with the terms agreed upon with the representatives of that city.

Such are the entire results of all the recent negotiations and conferences of the St. Paul company in New York or elsewhere.—*Milwaukee News.*

Dubuque City Railroad.

A company has recently been organized at Dubuque, with a capital of $75 000, of which $50,000 has been paid, for the purpose of constructing a horse railroad extending from the ferry landing on the levee, passing the railroad depot and along Main street, the distance of three miles east to the neighborhood of Heeb's Brewery. Mr. C. Hathaway, of Philadelphia, has contracted to build the road, furnish horses, stables, cars and car house complete by May 1, 1868; has 1,000 feet constructed, and all the material ready to finish the balance in 30 days after the opening of Spring. J. K. Graves is President, and J. Herod, Secretary and Treasurer.

Commerce of New York.

We give below, from the *New York Journal of Commerce*, a statement of the Commerce of New York for 1867, in comparison with that for the five preceding years. The imports for 1866, were $306,613,184, and that will probably stand as the banner year for the remainder of this decade. The total in 1867, was $252,648,475. These figures and all which follow, relating to the imports, represent only the foreign cost in gold—freight and duty not added. To show the cost

upon the market in paper money, the amount of foreign gold cost should be doubled, making the value of the year's imports on sale, duty paid, a little over $500,000,000 in currency, without reckoning any profit to the importer. To show what relation this return bears to the returns of former years, the following statement is given of the total imports at this port in each year since 1850:

FOREIGN IMPORTS AT NEW YORK.

Year.	Dutiable.	Free Goods.	Specie.	Total.
1851.	$119,592,264	$9,719,771	$2,049,543	$131,361,578
1852.	115,356,052	12,105 342	2,408,225	129,849,619
1853.	179,512,412	12,156,387	2,429,083	194,097,652
1854.	163,494,984	15,768,916	2,107,572	181,371,472
1855.	142,900,661	14,103,946	855,631	157,860,238
1856.	193,839,646	17,902,578	1,814,425	213,556 649
1857.	196,279,362	21,440,794	12,898,033	230,618,129
1858.	128,578,256	22,024,691	2,264,120	152,867,067
1859.	213 640,363	28,708,732	2,816,421	245,165 516
1860.	201,401,683	28,006,447	8,852,330	238,260,460
1861.	95,326,459	30,353,918	37,088,413	162,768,790
1862.	149,970,415	23 291,625	1,390,277	174,652,317
1863.	174,521,766	11,567,000	1,525,811	187,614,577
1864.	204,128,236	11,731,902	2 265,622	218,125,760
1865.	212,208,301	10,410,837	2,123,281	224,742,419
1866.	284,033,567	13,001,588	9,578,029	306,613,184
1867.	238,297,955	11,044,181	3,306,339	252,648,475

The dutiable in the above table includes both the total entered directly for consumption and the total entered for warehousing, to show the aggregate of duty paying goods landed at the port. The falling off in free goods, as compared with the years preceding 1863, is owing to the changes in the tariff, but especially to the transfer of tea and coffee from the free list.

We have already published the comparative statement, showing the imports of dry goods at this port during the years 1866 and 1867, and have also given from week to week the quantity and value of general merchandize imported, all of which are included in the returns given above; but it may be convenient for reference to divide the entire amounts in three grand items, which will interest those engaged in different branches of trade:

CLASSIFICATION OF IMPORTS AT NEW YORK.

	1866.	1867.
Dry goods	$126,222,855	$86,263,643
General mdse	170,812,800	163,078,493
Specie	9,578,029	3,306,339
Total imports	$306,613,184	$252,648,475

The cash duties received at this port during the year 1867 amount to one hundred and fourteen million dollars. This was collected upon $234,317,072 dutiable goods thrown upon the market.

The exports of specie are mostly given at their counted or tale value, but shipments of merchandise are reckoned at their market price in currency. Before giving the monthly details we present a quarterly table of the exports, giving the total shipments of the year exclusive of the precious metals:

EXPORTS FROM NEW YORK TO FOREIGN PORTS EXCLUSIVE OF SPECIE.

	1866.	1867.
1st quarter	$60,972,531	$49,376,379
2d quarter	46,766,386	46,270,261
3d quarter	38,381,202	38,928,663
4th quarter	46,209,485	52,214,722
Total	$192,829,554	$186,790,025

We now present a complete table, showing the imports and receipts for customs at New York, monthly, for a series of years; also a monthly table of exports, including the shipments of specie and bullion:

Foreign imports entered at New York during the years 1862, 1863, 1864, 1865, 1866, and 1867:

ENTERED FOR CONSUMPTION.

	1862.	1863.	1864.	1865.	1866.	1867.
January	$6,763,396	$8,741,227	$12,422,618	$5,217,495	$18,556,726	$11,046,856
February	7,058,174	7,372 539	15,766,601	5,178,774	17,389,505	13,364,912
March	10,312,689	11,461,572	15,848,425	7,066,126	15,200,809	11,373,974
April	7,141,197	9,493,830	18,951,760	5,528,575	13,366,448	10,800,747
May	8,091 120	7,980,281	7,531,300	6,592,157	13,563,551	9,438,747

Summit Branch Railroad Co.

This company is engaged in mining coal, and in operating the Lyken's Valley Railroad.

The year 1867 was not a profitable one among the coal regions of Pennsylvania, and many of the largest collieries have either suspended business or mined at a loss. Notwithstanding the expenses incidental to a new colliery, and many outlays necessary at the start, the Treasurer, in his report, shows a net colliery profit of $110,289 05, and a net railroad profit of $29,805 61.

Say railroad and colliery profit	$140,094 66
Less interest, general management, taxes, etc	58,008 47
Total net profit for year	$84,086 19
Applied toward sinking fund for redemption of bonded debt	25,000 00
Balance to credit of income account for year	$59,086 19
Add balance of December 1, 1866	56,140 87
Leaves balance to credit of income account	$115,227 06

From this amount the expense of new engines, new cars, a new wharf at Delaware City and other expenses are to be deducted. The net earnings for the year were $157,076 48, which have been appropriated as follows:

Construction expenditures	77,179 29	
Less paid with bonds	26,000 00	
		$51,179 29
Expenditures for increased property		42,667 50
Expenditures for Delaware City wharf (additional)		4,833 75
Payment to sinking fund		25,000 00
Net assets per statement		33,395 94
Net earnings for the year		$157,076 48

During the year there have been shipped from the colliery 123,109.3 tons of coal, which have been placed in the railroad at a less cost than is accomplished by any colliery in the State.

The Directors assure the stockholders that the additional experience of each year more conclusively convinces them of the great and increasing permanent intrinsic value of the property of the company, and they believe that no colliery has a greater supply of coal, or of better quality, or can produce it cheaper; and that it is the market only which will regulate and limit their profits.

Bridge over the Missouri River at Omaha.

It has been finally determined that the long talked of bridge across the Missouri river is to be constructed from Council Bluffs to Omaha. The bridge is to cost such an enormous sum, from $2,600,000 to $3,000,000, that no one railway company felt able to build it. Therefore the four railway companies have united in the work—the Union Pacific, Chicago and Northwestern, Chicago and Rock Island, and Chicago and Burlington. The Chicago and Northwestern was inclined to bridge the Missouri north of Omaha, and then strike the Union Pacific Railroad, forty miles west of Omaha. The Rock Island railroad wanted to bridge it south of Omaha, but the cost is so enormous that it was constrained to give up the design.

The Council Bluffs bridge may be constructed in the year 1868. If so it will require on the part of the Northwestern an expenditure of from $700,000 to $750,000. Outsiders can thus understand why the Northwestern passed its usual dividend of seven per cent. on its preferred stock at the last meeting of its directors. The purchase of the Winona and St. Peter Railroad, and the bridge at Omaha will make its treasury lean during the ensuing year. The amount of preferred stock is $15,000,000—a dividend of 7 per cent. would require $1,050,000.—*Milwaukee Wisconsin.*

☞ M. A. Simpson, Esq., of Belfast, Me., has been elected President of the Moosehead Lake Railroad Company.

American Railroad Journal.

Saturday, January 18, 1868.

Stock Exchange and Money Market.

Money has been quite freely offered, all through the week, to responsible borrowers, at gradually yielding rates. The disbursements of January interest and dividends, and the Treasury payments on account of matured loans, especially the loans of 1847-'67, have added largely to the available supply, which has been very considerably in excess of the requirements of the market, for either speculative, or mercantile purposes. Call loans have been quoted at 5@6, and prime to good discounts at 6½@8 per cent. per annum. On Wednesday the leading street houses were offered more money than they could advantageously employ, at 5 per cent. The inquiry for aid has been mainly from the Stock and Gold operators. The mercantile demand has been comparatively moderate. The city banks, last week, added nearly three and a half millions to their loan averages, while reporting an increase of 7¾ millions in deposits, nearly 6¼ millions in their specie hoard, and nearly 1¾ millions in their legal tender reserve. The banks, city, as well as country, have been investing freely in the public funds, particularly in the Five Twenties, the Compound Interest Notes as far as they have been available in round sums, the Seven Thirties, and the new three per cent. certificates, which latter attract increasing attention, as money cheapens in price in the open market. Notwithstanding its heavy disbursements, the Government office shows a moderate augmentation of its cash balances, during the week. Its business, last week, was unusually extensive, over 41 millions having been received and disbursed, in that time. The specie reserve of the city banks is now $19,222,856, against $14,613,477 same time last year. The city bank deposits are now $194,835,525, against $202,517,633 week ending Jan. 12, 1867. The legal tender reserve amounts to $63,753,116, against $63,248,870 same time last year. The circulation now stands at $34,094,137, against $32,825,103 same time last year. The loans are now $253,170,723, against $258,935,488 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $88,980,754 a day, against a daily average of $96,658,261 the preceding week, and $74,856,717 the week ending with Dec. 28. The current week's exchanges average about $113,464,343 a day. The city banks, last week, gained $1,641,915 of legal tender, and $7,764,739 in deposits, and $6,498,242 of specie. They increased their loans, $3,429,426; and reduced their circulation, $40,254.

The Philadelphia Bank movement the past week shows a increase in loans, of $591,403; an increase of $164,708 in specie; a decrease in legal tenders of $744,437; an increase of $510,556 in deposits; and an increase of $93 in circulation. The Bank Clearings show an increase of $4,164,621, and the balances, an increase of $40,999.

National Bank notes to the amount of $150,150 were issued last week, making the total issue to 1,673 banks thus far, $305,711,081, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,883,205, leaving, with the existing 1,639 banks, (having an aggregate capital of $424,894,861,) an actual circulation at this date, of $299,488,016. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,055,550; and for the public deposits, $37,817,950—making a total of $378,873,500. The Treasury Department last week redeemed and destroyed $461,000 of worn and mutilated fractional currency, and issued $1,294,514 of new.

The U. S. Sub-Treasury receipts, week ending with Jan. 11, were $41,441,823, including $1,633,803 from customs duties; payments, $41,181,472, including $3,091,000 of coin interest; balance at the close of the week, $97,825,079, against $97,564,728, at the close of the preceding week, showing an increase of $260,351. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,526,108 including $252,379 from customs; and payments, $2,555,784; on Tuesday, receipts, $1,692,578 including $270,579 from customs, and

payments, $1,571,820. The balance at the close of business on Tuesday stood at $98,917,216, against $97,596,514 a week previous; and $101,683,223 on Dec. 29.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to Jan. 11, was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740.

Government revenues have been more liberal, since our last. The excises have yielded handsomely, and the cusoms have been on the increase. The prospect now is of a steady improvement. The excises, last week, yielded $7,744,307, against $6,251,172, the preceding week; customs at the port of New York $1,633,803, and at the outports, about $550,000 (in coin) more, making the grand total income for the week equal about $10,856,507 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $110,500,000.

Government received $7,194,910 from customs, through the port of San Francisco, from Jan. 1, to Dec. 8, 1867.

An unusually animated speculative movement has been noted in Gold, since our last, stimulated in the main by the various sensational reports from Washington, of political trouble, and currency inflation. The demand has been very brisk, during most of the week, and the price has been carried up from 135⅞ at the opening on the 9th inst., to 142½ at the opening on the 14th, or nearly seven per cent. At the rising, the business transacted has been very extensive, attended by much excitement and feverishness in the Gold Beard. The dealings, late on Tuesday, and all Wednesday of the current week were on a less extensive scale, and much less firmness was discernable in the market. Sales on Wednesday were made as low as 138¼@138⅜, the latest quotations having been 138⅜@138½. The *Cuba* on Wednesday took out $241,000 in specie. The *Hammonia* on Tuesday carried off $16,000. The export demand has been less active, checked in part by the decline in foreign exchange. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $186,158, against $68,411 same time last year. The customs demand for Gold last week, averaged $272,300 a day; thus far, this week, it has been equal to $261,479 a day, or equal to a weekly aggregate of $1,568,874. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $26,608, and from California, none. The total customs revenue of the Government, in coin, at this port, during the calendar year of 1867, was $116,958,654, against $130,222,092 same time in the preceding calendar year. The customs revenue, at the port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $58,928,133, against $65,637,505 same time in the preceding fiscal year. The total receipts of California gold at this port in 1867, was $27,677,556, against $42,740,913 in 1866, showing a decrease in 1867, of $15,063,357. The receipts of California gold, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $16,454,402 against $26,027,398 same time in the preceding fiscal year, showing a decrease of $9,572,906 in 1867–'8. The exports of specie from this port, last week, were $5,537,400, against $1,662,340 same week last year. The exports of specie, hence, since July 1, 1867, have been $32,934,186, against $18,476,610 same time in 1866–'7. The total outflow of specie from the port, in 1867, was $51,841,678, against $62,553,700 in 1866. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $3,091,000, and since July 1, 1867, $42,069,019, against $31,741,463 same time in 1866–'7. The total coin interest disbursements through the Government office, in 1867, was $61,871,348, against $48,680,377 in 1866. The specie exports from San Francisco, from Jan. 1, to Dec. 8, 1867, reached $37,942,265, against $40,851,469 same time in 1866, showing a decrease, in 1867, of $4,289,204.

Increased shipments of produce, and a revival of the export movement in U. S. bonds have added liberally to the supply of foreign exchange, which has been in much less request, and has declined sharply in price, closing tamely and heavily. Bankers' 60 day bills on London closed on Wednesday at 109½@109¾, and on Paris to 5.20@5.15; sight bills on London to 109⅞@110¼, and on Paris to 5.13¼@5.11¼. The offering of produce bills have been fair, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,912,546, against $4,256,658 same week last year; total, since July 1, 1867, $97,555,165, against $102,564,919 same time in 1866–'67. The total value of exports of produce and merchandise in 1867, was $189,688,044, against $192,829,554 in 1866.

Government securities have been decidedly active, since our last. The demand has been brisk from home buyers, and from shippers. The Five-twenties of the several issues have been in most request, those of 1862 and 1865, May and November coupons taking the lead. Prices have advanced materially, though the latest transactions on Wednesday indicated a slight reaction from the highest figures of the week, which were made early on Tuesday. The floating supply of bonds and notes is quite moderate.

U. S. sixes of 1881 closed here on Wednesday at 109⅛@109¾; U. S. Five-twenties of 1862, 109⅛@109¼; U. S. Five-twenties of 1864 at 106¾@107; U. S. Five-twenties of 1865 at 107⅛@107¾; U. S. Five-twenties of 1865, consolidated, 105½@105⅝; U. S. Five-twenties of 1867, 105½@105¾; U. S. Ten-forties at 102½@102⅝, and U. S. Seven-thirties at 105¾@105⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	117⅜	September, 1865	116
August, 1865	116⅜	October, 1865	115¾

U. S. three per cent. certificates 100⅛

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Dec. 31.	Jan. 8.	Jan. 15.
Consols	92	92¼	92½
U. S. 5-20's of 1862	72⅛	71⅞	71¼
Erie	48¾	48¾	48
Ill. Central	89¾	88½	*84¾

* Ex-dividend.

Railway and miscellaneous share property has been quite variable, since our last. The opening transactions were on an extensive scale at higher and buoyant prices; but the business of Tuesday and Wednesday was much restricted in volume, and on a decidedly less confident basis, as regards price, the market closed tame and weak.

General business has been less active, since our last, the violent fluctuations in gold having had the effect of unsettling commercial values. Breadstuffs have been in comparatively limited request, and have been on the decline. The export call has been checked by the rise in rates on ocean freight. Provisions have been moderately dealt in at variable prices. Petroleum has been in rather more demand, especially bonded, which has been quoted firmer. The receipts of petroleum at this port, last year, were equal to 1,353,634 bbls.; exports hence, equal to 845,853 bbls.; home consumption, 469,297 bbls., stock Jan. 1, 80,503 bbls. Cotton has been less active, closing heavily at 16¼@16½ cents for middling uplands, per lb. The stock of cotton now here is estimated at about 62,500 bales. The receipts at the port this week, have averaged about 4,500 bales a day. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 957,000 bales, against 843,000 bales same time last year; exports, same time, 515,000 bales, against 858,800 bales same time last year; stock on hand at latest dates, 342,000 bales, against 535,000 bales same date last year. Beeves have been more active this week, and a shade firmer in price, the range having been from 12@20; receipts, 4,756. Veal calves in fair request, and firm at 9@13½c.; receipts, 662. Sheep and lambs active and higher, the former bringing from 4½@8¼, and the latter from 5@8¼; receipts, 18,506. Swine have been moderately inquired for at from 7⅝@8c. per lb., all live weight; receipts, 7,611. The aggregate receipts of live stock at the market, in and near this city, last year, were 293,332 beeves, 3,369 milch cows, 69,941 calves, 1,174,154 sheep and lambs, and 1,102,643 hogs. In numbers there is a falling off of 5,000 beeves from last year, but this deficiency is much more than made up by the large increase of sheep and hogs, the gain being 143,533 of the former, and 436,251 of the latter. Ten years ago the annual receipts were 162,243 beeves, 12,848 fresh cows, 34,218 calves, 444,036 sheep, and 942,321 hogs, showing that a great change has taken place in these markets. The cost of the live animals sent here during the past year for slaughtering, as purchased by the butcher, amounted to $48,619,708, computed as follows: 293,832 beeves, 6 cwt., net each at 15½c. per lb., $27,032,544; 1,102,643 hogs of 185 lbs. average weight, at 7 1.5c. per lb., $14,687,204; 1,171,154 sheep and lambs of 75 lbs. each, at 7 1.5c. per lb., $6,840,482; 69,941 calves, at $8 each, $559,528; then 3,369 fresh cows which take the places of so many sent to the butcher, at $70 each, $235,830. Foreign merchandise has been lightly dealt in, as a rule. Groceries have been generally quiet, coffee

having been most in demand. The total receipts of coffee in the United States for the year ending December 31, 1867, were 1,537,930 pkgs., weighing 226,322,811 lb., against receipts in 1866 of 1,174,388 pkgs., weighing 165,892,983 lb., and the total consumption in 1867 was 203,506,671 lb., against a consumption in 1866 of 159,918,881 lb., being an increase of 43,587,790 lb., or over 27¼ per cent. The total receipts of foreign raw sugar into the United States, exclusive of the States and Territories on the Pacific, for the year ending Dec. 31, 1867, were 355,801 tons, against receipts in 1866 of 403,497 tons; while the consumption of foreign in 1867 was 378,068 tons, against a consumption of foreign in 1866 of 383,178 tons, and the total consumption of foreign and domestic cane sugar in 1867, was 400,568 tons, against a total consumption in 1866 of 391,678 tons. The imports of foreign wool into this port last year were 37,547 bales, weighing 18,364,010 lbs., and valued at $8,040,623, against 58,890 bales, weighing 36,167,993 lbs., and valued at $5,215,075, in 1866. Dry goods have been quiet, but comparatively firm, in the instance of desirable fabrics. The total imports of foreign dry goods, last week, were $974,688, and the total amount marketed $967,413. The value of foreign merchandise imported last week, was $2,481,375—making the grand total specie value of last week's imports of dry goods and merchandise, $3,456,063, against $7,062,192, same week last year; total since July 1, 1867, $120,878,454, against $146,041,548 same time in 1866-'67. The aggregate for the year 1867, was $242,478,575 against $277,043,050 in 1866. The ocean freight market has been fairly active and decidedly buoyant since our last. For Liverpool we quote flour at 2s. 3d. @2s. 6d. per bbl.; grain at 7c.@8c. per bushel; cotton at ⅜@ 7/16d. per lb.; and heavy goods at 20s.@40s. per ton, all by sailing vessel. Total number of vessels in port on Wednesday 489.

The New York exports, exclusive of specie, for the week ending Jan. 14, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$4,256,658	$3,912,516
Prev. reported.....	3,716,624	2,500,234
Since January 1.....	$7,973,282	$6,412,780

The balance in the Sub-Treasury on Wednesday was $101,028,859 50.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Minnesota Valley Railroad has a large force of men at work between La Sueur and Ottawa, and it is expected that the cars will reach Ottawa early in the spring.

Railroad Earnings.--Weekly.

The earnings of the Atlantic and Great Western Railway for the first week in Jan., 1868, were $85,245 00
Corresponding week previous year 78,618 00

Increase $6,627 00

The earnings of the Chicago and Alton Railroad for the first week in January, 1868, were $56,285 58
Corresponding period previous year .. 52,427 11

Increase $3,858 47

The earnings of the Toledo, Wabash and Western Railroad for the 1st week of Jan., 1868, were $59,950 12
Same week in 1866 ..... 52,926 09

Increase $7,024 03

The earnings of the Chicago and Rock Island Railroad for the first week in January, 1868, were $79,100 00
Corresponding week of previous year .. 81,136 00

Decrease $2,036 00

The earnings of the Chicago and Northwestern Railroad for 1st week in Jan., 1868... $171,376 52
Corresponding week previous year .. 168,684 44

Increase $2,692 08

The earnings of the Detroit and Milwaukee Railroad for the week ending January 9, 1868, were $23,086 00
Corresponding week of 1867 ..... 23,124 00

Decrease $38 00

The earnings of the Marietta and Cincinnati Railroad the 1st week in Jan., 1868... $25,069 00
Corresponding week previous year 24,856 00

Increase $213 00

The earnings of the Michigan Central Railroad for the 1st week in Jan., 1868, were.. $75,438 14
Corresponding week of previous year .. 75,113 33

Increase $324 81

The earnings of the Western Union Railroad for the 1st week in Jan., 1868 ..... $9,193 76
Corresponding week previous year 9,792 02

Decrease $598 26

Milwaukee and Prairie du Chien Railway.

On the 31st of December last, the long contemplated sale and transfer of the Milwaukee and Prairie du Chien Railway to the Milwaukee and St. Paul Railway Company, was consummated. A majority of the shares of stock of the Prairie du Chien Company has been for some time owned by the latter company, but the transfer and change of name did not fully take place until the above date. The road will hereafter be known as the Prairie du Chien Division of the Milwaukee and St. Paul Railway. The *Wisconsin* says that no change will take place in the present management or operations of the road. The change being simply one of name and convenience.

Paterson and Newark Railroad.

The engineer of this railroad has been in Paterson trying to arrange with the property owners along the proposed line of the road for the land needed. As soon as he can complete the neces sary arrangements the contractors will begin work at once at that end of the road. The Paterson *Press* learns that a portion of the right-of-way has been already secured, and work will be begun at once near the plank road, and at eight other places, giving employment to from fifty to ninety men.

A Remarkable Mechanical Invention—A Steam Man.

Mr. Zadock Deddrick, a Newark machinist, has invented a man; one that, moved by steam, will perform some of the most important functions of humanity; that will, standing upright, walk or run, as he is bid, in any direction and at almost any rate of speed, drawing after him a load whose weight would tax the strength of three stout draught horses.

The man stands seven feet and nine inches high, the other dimensions of the body being correctly proportioned, making him a second Daniel Lambert, by which name he is facetiously spoken of among the workmen. He weighs five hundred pounds. Steam is generated in the body or trunk which is nothing but a three-horse power engine, like those used in our steam fire engines. The legs which support it are complicated and wonderful. The steps are taken very naturally and quite easily. As the body is thrown forward upon the advanced foot the other is lifted from the ground by a spring and thrown forward by the steam. Each step or pace advances the body two feet and every revolution of the engine produces four paces. As the engine is capable of making more than a thousand revolutions a minute it would get over the ground, on this calculation, at the rate of a little more than a mile a minute. As this would be working the legs faster than would be safe on uneven ground or on Broad street cobble stones it is proposed to run the engine at the rate of five hundred revolutions per minute, which would walk the man at the modest speed of half a mile a minute.

The fellow is attached to a common Rockaway carriage, the shafts of which serve to support him in a vertical position. These shafts are two bars of iron, fastened in the usual manner to the front of the carriage and are curved so as to be joined to a circular sustaining bar, which passes around the waist, like a girth, and in which the man moves so as to face in any direction. Besides these motions machinery has been arranged by which the figure can be thrown backward or forward from a vertical nearly forty-five degrees. This is done in order to enable it to ascend or descend all grades. To the soles of the feet spikes or corks are fixed which effectually prevent slipping. The whole affair is so firmly sustained by the shafts and has so excellent a foothold that two men are unable to push it over, or in any way throw it down. In order to enable it to stop quickly, it is provided with two appliances, one of which will, as before stated, throw it backward from the vertical, while the other bends the knees in a direction opposite to the natural position.

An upright post, which is arranged in front of the dash-board, and within easy reach of the front seats, sustains two minature pilot wheels, by the turning of which these various motions and evolutions are directed. It is expected that a sufficiently large amount of coal can be stowed away under the back seat of the carriage to work the engine for a day, and enough water in a tank under the front seat to last half a day.

In order to prevent the "giant" from frightening horses by its wonderful appearance, Mr. Deddrick intends to clothe it and give it as nearly as possible a likeness to the rest of humanity. The boiler and such parts as are unnecessarily heated will be encased in felt or woolen undergarments. Pantaloons, coat and vest, of the latest styles, are provided. Whenever the fires need coaling, which is every two or three hours, the driver stops the machine, descends from his seat, unbuttons "Daniels" vest, opens a door, shovels in the fuel, buttons up the vest and drives on. On the back between the shoulders the steam cocks and gauges are placed. As these would cause the coat to set awkwardly a knapsack has been provided that completely covers them. A blanket neatly rolled up and placed on top of the knapsack perfects the delusion. The face is moulded into a cheerful countenance of white enamel, which contrasts well with the dark hair and moustache. A sheet iron hat with a gauge top acts as a smoke stack.

The cost of this "first man" is $2,000, though the makers, Messrs Deddrick & Grass, expect to manufacture succeeding ones, warranted to run a year without repairs, for $300. The same parties expect to construct, on the same principle, horses which will do the duty of ten or twelve ordinary animals of the same species. These, it is confidently believed, can be used alike before carriages, street cars and ploughs. The man now constructed can make his way without difficulty over any irregular surface whose ruts and stones are not more than nine inches below or above the level of the road.—*Newark (N. J.) Advertiser.*

Troy and Greenfield Railroad and Hoosac Tunnel.

In my communication to the Legislature one year ago, I stated that under direction of Chapter two hundred and ninety-three of the Acts of 1866 the construction of the railroad between Greenfield and the Tunnel had been contracted, and that a lease of the same had been executed under the approval of the Executive Council. The road has now been completed as far as Shelburne Falls, a distance of thirteen miles, and the corporation's lessees have commenced the running of regular trains. It was formally opened two months ago, and the great attendance of people, and the deep interest manifested by them in the first advent of the locomotive into the valley of the Deerfield, afforded striking proof of the value fixed by the whole population of the Northwestern portion of the State upon their new connection with general commerce. The remaining portion of the line, extending from the Falls to the mountain, seventeen miles in length, will be finished in the next summer, and will constitute the completion of a road of thirty miles, built at a fair cost and holding a strong relation to the interests of the whole public.

The progress of the work upon the Tunnel itself, though prosecuted at some points under adverse circumstances, has as a whole been highly encouraging for the future. During the year a contract was made with three experienced men for work on the Central Shaft, and the East End, but after a sufficient trial it appeared that the parties would be unable to execute the same, and the relinquishment of it was accepted by the Governor and Council, and operations at those points were resumed by the State.

The prosecution of the work at the Central Shaft was arrested in October by the destruction of the buildings and machinery by fire, which was also attended by a lamentable loss of human life. Measures have been commenced for the earliest replacement of the fixtures, and for the continuance of that excavation. Notwithstanding this and other drawbacks, there was at this point in a period of twelve months an increase of progress over the preceding, of seventy-six feet.

At the West End, which, under a policy initiated by Mr. Brooks, the former chairman of the Commssioners, has been worked upon the contract system for nearly a year and a half by the very efficient contractor, there has been a good advance and reasonable success. The original contract has been repeated upon terms more favorable to the State, and its execution promises every anticipated result.

At the West Shaft, upon the two linear headings, there has been a decrease of advance, compared with the corresponding months of the previous year, of one hundred and twelve feet. This loss has come from the great influx of water, without a pumping capacity to dispose of it. A policy in this particular, intended for economy, has in my judgment been found to be erroneous, and I cannot doubt that it would have been a true economy to have provided one year ago, at a greater expense, for larger and more efficient pumps. But the knowledge of present difficulties has now prepared the Commissioners to meet them with a proper application of power to overcome them. The obstacle of water can be and will be overcome, and a rate of advance corresponding to the prosperous results realized at the East End may be expected.

At the East End the linear advance has been within the year one thousand and fifty-one feet, showing an increase over the previous year of four hundred and fifty-nine feet. The drills have proved an entire success, and this class of machines will be soon introduced into the West Shaft, where they should accomplish similar results.

The Report of the Commissioners and that of the consulting Engineer, will be transmitted to the Legislature at an early day. The consulting Engineer, Mr. Benjamin H. Latrobe, has, during the year, visited the Tunnel of the Alps, and has presented in his report a variety of facts learned there which will be found to possess much interest. That great work has now proceeded nearly twenty-five thousand linear feet, leaving fifteen thousand yet to be accomplished. That enterprise, like our own, was beset with many difficulties in its earlier stages; but by a constantly accelerating progress from year to year, it has attained a result of nearly four thousand feet in nine months preceding last October. After weighing carefully all the unfavorable as well as the favorable circumstances which surround our own work, it is my firm belief that a similar acceleration may be expected here; and that this undertaking can be finished within the time and cost estimated by Mr. Latrobe in his report for 1866, which will be found stated in my last address to the two Houses.—*Extract from the Message of the Governor of Massachusetts.*

Fitchburg Railroad.

The receipts of this road for the years ending November 30, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$428,290 44	$440,734 10
" freight	627,642 15	600,043 33
" mails	101,000 00	10,000 00
" rents	6,044 34	6,840 42
" interest	18,275 35	26,553 58
" express	17,192 05	17,272 40
	$1,107,444 83	$1,101,443 83
Expenses, viz:		
Repairs of road	$107,691 89	$118,665 07
" locomotives	102,340 84	97,745 24
" structures	76,158 80	47,894 88
" bridges	13,277 68	13,588 36
" cars	68,827 36	91,767 85
Fuel	97,632 08	91,749 47
Oil and waste	12,048 55	9,241 23
Freight expenses	97,098 05	101,230 19
Passenger "	50,077 58	53,219 89
Switchmen, watchmen and gate keepers	15,862 06	17,556 34
Removing ice and snow	1,069 04	7,120 30
Taxes and insurance	70,460 53	76,268 87
Gratuities and damages	83,668 70	7,193 31
Salaries, and office and expenses	13,993 73	13,513 53
Total expenses	$760,198 89	$746,699 53
Net earnings	$347,247 44	$354,744 30
	1866.	1867.
Number of passengers carried in the cars	1,368,356	1,535,097
Do. carried one mile	18,848,202	19,820,919
Number of tons of merchandise carried	512,874	511,488
Do. carried one mile	14,490,578	14,268,518
Number of miles run by locomotives	477,106	505,332

The foregoing statements show a decrease in gross receipts for the year, as compared with the preceding year, of $6,000 50; with a decrease in expenses of $13,497 36—making an increase in net earnings of $7,496 86.

The increase in number of passengers carried, is 166,741; in passengers carried one mile, 972,717; and in receipts from passengers, $12,443 66.

The decrease in tons of merchandize carried is 1,386; in tons carried one mile, 222,060; and in receipts from mdze., $27,598 82.

The company have 31 locomotives, 33 passenger cars, 10 baggage cars, 348 eight-wheel and 298 four-wheel merchandize cars, and 36 gravel cars. This shows an increase of 2 locomotives, 4 passenger, 1 baggage, 25 mdze., and 5 gravel cars.

The assets of the corporation on the 30th of November last, were as follows:

Notes receivable		$459,408 39
Cash and cash funds		103,703 52
U. S., for mail service		1,454 89
		$564 566 80
The liabilities were:		
Renewal fund	$14,534 19	
Balance due connecting railroads	84,013 41	
Unclaimed dividends	10,476 00	
Unclaimed State tax	50 56	
		109,074 16
Excess of assets		$455,492 64

This sum is in cash or in funds equivalent thereto, and after the payment of the present January dividend, (which, with the U. S. tax thereon, amounts to $149,052 65,) there will still remain a surplus of $306,439 99.

The company have other property valued at $8,144, also fuel, iron, lumber and other materials necessary for repairs, which at a low valuation are worth $70,916 34. This property and material have been paid for, but are not included in the assets.

TRIAL BALANCE, NOV. 30, 1867.

President.—WM. B. STEARNS.

Directors.—Wm. B. Stearns, Alvah Crocker, W. E. Falkner, P. B. Brigham, W. A. Brigham.

Treasurer.—M. D. BENSON.

Des Moines Valley Railroad.

The new line *via* the Chicago, Burlington and Quincy to Bushnell, thence *via* the Toledo, Peoria and Warsaw Railroad to Keokuk, was opened to public traffic and travel on the 1st inst. At Keokuk this route connects with the Des Moines Valley road running through one of the most prolific, agricultural and business sections of Iowa, thus furnishing another favorable outlet for the products of that State *via* Chicago to Eastern markets. The Des Moines Valley road is in the hands of efficient and experienced men, and its general management gives great satisfaction to the people all along its line.

☞ The following gentleman have been elected directors of the Baltimore City Passenger Railway, for the ensuing year: Henry Tyson, President, Thos. M. Smith, Wm. Kennedy, Thos. Whitridge, G. D. Clark, E. B. Edwards and C. L. Grove.

Warwick Valley Railroad.

This road is 10.33 miles in length, extending from Warwick to Greycourt, a point on the Erie Railway, 54 miles from Jersey City. It is operated under contract by the Erie Railway Co., but not leased. The gauge of the road is six feet. Weight of rail per yard, 50 lbs.

The following is a comparative statement of the receipts and expenditures of this road for the fiscal year ending September 30, 1866 and 1867:

Receipts:	1866.	1867.
From passengers	$10,285 57	$11,068 17
" freight	37,301 95	38,217 38
" mail, express, etc.	1,803 66	2,344 64
Totals	$49,391 18	$51,630 19
Expenses, viz:		
Repairs of road	$5,616 35	$8,572 67
" buildings, etc	325 00	489 95
Taxes, including U. S. revenue tax	2,594 56	2,137 30
Operating expenses	4,709 52	4,969 44
Paid Erie Railway	14,388 69	14,865 00
Interest	5,949 87	5,735 69
Dividends, 8 per cent	7,912 50	7,920 00
Payments to surplus fund	7,894 78	6,940 34
Totals, as above	$49,391 18	$51,630 19
	1866.	1867.
Miles run by trains	19,820	19,880
Number of passengers carried	41,486	44,618
Do. carried one mile	311,145	343,461
Tons of freight carried	17,590	19,675

Capital stock authorized by charter, $150,000; amount subscribed, $101,500; amount paid, $98,650. Funded debt, $85,000.

Pres't and Sup't.—G. BURT.

Treasurer and Secretary.—J. L. WELLING.

To Contractors.

The Peninsular Railway Extension Company will receive proposals at their office in Battle Creek, Michigan, until the 27th inst., for clearing, grubbing, grading, bridging, culverts, cattle guards, farm and road crossings of the railroad of the company between Battle Creek and the Indiana State Line. Parties are requested to make their bids on fifteen miles, on the west end of the line, and on consecutive sections of five miles each, and upon the entire line. Address L. D. Dibble, Esq., President.

Little Rock and Fort Smith Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: Jesse Turner, A. J. Ward, H. F. Thompson, W. P. Denckla, C. G. Scott, J. M. Tebbetts, M. Rose, J. L. Shinn and J. P. King. The Van Buren (Ark.) *Press* says that "the affairs of the company seem now to be in a flourishing condition, and the prospects for the building of the road more hopeful than ever. Mr. J. H. Haney, the special agent of the company, who has lately returned from New York, informs us that he has accepted a proposition made by certain parties who are able to build the road, and will do so upon certain specified conditions. Some legislation will be necessary and the several counties along the line will be required to subscribe to the stock of the company to the aggregate amount of $500,000, payable in seven per cent. bonds, which will be accepted as pay by the contractors in lieu of cash."

☞ We learn that the contractors who have undertaken to build the Memphis and Little Rock road, are now in Memphis, making arrangements to commence work on the road.

Western Central Railroad.

A certificate incorporating the "Western Central Railroad Company," has been filed in the office of the Secretary of State for the State of Ohio. The object being the construction of a new and important line of road to commence at West Salem, Wayne Co., Ohio to run through Indiana, forming direct communication with the great route to the Pacific, and also a more direct communication with Chicago. The company was organized at Bucyrus on the 18th ult. The incorporators are as follows: Hon. T. J. Godfrey, Celina, O.; Hon. Wm. Sawyer, St. Mary's, O.; Col. Geo. W. Andrews, Wapakonetta, O.; Gen. J. S. Robinson, Kenton, O.; Dr. W. Merriman, W. M. Scroggs and E. B. Finley, Bucyrus, O.; John Dempsey, Shelby, O. The incorporation of the Indiana portion of the line has not yet been perfected, but this, it is believed, will be done without delay.

☞ Thirty miles of the Walkill Valley Railroad have been contracted for by Mr. Randall at a cost of $390,000. The road commences at the Montgomery terminus of the M. and E. Railroad, and runs north through Walden, in Orange County, and Shawangunk Village, in Ulster County, to Tuthill Hill.

☞ It is stated that Col. John Severance has taken the contract to build the St. Joseph and Denver railroad to Troy, Kansas, the work to be commenced immediately.

540 MILES

OF THE

Union Pacific Railroad

Running West from Omaha

Across the Continent,

ARE NOW COMPLETED.

THE TRACK BEING LAID AND TRAINS RUNNING

WITHIN TEN MILES OF THE SUMMIT OF THE ROCKY MOUNTAINS.

The remaining ten miles will be finished as soon as the weather permits the road-bed to be sufficiently packed to receive the rails. The work continues to be pushed forward in the rock cuttings on the western slope with unabated energy, and a much larger force will be employed during the current year than ever before. The prospect that the whole

GRAND LINE TO THE PACIFIC

WILL BE COMPLETED IN 1870,

was never better. The means so far provided for construction have proved ample, and there is no lack of funds for the most vigorous prosecution of the enterprise. These means are divided into four classes:

1.—UNITED STATES BONDS,

Having thirty years to run, and bearing six per cent. currency interest, at the rate of $16,000 per mile for 517 miles on the Plains; then at rate of $48,000 per mile for 150 miles through the Rocky Mountains; then at the rate of $32,000 per mile for the remaining distance, for which the United States takes a *second lien* as security. The interest on these Bonds is paid by the United States government, which also pays the Company one-half the amount of its bills in money for transporting its freight, troops, mails, &c. The remaining half of these bills is placed to the Company's credit, and forms a sinking fund which may finally discharge the whole amount of this lien.

2.—FIRST MORTGAGE BONDS.

By its charter the Company is permitted to issue its own First Mortgage Bonds to the same amount as the bonds issued by the government, and *no more, and only as the road progresses.* The Trustees for the Bondholders, are the Hon. E. D. Morgan, U. S. Senator from New York, and the Hon. Oakes Ames, Member of the U. S. House of Representatives, who are responsible for the delivery of these Bonds to the Company in accordance with the terms of the law.

3.—THE LAND GRANT.

The Union Pacific Railroad Company has a land grant or absolute *donation* from the government of 12,800 acres to the mile on the line of the road, which will not be worth less than $1.50 per acre, at the lowest valuation.

4.—THE CAPITAL STOCK.

The authorized capital of the Union Pacific Railroad Company is $100,000,000, of which $8,500,000 have been paid on the work already done.

The Means Sufficient to Build the Road.

Contracts for the entire work of building 914 miles of first-class railroad west from Omaha, comprising much of the most difficult mountain work, and embracing every expense except surveying, have been made with responsible parties, (who have already finished over 540 miles), at the average rate of sixty-eight thousand and fifty-eight dollars ($68,058) per mile. This price includes all necessary shops for construction and repairs of cars, depots, stations, and all other incidental buildings, and also locomotives, passenger, baggage, and freight cars, and other requisite rolling stock, to an amount that shall not be less than $5,000 per mile. Allowing the cost of the remaining one hundred and eighty-six of the eleven hundred miles assumed to be built by the Union Pacific Company to be $90,000 per mile,

The Total Cost of Eleven Hundred Miles will be as follows:

914 miles, at $68,058	$62,206,012
186 miles, at $90,000	16,740,000
Add discounts on bonds, surveys, &c.	4,500,000
Amount	$83,446,012

As the U. S. Bonds are equal to money, and the Company's own First Mortgage Bonds have a ready market, we have as the

Available Cash Resources for Building Eleven Hundred Miles:

U. S. Bonds	$29,323,000
First Mortgage Bonds	29,328,000
Capital Stock paid in on the work now done	8,500,000
Land Grant, 14,080,000 acres, at $1.50 per acre	21,120,000
Total	$88,276,000

The Company have ample facilities for supplying any deficiency that may arise in means for construction. This may be done wholly or in part by additional subscriptions to capital stock.

EARNINGS OF THE COMPANY.

At present, the profits of the company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a *Government Work*, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

First Mortgage Bonds

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent. lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment, and have thirty years to run before maturity. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,
HENRY CLEWS & CO., Bankers, No. 32 Wall st.,
HEDDEN, WINCHESTER & CO., Bankers, No. 69 Broadway.

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.

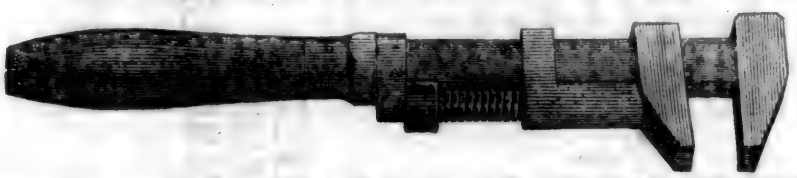
TO RAILROAD CAR BUILDERS AND OTHERS.

The undersigned, being the duly authorized Agent in the United States for the sale of **PEACOCK & BUCHAN'S CELEBRATED AND APPROVED PAINT COMPOSITIONS,** Nos. 1, 2, 3, and 4, solely manufactured in Southampton, England, invites the attention of Railroad car builders, owners and others to the PAINT COMPOSITION No. 3, IN ALL COLORS AND TINTS. It is hermetically soldered up in convenient sized tins of 7 lbs., 14 lbs., and 28 lbs. each, and warranted to keep good in any climate for many years. Being MIXED READY FOR IMMEDIATE USE, it will be found of great advantage, as it can be packed away like preserved meats, and will not deteriorate. It has been opened after TEN YEARS and found to be quite good and READY FOR USE. Being ground first on roller mills of polished granite, and then of burnished steel, by steam power, it is as fine as artist's color, and is applicable to the first-class Railroad Car, Counting House, or Drawing-Room, or the cabin of the yacht, steamer, or sailing ship—each tin forming a ready Paint Pot. It dries in a few hours, with a beautiful brilliant surface, without any stickiness or unpleasant smell, and stands longer than ordinary paint—never blistering, cracking, or flaking. IT IS GENERALLY ADOPTED BY THE CHIEF RAILWAY COMPANIES OF EUROPE, AND IS **CHEAPER AND BETTER THAN ANY OTHER** PAINT IN THE MARKET.

L. MORTON MONTGOMERY, Agent and Importer,
Office 27, Nos. 40 & 42 BROADWAY, N. Y.

PLASTIC SLATE ROOFING
JOINT STOCK COMPANY.
OFFICE 167 (Room 19) BROADWAY,
NEW YORK.
W. C. POTTER, Vice Pres't.
J. M. ALLEN, Sec. and Treas. **LICENSES GRANTED.**

PLASTIC SLATE
FOR
Roofing & Other Purposes.
The process of reconstructing Slate Stone from a disintegrated state was
PATENTED FEBRUARY 21st, 1865.
It is a combination of
Pulverized Slate and Viscous Matter,
(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature.
As a Roofing Material it Stands Unrivalled.
A mastic—it adapts itself to every shape and slope. Non-combustible, impervious, non-expansive, and undecaying.
Frost does not Crack nor Heat Dissolve it.
The only roofing material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little, if any wear, from exposure, and
Perfectly Fire-Proof,
It is unequalled as a coating for Railroad and Farm Buildings, Fences, Bridges, bottoms of Vessels, Vaults, etc.



ESTABLISHED IN 1836.

THOMAS E. WALKER, Treasurer.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.
THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address
COLLINS & CO., 212 Water Street, New York.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—
1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. **Sent free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.		SHEET No	
1.	General Table for all Bases and all Slopes.	13. for Base 18 ft. Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.	14. " " 20 "	1½ to 1
3.	Base 18 ft. Slopes 1½ to 1	15. " " 24 "	1½ to 1
4.	" 14 " 1½ to 1	16. " " 25 "	1½ to 1
5.	" 15 " ½ to 1	17. " " 26 "	1½ to 1
6.	" 15 " 1 to 1	18. " " 28 "	½ to 1
7.	" 16 " 1½ to 1	19. " " 30 "	1 to 1
8.	" 16 " ½ to 1	20. " " 30 "	1½ to 1
9.	" 16 " 1 to 1	21. " " 32 "	1½ to 1
10.	" 18 " ½ to 1	22. " " 32 "	1 to 1
11.	" 18 " 1 to 1	23. " " 34 "	1½ to 1
12.	" 18 " 1 to 1		

The Tables are printed in clear, bold type on tinted paper, sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.
Sent, free by mail, in separate sheets, at **25c.** each.

American Railroad Journal.

New York, Saturday, January 25, 1868.

Dunleith and Dubuque Bridge.

The Iron Railroad Bridge across the Mississippi River at Dubuque, Iowa, has been let to the Keystone Bridge Company of Pittsbugh, Penn. All of the prominent bridge builders submitted plans and estimates and the competition was quite spirited, several of the bids being within a trifle of each other; but after careful consideration, the "Linville & Piper" patent truss which has given such perfect satisfaction upon the Pennsylvania, Steubenville, and other leading lines where it has been used, was adopted.

The entire bridge is to consist of a draw or "pivot" span of 360 feet, 2 spans adjacent thereto of 250 feet each, and 4 spans of 225 feet—in all 1,760 feet.

The contracting parties at first decided to select the plan submitted by the Keystone Bridge Company, in which the top chord was composed of *cast* iron, but subsequent investigation of the superior merits of their entire wrought iron truss bridge, embracing their patent swelled wrought iron posts, upset weldless chord links, and all of their more recent improvements, induced them to incur the additional expense and contract for the latter. To the Dubuque and Dunleith Bridge Co., therefore, will belong the honor of first putting across the Mississippi an entire wrought iron bridge, those now building for the Chicago, Burlington and Quincy Railroad Company being of cast and wrought iron combined.

It is said that the contractors have been offered a very handsome bonus for every day saved previous to January 1st, 1869, at which date they have agreed to have the bridge completed and ready for traffic.

We also learn that the contract for the construction of the bridge across the Missouri at Kansas City has been let to this company and that the construction of it is now well under way. It will consist of a span of 360 feet, and a span of 70 feet entirely of wrought iron, one span of 250 feet, two spans of 200 feet, one span of 180 feet, and one span of 130 feet constructed of combined wood and wrought iron upon the "double triangular truss" principle.

Dutchess and Columbia Railroad.

The farmers, manufacturers, and other business men residing in central Dutchess County having long observed that their more favored friends along the lines of the Harlem and Hudson River Railronds were rapidly accumulating wealth by means of the business facilities afforded by their proximity to those avenues to market, in which they could not participate in consequence of having to transport their products an average distance of 12 miles, over high ridges, to the railroad stations, determined to have a railroad of their own, to pass near their own doors. They had a sufficient general knowledge of the shape of the country to satisfy them that as there were fine valleys extending from the northern part of the county to the southern, and that a railroad could be cheaply constructed. Engineers were accordingly procured, the line carefully surveyed and located, and a company organized under the name of the Dutchess and Columbia Railroad Co., under the General Railroad Law of the State; the road to have its northern terminus in Columbia County, and its southern on the Hudson River at or near Denning's Point. Meetings were held in each town through which the proposed road would run, and books of subscription were opened. The farmers, and others along the line, subscribed about $500,000, and outside capitalists gave nearly $300,000 more. The road in Dutchess County was put under construction from a point in the town of Pine Plains, a short distance south of the Columbia County line, to its terminus on the Hudson River, near Denning's Point and Fishkill Landing, a distance of 43 miles. The company mean to extend their line northwardly into Columbia County to some point hereafter to be controlled by local subscriptions and other considerations. Surveys have also been made from the Pine Plains portion of the Dutchess and Columbia Railroad eastwardly through Millerton and northern Connecticut, passing through the important towns of Lakeville, Salisbury, Canaan, Norfolk, Winsted, New Hartford and Collinsville, and thence to Springfield, Mass., there to connect with the Western Railroad, and form the shortest line of railroad from Boston to the Hudson River at Fishkill. At Collinsville, a branch of a few miles will connect Hartford with this important route, and give that city as favorable a railroad connection with the Hudson River as any presented to their choice. About 500 laborers are now cutting down the hills and filling up the hollows along the Dutchess and Columbia Railroad line, and it is evident that before the summer is over the grading will be ready for the track, the iron for which has already been purchased, and the cars running through the centre of Dutchess County before another Winter.

Fort Scott and Santa Fe Railroad.

The survey of the line of this road has recently been completed by Col. A. Vleit, Engineer, of Fort Scott to the mouth of the Little Arkansas, a distance of over two hundred miles. On the line of his survey he touched the towns of Humboldt, Eureka, El Dorado, and Towanda. He also surveyed a line from Fort Scott to Iola. Col. V. thinks the route compares most favorably with any other proposed railroad in the State.

☞ The work on the Union Pacific Railroad is being vigorously pushed forward, and the construction train is now run almost to the summit of the Black Hills. The road will be finished to Saunders by the last of May.

Vermont and Massachusetts Railroad.

The earnings of this road for the years ending November 30, 1866 and 1867, were:

	1866.	1867.
From passengers	$146,682 45	$151,962 72
From freight	233,391 30	248,162 99
From Cheshire R.R. Co., for joint use of road from Fitchburg to Ashburnham, and of engine house, water, station buildings, and services performed at Fitchburg and other stations	39,000 00	39,000 00
From U. S. mails	6,000 00	6,000 00
From expresses	5,487 54	8,761 83
From rents	3,984 83	6,114 05

Rent to Conn. River R. R.	1,500 00	1,500 00
Loss and damage	2,229 16	3,498 23
Taxes and insurance	4,165 66	5,755 55
Salaries	7,550 00	8,175 00
United States tax	9,724 94	3,762 18
State tax	14,977 41	20,837 70
All other expenses	11,983 29	9,722 66
Totals	$295,321 63	$398,829 13
Earnings less expenses	$140,643 64	$62,594 68
Interest account	28,824 14	28,480 81
Balance	$111,819 50	$34,114 87

Compared with the previous year the gross earnings of 1867 show an increase of $25,458 54; with an increase in expenses of $103,507 50—making a decrease in net earnings of $78,048 96.

The report says:

The gross earnings of the past year are the largest of any year since the road went into operation; but owing to the large expenditures on the road during the year, the net earnings appear small. Notwithstanding this apparent decrease of net income, our business of the year has been prosperous and increasing, and our property has been increased in value and efficiency. It will be seen at once that the increased expenditures have generally been in those items which add a permanent value to the road, and are not lost because charged to expense account. We have expended a large amount for permanent improvements, and rolling stock for future use, which will diminish the amount of current expenses hereafter, we hope. At Brattleborough, we have built a new engine house, water works and turn table, at a cost of $12,546 59. At Fitchburg, a new turn table, with its masonry, and enlarged offices, at a cost of about $3,000. At Ashburnham, with the Cheshire road, a turn table, at a cost of $1,419 76. New freight cars, $7,800. New turn outs, &c., at Brattleborough and Greenfield, at $8,201 90. New locomotive, $15,000. Cost of building another in our shop, (not yet completed,) $8,000. Two new passenger cars $9,540. Arch beams in the Connecticut River Bridge and Deerfield River Bridge, $5,000. These expenditures, amounting to $65,508 25, are for the most part, over and above the ordinary repairs, and are all charged to current expenses.

We have also built 179 feet of short bridges, 282 feet of new wood shed, and four miles of new board fence. We have laid down in our track 800 tons of new rails.

We have made these expenditures under the belief that it is good economy to be liberally prepared in advance for the wants of our steadily increasing business, not forgetting the demands which the extended road to Shelburne Falls will soon make upon us. That road is now completed to that enterprising town, and we are prepared to run it as soon as it is delivered to us, under the joint lease from the Commonwealth to the Fitchburg Railroad Company and our company.

We suffered a heavy loss, to the extent of nearly $20,000, by the washing of our road during the tornado and water spout at Northfield, on Friday, the 7th day of June, 1867. The storm lasted about one hour, but the damage was probably all done in twenty minutes from the commencement of the rain. Common roads in the neigborhood were made entirely impassable, many farms were much injured, and private property destroyed. The swollen stream under our road became choked up from the ruins above, the water rose to a great height and tore away our culverts, embankment, &c. The heavy stones of the culverts were carried off to a considerable distance, apparently as easily as the gravel of the embankment. The length of the road injured was but a few rods, in a deep ravine, but the masonry and embankment were heavy and expensive. The work of repair has all been completed and paid for. No foresight could have guarded against this extraordinary injury, and no power could have withstood the violence of the storm.

The suit in Vermont, pending last year upon the validity of the old scrip, is undetermined. The testimony has been closed, and the case will soon be made up, presenting the questions of law to be settled.

We have made a contract for six years with the Connecticut River Railroad, by which that road runs all their trains over our ten miles of road between South Vernon and Brattleboro', for a sum agreed upon to be paid by us, which arrangement we believe is satisfactory to the Connecticut River line.

Our contract with the Cheshire Railroad for the use of our road for their trains between Ashburnham and Fitchburg, will expire in August next. The contract will doubtless then be renewed for a term of years, at a considerable advance of rent over what we have received for the last five years.

It is expected that the Troy and Greenfield Railroad will be completed to the Tunnel by July 1st. If so, we shall furnish attractive facilities for travelling over our line, and over the Hoosac Mountains to Troy, Albany, Saratoga and the West, without any increase of rolling stock as far as our road is concerned. The summer and pleasure travel will find no more attractive route than up the Valley of the Deerfield River and over the Hoosac Mountains.

During the past five years the gross earnings of our road have more than doubled by regular annual increase from ordinary business, without any benefit from our location as part of a great through line to the West.

Gross earnings, 1867	$461,423 81
Gross earnings, 1862	216,064 86
Gross gain in five years	$245,358 95

Upon the completion of the Hoosac Tunnel we shall have the benefit of the through business for which the large outlay of capital in our line was designed, and shall in public usefulness and adequate compensation therefor stand side by side with the Boston and Albany Railroad. Were the Tunnel now completed the proprietors of the Cunard steamers, instead of granting to the City of Boston the favor of an occasional call, would be glad to renew their business relations with our metropolis, or would be obliged to yield a profitable business to other lines.

The indebtedness of the company, as will appear by reference to the annexed statement, is $553,172 50; and the assets, (exclusive of fuel, oil, old rails and stock materials on hand,) $93,907 90—showing an excess of indebtedness of $459,264 60.

TREASURER'S TRIAL BALANCE.

Superintendent—OTIS T. RUGGLES.

Louisville and Danville Railroad.

A meeting of delegates from Louisville, Jefferson, Shelby, Anderson, Mercer and Boyle, was held at the Capitol, in Frankfort, Ky., on the 9th inst., to take into consideration the feasibility of constructing a railroad from Louisville to Danville. Judge W. F. Bullock was appointed chairman, and T. C. Bell, Esq., Secretary. On motion, it was resolved that the most practicable and suitable route for a railroad from Louisville to Danville was through the County of Shelby, running through or near Shelbyville; thence through Anderson, through or near Lawrenceburg; thence through Mercer, running through or near Harrodsburg, thence to Danville.

A committee, with Gen. J. H. Sneed as chairman, was appointed to draft a charter for said proposed road or amendments to the charter of the Shelbyville Railroad, and report the same to the meeting for its inspection.

The committee subsequently reported that they had agreed upon certain amendments to the charter of the Shelby Railroad Company, which would fully accomplish the purposes and objects for which the meeting was called.

The said amendments were read and adopted by the meeting.

The following gentlemen were appointed a committee to secure the passage by the General Assembly of said amendments: Dr. N. Green, S. L. Geiger, Boyd Winchester, J. Fry Lawrence, C. Sanders, J. W. Davis, C. M. Harwood, J. H. Yowell, B. Magoffin, and J. M. McFerron.

On motion, the following gentlemen were appointed a committee to lay before the authorities

of the city of Louisville the proposition to build the railroad from Louisville to Danville, and solicit aid from the city in the construction of the road, viz: M. J. Durham, Col. P. B. Thompson, J. H. Yowell, C. M. Harwood, S. L. Geiger, J. D. Guthrie and W. F. Bullock.

Norfolk and Petersburg Railroad.

The receipts from operations of this road for the fiscal year ending September 30, 1867 were

From passengers	$44,108 47
" freight	141,502 73
" mail	4,074 96
" telegraph	633 53
" express freight	4,877 31
" hire of cars	13,458 15
	$208,655 15

Expenses, viz:

Transportat'n department	$74,609 71	
Road department	42,359 05	
Machinery department	20,506 72	
Salaries general officers and expenses	11,935 43	
Office expenses	1,766 24	
Taxes and law fees	3,547 75	
Losses—property	3,806 92	
Telegraph	2,892 19	
		161,424 01
Earnings less expenses		$47,231 14
Discounts	$3,718 92	
Interest on funded debt and guaranteed stock	49,390 00	
		53,108 92
Deficit		$5,877 78

The liabilities of the road, other than its funded debt is stated at $223,998 13, of which $115,010 95 is in the form of notes and acceptances, and $108,987 18 in the shape of open accounts; but of this latter sum the cancellation and payment of $93,000 had been arranged out of the available assets in hand. The balance of this indebtedness, say $16,000, added to the item first mentioned, makes the actual liability of the company $131,000, for the payment of which the company rely upon the sale of $160,000 of its first mortgage 7 per cent. bonds.

The entire issue of bonds allowed by this mortgage is but $600,000, and considering the value of the property which has cost in cash over $2,250,000; that the rails upon the road, now as good as new, and in the aggregate amounting to about 10,000 tons, would bring more than that sum; that interest has been punctually paid upon the bonds heretofore sold; and that the earnings of the road demonstrate the ability of the company to continue the discharge of this obligation regularly, ought to render the disposal of these easy, and at fair rates.

The additions made to the property of the company during the year amounted to $55,380 84, and embraced one first class tonnage engine, 35 tonnage cars, 2 timber trucks, and part ownership of the depots employed for Baltimore and New York freights, besides a valuable real estate at Ivor.

During the year 26,219 ties have been put in the track. The road bed is in fair order, and the rail quite as good as when first laid. The movement of trains over the road has been marked with great regularity, and with wonderful freedom from accidents and losses. The motive power and rolling stock have been kept in good repair, and are now in splendid order.

The company have 7 locomotives, 8 first-class and 2 second class passenger cars, 2 mail and baggage cars, 51 box, 37 flat, 1 cattle and 2 timber cars. Miles run with passenger trains, 51,415; with tonnage trains, 41,704; with material trains, 13,454; switching trains, 13,565—total miles run, 120,138.

The total tonnage of the road was 49,218.64; of which 27,879.61 were through, and 21,339.03 way. Equivalent number of tons carried one mile, 3,420,360.98.

The total number of passengers carried was 24,530; of these 17,147 were first-class, and 7,388 second class; 2,450 were through, and 22,080 way passengers. Equivalent number of passengers carried one mile, 1,217,816.

The total number of bales of cotton received at Norfolk during the year was 37,979, of which 9,910 were from Georgia, 19,934 from M. & C. R. R., 2,786 from Nashville, and 5,349 from Petersburg.

Milwaukee and Prairie du Chien Railroad.

The transfer books of the Milwaukee and Prairie du Chien Railway Company will be closed on the 22d inst., preparatory to the payment of dividends on the first and second preferred stock on the 1st of February, and be opened on the 3d proximo. On the 31st December, 1866, this company sold all its property to the Milwaukee and St. Paul Company, and the latter then agreed to pay interest on the first preferred stock of the former company until the 1st of February, 1868, at eight per cent. in money, and on the second preferred stock at the rate of seven per cent. The Milwaukee and St. Paul Company will, on the date mentioned, exchange the first preferred stock for eight per cent. bonds, and the second preferred stock for seven and three-tenths per cent. bonds, the interest on both to be payable semi-annually.

Lake Superior Mining Region.

The product of the copper mines in the Lake Superior region in 1867 was 7,900 tons, valued at $8,876,000. In 1866 the product was 8,000 tons, valued at $4,800,000, showing a decrease of 100 tons, and a decrease in the value of product of $924,000.

The product of the iron district in 1867 was Ore, 463,500 tons; pig iron, 80,243 tons—total 493,743 tons, valued at $3,414,120. In 1866 the value of the product of the iron district was $2,405,920—showing an increase of $1,008,200.

The increase in the iron product has been 100 per cent. within the past three years, and the population and the business of the district have been proportionately augmented.

The value of exports and imports in 1867, were as follows:

Copper region	$6,752,000
Iron district	5,480,000
Lumber and shingles (exported)	7,000
Fish (13,500 bbls)	54,000
Hides and tallow	28,000
Ashes	3,500
Total exports and imports	$12,324,500

The value of the exports and imports in the lumber district on the south slope of the Upper Peninsula, the trade of which is with Chicago, Milwaukee and Green Bay, is about $2,400,000.

The amount of new capital invested in the copper interest in 1867 was $2,255,000; and in the iron interest, $1,650,000—total, $3,905,000.

The receipts from tolls on the St. Mary's Ship Canal in 1867 were $31,054 79; in 1866, $28,969 54—an increase of $7,085 25.

It will be seen that including the lumber trade, above referred to, the yearly commerce of the Lake Superior region already aggregates $14,744,500, and is rapidly increasing.

Lebanon Springs Railroad.

The Lebanon Springs and Bennington Railroad, connecting with the Harlem Railroad at Chatham Four Corners, is expected to be completed about the 1st of July next. Of the 56 miles, 33 miles are already graded and ready for the ties. Almost one-half of the remainder of the new road is also graded. Among the advantages anticipated from this new link in the chain of railroads in this State, one of the most prominent is the formation of a grand trunk line from New York to Montreal without change of cars. To the Harlem road alone the traffic thus to be developed is estimated at $1,000,000 a year, while to the general interests of this State, and the enlargement of this productive power, these new facilities for transportation are sufficiently obvious.

☞ The following gentlemen have been elected directors of the Middleboro' and Taunton Railroad: J. B. Tobey, E. Tucker, P. Tillinghast, J. S. Tillinghast, W. A. Crocker, C. Robinson, and A. Field. J. B. Tobey, of Wareham, President; E. Pickering, Treasurer, and W. E. Swasey, of Taunton, Superintendent.

☞ The Westminster *Sentinel* says the Western Maryland Railroad is now graded nearly all the way to Hagerstown. They have commenced laying the track west of Union Bridge.

☞ The contracts for the grading of the Detroit and Howell Railroad have all been let, and the work is to be commenced immediately.

Arrivals at New York, 1867.

The annexed statement shows the number of arrivals of merchant vessels at this port from foreign ports from Jan. 1, to Dec. 31, 1867, inclusive, the class of vessel, and their nationality:

For the same period last year 4,012,634 85

Decrease $453,462 89

Rock River Improvement.

We have received a copy of the report of the committee, appointed by the Governor in pursuance of a resolution passed by the Legislature last year, to investigate and report upon the proposed improvement of Rock River, with a view of calling the attention of the General Government to its importance to the national interests, in the hope of obtaining Government aid in the prosecution of the work.

The improvement referred to contemplates the construction of a canal and slack water navigation from Fond du Lac in Wisconsin to Rock Island in Illinois—a distance of 285 miles; and which, with Lake Winnebago and the lower Fox to Green Bay, would open a navigable water course over 450 miles long, through an important and fertile portion of the State, and connecting Lake Michigan with the Mississippi River. The committee thinks there could be no rivalry or antagonism between this interest and that of the Fox River Improvement Company, which has for some time held a charter, been endowed with a land grant, and is now going forward with its work; but rather that the routes would be tributary to each other as links in the great chain of internal navigation. The navigable water courses now in use or contemplated—converging on Lake Winnebago, from North, South, East and West—amount, estimated by the committee, to 1,020 miles, affording such rare facilities for interior transportation as few if any of our sister States possess.

One of the natural features of this stream which the committee regards of importance in considering the feasibility of the proposed canal, is the numerous expansions of the river into broad and shallow lakes, which fill the important function of reservoirs of water, at the same time they prevent the devastating effects of floods. Col. Worrall, who made a survey of Rock River, says that Horicon Lake could be made a reservoir capable of supplying a canal seven feet in depth, or sufficient to float boats of 500 tons burthen. This lake is 833 feet above the Mississippi, at Rock Island; and Lake Winnebago 170 feet above Lake Michigan at Green Bay.

Some interesting figures are given of the agricultural productions in 1865, of the ten counties bordering on the route from Green Bay to the State line:

	Bushels.
Wheat	3,194,000
Corn	3,131,000
Oats	3,338,000
Potatoes	1,529,000
Butter, lbs	800,000
Cheese, lbs	300,000
Live stock, value	$5,777,000

The commerce, manufactures and agricultural productions of the four counties, located on the proposed improvement—Rock, Fond du Lac, Jefferson and Dodge—are estimated to amount to $40,000,000 annually, and that upon the whole route, including that portion of Illinois through which it passes, it will aggregate $125,000,000 per annum, on which would be saved to the people, by using this route, in the cheapening of transportation, an amount estimated at $10,000,000 yearly, an item which would certainly justify a liberal expenditure by the people of those sections, in forwarding the work. This estimate is founded upon a certain proposed carrying capacity of the canal, and the difference in cost of railroad and canal transportation.

Among the articles whose transportation would form an important item of business on this route, are mentioned the vast productions of lumber and fuel of our northern forests, to supply the demand of the prairies of Illinois; ice from our pure lakes and rivers for the lower Mississippi market; grain and other agricultural productions of our fertile interior counties seeking an eastern or southern market; and last but not least, the rich ores of the Lake Superior mines, to meet, at the splendid water powers along the river, their necessary "associate of the furnace," coal from the rich beds at the mouth of Rock River. The committee conceives that with all the splendid facilities for manufacture along this route, and which this improvement would develop, there would grow up a chain of large manufacturing towns from Green Bay to Rock Island, that would make Wisconsin the rival of New England in this branch of industry.

The cost of the projected canal, according to Col. Warrall's estimate, would be a little over five millions and a quarter dollars to make a navigation equal in size to the present Illinois and Michigan Canal. A survey and estimate was also made for a larger canal to cost near fifteen millions, with locks 200 feet long and 30 feet wide, which would allow the passage of boats of 500 tons burthen, and be capable of transporting ten million tons during the season of navigation. As to which of the two plans to adopt, "it is evident," says the committee, "that if we are to expect the aid of the Government, we must conform to its views, and these seem to be in favor of the larger canal." It is the opinion of the committee that the rise in the value of property along the line of the proposed work, the moment it is completed would more than pay for its cost.

The projectors of this work do not ask or expect any monied assistance from the Government. All they ask is that a work of such importance to the development of the resources of the country shall share in the distribution of the 11,000,000 acres of public lands now being made for public improvements.

The Committee in conclusion recommend First, That a charter, with proper guards and guarantees, be adopted by the Legislature, to empower a private corporation to make this improvement, and authorize such number of counties as desire to aid in its construction, to subscribe stock and issue their bonds for that purpose; and also to permit individuals to subscribe to its stock; but only in such a manner that the work shall be free from the control of individuals and corporations whose combinations might be inimical to the public good and the objects of this enterprise. Second, To memorialize Congress for a grant of land, in such quantities, in connection with the bonds of the counties and the subscriptions of individuals, as shall be necessary to insure the completion of this improvement.—*Milwaukee Wisconsin.*

St. Louis and Iron Mountain Railroad.

Governor Fletcher on yesterday took possession of the "St. Louis and Iron Mountain Railroad," under authority of that provision of the "sell-out law" of February 19th, 1866, which required half a million of dollars to be expended in the "graduation, masonry, or superstructure" of the extension of that road within one year from the date of sale by the State, upon the ground that such expenditure has not been made. This action will occasion surprise with some of our people, who have been led to believe that the requisite amount had been so expended. The year expired on the 12th instant, and as yet no affidavit, as is required by law, to the amount expended, has been filed, and from information in the Governor's possession he has satisfied himself that the half million dollars has not been expended in the mode pointed out by the law, if at all. Such being the case, the Governor has conceived it to be his duty to seize upon the road, and to hold it for the benefit of the State, subject to such disposition as the Legislature may direct.

While the duty of the Governor was clear, and while, with his knowledge and view of the facts, only one course of action was open to him, it is certainly cause for profound regret that the contingency has arisen which demanded this action. Mr. Allen and his associates have labored with zeal and considerable success in the work of extending the road, and a sum of money nearly equal to the amount required by law has been devoted to that purpose in the grading, surveying and purchase of material, though not actually expended in the "graduation, masonry and superstructure," so as to become inseparably a portion

of the property as the law requires. This result is the more to be regretted as Mr. Allen's failure is not the result of his own negligence or inability, so much as of the interferance of a State official, which turns out to have been wholly illegal and unauthorized.

No one, probably, doubts that, but for the suit of the Attorney-General there would have been no difficulty in raising and expending the amount of money specified in the act of sale, and in the manner there indicated. Although he is at the head of the law department of the State, the court has decided his act to have been illegal, and we learn that he is now seeking through the Legislature such authority as will give it validity. It is, therefore, to be hoped that, in view of these facts, the Legislature will render Mr. Allen such aid as to relieve him of the consequences of his legal failure, and restore to him the possession of the road.

The first purchasers of the road, including the names of Vogel, Simmons, Erastus Wells and others, having executed a bond conditioned for the expenditure of the half million dollars required by law, the Governor has directed suit to be brought thereon in the name of the State for the recovery of the penalty therein specified.—*St. Louis Democrat Jan.* 16.

Finances of Philadelphia.

The total revenue of the city for 1867, derived from the departments, sales of loans and receipts from taxes was $9,685,212 49
Balance on hand Jan. 1, 1867 ..... 1,028,423 92

Total $10,713,636 41
The total expenditures of the city in 1867 were 9,630,847 23

General Fund Balance in the hands of city treasurer $1,082,789 18
Balance to credit of sinking funds .. 216,092 70

Total cash balance in hands of city treasurer Jan. 1, 1868 ..... $1,298,881 88

The following shows the present debt of the city:

The funded debt of the city on Jan. 1, 1867 was $35,021,592 52

Which was increased during the year by issue, as follows:

For school department ..	$353,700	
For water department ...	303,500	
For gas works	462,700	
For expenses of former years	1,558,200	
	$2,678,100	
From which deduct:		
Loans redeemed by Treas. $172,562 75; cancelled by commissioners of sinking fund ... $849,600 ...	1,022,162 75	
Showing the increase to the funded debt to be		1,655,937 25
Total funded debt Jan. 1st, 1868 ..		$36,677,529 77
Total cash payments by City Treasurer for 1867 as above		$9,630,847 23
Deduct amount of cash paid on account of temporary loan, interest and warrants prior to 1867		3,784,183 75
Total cash paid on account on Departments		$5,896,663 79
To which add outstanding warrants for 1867		1,066,272 36
Total expenditures of Departments.		$6,962,935 85

The warrants of 1867 outstanding Jan. 1st, 1868, amounted to $1,085,268 05, to which add $356,920 80 of warrants of 1866 and prior years, making a total outstanding Jan. 1st, 1868, of $1,442,088 85; leaving general fund balance in hands of Treasurer, $1,082,789 18; and to credit of sinking funds $216,092 70, making a total cash balance in hands of Treasurer, January 1, 1868, of $1,298,881 88.

Shipments of Specie to the East.

Mr. James Low, of London, has just issued his annual circular, showing the total amount of specie shipped to the East from Great Britain by the Peninsular and Oriental Company's steamers for seventeen years. The figures are as follows:

	Gold.	Silver.
1851	£102,280	£1,716,100
1852	921,739	2,680,238
1853	880,202	4,710,665
1854	1,174,299	3,132,003
1855	948,272	6,409,889
1856	404,749	12,118,985
1857	269,275	16,795,232
1858	168,305	4,781,023
1859	788,269	14,828,521
1860	1,669,746	8,038,276
1861	783,543	6,838,292
1862	1,715,963	10,138,506
1863	3,173,442	8,213,264
1864	2,041,854	6,175,270
1865	555,725	3,621,330
1866	478,217	2,374,939
1867	258,904	643,927
	£16,334,784	£113,167,360

The important falling off in 1867 helps to explain the great accumulation of gold both in the Bank of England and the Bank of France.

The exports of specie and bullion to the East (including Egypt, &c.) from the Mediterranean ports for fifteen years are stated as under, showing likewise a material falling off:

	Gold.	Silver.
1853	£93,528	£848,362
1854	48,456	1,451,014
1855	243,239	1,524,240
1856	74,039	1,989,916
1857	259,986	3,350,689
1858	165,230	911,043
1859	142,144	1,521,970
1860	765,138	2,764,054
1861	644,934	2,021,060
1862	1,676,689	4,461,273
1863	4,849,521	6,923,269
1864	4,928,891	10,681,428
1865	3,794,425	6,123,968
1866	2,393,062	4,704,596
1867	1,189,035	1,403,265
	£21,268,317	£50,680,100

Railways in Russia.

It is stated that no fewer than 30,000 men are now engaged in the construction of the Orel and Vitebsk. The total length of the line is 821¼ miles, and it is divided into four sections as follows: Vitebsk to Smolensk, 83¾ miles; Smolensk to Roslaw, 71⅞ miles; Roslaw to Briansk, 82½ miles; and Briansk and Orel, 83⅛ miles. About half the first section is now completed, and the three other sections are expected to be terminated by the autumn. The iron bridges and rails are ordered in England; the locomotives in France (Creusot works;) and the trucks in Germany. A great part of the rails has arrived at Riga and even at Vitebsk.

A line has been projected between Rybinsk and Tver; it is stated that it would prove very useful in connection with grain traffic. The total length of the line would be 215 verstes. The promoters have submitted their plans to the Governor of Tver and to the provincial regency of the Government.

☞ The contracts for the erection of an iron bridge across the Mississippi River, at Dubuque, have been let; the foundations and masonry to Reynolds, Saulpaugh & Co., of Rock Island, Ill., and the superstructure to the Keystone Bridge Company, of Pittsburg, Penn. The whole to be completed ready for the cars by January 1, 1869.

Philadelphia and Erie Railroad.

Some years ago the Pennsylvania Railroad Company took three millions of 7 per cent. bonds from the Philadelphia and Erie Railroad Company, the bonds being convertible at the pleasure of the holder into an 8 per cent. preferred stock. The money advanced on these bonds it was supposed at the time was sufficient to finish the Philadelphia and Erie Railroad. Time has shown that this was a mistake. The road is not yet satisfactorily finished, and, at the request of the Pennsylvania Railroad Company, the Philadelphia and Erie Railroad Company have recently issued to the former company 48,000 shares of 8 per cent. preferred stock in exchange for $2,400,000 of the 7 per cent. bonds. The same bonds are to be re issued without the convertible clause, the proceeds of their sale to go to the completion of the road, doubling a portion of the track, and to some new work. The funded liabilities of the company retain the same, the capital being increased by a preferred 8 per cent. stock to the amount above stated.

Railroads in Indiana.

The Cincinnati *Gazette* says that H. C. Lord, Esq., President of the Indianapolis, Cincinnati and Lafayette Railroad Company, has made a proposition to the people of Muncie, Ind., to extend the Valley road from Hagerstown to that place and it seems quite certain that it will be accepted. A road is also talked of as an extension of the Junction from Newcastle to Muncie. Mr. Lord seems to be working for a connection with the proposed line of the Fort Wayne and Southern, the road-bed of which is already graded, while the Junction is looking, it is said, to a road from Muncie, through Marion and Wabash to Warsaw, on the Pittsburg, Fort Wayne and Chicago, from whence a road already extends north into the pine regions, and to Grand River. At all events the Muncie people feel safe, at least, of one direct railway to Cincinnati, if not two, by September next.

☞ The following gentlemen have been elected directors of the Perkiomen Railroad: Arthur D. Markley, Philip Super, James Boyd, Aaron Schwenk, George Graber, S. D. Rudy, H. A. Hunsicker, S. Gross Fry, G. D. Hunsicker, Henry Longaker, Jesse Ziegler, Wm. F. Reed and W. H. Seipt. President, Arthur D. Markley; Secretary and Treasurer, J. W. Jones.

☞ The following gentlemen have been elected directors of the East Pennsylvania Railroad: Charles E. Smith, H. H. Muhlenberg, D. E. Stout, J. L. Stitchter, G. D. Stitzel, J. S. Richards, A. E. Borie, R. B. Cabeen, and F. B. Gowan. President, Charles E. Smith; Secretary and Treasurer, Henry M. Albright.

☞ The earnings of the Calais and Baring (Maine) Railroad Company for 1867, were $40,801 92; expenses, $22,752 14; net earnings, $18,048 70.

RAILROAD AND CANAL DIVIDEND STATEMENT.

American Railroad Journal.

Saturday, January 25, 1868.

Stock Exchange and Money Market.

Money has been tending toward lower rates in the open market, since our last, under the influence of steadily accumulating supplies at this point, which are pressing on the market, especially for temporary employment. The banks and the Treasury office show a marked increase in their cash reserves; and private lenders report heavier balances as being at their disposal, without adequate channels of investment being available. Call loans have receded to 4@5 per cent. to the Government houses, and 5@6 per cent. to the Stock Exchange firms. Mercantile credits have been quoted at 6½@7½ per cent. per annum, with a free currency for all desirable grades of business paper, the offerings of which have been very moderate for the season. There has not been much animation in trade circles, and little aid has been called for, by other than the produce commission houses. The street demand has been the main reliance of lenders; and this has not been equal to the absorption of the available supply of money, much of which is being invested directly in the public funds, leading to increased activity and buoyancy in this special line. The accumulations of country bank balances and local deposits, (the latter growing in a large measure out of the collection of January dividends,) have run up the general deposit line at bank, since the New Year, $27,174,952. This is quite unprecedented at the beginning of the year, and the fact is not only significant of continued ease in the Money Market here, but of the absence of speculation and the great caution of the trade and banking movements of the interior of the country. The City Banks have not yet found employment for these accumulations beyond $11,171,646. They hold, however, $10,467,253 more gold and gold notes than at the beginning of the year, a large share of which sum belongs to depositors to be repaid in kind. The specie reserve of the city banks is now $23,191,867, against $15,365,207 same time last year. The city bank deposits are now $205,888,143, against $201,200,115 week ending Jan. 19, 1867. The legal tender reserve amounts to $66,155,241, against $63,235,386 same time last year. The circulation now stands at $34,071,006, against $32,854,928 same time last year. The loans are now $256,033,928, against $255,032,223 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $103,299,561 a day, against a daily average of $88,980,754 the preceding week, and $96,653,261 the week ending with Jan. 4, 1868. The current week's exchanges average about $85,804,400 a day. The city banks, last week, gained $2,402,125 of legal tender, $11,052,618 in deposits, and $3,969,011 of specie. They increased their loans, $2,863,205; and reduced their circulation, $23,131.

The Philadelphia Bank movement the past week shows a increase in loans, of $419,489; a decrease of $179,642 in specie; a decrease in legal tenders of $210,567; an increase of $325,559 in deposits; and an increase of $2,716 in circulation. The Bank Clearings show a decrease of $2,761,888, and the balances, an increase of $34,899.

National Bank notes to the amount of $138,880 were issued last week, making the total issue to 1,673 banks thus far, $305,849,961, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $5,893,805, leaving, with the existing 1,689 banks, (having an aggregate capital of $424,394,861,) an actual circulation at this date, of $299,566,298. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,150,950; and for the public deposits, $37,767,950—making a total of $378,918,900. The Treasury Department last week redeemed and destroyed $349,400 of worn and mutilated fractional currency, and issued $374,736 of new.

The U. S. Sub-Treasury receipts, week ending with Jan. 18, were $18,437,115, including $1,532,134 from customs duties; payments, $11,094,740, including $2,461,000 of coin interest; balance at the close of the week, $105,167,454, against $97,825,079, at the close of the preceding week

showing an increase of $7,842,375. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,770,100 including $839,716 from customs; and payments, $2,490,731; on Tuesday, receipts, $1,304,814 including $211,607 from customs, and payments, $1,193,497. The balance at the close of business on Tuesday stood at $105,640,197, against $98,917,216 a week previous; and $98,917,216 on Jan. 7, 1868.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to Jan. 11, was $245,869,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740.

Government revenues have been less extensive, since our last. The excises have been much less prolific. The customs yield has been moderate. The excises, last week, yielded $2,178,000, against $7,744,307, the preceding week; customs at the port of New York $1,532,134, and at the outports, about $511,000 (in coin) more, making the grand total income for the week equal about $5,038,388 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $113,500,000.

Government received $7,594,894 from customs, through the port of San Francisco, from Jan. 1, to Dec. 18, 1867.

Gold has been in much less active speculative demand, since our last, and there has been decidedly less buoyancy in the market. The extremes of the week have been 138⅜ and 140½, and the latest quotation on Wednesday of the current week was 139⅜. The export demand has practically ceased for the present. No specie was shipped by Wednesday's steamers; while $958,616 in California treasure were received by the *Arizona*, on that day, from Aspinwall. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $204,139, against $91,773 same time last year. The customs demand for Gold last week, averaged $255,356 a day; thus far, this week, it has been equal to $275,661 a day, or equal to a weekly aggregate of $1,653,966. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $17,981, and from California, $958,616. The total customs revenue of the Government, in coin, at this port, during the calendar year of 1867, was $116,958,854, against $130,222,092 same time in the preceding calendar year. The customs revenue, at the port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $60,467,133, against $68,011,505 same time in the preceeding fiscal year. The total receipts of California gold at this port in 1867, was $27,677,556, against $42,740,913 in 1866, showing a decrease in 1867, of $15,063,357. The receipts of California gold, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $17,413,018 against $26,027,398 same time in the preceeding fiscal year, showing a decrease of $8,614,380 in 1867–'68. The exports of specie from this port, last week, were $373,531, against $166,702 same week last year. The exports of specie, hence, since July 1, 1867, have been $33,498,217, against $18,643,312 same time in 1866–'7. The total outflow of specie from the port, in 1867, was $51,841,678, against $62,553,700 in 1866. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,461,000, and since July 1, 1867, $44,530,019, against $32,436,463 same time in 1866–'7. The total coin interest disbursements through the Government office, in 1867, was $61,871,348, against $48,680,377 in 1866. The specie exports from San Francisco, from Jan. 1, to Dec. 18, 1867, reached $40,656,910, against $43,669,753 same time in 1866, showing a decrease, in 1867, of $3,012,843.

A comparatively limited call has been experienced, during the week, for foreign exchange, which has been rather pressed on the market by other than the leading drawers, and which has been depressed in price. Bankers' 60 day bills on London closed on Wednesday at 109⅜@109⅝, and on Paris to 5.17½@5.16; sight bills on London to 109⅝@110, and on Paris to 5.15@5.13¼. The offering of produce bills have been rather lighter, this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,678,601, against $2,724,291 same week last year; total, since July 1, 1867, $101,233,766, against $105,289,210 same time in 1866–'67. The total value of exports of produce and merchandise in 1867, was $189,688,044, against $192,329,554 in 1866.

Government securities opened tamely at barely steady rates, but closed quite briskly, under a decided increase of the investment demand, at much firmer, and rising prices. The unusual ease in Money has had the effect of stimulating purchases of all classes of the funded obligations particularly the coin bearing bonds, which have been offered rather sparingly in the open market, as the leading holders have been anticipating a further material improvement in values. There has been a fair export call for the Five-Twenties of 1862, and 1865, May and November coupons; and some speculative inquiry at the close for nearly all the six per cent. bonds. The market wound up strong and buoyant.

U. S. sixes of 1881 closed here on Wednesday at 110⅝@110¾; U. S. Five-twenties of 1862, 110½@110⅝; U. S. Five-twenties of 1864 at 108@108¼; U. S. Five-twenties of 1865 at 109@109¼; U. S. Five-twenties of 1865, consolidated, 106½@106⅝; U. S. Five-twenties of 1867, 106⅝@106¾; U. S. Ten-forties at 103¼@103⅜, and U. S. Seven-thirties at 106⅝@106¾. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865 ..... 117⅜	September, 1865.. 116
August, 1865.... 116⅜	October, 1865 .... 115¾

U. S. three per cent. certificates 100¼

Railway and miscellaneous share property has been more active, and as a rule, more buoyant in price, though frequent fluctuations have been occasioned under the realizing process. The later dealings indicated considerable steadiness, with a tendency to a further appreciation of values, especially in the instance of the speculative favorites of the railway list.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 8.	Jan. 15.	Dec. 22.
Consols	92¼	92½	92⅞
U. S. 5-20's of 1862....	71⅞	71¼	71⅞
Erie	48¾	48	48¾
Ill. Central	88⅛	*84¾	85½

* Ex-dividend.

General business has been without notable activity in the leading lines. Breadstuffs have been rather more firmly held, on a moderate trade. Provisions have been in less active demand; Pork has declined in price, closing heavily. Cotton has been more active, but extremely variable in price, closing rather buoyantly at 17@17¼ cents for middling uplands, per lb. The stock of cotton now here is estimated at about 55,000 bales. The receipts at the port this week, have averaged about 4,000 bales a day. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 1,039,000 bales, against 897,000 bales same time last year; exports, same time, 575,000 bales, against 397,000 bales same time last year; stock on hand at latest dates, 345,000 bales, against 585,000 bales same date last year. Beeves have been less active this week, and a shade easier in price, the range having been from 11@19; receipts, 5,760. Veal calves in fair request, at 9@18½c.; receipts, 479. Sheep and lambs active, the former bringing from 4@7¾, and the latter from 5@7¾; receipts, 27,415. Swine have been in good demand at from 7⅜@7⅞. per lb., all live weight; receipts, 14,963. In foreign merchandise a livelier business has been noted in groceries at steady rates; but otherwise, very little increase has occurred in the volume of trade. A little more movement has been reported in desirable styles of dry goods especially in domestic cottons, which have been quoted rather stronger in price. Domestic woolens and most kinds of foreign goods show little change in values, none to the advantage of sellers. The total imports of foreign dry goods, last week, were $1,541,826, and the total amount marketed $1,251,885. The value of foreign merchandise imported last week, was $2,046,165—making the grand total specie value of last week's imports of dry goods and merchandise, $3,587,491, against $4,229,355, same week last year; total since July 1, 1867, $124,460,945, against $150,270,903 same time in 1866–'67. The aggregate for the year 1867, was $242,478,575 against $277,048,050 in 1866. The ocean freight market has been less active, owing to the extreme scarcity of room; rates have been firm and buoyant. For Liverpool we quote flour at 3s.@3s. 3d. per bbl.; grain at 9d.@10d. per bushel; cotton at ⅜@½d. per lb.; and heavy goods at 27s. 6d.@40s. per ton, all by sailing vessel. Total number of vessels in port on Wednesday 469.

The New York exports, exclusive of specie, for the week ending Jan. 21, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$2,724,291	$3,678,601
Prev. reported	7,793,282	6,412,780
Since January 1.....	$10,697,573	$10,091,381

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$2,221,003	$1,541,328
Gen. merchandise	2,008,352	2,046,165
Total for the week	$4,229,355	$3,587,491
Previously reported	7,062,192	3,456,063
Since January 1	$11,291,547	$7,043,554

The balance in the Sub-Treasury on Wednesday was $104,566,477 81.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Flint and Pere Marquette Railroad.

Gov. Crapo, of Michigan, has officially examined and approved the second twenty-mile section completed of the Flint and Pere Marquette Railroad. The road alluded to runs in air line west from Flint in Michigan to Pere Marquette on the eastern shore of Lake Michigan, and directly opposite Manitowoc. It is proposed to run a line of boats from Manitowoc to Pere Marquette, on a similar plan to those of Milwaukee and Grand Haven.

Cedar Falls and Minnesota Railroad.

This company is building a road from the Iowa Division of the Illinois Central, commencing at Cedar Falls, 100 miles west of Dubuque, and running in the direction of Austin, Minn., which is distant 114 miles from the Falls, and is constructed and in operation to Waverly, and the work is progressing. The company belongs to St. Louis and the design is to extend it eventually south to that city.

☞ A thousand men are to be set at work at once on the railroad running westward from Memphis to Little Rock, Arkansas. By next January it is thought that Memphis will be in railroad connection with a vast and fertile region heretofore inaccessible save during high water on the rivers penetrating Arkansas.

☞ It is stated in the Wilmington *Commercial* that Mr. Wood, the contractor of the Dorchester railroad, connecting Seaford, Del., with Baltimore, is pushing on the work rapidly. He will have the grading done to the State line by the 1st of February, and the entire road finished by the 15th of July.

☞ The *Tribune* says that a railroad is to be built from Paterson to Pompton, connecting with the Erie or Paterson and Newark Road, and touching Little Falls. Its estimated cost is $250,000. Contractors promise to complete the road in one year, and $40,000 is already pledged in Pompton.

☞ The Pacific Railroad Commissioners left Atchison on the 14th inst., to inspect the last section of the first hundred miles of the Atchison branch Pacific Railroad.

☞ H. P. Clough has been appointed Superintendent of the Atlantic and Great Western Railway.

Railroad Earnings.—Weekly.

The earnings of the Atlantic and Great Western Railway for the second week in Jan., 1868, were $98,170 00
Corresponding week previous year 92,056 00

Increase $6,114 00

The earnings of the Chicago and Rock Island Railroad for the second week in January, 1868, were $66,100 00
Corresponding week of previous year.. 66,760 00

Decrease $660 00

The earnings of the Chicago and Northwestern Railroad for 2d week in Jan., 1868... $159,998 37
Corresponding week previous year .. 173,444 66

Decrease..... $13,451 29

The earnings of the Detroit and Milwaukee Railroad for the week ending January 16, 1868, were $19,964 00
Corresponding week of 1867 ..... 22,168 00

Decrease $2,204 00

The earnings of the Western Union Railroad for the 2d week in Jan., 1868..... $9,256 57
Corresponding week previous year..... 9,903 69

Decrease $647 12

The earnings of the Michigan Central Railroad for the 2d week in Jan., 1868, were .. $72,044 47
Corresponding week of previous year.. 71,133 76

Increase $910 71

The earnings of the Michigan Southern and Northern Indiana Road for the 2d week in Jan., 1868, were $83,790 00
Corresponding week of 1867 ..... 70,136 00

Increase $13,654 00

The earnings of the Chicago and Alton Railroad for the second week in January, 1868, were $59,752 22
Corresponding period previous year.. 65,911 57

Decrease $6,159 35

The earnings of the Toledo, Wabash and Western Railroad for the 2d week of Jan., 1868, were $64,925 20
Same week in 1867..... 59,133 31

Increase..... $5,791 89

United States Patent Office.

From the annual report of the Commissioner of Patents it appears that the number of applications for patents during the year was 21,276. Of these 18,651 were from citizens of the United States, and the remainder from citizens of other countries. The receipts for the year are $616,581, and the expenses $639,263. The Patent Office fund at the close of the year amounted to $271,444. The Commissioner says the business of his office has greatly increased during the year, and it is likely to be much larger the present year.

Lake Erie Wine Product.

The Sandusky *Register* gives the following estimate of the product of wine in the Lake Erie Region during 1867, which, it says, can be relied on as very nearly accurate, excepting perhaps that of the Peninsula and Catawba Island, which may not be quite correct:

	Gallons.
Sandusky City	125,000
Main Shore, Erie County, outside of city.	25,000
Peninsula and Catawba Island	80,000
Kelly's Island	105,000
Put-in-Bay and other Islands	65,000
Total	400,000

Journal of Railroad Law.

COMMON CARRIERS LIABLE FOR DAMAGE OCCASIONED BY BROKEN RAILS.

The case of McPadden *vs.* The New York Central Railroad Company was brought by the plaintiff to recover for an injury sustained by him, while a passenger on the cars of the defendant. The facts were as follows: On the 5th of January, 1864, the plaintiff took passage on the cars at Rochester for Knowlesville, in this State. At Brockport the train stopped, and there met the other train going east. The train was a few minutes behind time. About half a mile west of Brockport the train on which the plaintiff was riding ran off the track. The passenger coach was overturned and the plaintiff was thereby severely injured. When the accident occurred, the train was moving at a moderate rate. The speed of the cars going east was about twenty-five or thirty miles an hour. A broken rail was the cause of the disaster. A piece of the rail about four feet in length, was broken in several pieces. The iron was apparently good and sound. Before the train from the west came down, an employee of the road had inspected the track, but there was no inspection after that train had passed. It was a cold, snowy morning. The accident occurred about six o'clock. The witnesses of the plaintiff swore that the truck of the locomotive was off the track. The defendant's witnesses testified that the hind wheels of the baggage car were the first off the track.

The counsel for the defendant moved for a nonsuit, on the ground that there was no proof of negligence or omission of duty, but clear evidence that every precaution to ensure safety to passengers had been taken by the defendant. The plaintiff's counsel, on the other hand, asked to go to the jury upon the question, whether the rail was broken before the train going west, upon which the plaintiff was, came upon it. The Court refused permission so to do, and the counsel for the plaintiff excepted. The Court then on motion of the counsel for the defendant, non-suited the plaintiff, and the counsel for the plaintiff excepted.

The Court directed a stay of proceedings to make a case, and ordered the exceptions to be heard in the first instance at the general term.

By the Court, JOHNSON, J.—The plaintiff was improperly non-suited. His counsel asked permission to go the jury upon the question, whether the iron rail was not broken before the train on which the plaintiff was a passenger came upon it. The cause of the accident and the injury to the plaintiff was a broken rail, which threw the car in which the plaintiff was riding from the track, while the train was running at a speed of from twenty to twenty-five miles per hour. It appears from the evidence, that the express train from the west had passed over the place where the rail was broken only a short time previous, and that there had been no examination of the track between that time and the time of the accident in question. It was therefore clearly a question for the jury to determine, whether the broken rail was in a sound condition at the time the train in which the plaintiff was riding came upon it. It is claimed by the defendant's counsel, that all the evidence shows, that the rail was then in a safe condition, and that it broke under the train in which the plaintiff was riding. The most that can fairly be claimed is, that the evidence tended to establish this. It does not prove it exclusively, and it should have been left to the jury to draw the inference. The rule is now established in this State, that a common carrier of persons is bound to provide road-worthy vehicles, irrespective of any question of negligence. (Alden *vs.* The New York Central R. R. Co., 26 N. Y. Rep., 102.) This is a simple, plain and eminently sensible rule, and it should be applied in all cases falling clearly within the principle. The same principle would require the carrier who furnishes his own road, and has secured to him the exclusive possession and control of it, to provide a vehicle-worthy road. That is, a road adapted to the safe passage of the vehicle used over it—a road of continuous unbroken rails for each and every train to enter upon in its passage over the road. Strictly speaking, the rail is no part of the vehicle, though in some sense it may be said to be so. But however, this may be, the rail is clearly a part of the machinery by which the vehicle is operated, and falls directly within the principle. The learned Judge erred therefor, at the Circuit, in refusing to allow the plaintiff to go to the jury on the question, whether the rail was not broken before the train on which he was riding came upon it. There must consequently be a new trial, with costs to abide the event.

(Monroe General Term, March 5, 1866, Welles, E. D. Smith and Johnson, Justices.)

Imports of Merchandise.

We give below from the *Journal of Commerce*, a table showing the comparative imports of a few leading articles of general merchandise at New York, from foreign ports for the years 1866 and 1867:

	1866.	1867.
Books	$851,583	$929,167
Buttons	1,389,383	1,557,005
Cheese	188,841	218,489
Chinaware	965,259	656,717
Cigars	1,261,918	493,350
Coal	553,293	547,699
Coffee	12,808,788	14,433,119
Cotton	157,113	76,865
Earthenware	2,148,619	2,230,305
Furs	2,600,378	2,251,629
Glass plate	1,090,674	944,289
India rubber	1,681,844	2,400,349
Indigo	441,071	487,979
Leather & dressed skins	4,735,340	4,493,680
Undressed do	7,745,216	9,132,298
Liquors—		
Brandy	730,123	850,512
Metals—		
Copper	665,309	54,144
Iron, bars	2,200,949	2,436,417
Iron, pig	879,738	1,024,228
Iron R. R	1,492,533	2,149,685

Watches	2,387,765	1,999,369
Wines	3,830,959	2,468,466
Wool and waste	5,780,124	3,421,784

Memphis and Little Rock Railroad.

The work of constructing the Memphis Little Lock railroad is to be prosecuted with the utmost vigor during the present winter, under the superintendence of the recently elected directors, and the president of the road, R. C. Brinkley, Esq. The sub-contractors for building the road, Mr. D. C. Sarvin, of St. Joseph, Mo., and Mr. Jackson Sickles, of New York, under the contract of Mr. Willis Gaylord, of New York, are at present in the city, making arrangements to employ one thousand men, in order to commence the work of construction without loss of time. It is proposed that five hundred men will commence at Madison, and work west, and an equal number of men at Devalls Bluff, about the 1st of January. The contract price is $2,200,000 in the company's stock, the work to be finished within fifteen months. The contractors are active, intelligent gentlemen, and are determined that the work shall be brought to a successful completion within the time specified in the contract. It will be a gala day in Memphis when the opening of the Memphis and Little Rock Railroad takes place, and all citizens will be glad to learn from time to time of the satisfactory progress of the work.—*Memphis Bulletin.*

Pittsburg, Columbus and Cincinnati R. R.

The Steubenville *Herald* says that this Railroad, under its present management, is fast taking its place among the front rank of railroad corporations, and for months past it has been taxed to the utmost of its carrying capacity. To such an extent has been the case, between Steubenville and Pittsburg, that the company have been obliged to make arrangements for a double track on that part of their road, and the prosecution of this work is being vigorously enforced. New cars, with all modern safety improvements, are being daily added to the road, and recently six new and powerful engines, said to be among the finest in the country, have been added to its material. The business of the road is growing daily, and increased facilities are being extended to passengers and freight carriers.

Western Union Telegraph.

The capital of this company is $40,350,400. The assets and liabilities Jan. 1, 1868, were as follows:

Surplus on hand		$264,944 79
Assets—Telegraph stocks productive.	49,870 00	
Real estate	142,800 00	
Due from Railroad and Telegraph Companies	187,048 50	
Due from Government and Press	31,744 20	
Due from Offices and Superintendents	140,417 42	
Bills receivable	62,141 55	
Total		$877,966 46
Liabilities—Due on Dividends and Interest account	$75,818 56	
Railroad and Telegraph Companies	152,205 87	
Loan account	131,821 58	
Internal Revenue	16,933 98	
Offices and Superintendents	5,451 54	
		$382,231 53
Balance profits on hand		$495,734 93

☞ It is announced at the West that negotiations have been completed for builing the Denver Branch of the Union Pacific Railroad the present year. The territory of Colorado furnishes $500,000 in cash, and the Union Pacific Company the residue. The line will be built from Cheyenne as the initial point to Denver.

☞ A. H. Hoxie has been appointed Assistant Superintendent of the Union Pacific Railroad.

Boston, Hartford and Erie Railroad.

Seven hundred men are now at work on this road, and the force will be increased daily, probably reaching 1,000 during the month, and still more as the season advances. This portion of the road will be completed by June 1, 1869, and will form a connecting link which will give uninterrupted communication on the Boston, Hartford and Erie road between Boston and Waterbury, Connecticut, a point but 75 miles from Fishkill, the western terminus of the road. The road between Waterbury and Fishkill is also under contract, and preparations are making to prosecute it with vigor. When completed, the Boston, Hartford and Erie corporation will have a road commencing at the foot of Summer street in Boston, thence through Blackstone, Thompson, Putnam, Willimantic, Hartford and Waterbury, to the Erie Railway at Newburg, on the Hudson River; a branch from Providence to Willimantic; also from Thompson to Southbridge; also a line from Brookline through Woonsocket, Pascoag, Putnam, Willimantic and Middletown, to New Haven—in all 425 miles of road, 235 miles of which is already constructed. The character of the country through which this road runs, comprising many large manufacturing towns, would seem to ensure a large and profitable local business, while its important connection with the Erie Railway must secure an amount of through traffic of no mean proportions.—*Boston Advertiser.*

Arrivals and Tonnage of Vessels at Quebec.

The arrivals and tonnage of vessels at Quebec during 1867, were as follows:

	Vessels.	Tons.
British	696	474,296
American	2	1,659
Norwegian	99	57,483
Prussian	10	4,900
French	3	1,132
Portuguese	4	1,105
Hamburg	4	3,114
Bremen	7	4,734
Lubeck	1	585
Total in 1867	826	548,958
" 1866	1,025	605,227
" 1865	1,021	646,115
" 1864	1,098	624,026
" 1863	1,401	742,431

The average of the five years, 1858 to 1862, was 1,096 vessels, and the average tons, 614,157.

☞ The Annamessic Company have made a survey of a direct line for a railroad from Plymouth to Wilmington, N. C., and have commenced the Dismal Swamp Canal. This line, just touches the town of Washington, N. C., and will cross the Annamessic and North Carolina Railroad between Kinston and Newbern.

☞ A meeting in reference to the proposed railroad between Lebanon and Pinegrove, Penn., was recently held in Lebanon. Committees to obtain further information on the subject, and to correspond with leading citizens of Schuylkill County in regard to the proposed enterprise, were appointed.

☞ The Milwaukee *Wisconsin* says that Oconto and Menominee are extensively agitating the subject of extending the Chicago and Northwestern Railroad down the bay shore on its way to Escanaba; and that Oconto County offers to give bonds for all that the company asks.

☞ The contracts have been awarded for grading the Baltimore and Potomac Railroad, and large parties of workmen, under competent engineers, are rapidly pushing on the work on the sections between Marlboro' and Millersville, and also on the branch road to Washington.

New Maryland and Dt. of Columbia Railroad Bill.

A bill has been introduced into the House of Representatives, "to authorize the building of a railroad from Washington city, to connect with the Northern Central Railroad at or near the State line between Pennsylvania and Maryland." It is proposed to run the road by Brookville and Owings's Mills. The capital stock is to be $2,000,000, in forty thousand shares, at $50 per share, ten per cent. to be paid in when subscribed. The company to fully organize when $250,000 are subscribed and the ten per cent. paid in. The gauge of the road will be the same as that of the Northern Central; to be built of American iron, and completed in four years from the election of the directors; which election is to be held when $250,000 of the stock is subscribed for.

Eldora Railroad and Coal Co.

This road branches from the Iowa Division of the Illinois Central road, near Ackley, 133 miles from Dubuque, and runs in a southerly direction, *via* Steamboat Rock to Eldora, a distance of 18 miles, when it reaches the coal regions that are owned by the company. The main object of this road is to convey this coal to where it can reach a market. The coal is said to be in quality next to the best found in the West; is in unlimited supply and easy of access, being of surface formation. Thirteen miles of this road are now in operation, and the remaining five miles are ready for the iron. The company was organised in 1867, with a capital of $600,000. C. C. Gilman is President; J. M. McKinley, Secretary; and J. K. Graves, Treasurer.

Chicago and Great Eastern Railroad.

At the annual meeting of the stockholders of this road recently held in Chicago, the following gentlemen were elected directors, viz: W. D. Judson, James E. Young, Amos Tenney, Henry Morgan, James W. Elwell, Lawrence Wells and James D. Fish. It was voted to consolidate the Chicago and Great Eastern Railroad with the Columbus and Indiana Central, which runs from Columbus, Ohio, to Indianapolis, Indiana *via* Richmond, the terminus of the Chicago and Great Eastern Railroad, and has a branch partly built from Union through Logansport to the Illinois and Indiana State line.

☞ The firm of Hall, Washburn & Co., manufacturers of machinery of all kinds, and dealers in Railway and Steamship Supplies, was dissolved on the 20th Nov. last. M. B. Washburn, having purchased the entire interest of the above firm, will continue the business at 137, 139 and 141 Elm st., N. Y., where all orders will receive prompt attention.

The Great Russian has decided on laying down a second line of rails between Moscow and Nijni-Novgorod, a distance of 176 verstes. It appears that the rough receipts on this division of the Great Russian system now exceed 9,000 roubles per verste; and this limit having been attained, the statutes require that the line is to be doubled. And doubled it will be accordingly.

☞ A railroad is in contemplation from Delmar to Nanticoke Point, at the mouth of that river. The new road will, if built, run through and open up the western part of Wicomico and Somerset counties, along the Chesapeake Bay.

☞ At the recent annual meeting of the Philadelphia, Wilmington and Baltimore Railroad company, the following named gentlemen were elected directors: Isaac Hinkley, Samuel M. Felton, Wm. Sellers, Samuel Welch, John A. Duncan, Jesse Lane, Joseph Bringhurst, Frederick A. Curtis, J. I. Cohen, Jr., Thomas Kelso, Columbus O'Donnell, Enoch Pratt, Thomas Donaldson, Jacob Tome and Nathaniel Thayer. The board was subsequently organized by the election of Isaac Hinkley president, Enoch Pratt vice president, and Alfred Horner secretary and treasurer.

☞ The directors of the Lackawanna and Bloomsburg Railroad, recently elected are as follows: James Archibald, John C. Phelps, Moses Taylor, John J. Blair, John Brisbin, Joseph H. Scranton, A. H. Reynolds, Samuel Hoyt, Thos. F. Atherton, Payne Pettibone, D. G. Driesbock, and W. R. Storrs. President, James Archibald; Vice-President, John C. Phelps.

☞ The total receipts of the railways of Italy amounted in the first half of 1867 to 1,334,480*l.*—viz., Upper Italy, 969,440*l.*; Roman, 292,120*l.*; South Italian, 160,760*l.*; and Victor-Emmanuel and Calabro-Sicilian, 22,272*l.* The receipts of the telegraph in the first nine months of the year were 120,920*l.*

☞ The citizens of Cleveland are agitating the project for a railroad from the Cleveland, Columbus and Cincinnati Railroad at Berea, through Medina, Wooster and other towns, to some points in the Tuscarawas Valley.

☞ The Rogers Locomotive Works, Paterson, N. J., are enlarging, in view of an expected increase of business. The Grant Locomotive Works are said to be closed for want of work.

☞ The Pelta *Blade* says that the project on foot for the establishment of a railroad from Des Moines to Albia, *via* Knoxville, is meeting with good success.

THE NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE.
ALBANY, Jan. 21, 1868.

TWENTY-NINTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a semi-annual dividend of Three Per Cent. on the capital stock thereof, payable on the 20th day of February next.

Dividends in New York will be paid at the office of Duncan, Sherman & Co.; in Albany, at the Albany City National Bank.

The transfer books will be closed at the close of business on Friday, the 31st day of January inst., and be re-opened on the morning of Monday, the 24th day of February next.

E. D. WORCESTER, Treasurer.

CHARLES J. PUSEY & CO.,

74 Broadway, & 9 New St.,

NEW-YORK.

COMMISSION MERCHANTS FOR THE SALE OF

Pig, Merchant Bar & Railroad Iron & Supplies

OF EVERY DESCRIPTION.

Sole Agents for the Sale of Atkins Bros' make of Railroad Iron. Their Works being located in the coal & iron districts of Pennsylvania, & having their own Ore Mines, Blast Furnaces and Machine Shops, all under their ownership and control, in connection with their extensive Mills, which have recently been greatly enlarged and improved, enables them, with their long experience, to produce Rails, which for evenness and regularity of quality and finish, cannot be excelled anywhere.

Rails of any desired weight or pattern furnished on short notice.

CHAS. J. PUSEY,
HANSON E. ATKINS,
CALEB H. MALIN.

Manufacturers of the Celebrated

CAST STEEL

For Tools, Dies, Taps, Punches, &c.

13 GOLD STREET, NEW YORK.

ESTABLISHED 1833.

TO BRIDGE CONTRACTORS,

LOUISVILLE, CINCINNATI, AND LEXINGTON RAILROAD,

CHIEF ENGINEER'S OFFICE,
LOUISVILLE, KY., January 13, 1868.

SEALED PROPOSALS will be received at this office until February 15, 1868, for about twenty-six hundred lineal feet of Bridge superstructure (in iron and timber) for the Kentucky river and other streams crossing the Louisville and Cincinnati Railroad. Thirteen hundred feet will be in spans of 200, 150, 125, and 100 feet, and the residue in 75 feet spans and under; all upon plans and specifications exhibited on and after the 20th inst.; but proposals upon other plans will be considered. Each bid will cover materials, labor of all kinds, transportation, and erection. For a portion of the Bridge work completion will be required July 1st, 1868, and for all by September 1st ensuing. Payments cash, with the usual reservation on partial payments to secure fulfillment of contract. Right reserved to reject any or all bids.

Proposals will also be received for the temporary trestling on the line.

I. M. ST. JOHN,
414 Chief Engineer.

IRON BRIDGES.

THE undersigned is prepared to Manufacture and Build in any part of the United States, at reasonable terms, Fink's Patent Iron Bridges, Plate and Lattice Bridges, Plate Girders for Fireproof Buildings, Iron Roofs, Boats, etc For plans and particulars apply to

540 MILES

OF THE

Union Pacific Railroad

Running West from Omaha

Across the Continent,

ARE NOW COMPLETED.

THE TRACK BEING LAID AND TRAINS RUNNING

WITHIN TEN MILES OF THE SUMMIT

OF THE ROCKY MOUNTAINS.

The remaining ten miles will be finished as soon as the weather permits the road-bed to be sufficiently packed to receive the rails. The work continues to be pushed forward in the rock cuttings on the western slope with unabated energy, and a much larger force will be employed during the current year than ever before. The prospect that the whole

GRAND LINE TO THE PACIFIC

WILL BE COMPLETED IN 1870,

was never better. The means so far provided for construction have proved ample, and there is no lack of funds for the most vigorous prosecution of the enterprise. These means are divided into four classes:

1.—UNITED STATES BONDS,

Having thirty years to run, and bearing six per cent. currency interest, at the rate of $16,000 per mile for 517 miles on the Plains; then at rate of $48,000 per mile for 150 miles through the Rocky Mountains; then at the rate of $32,000 per mile for the remaining distance, for which the United States takes a *second lien* as security. The interest on these Bonds is paid by the United States government, which also pays the Company one-half the amount of its bills in money for transporting its freight, troops, mails, &c. The remaining half of these bills is placed to the Company's credit, and forms a sinking fund which may finally discharge the whole amount of this lien.

2.—FIRST MORTGAGE BONDS.

By its charter the Company is permitted to issue its own First Mortgage Bonds to the same amount as the bonds issued by the government, and *no more, and only as the road progresses.* The Trustees for the Bondholders, are the Hon. E. D. Morgan, U. S. Senator from New York, and the Hon. Oakes Ames, Member of the U. S. House of Representatives, who are responsible for the delivery of these Bonds to the Company in accordance with the terms of the law.

3.—THE LAND GRANT.

The Union Pacific Railroad Company has a land grant or absolute *donation* from the government of 12,800 acres to the mile on the line of the road, which will not be worth less than $1.50 per acre, at the lowest valuation.

4.—THE CAPITAL STOCK.

The authorized capital of the Union Pacific Railroad Company is $100,000,000, of which $8,500,000 have been paid on the work already done.

The Means Sufficient to Build the Road.

Contracts for the entire work of building 914 miles of first-class railroad west from Omaha, comprising much of the most difficult mountain work, and embracing every expense except surveying, have been made with responsible parties, (who have already finished over 540 miles), at the average rate of sixty-eight thousand and fifty-eight dollars ($68,059) per mile. This price includes all necessary shops for construction and repairs of cars, depots, stations, and all other incidental buildings, and also locomotives, passenger, baggage, and freight cars, and other requisite rolling stock, to an amount that shall not be less than $5,000 per mile. Allowing the cost of the remaining one hundred and eighty-six of the eleven hundred miles assumed to be built by the Union Pacific Company to be $90,000 per mile,

The Total Cost of Eleven Hundred Miles will be as follows:

914 miles, at $68,058	$62,205,012
186 miles, at $90,000	16,740,000
Add discounts on bonds, surveys, &c.	4,500,000
Amount	$83,445,012

As the U. S. Bonds are equal to money, and the Company's own First Mortgage Bonds have a ready market, we have as the

Available Cash Resources for Building Eleven Hundred Miles:

U. S. Bonds	$29,823,000
First Mortgage Bonds	29,328,000
Capital Stock paid in on the work now done	8,500,000
Land Grant, 14,080,000 acres, at $1.50 per acre	21,120,000
Total	$88,270,000

The Company have ample facilities for supplying any deficiency that may arise in means for construction. This may be done wholly or in part by additional subscriptions to capital stock.

EARNINGS OF THE COMPANY.

At present, the profits of the company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a *Government Work*, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

First Mortgage Bonds

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent. lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment, and have thirty years to run before maturity. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,

HEDDEN, WINCHESTER & CO., Bankers, No. 69 Broadway.

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

JOHN J. CISCO, Treasurer, New York.

COLLINS & CO.'S NEW PATENT SCREW WRENCH.
THE STRONGEST AND MOST DURABLE WRENCH IN MARKET.

All Consumers have noticed that their wrenches first fail by reason of the forcing back of the handle, and by the springing of the bar. Our improvement remedies both these defects, the bars being finished wider than any other wrench in market, and the handle cannot be displaced, as all strain on it is prevented by the screw thimble, D, (see cut.) Already adopted as *the best* by the principal railroads and machine shops, and for sale by Hardware dealers generally. Address

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. Lyons, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20 "		1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 24 "		1½ to 1
4.	" 14	"	1½ to 1	16.	" 24 "		1½ to 1
5.	" 15	"	¾ to 1	17.	" 25 "		1½ to 1
6.	" 15	"	1 to 1	18.	" 26 "		1½ to 1
7.	" ½	"	1½ to 1	19.	" 28 "		¾ to 1
8.	" 16	"	¾ to 1	20.	" 30 "		1 to 1
9	" 18	"	1 to 1	21.	" 30 "		1¼ to 1
10.	" 18	"	¼ to 1	22.	" 30 "		1½ to 1

American Railroad Journal.

New York, Saturday, February 1, 1868.

Iowa Falls and Sioux City Railroad.

The Dubuque *Herald* says that an arrangement has been entered into between the Dubuque and Sioux City and the new Iowa Falls and Sioux City Railroad Companies which will not only put an end to hostilities, but will probably combine the interests of the two so as to work for one end.

The old Dubuque and Sioux City Company have made a conveyance of all their right, title and interest to the line of the road west of Iowa Falls to the Iowa Falls and Sioux City Company, of which John I. Blair is the head, and in which Platt Smith, Esq., of Dubuque is actively interested. The new company assumes, as we understand it, all the contracts for grading, tieing and bridging the road between Iowa Falls and Fort Dodge, which have already been made; also the contracts relative to the right of way; and in fact, everything that has been done by the old company looking to the extension of the road. The new company take from the old company everything just as it stands, and have obligated themselves to push the work ahead to a rapid and successful termination.

The bargain, however, is conditional in this respect, that the land grant which has been conditionally given to the old company shall be passed over to the new. The legislature, however, is the only party having control of this, and the contract all properly signed and sealed, has been put in the hands of a third disinterested party to hold until this question is decided, and then if the land grant is conveyed to the new company, the contract is to be delivered. As the Iowa Falls and Sioux City, however, will be the only company competing for the land grant, there can be little doubt that it will secure it.

Should this condition, with others of minor importance, be fulfilled, the new company agrees to complete the road to Fort Dodge during the present year, and to the Missouri River before the close of the year 1869. The new company also assumes the lease with the Illinois Central beyond Iowa Falls, to which assumption the Central managers have already assented, and this latter company will therefore operate the road as fast as it is completed, just as they now do the completed sections. The line being completed through to the Missouri with a branch to Sioux City and another to a point on the Union Pacific branch to Omaha, and the bridge at Dubuque being completed about the same time, it is designed to make this a great through route, and to this end the efforts of all the interested companies, the Illinois Central, the Bridge Company, the Dubuque and Sioux City, and the Iowa Falls and Sioux City will all combine.

Bridge over the Mississippi at Davenport.

The Davenport *Gazette* says that the difficulties which have prevented the completion of arrangements for the new bridge over the Mississippi at that point, have all been removed. The Chicago, Rock Island and Pacific Railroad Company have agreed with the Secretary of War as to the terms of mutual occupancy and mutual expenditures. Gen. Grant and Gen. Dyer, Chief of Ordnance, heartily approved of the arrangements, and earnestly recommend Congress to make the appropriation needed to complete the entire structure within fourteen months from next spring, when the work is to be begun.

The piers are to be of the best stone; the superstructure wholly of iron, and the whole to be built under the direction of the National authorities, and, in the first instance, at National cost. The estimated expense is $1,200,000. Of this amount one-half is eventually to be repaid by the railroad company, which will give bonds to that effect. The bridge will have a draw, but will be built, according to plans prepared by the best Engineers in the United States service, and will not be an impediment to navigation.

Western Union Telegraph.

From the report of the Western Union Telegraph Company for the 18 months ending December 31st last, the following analysis is made:

The total capital stock on which the company is liable for dividends is $40,359,400, subject to be increased by further exchanges of outstanding American and United States Telegraph Companies stock, as provided for in agreements of consolidation, viz., American stock, $133,800; U. S. stock, $145,600.

The bonded debt exhibits the following: bonds of the American Telegraph Co., due in 1873, $89,500; bonds of Western Union Telegraph Co., due in 1875, $4,857,300—total bonded debt December 1, 1867, $4,946,800.

The statement of income and expenses for 18 months from July 1, 1866, to January 1, 1868, (the business of December, 1867, being estimated,) shows the gross receipts to have been $10,044,868 29; working expenses, including amounts paid to other lines, rents, taxes, cost of reconstruction, &c., $6,195,424 32—net profits, $3,849,443 97.

The total net profits of 17 months up to Dec. 1, 1867, and miscellaneous profits aggregating a total of $3,684,697 15, have been applied as follows: Dividends, $1,610,421 34; interest on bonds, $439,157 48; appropriation to sinking fund for purchase of bonds of 1875, $140,000; redeemed American bonds, $53,175; redeemed bonds of 1867, $563,180; constructing new lines, $586,003 21; purchase of sundry telegraph stocks, $125,644 27; paid on account of Buffalo bond and mortgage, $10,000—total, $3,527,581 30; leaving balance unappropriated, $157,115 85, and balance on hand July 1, 1866, $17,828 94—making the balance of unappropriated profits Dec. 1, 1867, at $174,944 79.

The statement of assets and liabilities Dec. 1, 1867, show: Assets, $48,291,605 86; liabilities, $46,355,831 53. The profits used for purchasing property, profits applied to sinking fund and not yet expended, and profits on hand unappropriated, aggregate $1,945,774 38.

The estimated available surplus on January 1, 1868, is $254,944 79, the net profits of last December being set down at $180,000.

Boston and Lowell Railroad.

The receipts from operations of this road for the fiscal years ending September 30, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$398,318 39	$408,199 38
" freight	567,070 91	551,198 17
" mail	5,680 59 }	15,644 42
" expresses	13,002 19 }	
	$979,022 08	$975,041 97
Expenses, viz:		
Repairs of road	$111,986 15	$134,850 55
" equipment	131,417 88	157,399 89
" bridges	24,482 49	13,006 71
" structures	58,584 73	37,041 75
Merchandize expenses	66,812 75	68,509 53
Fuel	97,153 86	94,281 94
Wages	81,436 57	89,974 51
Taxes and insurance	52,339 43	36,241 77
Rents to other roads	43,597 30	39,316 20
Oil and waste	14,350 85	13,098 08
All other expenses	53,381 02	53,722 99
Totals	$735,493 03	$737,443 92
Net receipts	$243,529 05	$237,598 05

The income of the company from all sources during the years named have been as follows:

	1866.	1867.
Receipts, as above	$979,022 08	$975,041 97
Rents	1,141 29	1,166 27
Trustees of sinking fund	16,145 31	16,250 96
	$996,308 68	$992,459 20
Expenses	$735,493 03	$735,278 80
Interest	42,995 00	41,880 96
Dividends	146,400 00	147,000 00
Taxes	21,066 96	19,311 11
Carried to reserve fund	50,353 69	49,038 33
	$996,308 68	$992,459 20

The Reserved Fund Account at the commencement and close of each year was as follows:

	1866.	1867.
Bal. from previous year	$503,482 13	$553,835 82
Transportation account	244,248 92	239,768 17
Rents account	1,141 29	1,166 27
Accumulation of S. F.	16,145 31	16,250 96
	$765,017 65	$811,016 22
Less dividends, interest and taxes	211,181 83	574,142 07
Reserve Sept. 30	$553,835 82	$236,874 15
From this amount is to be deducted the dividend declared Dec. 9, 1867.		79,642 11
Leaving a surplus of		$157,232 04

The gross income from working the road is $3,980 11 less than in 1866; while the expenses have been $505 64 greater—making the net income $4,485 75 less.

The income from rents and from the accumulation of the sinking fund was added, on the 31st of December, 1866, to the principal of the Policies from the Massachusetts Hospital Life Insurance Company held by the Trustees of that Fund.

This fund established for the final redemption of the bonds, which will fall due in 1873, amounts to $284,678 09. It has been increased during the past year by cash payments to the Trustee, $18,300, and by its own accumulation, $16,250 96; and on the 31st Dec. it will be increased by the amount of one year's accumulation to that date.

Of the bonds due in 1873, the amount of $61,500 has been converted by the holders into stock at par in accordance with the contract in the bonds.

The balance of the interest account, the amount of dividends declared, and of stockholders' United States and State Taxes paid during the year, had been passed to the debit of "Profit and Loss" before that account was closed.

The net profits of the company, for the year, have amounted to $213,184 32; of this sum there has been paid to the stockholders $164,145 99, viz.:

Cash dividends	$147,000 00
United States income tax	7,736 84
Local taxes	9,409 15
	$164,145 99

And $49,038 33 have been added to the reserves.

The financial condition of the company at the close of each year was as follows:

	1866.	1867.
Cost of road	$2,456,140 73	$2,460,961 22
Cost of equipment	192,638 25	192,638 25
Notes receivable	154 38	154 38
Trustees of S. F.	250,127 13	284,678 09
East Cambridge flats	6,796 33	25,239 76
Fuel, materials, etc., on hand	171,186 59	144,968 43
Cash	21,489 46	38,838 92
	$3,099,132 87	$3,147,479 05
Capital stock	$1,830,000 00	$1,891,500 00
Bonds due in 1873	440,000 00	378,500 00
Scrip due in 1873		366,000 00
Bonds due in 1879	200,000 00	200,000 00
Divid'ds and coupons	3,109 55	2,417 40
Balances of accounts	2,187 50	2,187 50
Notes payable	70,000 00	70,000 00
Reserves	553,835 82	236,874 15
	$3,099,132 87	$3,147,479 05

President.—F. B. Crowninshield.

Directors.—F. B. Crowninshield, Geo. W. Lyman, J. G. Abbott, Wm. Minot, Jr., Hocum Hosford.

Treasurer.—J. Thomas Stevenson.

Superintendent.—John B. Winslow.

Blue Line.

The Blue Line commenced business January 1, 1867. The following abstract of the Report of the General Manager shows its operations for the year ending December 31, 1867:

	Tons.	Earnings.
Freight moved East	91,591	$1,609,939 16
Freight moved West	55,462	1,082,675 99
Total	147,053	$2,692,615 15
Number of tons moved one mile		137,558,819
Earnings per ton per mile, eastward		1.83
Earnings per ton per mile, westward		2.18
Average earnings per ton per mile, both ways		1.96
Per cent. of freight moved East		62.28
Per cent. of freight moved West		37.72

The freight paid to the several roads in the line has been to

Boston & Albany (late B. & W. & W.)	$240,117 85
Hudson River R. R	179,463 82
New York Central R. R.	873,674 81
Great Western Railway	658,056 47
Michigan Central R. R	647,597 35
Chicago, Burlington & Quincy R. R.	17,856 92
Chicago and Alton R. R	64,459 22
Illinois Central R. R	11,389 21
Total	$2,692,615 15

The central office operating expenses were 1.11 per cent. of the earnings. The total number of miles run by all cars, including empties, was 18,565,886.

Allowing each car to make an average of 30,000 miles for the year, the proportion of cars each company should have had in the line to have made their proper proportion of mileage would have been:

	Cars.	Now have in Cars.
Boston and Albany	54	49
Hudson River Railroad	35	37
New York Central Railroad	196	100
Great Western Railway	152	130
Michigan Central Railroad	153	154
Chicago, Burlington and Quincy	6	50
Chicago and Alton Railroad	19	25
Illinois Central Railroad	4	50
Average number required	619	593

The past year has been one of unusual variations in the traffic. At the beginning there was but little business, other than dressed hogs, or such other property as necessity compelled its movement eastward, while upon west bound merchandise there was comparatively nothing moving, so that nearly all the cars returned empty, or loaded locally from one terminal point to another. This state of traffic continued until the beginning of March, when a sudden reaction took place; east bound freight dropped off all at once, at the same time the west bound merchandise came in very largely, but with little movement of loaded cars east to meet the demand for cars to load west. Consequently the cars having been sent west empty had to be returned east again empty, to meet the demand, making three trips over the line for one earnings. The month of April brought a very much greater difference, showing the earnings on west bound to be $145,981 58, against $85,106 30 on east bound. The west bound, for the last four months of the half year, continued to exceed the east bound earnings.

It is confidently hoped that a very large traffic in lumber will be developed for the line which had to be refused the past year for want of cars.

The property carried for 1867 was: Flour, 27,733 tons; barley, 478 tons; corn in bulk, 9,706 tons; oats in bulk, 556 tons; wheat in bulk, 3,563 tons; cotton, 3,943 tons; dressed hogs, 9,474 tons; wool, 3,154 tons; provisions and merchandise, 88,442 tons; total, 147,053 tons.

Amount of earnings on freight passing over the Albany bridge during the year	$2,340,762 11
Tolls for the year	88,621 48

Per cent. of earnings, 1.43 cents.

Earnings of the different roads on freight passing over bridge during the year:

Boston and Albany Railroad	$239,696 78
Hudson River Railroad	180,240 97
New York Central Railroad	737,908 52
Great Western Railway	552,102 08
Michigan Central Railroad	644,809 88
Chicago, Burlington and Quincy R.R.	17,392 35
Chicago and Alton Railroad	58,666 19
Illinois Central Railroad	10,445 24
Total	$2,340,762 61

Grain in bulk has been carried successfully from the West to the seaboard, and to various towns and cities in the East. The building of an elevator at the terminus of the line in New York and Boston, where grain can be handled with despatch and stored, would add very much to this class of traffic. It is contemplated to build these elevators as soon as possible.

The Refrigerators are the same pattern of the "Blue Car," but painted white to reflect the rays of the sun, but built much stronger than the others, and are doubled walled, double roofed, and double floored, with iron braces running from the roof to the bottom of the car. At each end is located an ice box holding about one ton of ice. These cars to be used for carrying fresh meat, game, butter, lard, eggs, oysters, and other property liable to loss or damage during warm weather. This branch of the business is expected to increase rapidly as the public becomes more

acquainted with the advantages offered by the use of these cars.

The line enters upon the second year's business with very fair prospects of success. There are now 613 blue cars in the line, including twenty refrigerators. The business is very fair, and there is every prospect of its continuing.

Coal Trade of the United States.

The following statement, taken from the Pottsville *Miners' Journal*, will show the number of tons of coal sent to market from the different coal regions, in 1866 and 1867:

	1866. Tons.	1867. Tons.
Schuylkill Region:		
By Reading Railroad	3,425,413	*3,099,580
By Schuylkill Canal	1,297,047	1,030,235
By Mahanoy and Lehigh	323,693	439,608
From Pinegrove	21,100	†27,962
	5,067,253	4,597,385
Less Lehigh, Shamokin and Lackawanna	433,766	262,565
Totals	4,633,487	4,334,820
Lehigh Region:		
By Lehigh Valley Railr'd	1,730,475	1,948,385
By Lehigh Canal	1,066,303	1,006,604
	2,796,778	2,954,989
Less Wyoming Coal	344,218	452,935
Totals	2,452,560	2,502,054
Wyoming Region:		
Wyoming Canal, S	463,642	369,099
North Branch Canal, N	105,943	82,376
Pennsylvania Coal Co.	535,385	‡861,730
Scranton, North	433,570	515,657
" South	1,085,450	1,203,664
Delaware and Hudson Co.	1,302,894	§1,422,229
Lack. and Bloomsburg, S.	465,180	420,310
By Lehigh	344,218	452,985
Totals	4,736,282	5,328,000
Shamokin Region	557,161	485,697
Total Anthracite	12,379,490	12,650,571
Semi-Anthracite:		
Short Mountain Coal Co.	112,851	89,288
Lykens Valley Coal Co.	36,950	76,106
Summit Branch Coal Co.	70,112	127,642
Treverton	53,648	48,118
Broad Top	265,720	244,412
Totals	539,281	588,566
Bituminous:		
Cumberland Coal	343,173	384,322
Baltimore and Ohio R. R.	812,563	764,545
Imported	643,294	521,305
Totals	2,338,316	2,255,728
Add Anthracite	12,379,490	12,650,571
Total tons	14,717,806	14,906,309

The following is a recapitulation of the quantity of Anthracite coal furnished by the different regions in 1866 and 1867:

	1866.	1867.
Schuylkill Region	4,633,487	4,334,820
Lehigh Region	2,452,560	2,502,054
Wyoming Region	4,736,282	5,328,000
Shamokin Region	557,161	485,697
Totals as above	12,379,490	12,650,571
To which may be added consumption in Regions in 1867		2,000,000
Total quantity mined		14,650,571

The loss and gain in 1867 was as follows:

	Loss.	Gain.
Wyoming Region		591,718
Schuylkill	298,667	
Lehigh		49,494
Shamokin	71,464	
	370,131	641,212

—showing the total gain of Anthracite in 1867, to have been 271,081 tons; from which deduct loss in Semi-Bituminous and Bituminous, 82,578 tons—making the whole increase for the year, 188,508 tons.

The following statement will show the shipments from the Schuylkill, Lehigh and Wyoming Regions since 1860:

	Schuylkill.	Wyoming.	Lehigh.
1860	3,271,511	2,941,817	1,821,674
1861	2,697,489	3,055,140	1,738,377
1862	2,890,598	3,145,770	1,851,054
1863	3,433,265	3,759,610	1,894,713
1864	3,642,218	3,960,836	2,054,669
1865	3,735,802	3,256,658	2,040,913
1866	4,633,487	4,736,282	2,452,560
1867	4,334,820	5,328,000	2,502,054

The whole supply of coal for 1867 in the United States, is estimated as follows:

	Tons.
Supply of Anthracite sent to market (official)	12,650,571
Semi-Bituminous and Bituminous in table (official)	2,255,738
	14,906,309
Consumed in the different Anthracite Regions, (estimated)	2,000,000
	16,906,309
Bituminous mined and consumed in the United States not embraced in our tables (estimated)	8,893,691
Making the whole supply of coal mined in the United States in 1867	25,800,000

Of the supply of anthracite mined, amounting to 14,650,571 tons, there were upwards of 5,000,000 tons, more than one-third, that did not reach the sea-board, but was consumed in the Coal Regions, sent to the interior, and on the lines of the different carrying companies. The consumption in the valley of the Schuylkill, and on the line of the Lehigh leading from Mauch Chunk to Bristol, was upwards of 2,000,000 tons, as follows:

	Tons.
On the line of the Schuylkill	1,107,826
Between Mauch Chunk and Bristol	912,325
	2,020,159

Central Railroad of New Jersey.

The quantity of coal transported over the Central Railroad of New Jersey in 1867, was as follows:

	Tons.
Lehigh coal	513,383
Lackawanna	854,520
Total	1,367,903

Of the above quantity 113,692 tons Lehigh, and 10,852 Lackawanna, in all 124,544 tons, were consumed on the line; the balance reached Elizabethport and Port Johnson.

The quantity transported in each year since 1860, has been as follows:

	Lehigh. tons.	Lackawanna. tons.	Total. tons.
1860	263,885	590,862	854,647
1861	254,367	568 869	823,235
1862	311,296	502,375	816,671
1863	435,729	613,954	1,049,683
1864	474,221	675,743	1,149,964
1865	509,619	494,687	1,004,306
1866	511,076	779,173	1,290,249
1867	513,383	854,520	1,367,903

Morris Canal.

The following is a statement of the amount of coal which entered the Morris Canal in each year since 1860.

	—Lehigh coal from— Canal tons.	Railroad tons.	Total. tons.	Scranton Coal. tons.	Total. tons.
1860	276,947	.....	276,947	127,517	404,464
1861	272,616	1,401	274,017	140,922	414,939
1862	106,431	45,738	152,169	172,128	324,297
1863	208,397	48,234	256,631	145,815	402,446
1864	194,097	37,644	231,745	151,122	382,866
1865	217,814	74,171	291,984	124,204	416,189
1866	205,351	112,790	318,141	141,034	459,175
1867	171,266	107,206	278,472	146,359	424,831

The total amount which entered the canal since 1845 was 6,007, 958 tons, of which 4,826,662 was Lehigh, and 1,355,036 tons Scranton.

Delaware and Hudson Canal Co.

The quantity of coal mined and forwarded by this company in 1867, was 1,507,487; in 1866, 1,391,674—an increase of 115,813 tons. In 1865 the amount carried was 812,094; and in 1864, 886,841 tons.

Lehigh Coal and Navigation Co.

The total tonnage of the Lehigh Canal (Coal) in 1867 was as follows:

	Tons.
Consumed on line of Lehigh Canal	67,340
Passed into the Del. Div. Canal	767,998
" Morris Canal	171,266
	1,006,604

The Coal passed into the Del. Div. Canal was distributed as follows:

Consumed on line of Del. Div. Canal	43,764
Passed into Del. and Raritan Canal	472,751
Passed through to Bristol	251,483
Total, as above	767,998

Philadelphia and Reading Railroad.

Amount of coal received from various lateral railroads in Schuylkill coal region:

	1866.	1867.
Schuylkill Valley Railroad	129,679	115,094
Mill Creek	292,726	249,582
Mahanoy and Broad Top Mountain Railroad	1,110,080	1,228,991
Total at Port Carbon	1,532,495	1,593,667
Mt. Carbon R. at Mt. Carbon.	42,513	34,682
Mine Hill and Schuylkill Haven Railroad at Schuylkill Haven	1,168,786	863,624
Schuylkill and Susquehanna Railroad at Auburn	146,667	132,123
Little Schuylkill Railroad at Port Clinton	534,952	485,484
	3,425,413	3,099,580
Bituminous and anthracite from Harrisburg	289,271	847,246
Total tons of 2,240 lbs.	3,714,684	4,446,826

* The whole quantity of Coal transported over the Philadelphia and Reading Railroad in 1867 was 3,446,826 tons. Of this quantity 347,246 tons were principally Bituminous Coal, received at Harrisburg, and a small quantity of Anthracite, reported in the tables.

† The whole coal trade of Pinegrove was 157, 817 tons. The balance is reported in the Reading Railroad tonnage.

‡ Of this quantity 21,170 tons were sent *via* Delaware and Hudson Canal.

§ Of this quantity 88,435 tons was coal belonging to the Union Coal Co., and 21,170 for the Penn. Coal Co,

SCHUYLKILL NAVIGATION CO.

The number of tons of coal transported by this company in 1867 was 1,030,235; in 1866, 1,297,046. Of these amounts there were sent to Philadelphia and vicinity in 1867, 336,364; and in 1866, 362,279 tons; to New York and vicinity in 1867, 465,261; and in 1866, 701,120 tons.

LITTLE SCHUYLKILL RAILROAD.

The quantity of coal transported over this road for the different operators in 1867, was 549,097 tons; in 1866, 617,278 tons; and in 1865, 585,534 tons.

LEHIGH AND MAHANOY RAILROAD.

The quantity of coal sent from Schuylkill County on this road, in 1867, by the different operators was 443,916 tons; in 1866 the quantity sent was 328,693 tons.

SCHUYLKILL AND SUSQUEHANNA RAILROAD.

The quantity of coal transported over the Schuylkill and Susquehanna Railroad in 1867, is as follows:

	East.	West.	Total.
From Pinegrove	129,856	27,962	157,818
" Dauphin, West	.....	.....	92,379
" Auburn, West	.....	.....	7,472
Total, 1867			257,669
" 1866	146,733	21,100	200,437
" 1865	168,296	18,458	186,754
" 1864	191,391	24,584	240,057
" 1863	189,254	48,449	237,703
" 1862	146,095	53,842	199,937
" 1861	101,523	91,820	193,343
" 1860	94,975	14,718	109,693

This road is now owned and worked by the Reading Railroad Company.

MORRIS AND ESSEX RAILROAD.

This is a new competitor for carrying coal from the Lehigh and Wyoming Regions. It connects at Easton with the Lehigh Valley Railroad, and will also connect with the Lehigh Navigation Company's road at Easton as soon as completed. Its terminus is at Hoboken, opposite New York. The grades are not so favorable as those on the New Jersey Central road, but it traverses rich manufacturing districts. The trade only commenced in March, and was small during the first three months. The amount sent in 1867, was 229,970 tons.

SHAMOKIN COAL TRADE.

The quantity of coal sent to market by the different operators in 1867, was 485,697 tons—distributed as follows:

	Tons.
Eastward, by Mine Hill and Reading Railroads	212,763
Eastward, by M. H. and Schuylkill Canal	49,440
Eastward, by Lehigh and Mahanoy R. R.	4,309
Southward, by Northern Central Railway and Pennsylvania Railroad	100,861
Southward, by canal, Sunbury inclusive	66,751
Westward, by Philadelphia and Erie R. R.	51,573
Total	485,697

LEHIGH VALLEY RAILROAD.

The coal carried on this road in 1867, was received from the following points:

	Tons.
Beaver Meadow Region	473,202
Hazleton Region	775,053
Mahanoy "	426,965
Wyoming "	273,165
Total	1,948,388
Total in 1866	1,730,475
" 1865	1,402,277

LEHIGH COAL TRADE.

The quantity of coal sent to market from the Lehigh Region by the different operators in 1867 was: by railroad, 1,243,712; by canal, 782,561—total, 2,026,273 tons. The amount sent in 1866 was 2,159,441 tons.

BELVIDERE DELAWARE RAILROAD.

The quantity of coal transported over this road in 1860 was 146,308 tons; in 1861, 145,907; in 1862, 129,452; in 1863, 130,494; in

	Through.	Way.	Total.
1864	161,278	18,095	174,323
1865	202,781	11,585	214,345
1866	174,508	13,554	188,062
1867	269,738	18,583	288,321

The Camden and Amboy Company are erecting extensive shipping wharves at Perth Amboy, and the trade by this route we learn will be largely increased.

LOCUST MT. COAL AND IRON CO.

The quantity of coal sent from the several collieries on the lands of this company in 1867, was 457,652 tons; in 1866, 494,340 tons; in 1865, 366,997 tons.

NORTH PENNSYLVANIA RAILROAD.

The quantity transported over this road in the years named, has been:

	Tons.		Tons.
1860	91,327	1864	123,475
1861	98,389	1865	129,695
1862	103,947	1866	141,841
1863	113,680	1867	140,827

EAST PENNSYLVANIA RAILROAD.

The quantity transported over this road since 1860, has been as follows:

	Tons.		Tons.
1860	11,030	1864	9,341
1861	10,622	1865	8 845
1862	6,667	1866	10,050
1863	9,526	1867	6,441

SCHUYLKILL REGION.

The quantity of coal mined and sent to market from the Schuylkill Region in 1867, was 4,454,015 tons. The number of operators engaged in the business was 108, and the number of collieries, 103. The average production of each colliery was 32,511 tons. In 1866 there were 118 operators, and 152 collieries. The quantity of coal sent to market in that year was 4,476,607 tons.

Of the 4,424,086 tons mined and transported on the laterals roads in the Schuylkill Region in 1867, 42 firms with 64 collieries, produced 3,286,429 tons, an average of 51,350 tons to each colliery.

SCHUYLKILL COUNTY LATERAL ROADS.

The following is the tonnage of the Lateral Railroads in Schuylkill County for the years 1866 and 1867:

	1866.	1867.
Mine Hill and S. Haven	1,821,498	1,395,785
Mill Creek	404.782	340,459
Mahanoy and Broad Mt.	1,278,432	*1,400,000
Schuylkill Valley	285,047	228,884
Mount Carbon	86,939	66.873
Little Schuylkill	617,278	549,097
Lorberry Creek	120,153	121,743
Swatara	45,281	41,927
	4,659,411	4,144,769
Lehigh and Mahanoy	323,693	439,608
	4,983,004	4,584,377
Union Canal	165,434	163,670

* Not Official.

The coal that passed over the Union Canal Railroad was received from the Lorberry Creek and Swatara roads. All the coal from the Mahanoy and Broad Mountain Railroad passed over the Mill Creek Railroad also, making the tonnage of that road about 1,878,432 tons.

In addition to the coal tonnage of the Mill Creek Railroad, 5,103 tons of black band iron ore were transported over the road in 1867.

MAHANOY AND LOCUST MT. COAL.

The quantity of coal sent from the Mahanoy and Locust Mountain Coal Fields in 1867, was 2,750,161 tons; in 1866, 2,508,621 tons—increase, 241,540 tons.

BLOSSBURG AND BARCLAY COAL TRADE.

The number of tons of coal sent to market annually since 1861, has been as follows:

	Blossburg.	Barclay.
1861	112,713	40,835
1862	179,334	52,779
1863	226,183	54,116
1864	353,124	62,000
1865	394,631	68,463
1866	411,759	99,453
1867	481,318	74,739

The total shipments to close of 1867, have been: Blossburg, 3,015,214 tons; Barclay, 541,577.

COAL TRADE OF THE LINE.

The trade of the line between Pottsville and Philadelphia and on the Lebanon Valley Railroad, was as follows in the last 8 years:

	Railroad.	Canal.	Total.
1860	385,860	223,017	608,887
1861	278,647	156,673	435,320
1862	416,856	129.060	545,916
1863	548,755	122,834	671,589
1864	634,074	114,364	748,448
1865	659,379	87,250	746,629
1866	836,598	174,407	1,010,905
1867	935,694	172,132	1,107,826

Of the above tonnage 1,021,123 tons were delivered at the following points on the line where there are iron works:

	Railroad.	Canal.	Total.
Leesport	2,682	16,461	19,143
Hamburg	5,831	7,074	12,905
Reading	188,461	45,844	234.305
Birdsboro'	10,508	7,547	18,055
Douglassville	12,827	7,249	20,176
Pottstown	33,506	1,429	34,935
Phœnixville	88,639	862	89,501
Norristown	138,331	5,605	143,936
Conshohocken	14,965	19,794	34,759
Spring Mills	.....	15,846	15,846
Swede's Furnace	18,256	.....	18,256
Manayunk Falls, Nicetown, Germantown & Belmont	214,412	24,321	258,738
Robesonia	17,550	.....	17,550
Sinking Springs	57,825	.....	57,825
Lebanon	80,199	.....	70,198
			1,021,123
Supply to these points in 1866			897,939
Increase in 1867			123,184

QUANTITY SENT TO PHILADELPHIA.

The quantity of coal sent to Philadelphia by railroad and canal, from 1860 to 1867, has been as follows:

	Railroad.	Canal.	Total.
1860	305,819	495,084	800,903
1861	273,478	473,965	747,488
1862	316,631	290,583	607,214
1863	388,352	237,563	625,915
1864	373,070	307,430	680,500
1865	380,233	296,925	677,158
1866	475,189	421,525	896,714
1867	389,933	336,364	726,297

Showing a falling off of 170,417 tons in 1867.

The receipts of coal at Port Richmond were as follows, since 1860:

	Tons.
1860	1,186,477
1861	909,112
1862	1,825,400
1863	2,128,154
1864	2,058,423
1865	2,051,202
1866	2,402,897
1867	2,121,199

The loss and gain for 1866 and 1867, at the following points, we sum up as follows:

	1866.		1867.	
	Loss.	Gain.	Loss.	Gain.
On the line		238,134	.....	109,928
At Philadelphia		219,556	170,417	.....
At P. Richmond		351,695	282,698	.....
Eastern trade by canal		109,448	275,859	.....
		918,839	728,974	109,928
			109,928	
			619,046	

Loss at these points in 1867, 619,946 tons, against a gain of 918,839 in 1866. The only increase is on the line, where the consumption reached 1,107,826 tons in 1867.

BROAD TOP SEMI-BITUMINOUS COAL TRADE.

The amount of coal mined and sent to market in 1867 from the collieries of the Broad Top Semi Bituminous coal region was 244,412 tons; in 1866, 265,720—decrease, 21,308. In 1865 the amount sent was 315,996 tons.

CUMBERLAND COAL TRADE.

The quantity of coal sent to market from the Cumberland Region in 1866 and 1867, was as follows:

	1866.	1867.
By Baltimore and Ohio R. R.	812,565	764,545
By canal	343,176	384,822
	1,155,741	1,149,367
	1,149,367	
Decrease in 1867	6,374	

PENNSYLVANIA CANAL COAL TRADE.

The quantity of coal transported on the Pennsylvania Canal in 1867 was 431,821 tons.

This coal, except a portion of Bituminous, is all embraced in the other tables.

IMPORTS OF COAL INTO BOSTON.

The imports of foreign and domestic coal at the port of Boston for nine years have been as follows:

	Foreign. Tons.	Domestic. Tons.
Great Britain	13,991	.....
Provinces	103,419	.....
Philadelphia	.....	435,061
Alexandria	.....	747
Baltimore	.....	75,651
Other places	.....	168,762
Total, 1867	117,440	680,221
" 1866	159,380	676,375
" 1865	209,225	538,977
" 1864	188,786	516,666
" 1863	180,445	589,921
" 1862	157,285	477,580
" 1861	130,687	508,815
" 1860	138,895	584,408
" 1859	110,210	570,325

IMPORTATIONS AND EXPORTATIONS OF COAL.

The quantity of foreign coal imported into the United States for the fiscal year ending June 30, 1867, was 521,305 tons, valued at $1,455,044. It was derived as follows:

	Tons.	Value.
British Provinces on Atlantic (Bit.)	338,337	$855,007
British Provinces on Atlantic (other)	115	682
All other countries (Bit.)	182,774	599,263
" " (other)	39	142
	521,305	$1,455,044

Average price at shipping port, $2 77 per ton.

EXPORTATIONS OF COAL.

	Tons.	Value.
Anthracite	192,912	$1,333,457
Domestic Bituminous	92,189	512,742
Foreign Bituminous	1,657	15,329
	266,758	$1,861,528

Average price at shipping point $6 49 a ton.

The Producing Interests.

The signs of the times look somewhat propitious, as though a better day was dawning to dispel the gloom that is hanging over the depressed and overburdened industries of the nation. There is deficiency of production, and a still greater deficiency threatened, while non-producing capital, viciously employed, has been going on perfecting its arts and processes by which the productive industries of the country have been literally robbed.

The issue is being raised in a most distinctive form between producing and non-producing capital. Mr. Sherwood, who has announced himself as a candidate for the Presidency, is taking the lead. In connection with his great scheme for a National system of *Equal Rights, Equal Speed, Cheap Freight Railways*, he has taken the appeal to the producing interests. If we mistake not, his appeal will be regarded by the people with that friendly consideration which all public benefactors deserve.

Mr. Sherwood takes the ground that the producing interests have the right to control the policy of the Government, and that no others have the moral right to speak, except as they may speak in behalf of these interests. This is high ground, and if sustained by the popular power, our condition, industrially, financially and commercially, will be rapidly improved.

It is not the province of our JOURNAL to engage in Party Politics, but on the contrary, to do what we can in the encouragement and advocacy of every improvement that is calculated to promote the material prosperity of the whole country. It will ever be our pleasure to speak well of the efforts of any man, or class of men who aim at the accomplishment of the greatest public good.

ANNUNCIATION

TO THE PUBLIC:

I hereby announce myself as a candidate for President of the United States for the next term. In this annunciation, I wish it understood, that I offer myself as an earnest representative of the material interests of the Nation. Under the existing condition of public and private embarrassment, I deem it indispensable that the administration of the Government should be formed, and its policy be controlled by the producing interests.

My position, in general terms is simple. First, as the foundation of true Republican Government, the natural rights of every human being must be maintained inviolate; and further, the means to protect and maintain these rights should be accorded through the ballot. I regard this as the only peaceable means that can be devised in order to resist the aggressions to which the feebler classes of society have been exposed in all ages of the world. No thoroughly beneficent statesmanship has ever transpired, and never will take place, until the warfare of class upon class shall have been ended, and man shall have been made the equal of his fellowman in all that pertains to protected citizenship.

In connection with this first duty of maintaining the rights of the citizen, material statesmanship is more than ever before demanded. The country cannot afford to forego its claims and necessities for increased production to accommodate the managers of parties where the object is little else than the distribution of office. I desire to speak plain. A little time since military talents were required for a vigorous prosecution of the war. Our people and Government honored, promoted and sustained the brave men who went to the field, and submitted to such self imposed sacrifices as have scarcely a parallel. We have come to the time when the sacrifices and damages of war, and the embarrassments resulting from them must be remedied, if at all, by calling into the foreground the statesmen and public economists of the country. There is a fitness of things that should be observed. To give preference to military prestige, unless in connection with known skill and knowledge in what appertains to the promotion of our material interests, would be just as inappropriate as it would have been to have called an inexperienced civilian to the command of the Army of the Potomac.

The producing interests of the United States are entitled to designate the candidate. No others have the right to speak, except as they may speak in behalf of these interests. I call upon these interests to assert their rights, as well as to exercise their power. When the great producing interests of the country shall have concentrated on a candidate more able than myself, and equally devoted to their prosperity, my humble name will be withdrawn, and such candidate will receive from me a support as cordial as I deem it important on the part of others.

I take this method of earnestly inviting the people to bring their Governments, State and National, and every department thereof, to the side, and to the support of the producing interests of the country.

Respectfully submitted,

LORENZO SHERWOOD.

Washington, January 7, 1868.

Idaho, Oregon and Puget Sound Railroad.

The bill to incorporate this company proposes to vest in Sidney Dillon, T. C. Durant, Brigham Young and others, and their successors, the power to build a railroad from a point on the Union Pacific, between Green River and 118° 30′ West longitude, north to Snake River Valley; thence northwesterly to Columbia River Valley; thence to Portland, Oregon; and thence to Puget Sound. The company asks for every alternate section of public, non-mineral lands, to the amount of twenty alternate sections per mile on each side of the railroad line, to be granted whenever any twenty miles are built; and also for U. S. bonds, payable in legal tender, to the amount of $16,000 per mile through plains, and $32,000 through mountain routes, for which a second mortgage to the United States shall be given on the entire road. The same grants are to apply to a branch road, not to exceed 300 miles in length, connecting said road with Montana.

☞ The Wilmington (Del.) *Commercial* says the Delaware R. R. Co. are about to procure legislation in Maryland to allow them to extend a branch road from Townsend, on the Delaware road, in New Castle Co., to Massey's Cross roads, in Kent County, Md. From this point the Kent County road is to be built to Kennedyville, and thence to Chestertown, the county seat of Kent.

American Railroad Journal.

Saturday, February 1, 1868.

Stock Exchange and Money Market.

The Money Market has been unusually easy for all borrowers in good standing, all through the past week. There has been a further marked increase in the offerings of capital, particularly in the call loan form. This is reflected very distinctly by the bank and U. S. Sub-Treasury statement of the week, which show a decided augmentation of the available cash balances. The Sub-Treasury reports a gain of full five millions; in addition to accessions to the bank deposits, and specie and currency reserves, noted in the last weekly exhibit. The gain of the banks, in lawful money, since the opening of the new year, has been over seven millions. Lenders have been unusually eager to place their balances advantageously, even at the modified rates of 4@5 per cent. on call, and 5½@7 per cent. per annum, which are the close figures. The demand for aid from the large dealers in the public funds, as also the Stock and Gold brokers, has been more active, in view of the buoyant speculation in progress in Government securities, railway share property, and in the precious metal, during most of the week. The inquiry from mercantile sources has been comparatively moderate. The banks have been discounting very promptly all prime to good business paper offered at their counters, within our qnoted range. The supply of such paper has been remarkably limited, and indicative, in some measure, of the prostration in general business. A further increase of strength has been shown, this week, by the city banks, which report a gain of $4,204,941 in the deposits, $1,914,933 in specie, and $998,920 in legal tender notes. The loan averages have been augmented $2,358,173; and the circulation has been increased $11,756. Since the first Saturday in January the lawful Money in the New York Banks has increased from $74,835,500 to $92,261,000, and the excess over the 25 per cent. of demand liabilities from $19,534,550 to $31,217,250. The specie reserve of the city banks is now $25,106,800, against $16,014,007 same time last year. The city bank deposits are now $210,093,084, against $197,952,076 week ending Jan. 26, 1867. The legal tender reserve amounts to $67,154,161, against $63,422,559 same time last year. The circulation now stands at $34,082,762, against $32,957,198 same time last year. The loans are now $258,392,101, against $251,674,803 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $88,067,204 a day, against a daily average of $103,299,561 the preceding week, and $88,980,754 the week ending with Jan. 11, 1868. The current week's exchanges average about $119,496,193 a day. The city banks, last week, gained $998,920 of legal tender, $4,204,941 in deposits, and $1,914,923 of specie. They increased their loans, $2,358,173; and reduced their circulation, $11,756.

The Philadelphia Bank movement the past week shows a decrease in loans, of $687,597; a decrease of $41,580 in specie; an increase in legal tenders of $9,509; a decrease of $144,549 in deposits; and an increase of $3,474 in circulation. The Bank Clearings show an increase of $803,840, and the balances, a decrease of $159,745.

National Bank notes to the amount of $127,501 were issued last week, making the total issue to 1,673 banks thus far, $305,912,711, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $6,322,956, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date, of $299,589,496. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,175,500; and for the public deposits, $37,827,950—making a total of $379,003,450. The Treasury Department last week redeemed and destroyed $523,245 of worn and mutilated fractional currency, and issued $613,000 of new.

The relative increased strength of the whole National Bank movement of the country in January to the October statement has been thus stated;

	October.	January.
Deposits in gross.....	$537,329,538	$531,500,102
Less clearing items...	134,392,500	109,359,336
Net deposits	$402,937,038	$422,140,766
Net bank balances...	9,025,805	12,331,671
Due treasury	27,715,781	27,383,673
Circulation	293,461,196	293,998,869
Demand liabilities..	$733,139,820	$755,854,979
Gold and greenbacks.	167,568,809	182,394,995
Pro rata	23 per cent.	24¼ per cent.

The U. S. Sub-Treasury receipts, week ending with Jan. 25, were $13,473,105, including $1,571,058 from customs duties; payments, $11,106,123, including $1,903,000 of coin interest; balance at the close of the week, $107,534,436, against $105,167,454, at the close of the preceding week, showing an increase of $2,366,982. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $4,705,221 including $204,949 from customs; and payments, $2,326,595; on Tuesday, receipts, $1,645,987 including $321,000 from customs, and payments, $916,907. The balance at the close of business on Tuesday stood at $110,643,141, against $105,640,197 a week previous; and $98,917,216 on Jan. 14, 1868.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to date of latest report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740.

Government revenues were on a limited scale, last week, in both custom and excise forms. The customs must soon begin to increase as the spring trade revives. The excises, last week, yielded less than two millions against $2,178,000, the preceding week; customs at the port of New York $1,571,058, and at the outports, about $520,000 (in coin) more, making the grand total income for the week equal less than six millions in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $115,000,000.

Government received $7,594,894 from customs, through the port of San Francisco, from Jan. 1, to Dec. 20, 1867.

There has been a more confident movement in Gold, since our last, chiefly of course, on speculative account, and the price has a rule a point or two higher; the extremes of the week having been 139⅜@141⅞. The speculation was greatly aided by the various reports and rumors from the National capital, relative to the debt, taxation, currency, gold reserve, and the political situation. The dealings on Wednesday were on a restricted scale, and were indicative of less spirit in the speculative interest. The latest transactions on that day were on the basis of 140⅞@141. There has been scarcely any call for specie for export, thus far, in the current week. There were no shipments reported on Tuesday and Wednesday, by the outgoing steamers of those days. The customs drain has been quite light. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $244,299, against $123,388 same time last year. The customs demand for Gold last week, averaged $261,843 a day; thus far, this week, it has been equal to $266,000 a day, or equal to a weekly aggregate of $1,596,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $40,160, and from California, none. The total customs revenue of the Government, in coin, at this port, during the calendar year of 1867, was $116,958,654, against $130,222,092 same time in the preceding calendar year. The customs revenue, at the port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $62,042,133, against $70,421,505 same time in the preceeding fiscal year. The total receipts of California gold at this port in 1867, was $27,677,556, against $42,740,913 in 1866, showing a decrease in 1867, of $15,063,357. The receipts of California gold, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $17,413,018 against $26,559,348 same time in the preceeding fiscal year, showing a decrease of $9,146,330 in 1867-'68. The exports of specie from this port, last week, were $1,069,300, against $670,169 same week last year. The exports of specie, hence, since July 1, 1867, have been $34,367,517, against $19,313,481 same time in 1866-'7. The total outflow of specie from the port, in 1867, was $51,841,678, against $62,553,700 in 1866. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,903,000, and since July 1, 1867, $46,433,019, against $32,854,463 same time in 1866-'7. The total coin interest disbursements through the Government office, in 1867, was $61,871,348, against $48,680,377 in 1866. The specie exports from San Francisco, from Jan. 1, to Dec. 20, 1867, reached $40,656,910, against $43,669,753 same time in 1866, showing a decrease, in 1867, of $3,012,843.

Foreign exchange has been less freely offered for some days past, and has been quoted a fraction higher in price, but the demand has been very moderate from all sources, and the market has been without buoyancy. Bankers' 60 day bills on London closed on Wednesday at 109⅛@109¾, and on Paris to 5.20@5.15; sight bills on London to 109¾@110¼, and on Paris to 5.15@5.12½. The offering of produce bills have been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,269,328, against $3,210,976 same week last year; total, since July 1, 1867, $104,503,089, against $108,500,186 same time in 1866-'67. The total value of exports of produce and merchandise in 1867, was $189,688,044, against $192,329,554 in 1866.

Government securities were in unusually brisk investment and speculative demand during most of the week at a sharp advance in prices, all through the list. The inquiry was very comprehensive, but was most active for the later issues of the Five-twenties, the coupons and registered Ten-forties, and the second and third series of the Seven-thirties, all of which were in much reduced supply. The banks and private bankers were heavy purchasers, with a view to the employment of their idle balances. The export business was not extensive, though some of the foreign houses made a number of lucky "turns" in the buoyant movement, which culminated on Monday. The dealings of Tuesday and Wednesday were on a reduced scale, and at a partial reaction of ⅜@⅝ per cent. from the highest figures of the week. The market closed steady, though without much animation.

U. S. sixes of 1881 closed here on Wednesday at 111½@111¾; U. S. Five-twenties of 1862, 110⅞@111; U. S. Five-twenties of 1864 at 108⅞@109⅛; U. S. Five-twenties of 1865 at 109⅝@109⅞; U. S. Five-twenties of 1865, consolidated, 107½@107⅝; U. S. Five-twenties of 1867, 107½@107⅝; U. S. Ten-forties at 104@104⅛, and U. S. Seven-thirties at 107½@107⅝. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	117⅜	September, 1865..	116
August, 1865....	116⅜	October, 1865	115¾
U. S. three per cent. certificates			100¼

The railway and miscellaneous share dealings were very heavy in the forepart of the week at higher and buoyant prices, the speculative activity extending nearly all through the list. On Tuesday and Wednesday there was a sharp reaction in the market, under a severe pressure to realize, especially on Erie, which declined over three per cent. on a less active and feverish market. The latest operations on Wednesday showed a partial revival of firmness in values, on a somewhat livelier call, in part from fresh buyers.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 15.	Jan. 22.	Jan. 29.
Consols	92⅛	92⅞	93¼
U. S. 5-20's of 1862....	71¼	71⅞	72
Erie	48	48¾	48¾
Ill. Central	*84¾	85½	86½

* Ex-dividend.

General business has been quiet, as a rule, the exceptions having been in the line of cotton, breadstuffs, provisions and naval stores, which have attracted more attention at firmer prices. Cotton has been moderately active, at much firmer prices, closing quite buoyantly at 18¼@18⅛ cents, chiefly 18½ for middling uplands, per lb. The stock of cotton now here is estimated at about 54,000 bales. The receipts at the port this week, have averaged about 3,000 bales a day. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 1,112,200 bales, against 966,200 bales same time last year; exports, same time, 640,000 bales, against 442,250 bales same time last year; stock on hand at latest dates, 340,000 bales, against 504,400 bales same date last year. At the Live Stock markets this week Beeves have been in less request at easier prices, the range having been from 11@18c. per lb.; week's receipts, 5,907. Veal Calves have been in moderate demand at from 9@13c. per lb.; receipts, 654. Sheep and lambs active and firm at from 4½@7½, and 5½@7½c., respectively, per lb.; receipts, 19,977. Swine have been less freely sought after, and have recede to 7@7½c. per lb., all live weight; receipts, 15,465. At the auction sales of Scranton coal, on Wednesday, 40,000 tons were sold, as

follows: 40,000 tons lump coal, $3.45@$3.60, 6,000 tons steamer coal, $3.40@$3.60, 7,000 tons grate coal, $3.67½@$3.87¼, 4,000 tons egg coal, $4@$4.15, 13,000 tons stove coal, $4.92½@5.05, 6,000 tons chestnut coal, $3.60@$3.85, per 2,240 lbs., delivered at Elizabethport. Foreign merchandise has been quiet and somewhat irregular in price. The dry goods trade has shown symptoms of approaching activity. The total imports of foreign dry goods, last week, were $1,281,490, and the total amount marketed $1,329,824. The value of foreign merchandise imported last week, was $1,232,945—making the grand total specie value of last week's imports of dry goods and merchandise, $2,514,435, against $3,663,970, same week last year; total since July 1, 1867, $126,975,380, against $153,964,878 same time in 1866–'67. The aggregate for the year 1867, was $242,478,575 against $277,043,050 in 1866. The ocean freight market has been fairly active; rates have been quoted firmer. For Liverpool we quote flour at 3s. 3d.@3s. 6d. per bbl.; grain at 10d. per bushel; cotton at 7/16@½d. per lb.; and heavy goods at 32s. 6d.@40s. per ton, all by sailing vessel. Total number of vessels in port on Wednesday 498.

The New York exports, exclusive of specie, for the week ending Jan. 28, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$3,210,976	$3,269,323
Prev. reported.....	10,697,573	10,091,381
Since January 1.....	$13,908,549	$13,360,704

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$2,520,071	$1,281,490
Gen. merchandise.....	1,143,900	1,232,945
Total for the week.....	$3,663,970	$2,514,435
Previously reported....	11,291,547	7,043,554
Since January 1.....	$14,955,517	$9,557,989

The balance in the Sub-Treasury on Wednesday was $111,083,387 31.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Brooklyn 6s, Park Loan, 94½; Georgia 6s, 67; do., 7s, 79; Great Western 2d mort., 72; Chicago and Great Eastern 1st mort., 75; Galena and Chicago 1st mort., 101½; Ohio and Mississippi 1st mort., 90; New York and New Haven 6s, 97; Joliet and Chicago 8s, 1st mort., 101; Hannibal and St. Joseph R. Cleveland, Columbus and Cincinnati R. R.

The annual meeting the stockholders of this company will be held in Cleveland on the 19th inst., for the election of directors; and to take action in the matter of leasing and purchasing by the company the road of the Bellefontaine Railway Company; and also in the matter of leasing to the Cleveland, Painesville and Ashtabula Railroad Company the right to run its trains over the road of this company between Cleveland and Berea, and certain other privileges upon the depot grounds of this company.

☞ The Portland and Rochester Railroad is graded to Quaker Pond, within two miles of Alfred, and all but three miles are gravelled. The track will be laid in the Spring.

Railroad Earnings.—Weekly.

The earnings of the Atlantic and Great Western Railway for the third week in Jan., 1868, were $102,897 00
Corresponding week previous year... 90,235 00

Increase $12,662 00

The earnings of the Chicago and Rock Island Railroad for the third week in January, 1868, were $71,100 00
Corresponding week of previous year.. 67,211 00

Increase $3,889 00

The earnings of the Chicago and Northwestern Railroad for 3d week in Jan., 1868... $168,273 22
Corresponding week previous year .. 149,212 83

Increase..... $19,060 39

The earnings of the Detroit and Milwaukee Railroad for the week ending January 23, 1868, were $18,432 00
Corresponding week of 1867 ..... 19,260 00

Decrease $828 00

The earnings of the Western Union Railroad for the 3d week in Jan., 1868..... $11,527 47
Corresponding week previous year.... 8,819 12

Increase $2,708 35

The earnings of the Michigan Central Railroad for the 3d week in Jan., 1868, were .. $65,639 16
Corresponding week of previous year.. 64,586 32

Increase $1,052 84

The earnings of the Michigan Southern and Northern Indiana Road for the 3d week in Jan., 1868, were $83,381 00
Corresponding week of 1867..... 66,831 00

Increase $16,550 00

The earnings of the Toledo, Wabash and Western Railroad for the 3d week of Jan., 1868, were $64,030 16
Same week in 1867..... 48,161 10

Increase $15,869 06

Wallkill Valley Railroad.

As we stated in our last the contract for building the Wallkill Valley Railway 13½ miles north from Montgomery, was awarded last week, by the directors, to a Mr. Randall, of New York, for $30,000 per mile, to be paid in town bonds, and the balance in first mortgage bonds upon the road. The road is to be constructed by December 1, 1868. The route of the road will be *via* Walden, Shawangunk, Libertyville, to Ireland Corners, in Ulster County. When completed, 24 miles of the Wallkill Valley Railway will be in operation between Goshen and Kingston. About 15 miles of railway will complete the connection, which latter will also be shortly under contract. —*Goshen (N. Y.) Republican.*

Pacific Railroad.

Late advices from Arizona state that General Palmer, of the Pacific Railroad survey, expresses the opinion that the road will be built on the thirty-fifth parallel.

It is reported that parties are surveying with the hope of getting a route which may possibly change the road to the thirty-second parallel, but their success is considered doubtful.

General Palmer has placed a corps of surveyors on the line from Techaopapee to San Francisco, and sent back a party of engineers from Colorado to make a correct survey of the thirty-fifth parallel to the Rio Grande.

It is the intention of General Palmer to proceed directly to Washington, by the way of San Francisco, to make his report in time to secure some Congressional assistance for the southern railroad companies.

Journal of Railroad Law.

CONDUCTOR JUSTIFIED IN EXPELLING PASSENGER FROM THE CARS, FOR NON-PAYMENT OF LEGAL FARE.

The facts in the late indictment of State *vs.* Goold, (53 Maine 279) were that the defendant, who was a conductor on the Grand Trunk Railway, and at this time was acting in that capacity, forcibly expelled a passenger from the the train, and for this assault the action was brought.

The evidence on the part of the defendant showed, that the company had established certain passenger rates, being the sums which were required to be paid, when payment of fares was made to the conductors in the cars; *that these rates were the regular rates;* were published in tariff tables, conspicuously posted in the stations of the company, and that the conductors were required, by the regulations of the company, to collect these rates of all persons, who paid their fares in the trains; but that by the same regulations, a discount of ten cents was made from these rates as the rate for persons who purchased tickets at the ticket offices, before entering the trains, and that large painted sign-boards were placed conspicuously in the stations, on which were painted in large letters a notice that such discount would be made.

The passenger, who was assaulted, entered the train, at a station where he knew there was a ticket office, and where a tariff table and sign-board were posted, without having bought a ticket. Before he reached the first or second station after starting, the defendant as conductor required him to pay his fare, according to the rates established by the company, to be paid in the cars. This he refused to do—but offered the defendant the sum required at the ticket office. The defendant refused to receive it, and upon the continued refusal of the passenger to pay the sum demanded, forcibly removed the passenger from the cars, at at a regular station, where the cars were then stopping.

KENT, J.—Railroad corporations have an undoubted right to fix and determine the rates of fare on their roads within the limits specified in their charters or by existing laws. They have also an undoubted right to make reasonable regulations as to the time, place and mode of collecting the same from passengers. They may reasonably require payment before the arrival of the train at the station where the passenger is to leave the cars. We see no reason to question their right to require payment in advance, to be made (at a convenient office and at convenient times; certainly where there is no positive interdict to entering the cars without a ticket, as in this case. There is neither hardship nor unfairness toward the passenger, who, ordinarily, can pay his fare and procure his ticket without trouble or delay at the office. But to the company it is something more important than mere convenience, that such regulations should be enforced. It is important in simplifying accounts. It is important to promote and secure safety, by allowing time to the conductor to attend to his proper duties on the train, and which would be often seriously interfered with, if his time was taken up in collecting fares and exchanging money and answering questions. It is highly important as a check against mistakes or fraud on the part of the conductors, and is a guard against imposition by those seeking a passage from one station to another, without payment.

In the case at bar, no absolute rule of exclusion was established. It appears from the statement of facts in evidence, that certain rates of fare were established by the company—that these rates were the rates published in the tariff tables, posted in the stations of the company. It was the rate thus established, that the passenger in the case was requested to pay. But he says he was not bound to pay the sum thus fixed, because by the same rules and tariff, a discount of ten cents was made from the rates to those persons who purchased tickets at the office before entering the train; and that this, in fact, constituted distinct and different rates for the same passage.

If this were so, we are not prepared to decide that it would be an unreasonable or illegal exercise of the power given to the corporation. Assuming that it is reasonable to require prepayment and the production of the ticket, it would seem to be simply a relaxation of the rule, in favor of the passenger to allow him to pass upon the payment of another rate, slightly advanced. If he neglected to avail himself of the opportunity offered to him to procure a ticket at the lower rate, he can hardly complain that he is allowed to proceed in the train, on payment of the rate established for such cases, instead of being, at once, removed from the car.

In fact, however, in this case, but one rate was established and that was the sum required in the cars. This was the "established fare," specified in our R. S., C. 51 § 47. A discount of ten cents was made on these rates, if a ticket was purchased before entering the train. What right had this passenger to claim this *discount* on the established rate? If he knew of the regulation, it was his carelessness or folly, that led him to neglect this opportunity. If he did not know of it, it was his misfortune. The company had done all that could reasonably be required of them, by posting the regulation conspicuously in the stations of the company. It would be an utterly impracticable rule to require that every passenger should be personally notified of its existence before entering the cars. Although it is not important in the view we take, yet one cannot help asking how this particular passenger persistently insisted on paying only "the sum required at the ticket office," if he did not know of the rule, allowing the discount at the office? But if the regulation was reasonable, and reasonable notice had been given of its existence, it is not necessary to prove actual knowledge of its existence on the part of the passenger, before entering the cars. It was not a special and exceptional, but a general rule. If a passenger enters the car, without knowing anything of the rates of fare, or of the rules in relation thereto, and without making any inquiries, he must be held to pay, as on an implied contract, according to the reasonable rates and rules of the company. He might as well claim exemption from the payment of *anything* for his passage, because he did not personally know that any rates or what rates were established, as to claim exemption from the rule which makes a distinction in rates, because he did not ascertain the fact before entering the train. The question is to be determined on the ground of reasonable-

ness and power, and not on the ground of individual knowledge.

The conductor of a train is justified in compelling a passenger, who utterly refuses to pay his legal fare, to leave the car at a regular station, R. S. c. 51 § 47.

The principles before stated have been recognized and sanctioned in Vermont in the case of Stephen *vs.* Smith (29 Verm. 160), and by the Court in New Hampshire, in the case of Hilliard *vs.* Goold, (34 N. H. 260), see also Redfield on Railways §26; Commonwealth *vs.* Powers 1 Met. 596.

The decision of the questions involved in this case rests upon two general principles, well established, viz.: that it is the duty of the corporation to adopt such regulations as are required to secure the comfort and safety of passengers; and it is equally their *right* to adopt all reasonable rules for their own security and the orderly management of their business. The corporation is no more bound by the one, than the passenger is by the other.

The Rulings of the Judge were incorrect. Exceptions sustained. New trial granted.)

European and American Locomotives.

A writer in the London *Herald*, comparing different kinds of railway apparatus, gives the following account of some of the peculiarities of European and American locomotives:

In England we see the locomotive engineers, as a general rule, aiming at high speed, as little complication as possible in the parts of the engine, utmost simplicity in all things, perfection of adjustment and workmanship and high boiler pressure. Upon this last point we may note that a few years since fifty pounds to the inch was considered high, now one hundred and twenty pounds and one hundred and thirty pounds are ordinary pressures, and on the North London line engines are being run at one hundred and eighty pounds.

France has slow speed and very heavy trains; her engineers aim at large tractive force, do not spare complication, use large quantities of material, and couple numbers of driving wheels together, making, for example, twelve-wheeled coupled engines, things utterly unknown in England, but at the same time they put light weight on those wheels, not more in fact than ten or eleven tons on an axle. The French deserve credit for having developed their engines into a form suitable for their shareholders' ideas of traffic, that is a heavy engine at slow speed pulling a long load. One expensive necessity has already been evolved in our own country by the quick running of small trains, namely, the necessity for laying down third and fourth lines of rails to accommodate the traffic, at an enormous expense to the proprietary, and which could have been avoided if the trains had been worked as on the Great Northern of France. The fuel for a heavy train is much the same as for a light one, or very little increased; but in running double sets of trains over double lines of rails the wages are doubled, the first cost —that is, line accommodation—is doubled, the number of engines is doubled, whilst the wear of engines and road is quadrupled.

The American idea is cheap engines. Their locomotives have their parts very accessible, and they run them at fair but not high speeds. The American engines have special arrangements for clearing and lighting the road, and for burning wood in their furnaces. Notwithstanding the superiority of English-made engines, not one of them can run over American lines with anything like the speed, safety or endurance of their own. Strange as this may at first sight appear, it is easily accounted for, and the explanation bears on the points we shall presently bring forward. This explanation is that the leading ends of the American engines are supported on four-wheeled trucks or bogies, which, while giving a long wheel-base, and consequently steadiness, allows the engine to travel on exceedingly bad roads, and to traverse sharp curves with ease and security.

The German engines go even slower than the French. The quickest French lines are those from Lyons to Paris, and from Paris to Calais. The proportions of parts of all the foreign engines—particularly the German—were very bad. For instance, the cranks in many cases had double the quantity of material necessary for the strength required, and this extra portion so disposed as to be a perpetual tumbling weight in their revolutions. Of the Italian lines we know of nothing special to be said.

The Belgians run their engines at speeds intermediate between the German and French; they follow a medium of English and French make in their construction, and their lines contrast favorably in their working with many others on the continent. This may be attributed to their being under the general superintendence of an Englishman, Mr. Cabrey.

The Russians are much the same as the Germans. The engines are mostly of English type; in some cases a cross between the English and the American.

Hudson River Railroad—Who may be Directors.

Recent circumstances have directed attention to the provisions in the charters of some of our railroads. The Legislature, either by the general acts permitting the construction of railroads, or in special charters granted, have, from time to time, been careful to guard these franchises with provisions that should promote the convenience and assure the rights of citizens. Among these provisions, the matter of the character of Directors has been looked upon as one that deserved especial care. By the general act of 1848, it was provided that a certain proportion of Directors shall be residents of the section which the road traverses, and that all shall be citizens and residents of the State.

The spirit which dictated that provision existed at the time of the incorporation of the Hudson River road in 1846, and was embodied in the act. It was therein enacted that "A majority of the Directors of the railroad company hereby incorporated shall reside in the counties in which the railroad shall be constructed, *and the same person shall not be a Director in any other railroad company in this State.*" Is it a fact that this provision has been abrogated by subsequent legislation? It would seem singular if, in view of all the successful efforts that have been made to get rid of the wholesome policy of former years, and of the every day practice in contravention of the wise provision, this section has not been modified or repealed. Still we have not been able, after a somewhat careful search, to find any law changing the section in question. It is possible there may be. But the subject merits inquiry, as well because of the apparent legal position of the matter, as the great public interest now being felt upon the subject of the consolidation of railroad power in the hands of a few men.—*Albany Journal.*

Pacific and Atlantic Telegraph Co.

The Pacific and Atlantic Telegraph Company of the United States, have declared the tenth quarterly dividend of 2½ per cent., payable on demand at the office of the company, 68 Fourth St., Pittsburg, Pa. The company has just completed a new two wire line over the route of the Pennsylvania Railroad, from Pittsburgh to Philadelphia. They have also constructed a new two wire line from Pittsburgh west to the town of Washington, where the wires strike one trunk line of the company on the National Road north to Cincinnati and the West. By the construction of this new trunk line of nearly eight hundred miles of wire, the company are placed in possession of a third line to the East, running through a different section of country from its other lines; thus affording increased protection to its business from damage to its lines from storms. The company by this new trunk line have one of the most direct and shortest lines between the east and the west. A couple of hundred miles makes of course no great difference in the transmission of messages when the weather is good, but in stormy weather there is a decided advantage in knowing the shortest line, to say nothing of the advantage to the Treasury in lessened cost for repairs and maintenance of way.

The company, we learn have a fourth route to the East partially completed. We learn in addition that the company are only waiting for the breaking up of the winter to begin building to Chicago and St. Louis, having already commenced their arrangements to that end.

Telegraph Enterprises.

The success attending the working of the two submarine cables which connect the New and Old Worlds, and the one between Florida and Cuba, is attracting the attention of capitalists everywhere, and we hear of at least six other projects for similar enterprises. Last week a company of New York business men organized under the name of the "Central American Cable Company," proposing at an early day to lay a cable between the island of Jamaica and the Isthmus of Panama. This company expect to obtain a grant from the Spanish Government to land the northern end of their line in Cuba, but if they fail in this, they propose to connect the new line with the existing Cuban cable at Key West, Fla. In addition to this, the Company intend to construct cable and land lines from Jamaica to St. Thomas *via* St. Domingo and Porto Rico. For this purpose negotiations are pending for the purchase of the Russian-American Company's Cable, and it is thought that the chief part of the work will have been completed by next Fall. Lines are also in process of construction between Rio Janeiro down the Atlantic coast of South America to Montevideo, to connect with the cable laid last year across the Rio de la Plata to Buenos Ayres. A company will construct a line next Fall across the Argentine Republic, on the Pacific side, from Buenos Ayres to Valparaiso, connecting the South Atlantic coast with the Pacific. The Spanish and American Company has also organized, under a grant and heavy subsidy from the Governments of Peru and Chili, to lay a cable within three years between Valparaiso and Callao. This Company are also taking the preliminary steps to extend their cable to Panama, thus bringing Calcutta, India, through the chain of cables and land lines into communication with Rio Janeiro. The total number of miles of telegraph wire now laid or projected to bring about the result we have indicated, will reach seven thousand four hundred and eighty. The benefits which will enure to American commerce by the diversion of the trade of the West Indies and South America from the channels in which it now runs, can scarcely be over-estimated should these telegraph plans be consummated.—*N. Y. Times.*

Baltimore City Passenger Railway.

This company commenced operations on the 28th day of July, 1859, under an ordinance of the Mayor and City Council of Baltimore, and was incorporated by the General Assembly of the State in 1862. The company now have thirty miles of track running through the streets of the city, and have paid into the treasury the amount of $473,290 56. They have in their service four hundred and forty horses and eighty cars.

Tonnage of Milwaukee.

The following is the tonnage of vessels owned and registered in the district of Milwaukee January 1st, 1868:

		Tonnage.
Side-wheel steamers	6	1,538.43
Propellers	9	3,951.11
Tugs	11	360.32
Scows	18	1,633.28
Brigs	3	579.01
Barks	14	5,758.38
Sloops	4	42.18
Canal boats	1	96.06
Schooners	126	18,068.96
Total	192	31,967.68
	Vessels.	Tonnage.
Of this amount Milwaukee owns	96	16,145.71
Racine has	38	7,788.56
Green Bay	28	3,429.98
Sheyboygan	20	3,292.40
Manitowoc	19	1,998.66
Kenosha	9	1,109.04
Port Washington	1	201.06

Queen Anne's and Kent Railroad.

The directors of this road met at Centreville, Md., on the 14th ult., at which time a contract was made with Messrs. Stearns & Quigley, of Wilmington, Delaware, for the construction of the road from Massey's Cross roads to Centreville. These gentlemen contract to build the road for $300,000—$225,000 in cash, and the remainder in bonds. The first earth is to be broken on the 6th inst., and the road is to be completed by May 1, 1869. The route agreed upon is this described in the Centreville *Citizen:* Commencing at Massey's Cross roads, in Kent County, and running thence to Millington, thence to Sudlersville, thence to the Cross roads at Cox's Saw Mill, thence to the Church Hill and Roesville road, between the lands of John H. Evans and the Hewett heirs, thence to Carville's Corner, at the northern terminus of the road between the lands of James B. Palmer and the Carville heirs. The route of the road thence to Centreville has not yet been determined on.

THE NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE.
ALBANY, Jan. 21, 1868.

TWENTY-NINTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a semi-annual dividend of Three Per Cent. on the capital stock thereof, payable on the 20th day of February next.

Dividends in New York will be paid at the office of Duncan, Sherman & Co.; in Albany, at the Albany City National Bank.

The transfer books will be closed at the close of business on Friday, the 31st day of January inst., and be re-opened on the morning of Monday, the 24th day of February next.

E. D. WORCESTER, Treasurer.

540 MILES

OF THE

Union Pacific Railroad

Running West from Omaha

Across the Continent,

ARE NOW COMPLETED.

THE TRACK BEING LAID AND TRAINS RUNNING

WITHIN TEN MILES OF THE SUMMIT

OF THE ROCKY MOUNTAINS.

The remaining ten miles will be finished as soon as the weather permits the road-bed to be sufficiently packed to receive the rails. The work continues to be pushed forward in the rock cuttings on the western slope with unabated energy, and a much larger force will be employed during the current year than ever before. The prospect that the whole

GRAND LINE TO THE PACIFIC

WILL BE COMPLETED IN 1870,

was never better. The means so far provided for construction have proved ample, and there is no lack of funds for the most vigorous prosecution of the enterprise. These means are divided into four classes:

1.—UNITED STATES BONDS,

Having thirty years to run, and bearing six per cent. currency interest, at the rate of $16,000 per mile for 517 miles on the Plains: then at rate of $48,000 per mile for 150 miles through the Rocky Mountains; then at the rate of $32,000 per mile for the remaining distance, for which the United States takes a *second lien* as security. The interest on these Bonds is paid by the United States government, which also pays the Company one-half the amount of its bills in money for transporting its freight, troops, mails, &c. The remaining half of these bills is placed to the Company's credit, and forms a sinking fund which may finally discharge the whole amount of this lien.

2.—FIRST MORTGAGE BONDS.

By its charter the Company is permitted to issue its own First Mortgage Bonds to the same amount as the bonds issued by the government, and *no more, and only as the road progresses.* The Trustees for the Bondholders, are the Hon. E. D. Morgan, U. S. Senator from New York, and the Hon. Oakes Ames, Member of the U. S. House of Representatives, who are responsible for the delivery of these Bonds to the Company in accordance with the terms of the law.

3.—THE LAND GRANT.

The Union Pacific Railroad Company has a land grant or absolute *donation* from the government of 12,800 acres to the mile on the line of the road, which will not be worth less than $1.50 per acre, at the lowest valuation.

4.—THE CAPITAL STOCK.

The authorized capital of the Union Pacific Railroad Company is $100,000,000, of which $8,500,000 have been paid on the work already done.

The Means Sufficient to Build the Road.

Contracts for the entire work of building 914 miles of first-class railroad west from Omaha, comprising much of the most difficult mountain work, and embracing every expense except surveying, have been made with responsible parties, (who have already finished over 540 miles), at the average rate of sixty-eight thousand and fifty-eight dollars ($68,058) per mile. This price includes all necessary shops for construction and repairs of cars, depots, stations, and all other incidental buildings, and also locomotives, passenger, baggage, and freight cars, and other requisite rolling stock, to an amount that shall not be less than $5,000 per mile. Allowing the cost of the remaining one hundred and eighty-six of the eleven hundred miles assumed to be built by the Union Pacific Company to be $90,000 per mile,

The Total Cost of Eleven Hundred Miles will be as follows:

914 miles, at $68,058	$62,205,012
186 miles, at $90,000	16,740,000
Add discounts on bonds, surveys, &c.	4,500,000
Amount	$83,445,012

As the U. S. Bonds are equal to money, and the Company's own First Mortgage Bonds have a ready market, we have as the

Available Cash Resources for Building Eleven Hundred Miles:

U. S. Bonds	$29,328,000
First Mortgage Bonds	29,328,000
Capital Stock paid in on the work now done	8,500,000
Land Grant, 14,080,000 acres, at $1.50 per acre	21,120,000
Total	$88,276,000

The Company have ample facilities for supplying any deficiency that may arise in means for construction. This may be done wholly or in part by additional subscriptions to capital stock.

EARNINGS OF THE COMPANY.

At present, the profits of the company are derived only from its local traffic, but this is already much more than sufficient to pay the interest on all the Bonds the Company can issue, if not another mile were built. It is not doubted that when the road is completed the through traffic of the only line connecting the Atlantic and Pacific States will be large beyond precedent, and, as there will be no competition, it can always be done at profitable rates.

It will be noticed that the Union Pacific Railroad is, in fact, a *Government Work*, built under the supervision of Government officers, and to a large extent with Government money, and that its bonds are issued under Government direction. It is believed that no similar security is so carefully guarded, and certainly no other is based upon a larger or more valuable property. As the Company's

First Mortgage Bonds

are offered for the present at NINETY CENTS ON THE DOLLAR, they are the cheapest security in the market, being more than 15 per cent. lower than U. S. Stocks. They pay

SIX PER CENT. IN GOLD,

or over NINE PER CENT. upon the investment, and have thirty years to run before maturity. Subscriptions will be received in New York at the Company's Office, No. 20 Nassau street, and by

CONTINENTAL NATIONAL BANK, 7 Nassau st.,
CLARK DODGE & CO., Bankers, 51 Wall st.,
JOHN J. CISCO & SON, Bankers, 33 Wall st.,
HENRY CLEWS & CO., Bankers, No. 32 Wall st.,
HEDDEN, WINCHESTER & CO., Bankers, No. 60 Broadway.

and by the Company's advertised Agents throughout the United States. Remittances should be made in drafts or other funds par in New York, and the bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A NEW PAMPHLET AND MAP, showing the Progress of the Work, Resources for Construction, and Value of Bonds, may be obtained at the Company's Offices or of its advertised Agents, or will be sent free on application.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail,** upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE.—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft.	Slop.	1½ to 1
				14.	" 20 "	"	1½ to 1
2.	For Side Hill Cuts and Fills.			15.	" 24 "	"	¼ to 1
3.	Base 12 ft.	Slopes	1½ to 1	16.	" 24 "	"	1½ to 1
4.	" 14	"	1½ to 1	17.	" 25 "	"	1½ to 1
5.	" 15	"	¼ to 1	18.	" 26 "	"	1½ to 1

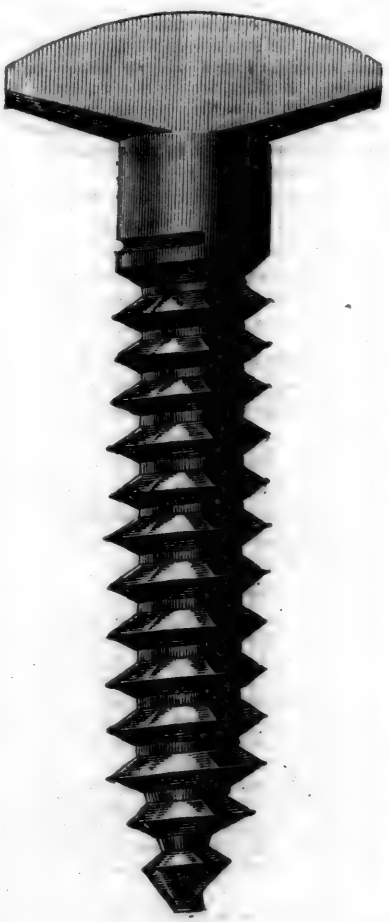
American Railroad Journal.



New York, Saturday, February 8, 1868.

The United States Railroad Screw Spike Company.

A company with a large capital has recently been formed in this city, having for its President Mr. Henry Young, and for its Secretary Mr. G. B. Hubbell (known favorably for so many years to the hardware trade of the country both as a merchant and manufacturer) and comprising among its members such well known and prominent citizens as Enos Richardson, Charles A. Townsend, H. F. Lumbard, E. C. Litchfield, E. C. Becker and others, for the manufacture of a new description of Screw-Spike for railroads, intended to supersede the common driving spike.

This company has just erected a capacious factory in the town of Ossining, Westchester Co., N. Y., for the manufacture of this article. The invention is interesting not only to railroad companies, to whom, in an economic point of view, it will doubtless be of much importance, but to the entire traveling community, whose personal safety it is intended and calculated to secure.

That our readers may understand the matter more clearly, we insert a cut representing the full size of the Screw-Spike, from which it will be seen that it is simply a wood screw with a double hooked head. It is designed to hold the rail more firmly to the tie, and to avoid working loose as the present description of spike does, and in this way to prevent the starting of the rails, which, as our readers know, is the cause of so

many accidents. In this respect the invention is one of great importance to the public, its promoting greater safety in railroad traveling, and as soon as its value in this regard is understood and appreciated we apprehend its universal use will be demanded by the public.

That a screw is a more secure fastening than a nail, it is of course unnecessary to argue—the extent to which the one has displaced the other where strain or traction is involved is the evidence of this, and it only seems strange that a principle so simple and so obvious should have been overlooked in fastening down iron rails on wooden ties or sleepers—that it is so, the experience of the past four years in the use of Montignani's Patent Screw Spike has, we understand, abundantly evidenced, and testimonials have been laid before us from the trackmasters of many railroads confirming this. Of these we shall only copy three or four which seem directly to the point.

Mr. Featherly, track master of the New York Central Railroad, has written to the company as follows:

"I put down your screw-spikes sixteen months ago on a section of our road where the heaviest work is done, viz., on a steep grade on the main track three miles from Albany, one quarter mile above West Albany, and they are there to-day as firm and secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time. I know they are safer than the common spike and a great saving of both life and property."

Mr. James R. Hilliard, trackmaster of the Erie Railway, makes a similar report in a letter to the company. He says:

"They will hold a rail more firmly to the tie, and will not work loose as the spikes now in use do," adding: "Driving the spike is liable to split or check the timber, which of course causes it to decay. The screw spikes, I think, overcome that difficulty. It is now fifteen months since I put the screw spikes on the track of the Erie Railroad, near Jersey City, on a reverse curve where all our long heavy freight trains pass each way, and, so far as my opinion goes, I must say I have never had a piece of track that keeps its guage equal to that when the screws are in use."

Mr. Marble, trackmaster of the Albany and Saratoga Railroad, we see, writes as follows:

"On examining the screw spikes put down by me December 16, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down, while great numbers of the common spike

are loose and out of place, and I find on examination the threads of the screws are bright and clean."

To the same effect Mr. E. H. De La Vergne, trackmaster of the Shore Railroad, writes:

"Having examined and tested your screw-spikes on our road I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our railroads would be perfectly safe, so far as the track is concerned."

Mr. A. F. Snyder, trackmaster, Albany, has written in these words:

"This is to certify that the screw spikes put down on the bridge over the Hudson River at Albany, N. Y., by the United States Railroad Screw Spike Company, February, 1866, have done their work perfectly, holding the rails securely and firmly to the ties, not having started in the least, while the ordinary spikes which were put down on the bridge at the same time have many of them started up and are quite loose and useless."

Testimonials to this effect from the men practically acquainted with the use of this article might be multiplied, but we have adduced enough to prove that they conduce in a very essential manner to safety of railroad traveling, by preventing the loosening or starting of the rails, which, as we have already said, is the cause of so many accidents, and such frequent loss of life. And as soon as this fact is generally known, their use will be a matter simply of necessity with the railroads, for the people will demand it.

This is, of course, the aspect of the subject which is of the first importance, and which most directly interests the public—the tendency to lessen the risk of railroad traveling, which unquestionably the use of this screw spike will have—and we hope the claims of the invention will receive attention, and the evidence in support of these claims will be investigated by the press and by thoughtful men throughout the country; and to this end we suggest that parties interested in the subject should write to the secretary, G. B. Hubbell, Esq., at the office of the company, 45 Cliff street, who will, we are sure, be happy to send in reply the fullest information. And surely every man who travels, or who has a wife or child, or friend who travels upon a railroad, is interested in this matter.

We desire to call public attention to this subject first and chiefly, we confess, that such a pressure of public demand may be brought to bear upon the railroad interest as will compel their attention to the subject. It is a trite proverb that "corporations have no souls;" and assuredly the fearful record of railroad accidents in this country presenting such an aggregate destruction of human life as is without parallel in railroad management in the world, and exhibiting a fearful laxity in our administration of them shows that our railway corporations form no exceptions to the general rule; and if they are brought to adopt any reforms or improvements in their system, it must be either from the pressure of public opinion or the hope of increasing dividends. Fortunately, we believe that both these considerations will combine in the present case; for we cannot doubt, on the one hand, that the traveling public will imperatively demand the use of this article, if it be the means of greater safety, as it doubtless will; and, on the other, we find from an examination of the facts that so far from the screw spike costing more money than the common spike it will in reality be much cheaper.

It is true that the first cost of the screw spike is conderably more per pound than—perhaps double—that of the common article. But it would be a great mistake to suppose its cost is, therefore, twice as great, or greater at all; on the contrary, it seems plain that it will be considerably less. On this subject of the greater economy of the article, the advertisement of the company tersely and clearly states the facts. It says:

"In order to remove the rail it will only be necessary to reverse the screw one quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized. Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used the rails are held so firmly in their place that this injury is prevented. The saving to railway companies in ties alone, it is estimated, will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

"It is also calculated that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving."

And this is abundantly corroborated by the testimony of practical railroad men, all, we understand, without exception, who have investigated the subject, avowing the conviction that a large saving would be effected in cost by the universal adoption of the screw spike.

Mr. Hilliard, to whose letter we have already referred, adds further on this point of cost, that the new spike will prove cheaper, not only from the greater cheapness in relaying iron, but from the much longer endurance of the ties where screws are used. He gives, in addition to the reasons already cited for advocating the use of the screw spike in preference to all others that he has seen in use for twenty-four years on railroad tracks, the following:

"In relaying iron it will be done *much quicker*. You simply give the screw one-fourth turn back, lift the old rail, replace it with a new one, then turn the screw back as before; while the old-fashioned spikes must be drawn from the ties, and new holes made every time a rail is replaced—and every spike driven in a tie is, as we trackmen term it, "death to the tie."

"I think the ties *will last at least four years longer* where the screws are in use, as they keep the ties up firm to the base of the rail, thereby preventing pounding; whereas the common spikes draw out as the ties settle, allowing the rail to bend and cut in the tie."

And Mr. Featherly (already referred to) also says on this subject:

"I know they are safer than the common spikes, and a great saving of both life and property—*at least fifty per cent. in ties, and quite as much in spikes*—saying nothing of economy in labor, and of the firmness of the rail, obviating the immense jarring which cuts the ties—caused by loose spikes and rails—and yet giving to the track that easy and connected spring so long desired."

Another source of economy in the use of these screws is that they can be drawn and re-used frequently, while spikes are necessarily crooked in drawing them from the wooden ties, and are commonly cast aside as scrap.

But a further and a higher consideration of economy remains still to be noticed. It is the saving certain to be effected by railroad companies in avoiding the losses caused by railroad accidents. If it be true, as we suppose is unquestionably the fact, that accidents involving great loss of property, and heavy damages for injury and death to individuals, have been caused by the defective fastening of rails, then an invention which avoids such danger may well be paid for as a premium on a policy of insurance against such losses, and, therefore, on the very lowest ground of pecuniary interest, the use of these spikes will be wise and economical.

We have no doubt that these considerations of economy will be regarded by prudent railroad managers, who will the more willingly and promptly bow to the demands of public opinion, when they understand that at the same time they are promoting directly their own pecuniary interests.

We have only to add that the company, composed, as we have said, of influential and sagacious men, and represented by intelligent and effective officers, has a large capital, and has gone into this enterprise with confidence in the final success of their patent, and a far-seeing apprehension of the magnitude of the business to be done. Having devoted nearly two years to careful study of the subject, and necessary preliminary experiments, they have erected a large factory, in which they have put a quantity of costly and powerful patent machinery, which enables them even now to turn out five or six tons daily of their screw spikes, and with facilities at once to increase the production to many times that amount. The peculiarity of the screw is that it is not cut, but hammered, thus securing by the process of hammering the greater toughness and higher refinement of the iron. The machinery employed in heading the screw (invented by Mr. Benjamin Walker,) is exceedingly ingenious, and does its work most perfectly. In a single heat the whole process of making the screw is completed. The rod, when heated, is first put into the heading machine, and the head forged, and then it is transferred to the screw machine, and the thread, which is perfect and sharply cut, hammered out.

The company are at present engaged in preparing tools for putting in the screws with ease and rapidity, which it is expected will reduce the cost to below that of driving the ordinary spike.

We have thought this matter of so much importance, not only to the public, but to the railroad interest itself, that we have devoted so much of our space to it this week, and we suggest to the press at large that this is a subject to which it may be well to call the attention of the people. With Bessemer steel rails, and with screw spikes to fasten them, we may hope to avoid many of the

accidents which arise from the starting and displacement of rails, and although they may cost railroad companies more money at the start, they will both be found in the end great sources of saving.

New Jersey Railroad and Transp. Co.

The following is an abstract of the report of this company for the year ending December 31, 1867:

RECEIPTS.

From passengers	$1,281,454 04
From freight	353,072 65
From U. S. mail, rents, express, freight and other sources	230,776 67
	$1,865,303 36

EXPENSES.

Maintaining railroad, bridges and buildings	$259,967 28	
Repairs of locomotives, cars and machinery	160,417 98	
Fuel—cost and labor in preparing	150,007 47	
Operating the road and transporting passengers and freight	428,214 92	
Office expenses, salaries and contingencies	20,546 06	
		1,019,153 71
		$846,149 65
Interest on bonds		$59,673 54
Transit duty on passengers & freight		33,799 29
State tax on capital stock		28,437 50
Government tax		65,000 32
Sinking fund		20,000 00
Dividends in cash, Aug. and Feb.		568,482 00
Profit and loss, to surplus earnings		67,757 00
		$846,149 65

The number of passengers transported over the road during the year, was as follows:

Over the whole line of the road	613,545
Between Jersey City and Newark	1,738,061½
" " Elizabeth	160,049
" " Rahway	163,066½
" " Uniontown	18,387
" " N. Brunswick	136,697
" all intermediate places	827,172½
Total, not including commuters and free passengers	3,656,978½

The number of tons of goods, wares and merchandise transported over the road during the year, was as follows:

Over the whole line of the road	55,888
Between Jersey City and Newark	42,738
" " Elizabeth	19,547
" " Rahway	14,068
" " New Brunswick	29,082
" all intermediate places	117,084
Total	278,407

Number of miles run by passenger, freight and other trains, 677,201.

GENERAL STATEMENT.

Capital stock		$6,000,000 00
Funded debt		850,000 00
Bonds and mortgages		512,614 00
Due other railroads		194,009 73
Profit and loss, being surplus earnings represented by permanent improvements, and the property and cash stated below	$109,867 73	
Dividend, 1st January, payable 3d February, 1868	293,750 00	
		403,617 73
		$7,960,241 46

Cost of road and equipments:

For graduation and masonry, bridges, superstructure, iron, passenger and freight stations, buildings and fixtures, engine and car houses, workshops, machinery and fixtures, engineering, land and land damages	$4,077,493 00	
Locomotives, tenders & snow plows	469,000 00	
Cars—passenger, freight and baggage	389,814 00	
Property, viz:		
Bridge, ferry, turnpike and other stocks, real estate, ferry boats, privileges and fixtures, (including the property and privileges purchased of the Jersey Associates)	$2,393,297 44	
Due from other roads	66,497 55	
Cash in bank, cash items, and balances due	564,639 47	
		3,024,434 46
		$7,960,241 46

President.—ALFRED L. DENNIS.
Secretary.—F. W. RANKIN.
Treasurer.—H. J. SOUTHMAYD.
Gen'l Superintendent—F. WOLCOTT JACKSON.

Des Moines Valley Railroad.

The capital stock of this company, as authorized by the articles of incorporation, is $8,000,000. The amount of stock subscribed and paid is $1,820,200. The indebtedness of the company is $3,687,003 91, viz:

Eight per cent. first mortgage bonds, issued at the rate of $15,000 per mile on the first 154 miles of road, and secured by a mortgage on the road, its franchises and full equipment	$2,310,000 00
Seven per cent. income bonds, issued at the rate of $3,000 per mile on the first 154 miles of road, and secured by an indenture of trust on the nett earnings of the road	462,000 00
Eight per cent. short bonds	120,000 00
All other indebtedness, including amount due contractors	795,003 91

The road extends from Keokuk to Des Moines, the Capital of the State, 162 miles, and is completed and in operation the entire distance.

The lands granted to this road are the residuum of the Des Moines River Land Grant, but none have ever been certified to the company.

The gross receipts of this road for the year, 1867, were $735,586 71 which was disbursed as follows:

Operating expenses	$412,125 05
United States revenue tax	5,704 41
Iowa State tax	7,355 87
Interest on first mortgage bonds	184,800 00
Interest on income bonds	32,340 00
Interest on short bonds	9,600 00
Paid incorporat'n expenses, to Lessees for rolling stock, &c., and on floating debt	83,661 38
Total disbursement	$735,586 71

No profits have been earned, out of which to declare dividends, and no dividends to stockholders can be paid until the floating debt is liquidated, amounting at present, as shown above, to be $795,003 91, and probably not until the short bonds ($120,000) are also paid.

The cost of building the road from Keokuk to Des Moines, including right of way, depot grounds and buildings, machine shops, rolling stock and and all equipments, is $5,507,208 91, or $33,995 08 per mile.

Insurance Agents.

An important case has recently been decided by the First District Court of this city, involving the question of the responsibility of Insurance Companies for the acts of irresponsible Agents. The case was that of Simeon Mack *et al.*, *vs.* The American Exchange Insurance Company. It was a test case, and was taken up from an inferior court to decide the point whether the actions of an irresponsible broker bound an insurance company or not. It appeared that certain insurance brokers had procured the insurance of policies to certain parties, but had never accounted to the company for the premiums. The Court held that in such cases the insurance company was not bound by the action of the brokers, and could at any time cancel the policy for non-payment to them or their agent, of the premium.

This decision is one of importance to every merchant and property owner, and shows the absolute necessity of the utmost care in the choice of a broker to pay premiums to. It is a warning to insure only with such brokers as are well known to be honest men and of good standing. The better way in this, as in all other transactions of a like nature, is to do business directly with the principals at the offices of the companies. The plaintiffs claimed that the brokers acted as agents of the company, which the defendant denied, though they admitted that they had at different times taken risks which were brought to them by these brokers, allowing a rebate of ten per cent. Justice Kevlen gave judgment for the defendants.

Indiana and Illinois Central Railroad.

We learn that a controlling interest in the stock of this company has been purchased by parties residing on the line of the road; and that at a meeting of the stockholders in Indianapolis on the 30th ult., new officers were chosen, viz: President, John K. Warren, of Decatur, Ill.; Vice President, N. T. Thornton, of Putnam County, Ind.; Treasurer, Burrows, of Decatur, Secretary, W. A. Morrison, of Indianapolis. It was determined to remove the office of the company to Decatur, Ill., as soon as possible. The new officers and directors have taken hold with a determination to have the road built at an early day. The company now has assets to the amount of $1,000,000, which they are ready and anxious to turn over to any company of capitalists who will build the road.

Westham Iron Works.

The Richmond *Whig*, referring to the revival of these Works, under the auspices of a new company, says: "The company consists of General Joseph R. Anderson, of this city Frederick H. Wolcott and David Hoadley, of New York, General Charles P. Stone, of Dover, Va., and Leslie Chase, of New York. The charter was recently granted by Judge Christian of the Circuit Court of Henrico. The capital stock is $100,000, with the right to increase it to $500,000, to be divided into shares of $100 each. The company will hold the following amount of real estate: 2,000 acres in the County of Augusta, 5,000 in Rockbridge, 500 in Henrico, 500 in Appomattox, 2,000 in Amherst, and 2,000 in Nelson."

The Union Pacific Railroad.

The Government Commissioners for the Union Pacific Railroad have reported to the Secretary of the Interior that they find the sixteenth section of thirty miles of said road, commencing at the 510th mile-post and terminating at the 540th mile-post west from the Omaha, well constructed and ready for immediate service, and therefore recommended the acceptance of the section. The President of the United States has accepted the section, and ordered the patents and bonds accruing by law to be issued to the company. The 540th mile-post, where this section ends, is 7,525 feet above tide-water.

Baltimore and Ohio Railroad.

We have received a copy of the report of this company for the fiscal year ending September 30, 1865, which was presented at the annual meeting of the stockholders in Baltimore on the 18th of November last. The reports of this company have been delayed for several years past by reason of difficulty in settling accounts which had accumulated during the war and since. In view of the destruction of much valuable property, and many costly structures, during the war, which represented in part the capital of the company, it has been deemed proper to place all the expenditures for the maintenance and increase of machinery, and the construction of buildings, tracks, etc., for the year 1865 as expenses. The following is a comparative statement of the earnings and expenses of the Main Stem for the years 1864 and 1865:

MAIN STEM.

Earnings:	1864.	1865.
Passengers	$3,250,307 42	$3,997,642 28
Tonnage	5,327,384 83	6.099,063 91
Total	$8,577,692 25	$10,096,706 19
Working expenses:		
Transportation exp.	$801,061 21	$1,113,208 33
General expenses	52,013 87	35,416 14
Losses by accidents	32,007 59	20,726 87
Repairs of railway	809,362 48	1,483,422 16
" locomotives	494,039 27	1,082,986 70
" burden cars	461,527 55	476,479 70
" pass. cars	98,960 03	287,250 86
" dump cars	2,925 95	5,727 87
" stationary machinery	71,849 26	147,765 19
" depots	135,332 13	332,725 63
" water stati's	20,798 90	30,074 09
" bridges	82,221 07	194,005 89
" telegraphs	6,238 45	42,317 83
Fuel and preparing	107,145 93	238,943 58
Cleaning engines and cars	39,780 65	63,153 16
Pumping water	9,309 12	11,674 86
Watching cuts tunnels and bridges	42,326 40	59,173 35
Contingent expenses of machinery department	3,609 38	4,676 11
Total	$3,270,509 05	$5,658,722 82
Net earnings	$5,307,183 20	$4,437,983 87

It is shown that the earnings, in comparison with the fiscal year 1864, increased $1,519,013 94, while the working expenses increased $2,388,213 27—making thus a comparative decrease of net profits of the Main Stem of $869,199 33. Compared with the fiscal year 1863, the increase of earnings being $3,586,761 13, and the increase of working expenses $3,692,874 91, the decrease of net profits amounted to $106,113 78.

During the fiscal year, the sinking fund for the redemption of the city loan increased to $956,724 64—showing a gain of $56,860 40.

Dividends of 4 per cent. each upon the capital stock were paid on the 1st of November, 1864, and 22d of May, 1865. The U. S. tax thereon was also paid by the company.

The liabilities of the company, compared with the statement of September 30, 1864, show reductions by payments on account of the loans stated as follows:

On loan redeemable in 1867	$99,019 37
" " 1875	130,500 00
" " 1880	26,500 00
" " 1885	107,500 00
	$358,519 37

The balance of cash in the Treasury, Sept. 30, 1865, was, $1,302,898 38, after deducting $135,903 92 for payment of interest on the city loan, and on the bonds of the company which matured Oct. 1, 1865.

Statement of Profit and Loss for the years ending September 30:

	1864.	1865.
Balance from previous year	$9,648,991 85	$13,087,651 31
Net earnings	5,307,183 20	4,437,983 87
Divid'd upon 10,168 shares of Washington Br. stock owned by the Co.	101,680 00	101,680 00
Increment of five million loan S. F.	35,121 18	44,848 48
House rents	4,571 86	3,777 79
	$15,097,548 09	$17,675,941 45
	1864.	1865.
Dividends on stock	$1,311,954 00	$1,050,000 00
Interest and taxes	672,583 00	515,211 62
Ground rents	25,359 78	25,800 86
Balance	13,087,651 31	16,084,928 97
	$15,097,548 09	$17,675,941 45

Statement of the liabilities and assets of the Baltimore and Ohio Railroad Company, September 30, 1864 and 1865:

Liabilities:	1864.	1865.
Stock	$13,123,000 00	$13,132,100 00
Stock scrip not funded	4,402 00	4,302 00
Certificates of indebtedness not conv. into stock.	22,890 00	14,130 00
Scrip issued for fractional certif.	1,670 00	1,430 00
Preferred stock	3,000,000 00	3,000,000 00
Loan redeemable in 1867	915,280 50	821,261 13
Loan of 1875	1,024,750 00	894,250 00
" 1880	628,500 00	602,000 00
" 1885	1,852,000 00	1,744,500 00
City loan	5,000,000 00	5,000,000 00
* N. W. Va. R.R. 2d mort. bonds		493,000 00
* N. W. Va. R.R. 3d mort. bonds		201,000 00

1865	322,314 81	436,568 05	758,882 86
Aggregate—			
1861	$1,349,424 22	$2,650,672 90	$4,000,097 12
1862	2,339,539 52	3,284,758 82	5,624,297 84
1863	1,980,798 42	4,678,491 09	7,659,289 51
1864	4,175,766 33	5,963,109 70	10,138,876 03
1865	5,067,539 15	6,704,336 57	11,771,875 72

The road operated by this company comprises three distinct parts: the Main Stem, the Washington Branch and the Parkersburg Branch. The length of these several lines is as follows:

Baltimore and Ohio Railroad	379.6 miles.
Washington Branch	30.0 "
Parkersburg Branch	103.5 "
Total	513.1 miles.

The stock of engines on hand at the close of the fiscal year 1865, numbered 243; of which 200 were first class, 34 second class, and 9 third class.

The number of cars owned by the company is as follows: 130 passenger, 22 smokers, baggage, mail, express, etc., 1 pay, 1 post office, 2 baggage, 8 officers, and 3,549 tonnage, stock and coal cars.

The mileage of engines in 1864 and 1865 on the lines severally, was as follows:

	1864.	1865.
Main Stem	3,493,376	3,798,323
Washington Branch	435,144	584,848
N. W. Virginia R. R.	416,837	436,729
Totals	4,345,357	4,819,900

No returns are given of the number of passengers carried. The through tonnage, which amounted in 1864 to 166,118, was in 1865, 164,476—showing a decrease of 1,642 tons.

The aggregate quantity of coal transported on the Main Stem in 1864, was 359,561 tons; and in 1865, 408,170 tons—showing an increase of 48,609 tons.

The tonnage of live stock in 1864, was 25,433; in 1865, it was 26,304.

The quantity of lumber brought to Baltimore in 1864, was 9,868 tons; in 1865, 12,096 tons.

The quantity of flour brought to Baltimore in 1864, was 616,917 barrels; in 1865, 631,688 barrels—an increase of 14,771.

In the last Annual Report full statements and explanations were made of the agreements with the city of Baltimore, and the Northwestern Virginia Railroad Company, under which a re-organization of that company, and a reduction and consolidation of its debts were to be affected. Under the arrangements connected with these agreements, the payment of the entire sum of the bonds of the Northwestern Virginia Company, endorsed by the Baltimore and Ohio Railroad Company, viz: $1,000,000 of second, and $500,000 of the third mortgage bonds was assumed, principal and interest, by this company.

The endorsed bonds of the Northwestern Virginia Railroad Company, which were embraced in the last annual statement as a sinking fund for the extinction of those liabilities, viz: $444,000 of the second, and $202,000 of the third mortgage bonds, as well as $63,000 of the former, and $97,000 of the latter, subsequently purchased for the same object, have been retired. The remainder of the second mortgage, viz: $493,000, and of the third mortgage guaranteed bonds, viz: $201,000, now appear in the accompanying statement, among the direct liabilities of the Baltimore and Ohio Railroad Company. The payment to the City of Baltimore of $1,200,000, for its interest in the Northwestern Virginia Railroad Company, and the assumption of the guaranteed debts, as stated, with other advances made to that company, swelled the aggregate of the liabilities of the Parkersburg Branch Railroad to this company, on September 30th, 1865, to $5,680,684 94. Under the agreements, this indebtedness was adjusted in the preferred stock of the reorganized company.

By unanimous action, the Board in July, 1865, purchased from the Government of the United States, four first class steamships, for the purpose of inaugurating permanent intercourse by steam between Baltimore and Liverpool.

This enterprise was commenced with the cordial sanction of all the interests connected with the company, and has produced results of the greatest magnitude and importance in advancing and assuring vast interests, embracing those of the city of Baltimore and all the extensive regions for which, through the Baltimore and Ohio road and its branches, Baltimore furnishes the most economical and advantageous port for foreign commerce.

Western Central Railway.

The *Columbus Journal* says that the Western Central Railway Company, of Ohio, has filed its certificate for incorporation with the Secretary of State. It is the intention of the company to build a railroad from West Salem, Wayne County, to a point on the western boundary of Ohio, in the township of Washington, Mercer County. The road is to run through the counties of Wayne, Ashland, Richland, Crawford, Wyandot, Hardin, Auglaize and Mercer. The capital stock of said company is $1,500,000. A meeting of the incorporators of the company was held at Bucyrus on the 16th ult. Delegations were present at the meeting from all points on the line from West Salem to Logansport.

Cazenovia and Canastota Railroad.

The subscribers to the stock of this road are promptly paying in to the Treasurer the required ten per cent. on their stock. At a meeting of the directors on the 16th ult., the following officers of the company for the ensuing year were elected; Lewison Fairchild, President; Charles Stroud, Vice President; H. F. Jervis, Secretary and Treasurer. Messrs. Stroud, Jervis & Sage were appointed as executive committee.

American Railroad Journal.

Saturday, February 8, 1868.

Stock Exchange and Money Market.

Money has been less active, since our last. Speculation in the public funds, as well as in stocks and gold, has been on a less confident basis. The mercantile traffic has been on a very restricted scale. The influx of capital from the country has been moderate, while the disbursements of the Sub-Treasury have been unusually heavy. The city banks, in their weekly statement, show a gain of $3,237,440, chiefly from remittances from country National Banks; a loss of $1,957,008 of legal tender notes, partly through the drain into the Sub-Treasury, which ceased on Friday; a decrease of $1,151,480 in the specie reserve, and an increase of $8,023,512 in the loan averages, chiefly due to advances on the public funds. Their circulation was cut down $20,241. The Sub-Treasury reduced its cash balances, nearly nine millions, during the week. The floating supply of capital has been very large, and lenders have been quite eager to place balances advantageously, both on call and in the discount form. Call loans have been quite easy at 3@4 per cent. to the Government houses, and 4@5 per cent. to the Stock and Gold Board firms, generally at 4 and 5 per cent. in each instance. Discount applications have been in unusual favor with the banks and with private lenders. Choice to good grades of business paper have been readily passed at from 5½@7 per cent. per annum. Government has been a free buyer of Seven-Thirties, and a moderate seller of Ten-Forties, thus adding to the cash resources of the street. The specie reserve of the city banks is now $23,955,320, against $16,332,884 same time last year. The city bank deposits are now $213,330,524, against $200,511,596 week ending Feb. 2, 1867. The legal tender reserve amounts to $65,197,153, against $65,944,541 same time last year. The circulation now stands at $34,062,321, against $32,995,347 same time last year. The loans are now $266,415,613, against $251,264,355 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $106,241,504 a day, against a daily average of $88,067,204 the preceding week, and $103,299,561 the week ending with Jan. 18, 1868. The current week's exchanges average about $106,244,282 a day. The city banks, last week, lost $1,957,008 of legal tender, and $1,151,480 of specie, while they gained $3,237,440 in the deposit line. They increased their loans, $8,023,572; and reduced their circulation, $20,241.

National Bank notes to the amount of $66,040 were issued last week, making the total issue to 1,673 banks thus far, $305,978,751, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $6,045,955, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date, of $299,542,926. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,210,400; and for the public deposits, $37,827,950—making a total of $379,038,350. The Treasury Department last week redeemed and destroyed $330,100 of worn and mutilated fractional currency, and issued $502,186 of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 1, were $15,990,564, including $2,075,843 from customs duties; payments, $24,826,879, including $1,312,000 of coin interest; balance at the close of the week, $98,698,120, against $107,534,436, at the close of the preceding week, showing a decrease of $8,836,315. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,134,382 including $371,410 from customs; and payments, $2,851,031; on Tuesday, receipts, $1,700,863 including $342,971 from customs, and payments, $598,110. The balance at the close of business on Tuesday stood at $99,584,225, against $110,643,141 a week previous; and $105,640,197 on Jan. 21, 1868. The aggregate receipts of the office in January, were $92,181,220; aggregate payments, $95,771,787.

Government paid off $4,468,550, of the 1847–'67 loan, through the local office, in January.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to date of latest report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740.

Government revenues have been a little more prolific, since our last, and since the commencement of the current week, have been generally on the increase. The excises, last week, yielded $2,780,000, against about $2,000,000 the preceding week; customs at the port of New York $2,075,843, and at the outports, about $650,000 (in coin) more, making the grand total income for the week equal to $6,682,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $119,000,000.

The Customs of this port in January, were $7,208,590, or $2,315,795 less than in January, 1867.

Government received $7,541,247 from customs, through the port of San Francisco, from Jan. 1, to Dec. 31, 1867, against $7,189,763 in 1866, $5,812,368 in 1865, and $6,378,385 in 1864. The receipts from the same source, during the first ten days of January, 1868, were $187,956, against $98,080 same time last year.

The Gold movement has been less animated, but more uniform, during the past week. The fluctuations in the price have been unusually limited, the range having been from 140⅝@141⅞, and the latest quotation on Wednesday 141⅜. The market has shown considerable strength, despite the absence of anything like an active inquiry on speculative or mercantile account. The premium has been buoyed up, in part, by the reports of an increase of from 15 to 20 millions in the public indebtedness, during the past month of January, because of the deficient revenues. The export demand has been moderate. The *Russia* on Wednesday carried off $361,781 in specie. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $277,783, against $123,388 same time last year. The customs demand for Gold last week, averaged $345,974 a day; thus far, this week, it has been equal to $357,100 a day, or equal to a weekly aggregate of $2,143,140. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $33,484, and from California, $1,299,124. The total customs revenue of the Government, in coin, at this port, during the calendar year of 1867, was $116,958,654, against $130,222,092 same time in the preceding calendar year. The customs revenue, at the port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $64,308,723, against $72,496,889 same time in the preceeding fiscal year. The total receipts of California gold at this port in 1867, were $27,677,556, against $42,740,913 in 1866, showing a decrease in 1867, of $15,063,357. The receipts of California gold, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $18,712,441 against $27,634,918 same time in the preceeding fiscal year, showing a decrease of $8,922,472 in 1867–'68. The exports of specie from this port, last week, were $169,100, against $685,098 same week last year. The exports of specie, hence, since July 1, 1867, have been $34,536,617, against $19,988,580 same time in 1866–'7. The total outflow of specie from the port, in 1867, was $51,841,678, against $62,553,700 in 1866. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $1,312,000, and since July 1, 1867, $49,465,520, against $33,135,408 same time in 1866–'7. The total coin interest disbursements through the Government office, in 1867, was $61,871,348, against $48,680,377 in 1866. The specie exports from San Francisco, from Jan. 1, to Dec. 31, 1867, reached $40,671,797, against $44,365,668 1866, $44,426,172 in 1865, and $55,707,201 in 1864. The exports from San Francisco, from Jan. 1, to Jan. 18, 1868, were $1,897,200.

Foreign exchange has been in rather better supply and moderate request at less buoyant prices. There has been a more liberal offering of commercial bills which have not been very salable. Bankers' 60 day bills on London closed on Wednesday at 109⅝@109⅞, and on Paris to 5.18¾@5.13¼; sight bills on London to 110@110¼, and on Paris to 5.12½@5.11¼. The offering of produce bills have been fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,218,009, against $2,881,102 same week last year; total, since July 1, 1867, $107,721,598, against $111,471,288 same time in 1866–'67. The total value of exports of produce and merchandise in 1867, was $189,688,044, against $192,329,554 in 1866.

Government securities have been generally quoted firmer in price, though the businss of the week has been on a less extensive scale, especially among the street purchasers. The investment demand has been fair, chiefly for the later Five-twenties and the Ten-forties. The Seven-thirties and Compound Interest Notes have been sought after by the redeeming agents of the Treasury, and have not been freely offered in the open market. Holders of all descriptions of the public funds have been more confident in their views, in the firm belief that Congress will do nothing to impair the faith of the Government pledged to their payment.

U. S. sixes of 1881 closed here on Wednesday at 111¾@111⅞; U. S. Five-twenties of 1862, 111¼@111⅜; U. S. Five twenties of 1864 at 108⅝@109⅛; U. S. Five-twenties of 1865 at 109⅞@110; U. S. Five-twenties of 1865, consolidated, 107¾@107⅞; U. S. Five-twenties of 1867, 107⅞@108; U. S. Ten-forties at 104⅜@104½, and U. S. Seven-thirties at 107⅝@107¾. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865	117½	September, 1865	116⅛
August, 1865	116½	October, 1865	115⅞
U. S. three per cent. certificates			100¼

Railway and miscellaneous stocks have been much depressed and lower in price, under a pressure to realize, especially on the more purely speculative stocks, which have been forced on the market, in amounts far beyond the immediate requirements of the operators on the *bull* side.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 22.	Jan. 29.	Feb. 5.
Consols	92⅞	93½	93⅜
U. S. 5-20's of 1862	71⅞	72	72
Erie	48¾	48¾	48
Ill. Central	85½	86½	87

The aggregate revenues of the British Government, last year, were £68,663,516, against £68,785,662 in 1866. The revenue from the various sources compare, thus:

	Year ended Dec. 31, 1866.	Year ended Dec. 31, 1867.
Customs	£21,915,000	£22,630,000
Excise	20,616,000	19,955,000
Stamps	9,291,000	9,597,000
Taxes	3,468,000	3,484,000
Property tax	5,458,000	5,266,000
Post office	4,375,000	4,630,000
Crown lands	327,000	337,000
Miscellaneous	3,340,662	2,764,516
Totals	£68,785,662	£68,663,516

General business have been quite tame, since our last. Breadstuffs and Provisions have favored buyers, on a less active call for the leading articles. Cotton has been less active, at irregular prices, closing at 19@19¼ cents, chiefly 19¼ for middling uplands, per lb. The stock of cotton now here is estimated at about 52,000 bales. The receipts at the port this week, have averaged about 3,700 bales a day. The receipts at all the shipping ports from Sept. 1, 1866, to Aug. 31, 1867, were 1,951,998 bales, against 2,154,476 bales the preceding cotton year; exports, 1,554,664 bales, against 1,557,054 bales the preceding year; estimated stock at close of the year, 80,296 bales against 253,000 bales same time last year. The receipts at all the ports, since Sept. 1, 1867, have been 1,192,000 bales, against 1,040,000 bales same time last year; exports, same time, 697,000 bales, against 473,000 bales same time last year; stock on hand at latest dates, 353,000 bales, against 560,000 bales same date last year. At the Live Stock markets this week Beeves have been in good request at bouyant prices, the range having been from 10@18c. per lb.; week's receipts, 4,951. Veal Calves have been in fair demand at from 9@13c. per lb.; receipts, 748. Sheep and lambs active at from 5@8, per lb.; receipts, 20,862. Swine have been more active at from 7¾@8¼c. per lb., all live weight; receipts, 10,910. Foreign merchandise has been a little more sought after in special lines, since our last, but the aggregate trade has been quite light for the season. The Dry Goods Imports in January amounted to only $5, 119,359 according to the invoiced value, as against $11,928,872 in January 1867. The amount marketed in January was $4,765,026, against $8,897,443 in January of last year. The total imports of foreign dry goods, last week, were $1,321,855, and the total amount marketed $1,215,904. The value of foreign merchandise imported last week, was $2,625,769—making the grand total specie value of last week's imports of dry goods and merchandise, $3,947,624, against $4,207,960, same week last year; total since July 1, 1867, $130,922,974, against $158,172,833 same time in 1866–'67. The aggregate for the year 1867, was $242,478,575 against $277,043,050 in 1866. The ocean freight market has been less active; rates have been quoted much lower. For Liverpool we quote flour at 3s. per bbl.; grain at 8¼d.@8½d. per bushel; cotton at ⅞@1d. per lb.; and heavy

goods at 30s.@37s. 6d. per ton, all by sailing vessel. Total number of vessels in port on Wednesday 487.

The New York exports, exclusive of specie, for the week ending Feb. 4, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$2,881,102	$3,218,009
Prev. reported.....	13,908,549	13,360,704
Since January 1.....	$16,789,651	$16,578,713

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$3,152,844	$1,321,855
Gen. merchandise.....	1,055,116	2,625,769
Total for the week.....	$4,207,960	$3,947,624
Previously reported....	14,955,517	9,557,989
Since January 1.....	$19,163,477	$13,505,613

The balance in the Sub-Treasury on Wednesday was $100,554,962 41.

Erie Extension Canal.

The gross amount of tonnage carried over the Erie Extension Canal during the past year was 528,374 tons. Of this 165,850 tons were received at and shipped from Erie, which includes coal, iron ore, limestone and miscellaneous freight. Of lumber, staves, &c., 5,732 tons, and of goods, iron, nails, 3,066 tons. Of iron ore the amount is near 50,00 tons, and of coal not far from 100,000 tons have been brought to Erie. The number of boats cleared from Erie was 1,956. The arrivals not far from 2,000. The rates of freight ranged from $1 50 to $1 75 including tolls.

☞ The Cincinnati *Gazette* says that the negotiations for some time pending have been concluded between the Baltimore and Ohio, the Marietta and Cincinnati, and the Indianapolis, Cincinnati and Lafayette Railroad Companies, by which hese lines, so far as working arrangements are concerned, are to be one.

☞ The first section of the Buffalo and Washington Railroad, from Buffalo to Aurora, has been completed.

Imports of Dry Goods.

Journal of Railroad Law.

RAILROADS NOT BOUND TO DELIVER AT OWNER'S PLACE OF BUSINESS—CAN DEMAND ONE RECEIPT FOR ALL GOODS ARRIVED, THOUGH REMOVED IN PORTIONS BY THE OWNER.

The facts in the late case of the Morris and Essex Railroad Co. *vs.* Ayres and others, (5 N. J., 393,) sufficiently appear in the opinion of the Court.

This case was certified from the Morris Circuit for the advisory opinion of this Court.

HAINES, J.—The plaintiffs, being merchants at Morristown, had certain articles of merchandise transported for them by the defendants from the City of New York to their place of business. The goods consisting of about three loads for a one horse wagon, were safely brought to Morristown and stored in the warehouse of the defendants, ready to be delivered to the plaintiffs on their signing a receipt for the whole quantity and paying the freight.

The freight was duly paid, but the plaintiffs refused to sign a receipt for all the goods, and proposed to remove them by a wagon load at a time, and to give receipts for such as they might take at each load. The regulations of the company required a receipt for all the goods before any part were removed, and without such receipt their agent refused to deliver any part of them.

Thereupon the plaintiffs brought their writ of replevin, by virtue of which the sheriff delivered to them the whole quantity. The object of the action is to test the validity of the regulation.

A verdict was rendered for the plaintiffs; and several exceptions having been taken by the defendants during the trial, the judge directed the same to be certified to this Court for its advisory opinion on the several points stated in the case.

The obligation of common carriers by railway is safely to transport the goods to the place of destination, to deposit them without delay and without additional charge in their warehouse, until the owner or consignee has a reasonable time to remove them. They are not required as carriers by wagon, to deliver at the door or place of business of the owner or consignee, nor as carriers by water, to give notice of their arrival. Their route being confined to the track, renders the first impracticable without the use of wagons, which is not part of their contract, and the usual certainty of the arrival of the train renders the latter unnecessary, and by the usage of the business was not required.

Having the merchandise in good order, and safely stored and protected from the weather and from trespassers, and ready for delivery, allowing a reasonable time for the owner or consignee to remove them, their duty as carriers ceases, and they are no longer liable as carriers. After that they become warehousemen, with the liability only of bailees without hire, and responsible only for ordinary neglect. Redfield on Railways, 252–3; 1 Pars. on Contr., 671, 663; Pierce on Am. Railways, 436; Powell *vs.* Myers, 26 Wend., 591; Goold *vs.* Chapin, 10 Barb., 612; Thomas *vs.* Boston and Providence R. R. corporation, 10 Metc., 472; Norway Plains Co. *vs.* Boston and Maine R. R. Co., 1 Gray, 263.

After so depositing them in their warehouse, they keep the goods for the exclusive benefit of the owner, whose duty it is to remove them in a reasonable time. Garside *vs.* Trent and Mersey Navigation Co., 4 Term. R., 581; Brown *vs.* Dennison, 2 Wend., 593; Ackley *vs.* Kellogg, 8 Cow., 223.

In the case before us, the defendants had performed all their duty as to transportation and storage, and had the goods ready for delivery, subject only to the signing of a receipt, or all in accordance with the regulation.

The question then arose, whether that regulation was reasonable, and that was a question of fact to be determined by the jury. The validity of a by-law which binds the members of the corporation only, and not third persons, is purely a question of law. But the reasonableness of the regulation as is deemed necessary and conducive to the comfort, convenience, or safety of passengers, or to protect the rights of the company, is purely a question of fact. The reasonableness or unreasonableness of such regulation is properly for the consideration, not of the Court, but of the jury. State *vs.* Overton, 4 Zab., 435, 441.

The court, therefore, did not err in refusing to non-suit the plaintiffs, and in submitting the question of fact to the jury. Thus the first point certified is answered in the negative, to wit, that the motion to non-suit ought not to have been granted.

The verdict having been against the defendants and consequently against the reasonableness of the regulation, a further question is presented, whether the verdict was or was not against the weight of evidence on that subject.

By the testimony in the case, it appears, that the company had experienced great inconvenience and great difficulty arising from the delivery of so large an amount of freight to so many persons without retaining some written evidence of the delivery; and they could not tell in any particular case, whether particular goods were delivered or not; and that there was a further difficulty arising from persons leaving goods at the depot for a length of time, and taking them away in parcels, and frequent complaints had been made of goods being there, after the company thought they had reason to remove their goods as speedily as they could, and also to give to the company evidence that the goods had been safely brought to the place of delivery, and to have one receipt for all, instead of a receipt for such portion as the owner might see proper to take away from time to time. An opportunity was offered to the owner to examine the goods to see if they were all there and in good order, before a receipt was required.

The rule, which had been applied to one of the principal stations of the company, was found to operate well, so that in five years there was not an instance of any one receipting for goods, and afterwards claiming that any had been lost or not delivered.

When it was applied to the whole line of the road, it was again found to operate well, and was acquiesced in by freighters generally, some few only complaining that it was oppressive and unjust.

In my judgment there was abundant evidence from which the jury might and should have found the regulation to be reasonable.

The company had a right as carriers, to be discharged of their liability on their being ready to deliver the goods, and to have some written evidence of such discharge. It is not reasonable to require them to employ a witness to the delivery

of every parcel, when and as often as the owner may choose to call for it, nor to be compelled to have as many receipts as the owner may find it convenient to take parcels of his goods.

The company was bound to be ready to make delivery of the goods, but it is one delivery and not many, that the law requires. They have the right also to be discharged from liability as warehousemen. The owner having had the opportunity of inspecting the goods, to see that all were there and in good condition, he was bound to take the custody of them, and to assume the responsibility of their safe keeping, and to remove them out of the way of the company with all reasonable diligence.

To the giving of a single receipt for all the goods at the station, it is no answer to say, that the company gave receipts for them in parcels. The cartmen, who deliver the goods to the freight agent, take receipts for each load, and they can ask for no more. The company are not bound to give receipts for goods before they are delivered at the station, and are seen by the agent there, and each load may, and usually does, constitute one delivery, and for it is given one receipt. On the same principle, the owner at the place of destination has one delivery of all the goods there, and it is reasonable that he should surrender the company's receipts which they have given, or that he give one general voucher for what is delivered to him and placed in his custody. Should any error appear in the quantity of goods delivered, or in the condition of them, the receipt is not conclusive; it is but *parol* and *prima facie* evidence of delivery in good order and in full quantity, and like a bill of lading or any other receipt, is subject to explanation and correction.

I am of opinion, that the verdict was against the weight of evidence, and that the Circuit Court should be advised to set it aside, and to grant a new trial.

This, of course, answers the fourth and fifth points certified, and supersedes the necessity of considering the second and third points.

Burning Cars.

COBOURG, ONTARIO,
Dominion of Canada,
Jan. 31, 1868.

To the Editor of the RAILROAD JOURNAL.

SIR.—During the last three months, there has been great loss of life and property, by the burning of passenger cars, heated on the old plan.

Now sir, I can assure you that although I have over three hundred coaches heated on my plan, and many of them have been upset during the last three years, there has not been one single accident by fire, nor the loss by that means of one cents worth of property to any Railroad Company using my plan of heating and ventilation.

I use for wood or coal, but one stove in each car, and that is a double stove, or a stove within a stove. The plates are all heavy, and it is next to impossible to break them, so that the fire can get out. But there is an additional safeguard. The stove stands on a "water box" which contains about 5 pails of water, used for purifying the air before it goes into the stove. In case of an upset, all this water is poured over the stove and the floor of the car, so that if fire should get out, (which however has never yet been the case) it would be at once extinguished. In addition, no passenger could be burned against the stove, for it throws out no heat from the plates. The car is heated entirely by air. The following testimonials will show in what estimation my plan is held.

Yours respectfully,
H. JONES RUTTAN.

CHICAGO, April 20th, 1867.

"TO WHOM IT MAY CONCERN."

We the undersigned, Superintendents of Railways, have applied RUTTAN's Plan of Ventilation to our Coaches. The large supply of pure air, entirely freed from dust and cinders, and the downward exhaustion which prevents Passengers inhaling each other's breath, are most valuable characteristics of his system, and, in our opinion, render it the most desirable of any yet introduced. We would also bear testimony to the winter arrangement which, whilst it supplies a large quantity of fresh warmed air, effects a very considerable saving in fuel. One stove only being used in each car.

Office of the Chicago, Burlington and Quincy R. R. Co.,
Chicago, April 18, 1867.

H. J. RUTVAN, Esq.,

DEAR SIR.—Having had occasion for the past year to ride upon our trains between Chicago and Aurora, a distance of forty miles, almost daily, in coaches using your system of ventilation. It affords me pleasure to state, that nothing more perfect for furnishing a full supply of fresh pure air is desirable.

During the past winter, the coaches seating 76 persons each, were warmed by one stove placed in the end of the car, and were rendered entirely comfortable in the coldest days. To some considerable extent I have observed the working of your plan for heating and ventilating buildings, and I have yet to learn of a case which has not proved satisactory.

Yours very respectfully,
A. T. HALL,
Treas. C. B. & Q. R. R. Co.

R. N. RICE, General Superintendent Michigan Central Railroad.

J. B. SUTHERLAND, Superintendent Car and Locomotive Dep't Michigan Central Railroad.

R. HARRIS, General Superintendent Chicago, Burtington and Quincy Railroad.

A. N. TOWNE, late General Superintendent Chicago and Great Eastern Railroad.

M. HUGHETT, General Superintendent Illinois Central Railroad.

R. HALE, General Superintendent Chicago and Alton Railroad.

R. EATON, Superintendent Car and Locomotive Dep't Grand Trunk Railway of Canada.

Chicago and Great Eastern Railroad.

The Cincinnati *Commercial* says that the Columbus and Indiana Central Railway Co. will take possession of the Chicago and Great Eastern Railroad on the 12th of February. The consolidated line will embrace seven hundred and eighty-eight miles of track, as follows: Chicago and Great Eastern, two hundred and twenty-four miles; Indiana Central, one hundred and eighty-eight miles; Peoria, Logansport and Burlington, one hundred and eighty-three miles; Union and Logansport, ninety-three miles. The main shops of the new company will be located at Logansport.

Columbus, Chicago and Indiana Central Railway.

Last Thursday the last rail was laid on the Union and Logansport Railway, and in response to invitations kindly extended by Wm. Foster, Esq., Superintendent of the T., L. & B. Railway, a considerable number of the business men of our city witnessed the important event at a point fifteen miles east of this city, where the train from this city was met by the first through train from Columbus, Ohio, bringing B. E. Smith, Esq., President of the C. & I. C. Railway, and the business men of Hartford, Marion, and the other towns along the line of the road.

The last rail was laid, and the last three spikes were driven respectively by Dr. J. N. Converse, President of the Union and Logansport, B. E. Smith, Esq., President of the Columbus and Indiana Central, and J. E. Young, Esq., Vice President of the Chicago and Great Eastern. The greatest enthusiasm prevailed, and cheers were given with a will for each of these gentlemen, and for W. D. Judson Esq, Pres't of the C. & G. E., and Wm. Foster, Esq., Sup't of the T., L. & B., Railway. A brief welcome was made by Dr. J. M. Justice and T. H. Bringhurst of this city.

This event is of such great importance in its bearings upon the future prosperity of Logansport, as to demand more than a passing notice. The last two years have been marked by many important Railway projects, and the consolidation of so many different roads renders it necessary to take the map and look over the territory to fully comprehend the magnitude and extent of the interests involved in the completion of the Union and Logansport Railway and the passage of the first train over it from Columbus to Logansport.

We learn that the stockholders of both the Chicago and Great Eastern and the Columbus and Indianapolis Railways have voted upon the consolidation of the two roads. The vote in both cases was most favorable—95 per cent. of the stock being represented, and not a dissenting vote cast.

This completes the consolidation of the following corporations: The Columbus and Indiana Central; Union and Logansport; Toledo, Logansport and Burlington; and Chicago and Great Eastern; making in one corporation six hundred miles of road under one organization.

The name of the consolidated road is to be the "*Columbus, Chicago and Indiana Central Railway.*"

The laws of Ohio are such that the Board of Directors of the new consolidated railway cannot be elected sooner than twenty days from the date of the vote for the consolidation of the companies, and the time for the election has been fixed on the 12th of February. The new Board to be elected will comprise members of both the old Boards, and the new corporation will thus enjoy the benefit of the great ability and experience of gentlemen who have had charge of the separate organizations.

The organization is composed of prominent New York, Pennsylvania and Ohio capitalists, and has also as stock and bondholders many strong business men in Indiana and Illinois, who will by their foresight reap fine incomes and build up an immense freight and passenger business for the connecting lines east of Columbus. The strength and power of the Pennsylvania Railroad is acknowledged on all hands, and the eminent ability with which it is managed has placed it as the great route of the United States. It now reaches west over the Panhandle to Columbus, giving this new consolidation line the best possible eastern outlet *via* Pittsburg to Philadelphia and New York. Many of the Pennsylvania and eastern stockholders are deeply interested in this new organization, and will give to it such material aid as to bring to their own line a fourfold return for their investment.

Another very strong feature of this consolidated line, and for shippers on its various lines of connection, is the fact that the Baltimore and Ohio Railroad, which is second only to the Pennsylvania, has its western terminus at Columbus, giving the

advantage of two competing lines to the Atlantic for both freight and passengers.

The Columbus and Indiana Central, under efficient management, has for years been in a prosperous condition, extending from the Capital of Ohio to the Capital of Indiana, and has well been called the Central. From its Indianapolis terminus, it will always command a very large and profitable business from Central and Southern Illinois and Indiana. To make a certainty of Louisville and Nashville, a new short line has been built connecting with the Central main line at Cambridge City.

The entire line of the old Indiana Central is through the best portion of Indiana and Ohio, and it must maintain a very prominent position as one of the great trunk roads of the West.

Eighty three miles west of Columbus is the junction of the Union and Logansport Railway, which runs 114 miles through a rich and highly cultivated farming country—a part of the way through the Mississinnewa Valley, being acknowledged as among the best farming land in the West. Its western terminus is Logansport, where it forms a junction and has now become consolidated with the Toledo, Logansport and Burlington Railway from Logansport to the State Line of Illinois, and with the Chicago and Great Eastern to Chicago, making it a portion of the new route from Chicago to Columbus and Pittsburg and the eastern cities. This line is fully able to compete with the Pittsburg, Fort Wayne and Chicago Railway for the immense trade of Pittsburg, or as a through line which will be now in connection with and receive the influence and benefits of the Indiana Central.

The line west of Logansport to the Illinois State line will be run in connection with the Logansport, Peoria and Warsaw Railway to the Mississippi river, and is one of the best located lines in the West, and when finished, as it will be during the coming year, and if not consolidated, will be run in connection with the new organization of which we are writing. The Peoria and Warsaw road occupying a central line through Illinois,must command a large and profitable freight and passenger business, and by running in concert with the new line will greatly add to its own as well as to the interest of the new company. This road is extending and has already opened a part of the line from Peoria to Warsaw and Keokuk, and when this enterprise is completed the road must be one of the central lines to the Pacific.

The through trade formerly between Cincinnati and Chicago by way of Indianapolis and Lafayette, by the arrangement with Mr. Lord, is now over the White Water Valley Road, connecting with the Chicago and Great Eastern at Hagerstown, thus securing this travel by way of Logansport and adding largely to the earnings of the new company.

The location of this Great Consolidated Railway is such that it must become one of the most powerful corporations on this continent. By the shortest existing lines from the Atlantic cities it strikes such important points as Louisville, St. Louis, Indianapolis and Peoria, and is the shortest but one between New York and Chicago.

By its branch from Cambridge City, Indiana, it will on the first of May commence running its trains directly from Louisville to New York—the Silver Palace Cars running through without change.

As soon as the new line between Logansport and Union is ballasted, or about the first of June, through trains, from New York to Chicago will be put on.

A contract has been made with the White Water Valley Railway to do on that line the exclusive business between Chicago and Cincinnati instead of over the Cincinnati, Hamilton and Dayton road as formerly. This route will be forty-four miles shorter than any other line between the two cities. Mr. Lord, the owner of the White Water Valley road, has nothing to do beyond this with this line. Mr. Lord agrees by this contract to abandon the route from Cincinnati to Chicago by way of Lafayette.

The trains on the Chicago and Great Eastern Railway will continue to run to Richmond, notwithstanding the Hagerstown route, as the road derives a greater amount of trade from Richmond and points east on the Little Miami Road than from Cincinnati.

This consolidation and construction of the Logansport and Union road has been accomplished mainly by the untiring energy of the President of the Columbus and Indiana Central Road, B. E. Smith, Esq., of Columbus, Ohio, who from a private banker at Columbus has placed himself by his capital and sterling business integrity, at the head of this strong corporation, which is destined to be second to no other corporation in the Western States.

We understand that no time is to be lost in putting the new line in first class condition. A contract has been made with J. J. A. Quealy & Co., for ballasting about 85 miles of the road. Yesterday two gravel trains with the steam shovel were put at work at the gravel pit south of this city. At Marion the work of ballasting with steam shovel and ample trains will commence as soon as the frost is out of the ground in the spring.

We understand that a subscription to the Bonds of the new consolidated company has already been obtained sufficiently large to pay the floating indebtedness of the Great Eastern Railway which has been such a weight upon it. Ample funds have also been secured to carry on this year, with the same vigor that characterized the past year the work of rebuilding the Chicago and Great Eastern, when Joseph E. Young, Esq., the energetic Vice President of the company, gave almost his entire time and attention to superintending the relaying of nearly forty miles of track with new iron, and ballasting and putting the road in its present fine condition. The most powerful and enterprising corporations in this country aid in this work, and it rapid prosecution and completion at an early day is thus placed beyond a doubt.

Taking this new organization in its extent, and commanding as it does such an immense territory, it must, unquestionably at an early day become a first class road and one which to the section over which it passes and to the holders of stock and bonds must be equal to any road in the West. The character of the parties who control it gives a certain guarantee that the public are to be liberally accommodated, aod we ask our own citizens to extend all the aid in their power to this new enterprise which can so greatly promote the growth and prosperity of our city and county. —*Logansport Pharos, Jan.* 25.

Southern Railroads.

The South is preparing, after the suspension of half a dozen years, to resume the work of completing her system of internal improvements. Cessation upon these works was by no means the least of the misfortunes consequent upon the war. Not only were there in every State short portions of roads to be finished, but there were several main or trunk lines upon which also all progress was for the time suspended.

The work upon which the south as a whole was particularly interested, and for which a large appropriation was made by the Confederate Congress, was a link of one hundred miles connecting Dalton, Ga., the southern terminus of the Virginia and Tennessee chain of roads, with Selma, a focal point in Alabama, and thus, with the Southwestern roads, and the Gulf harbors. This work has now been resumed, and a call is made for one thousand hands. It will, probably be completed to Rome in six months, when the connection will be made by way of Kingston, and the Western and Atlantic Railroad. This is a part of what is known as the *Continental Railway*, connecting the New England cities with New Orleans and Texas, and ultimately, with the Pacific at Mazatlan, or Guaymas, by the shortest practicable route. For a road across the Continent it presents more favorable features and less disadvantages than any other. It passes through some twenty States and will thread many of the most populous and flourishing cities, thus bringing into its through traffic the commerce of the zones, and at the same time uniting in one common work many a different race and character. Its entire length will be not far from 3,350 miles—from New York City, say 2,450 miles.

Another enterprise which is more purely Southern is the *Charleston, Memphis and Topeka Railway*. It is calculated to tap the Union Pacific in the valley of the North Platte and lead off directly to the Southern States and their seaports their legitimate portion of the California business. Charleston, Augusta, Atlanta and Memphis, are upon the same straight line; Memphis being a little less than 700 miles from the Atlantic seaboard. At present the route is from Atlanta by way of Chattanooga, making a detour of some 50 miles to the northward, and increasing the distance probably 60 to 70 miles. It is contemplated (and the surveys are partially made,) to connect Atlanta with Decatur *direct*—when a trunk line will be established between the Mississippi Valley and Tide Water, that can have no rival for directness.

Next to St. Louis and New Orleans, Memphis is decidedly the most important place upon the Mississippi River. It is a point from which radiates several important lines of railroads upon the east, while it commands the entrance to Arkansas and the country westward. By the Memphis and Little Rock road, the Great Valley of the Arkansas is accessible, and by the Topeka extension, connection will be made with the Pacific Railway, thus shortening the distance to tide water several hundred miles at least, over the route by Chicago to New York. This extension is indispensable to the Southern States and particularly to Arkansas and Southwestern Missouri. Its influence will be to build up an important harbor at Charleston or Savannah, or at some intermediate point having better capacity—and will be a step favoring direct foreign trade with the Southern States. From Memphis to the Union Pacific, in the vicinity of Topeka, is some 425 miles—making in all about 1,100 miles to the seaboard. It is intended to enlist French and English capitalists in this work, and thus infuse new life into the business arteries of the South, and impregnate her with ideas of foreign industry.

From *Mobile to New Orleans*, some 140 miles, the work of construction is going on. This forms a part of the great coastwise route connecting all the important cities and harbors, from New York to Texas.

The *Alabama Central* from Montgomery to Decatur is another work about being resumed, and of great importance in the development of the State. There is no coal or iron in the whole country superior to that found in Alabama. When this road is completed, and a large share of it was done before the war, there will be a through route by way of Nashville from Chicago to Mobile and Pensacola upon nearly a direct line.

The *Knoxville and Kentucky* work has been in progress for the year past, and is making its way towards the Great West by Louisville and Cincinnati. The completion of the road from Knoxville, South, will give the Northwest a seaboard connection at Charleston, differing but little in distance with New York.

These are some of the main lines, though indeed but a small part of the public work in progress in the Southern States. With her soil and climate there is no reason why in a few years the South will not be cut and crossed in every direction by lines of railway, and as able to sustain them as the Western States. They will become so many additional bands to bind the country together.—*Portland Argus.*

Shamokin Coal Trade.

The Sunbury (Pa.) *American* says that the amount of coal shipped from the Shamokin coal region over the Shamokin division of the Northern Central Railroad, during the year 1867, was 485,697 tons, against 557,160 tons in 1866, a decrease of 71,463 tons. This does not, however,

give the entire production of the region, from the fact that during the year the Enterprise road has been extended to four collieries, and carried from them 87,836 tons. From which deduct decrease by Northern Central road and it leaves the total product of the region, for the year, 16,373 tons in excess of that of 1866, besides taking into account the shipment from the Reliance colliery, which may be set down at 200,000 tons.

Railroad Earnings.--Weekly.

The earnings of the Toledo, Wabash and Western Railroad for the 4th week of Jan., 1868, were $278,712 25
Same week in 1867..... 237,712 25

Increase $41,000 00

The earnings of the Chicago and Alton Railroad for the fourth week in January, 1868, were..... $67,476 05
Corresponding period previous year .. 58,826 05

Increase $8,650 00

The earnings of the Western Union Railroad for the 4th week in Jan., 1868 ..... $16,437 63
Corresponding week previous year.... 10,564 06

Increase $5,873 57

The earnings of the Chicago and Rock Island Railroad for the fourth week in January, 1868 were..... $67,100 00
Corresponding week of previous year.. 52,519 00

Increase $14,581 00

The earnings of the Chicago and Northwestern Railroad for 4th week in Jan., 1868..$242,283 09
Corresponding week previous year .. 199,489 72

Increase $42,793 37

The earnings of the Detroit and Milwaukee Railroad for the week ending January 30, 1868, were $21,835 00
Corresponding week of 1867..... 18,330 00

Increase..... $3,505 00

The earnings of the Michigan Southern and Northern Indiana Road for the 4th week in Jan., 1868, were..... $122,946 00
Corresponding week of 1867..... 95,700 00

Increase $27,246 00

To Contractors.

PROPOSALS will be received until March 1st, 1868, for the GRADING MASONRY, BRIDGING and TRACK LAYING of the OAKINGTON BRANCH RAILROAD, from its junction with the Philadelphia, Wilmington and Baltimore Railroad, two and one-half miles south of Havre de Grace to the Bay Shore at Oakington, 2 52-100 miles.

Bids to be made for the entire work, including the furnishing of TIES and IRON (50 lbs. to the yard), or for any part of the same. Plans and specifications to be seen at the office of R. K. HAWLEY & CO., No., 16 Eastern avenue, Baltimore, where proposals will be addressed.

R. K. HAWLEY, President.

TO BRIDGE CONTRACTORS,

LOUISVILLE, CINCINNATI, AND LEXINGTON RAILROAD,

CHIEF ENGINEER'S OFFICE,
LOUISVILLE, KY., January 13, 1868.

SEALED PROPOSALS will be received at this office until February 15, 1868, for about twenty-six hundred lineal feet of Bridge superstructure (in iron and timber) for the Kentucky river and other streams crossing the Louisville and Cincinnati Railroad. Thirteen hundred feet will be in spans of 200, 150, 125, and 100 feet, and the residue in 75 feet spans and under; all upon plans and specifications exhibited on and after the 20th inst.; but proposals upon other plans will be considered. Each bid will cover materials, labor of all kinds, transportation, and erection. For a portion of the Bridge work completion will be required July 1st, 1868, and for all by September 1st ensuing. Payments cash, with the usual reservation on partial payments to secure fulfillment of contract. Right reserved to reject any or all bids.

Proposals will also be received for the temporary trestling on the line.

I. M. ST. JOHN,
Chief Engineer.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,
By C. S. CROSS, Civil Engineer.
THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—
1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.
It is a plain, clear and most valuable book for practical Railroad Engineers. Sent **free by mail**, upon receipt of the price. For sale at this office. Price **$1.50.**

LYONS' TABLES.
To Civil Engineers and Contractors.
FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

	Sheet No.			Sheet No		
1.	General Table for all Bases and all Slopes.		13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.		14.	" 20 "		1½ to 1
3.	Base 12 ft. Slopes	1½ to 1	15.	" 24 "		½ to 1
4.	" 12 " "	1½ to 1	16.	" 24 "		1½ to 1
5.	" 15 " "	½ to 1	17.	" 25 "		1½ to 1
6.	" 15 " "	1 to 1	18.	" 26 "		1½ to 1
7.	" 15 " "	1½ to 1	19.	" 28 "		½ to 1
8.	" 16 " "	½ to 1	20.	" 30 "		1 to 1
9.	" 16 " "	1 to 1	21.	" 30 "		1½ to 1
10.	" 18 " "	½ to 1	22.	" 30 "		1½ to 1
11.	" 18 " "	¾ to 1	23.	" 32 "		1 to 1
12.	" 18 " "	1 to 1	24.	" 32 "		1½ to 1

The Tables are printed in clear, bold type on tinted paper sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.
Sent, **free by mail**, in separate sheets, at **25c. each**

INSTRUMENTS.

Reciprocal Duties.

One-fifth part of the aggregate property of the United States has been worked by various causes, into the form of non-producing capital. Twenty Seven Hundred Millions, or more, consists of Governments bonds and liabilities:—of the twelve hundred millions, or thereabouts, of railway capital, not over forty per cent. has been utilized in aiding production. The banks and the immense capital they wield with their vicious system of discounts on short paper, as well as evil practices of accommodating gamblers instead of producers, have become more of a drawback than an aid to the producing industries. Bondholders, to a large extent, as well as bankers, are employing the Government securities to aid the schemers connected with non-producing capital in making unworthy gains off of producing property and labor. Producing capital, discouraged by its burdens, has been rapidly abandoning the pursuits of industry until production in very many cases has neither capital nor motive to continue under its embarrassments. What is to be the result of this whole vicious platform of false political economy, and how long, under its continuance, before our producing interests will be brought to the non-producing level of the Mexican population?

The income from industry, in the main, has always been moderate, and never, under the best possible system can it become inordinate:—yet, upon the shoulders of industry and producing capital every pecuniary burden, that society is heir to, is obliged to be borne. It matters not as to the process or processes by which these burdens are placed, production cannot escape the exactions, only as the producing interests may rise up in self defence and demand reform. There is now a popular necessity for reform—a reform that shall be deep, radical, and founded upon a settled policy of aiding the producing interests alone as the only means of rescuing the people from burdens impossible for them to bear.

In case the embarrassments upon production go on accumulating the bankers will not be allowed, with impunity, to turn a covetously deaf ear to the popular complaints. Their system will go by the board and be replaced by another devised on the plan of assisting production, instead of bleeding it. The bondholders will not be permitted to fold their arms and make the outcry against repudiation, whilst contributing to the very causes that will be certain, without solid reform, to produce it. Producing industry can bear to a certain extent the burdens imposed on it, but there is a limit beyond which it cannot, and will not endure. More especially will this be the case where the exactions made on it are in a great degree the offspring of insensate covetousness.

It is the natural pride of every true and just minded American citizen to maintain the public faith inviolate. Nothing could be more difficult to obliterate than this sentiment of honor, founded on all considerations of public policy and national integrity. But, in maintaining this sentiment the public creditors are called upon to do their duty practically, and with a will, instead of merely preaching public morality to the classes in society most disparaged, and most imposed upon. It is very easy to find a remedy, and a quick remedy for existing evils, in case we can bring a fair proportion of non-producing capital to the immediate aid of producing employment. The bankers and bondholders of the United States have it in their power, by their combined influence in the right direction, to make the whole country flourish in a little time, and thus fortify and strengthen the security of their capital by making it popular instead of allowing it to remain a subject of growing execration.

The man who takes his mind's eye off the producing interests in the contemplation of any material subject, financial, political, or commercial, is at random at once. These interests, being the foundation of all others, and sustaining all others, are the only legitimate starting point for right reasoning in all collateral directions. Our banking system is presupposed to be founded on the idea and theory of being an aid, in some way, to production. So far as it subserves this purpose in good faith it is tolerable. In so far as it fails to accomplish this it is a public nuisance that should be abated. The loaning banks of Louisiana were the only really popular banks known to us, and their operations in past years afforded a marked contrast to the prevalent short paper discount system. The one can be made an assisting agency to production: the other only assists to break it down where its aid is invoked. Most business can turn itself but once in a year, and capital which requires to be turned oftener than that, as a general thing, is deleterious to production. It is a common saying among bankers that "farmers have no business to borrow money of banks." There is truth in this, considering the manner in which banks are managed. It might however be replied, "this is the fault of the system, and any bank which cannot be brought to the aid of agriculture, has no moral right to exist at all."

While we call with earnestness on the producing capital and labor of the whole country to rally and come to the aid of their own interests, we admonish the holders and managers of non-producing capital to do their duty in upholding the industrial classes. The producing population, under the present regime, may be bled into insensibility as to the claims of bondholders, as well as popular frenzy against bankers. There is a way to avoid this, and that way is for non-producing capital to come at once, and without delay, to the aid of the producing interests. There is no other

remedy, and men are demented if they suppose they can keep up this gigantic game of popular imposition. We would say things plainer if we knew how. There are antagonisms that are sure to go into warfare, unless they are reconciled on principles of justice. Sound policy, as well as common protection and common thrift require that non-producing capital should direct its efforts immediately to aiding and upholding the producing interests. Should this be done, as it can and ought to be done, the whole country may be made to thrive and our bonds brought to par in gold, as also our currency, in less than two years.

England, after the close of the European wars in 1815, found herself in the same condition we are now in, financially, with the exception of those vicious contrivances of bankers, gamblers, and monopolists to aggravate the disparagements on our industry. The government and statesmen of England sprung at once to the aid of the producing interests. Vigorous statesmanship and a steady support of these interests achieved results, such only, as could have upheld the Government and its financial credit. The only movement in this country that promises to be effectual in the right direction, in our judgment, is the one inaugurated by Mr. Sherwood. We cannot too earnestly advise the country to come to his support and sustain him in his efforts to give the producing interests a benefit in one direction, while we admonish non-producing capital to do its duty in another.

Covington and Big Sandy Railroad.

The Legislature of Kentucky, last year, passed an act incorporating a company for the construction of a railroad from Covington, through Maysville to Cattlesburg, at the mouth of the Big Sandy. The charter authorizes the company to acquire, by purchase, any other railroad, or the uncompleted work which may have been done along the line of the route, and to build a through line from Covington to Big Sandy. The Chesapeake and Ohio Railroad, commencing at the sea board, and running through the heart of Virginia, will meet the Covington and Big Sandy railroad at Cattlesburg, and connect with the Maysville and Lexington at Maysville, and the Kentucky Central at Covington. A letter from a well-informed gentleman, dated at Lexington, Va., to Gov. Stevenson, of Kentucky, says:

I take the liberty of dropping you a note in relation to the present condition of the Chesapeake and Ohio Railroad. The city of Richmond and counties on the line have subscribed $3,650,000 to the stock of the company, and we hope to raise the subscription to $5,000,000.

The Virginia Central Railroad, which you know is a part of the line, will be mortgaged, as well as the line to be built, for the additional means to complete the road to the Ohio river.

The Company was incorporated at the last session. An act is now in process of passage though the Legislature, authorizing the counties of Campbell, Pendleton, Bracken, Lewis, Greenup and Boyd, through which the road runs, to subscribe to its capital stock, whenever a vote of the people of said counties shall approve the subscription.

The Covington and Big Sandy will not only connect with the Chesapeake and Ohio line, but with the Baltimore and Ohio, and perhaps the Pennsylvania, so that all these great through lines will be tributary to the Covington and Big Sandy, the Maysville and Lexington and the Kentucky Central. Cincinnati will find it to her interest to foster the Covington and Big Sandy line, as it will be the shortest line by many miles to Baltimore and Norfolk.

South Side Railroad.

The revenue from operations of this road for the fiscal years ending September 30, 1866 and 1867, have been as follows:

	1865'–66.	1866'–67.
From passengers	$105,703 87	$74,506 75
" freight	162,738 97	232,239 49
" mail	6,649 92	6,649 92
" express freight	11,449 15	3,912 08
" car hire	3,038 97	12,782 12
	$289,580 88	$330,090 36

The operating expenses for 1866'–67 were:

Transportation departm't.	$122,337 14	
Road department	80,528 29	
Machinery department	31,857 49	
Salaries general officers and expenses	14,956 25	
Office expenses	4,364 47	
Taxes, law fees, etc.	5,715 15	
Losses—freight and baggage	2,410 52	
		262,169 31
Earnings less expenses		$67,921 05
Discount	$4,147 11	
Interest on funded debt and guaranteed stock	56,914 00	
		61,061 11
Balance		$6,859 94

Compared with the previous year the gross earnings show an increase of $40,509 48, or about 14 per cent—a result, says the report, which in itself would seem well to justify the faith we have heretofore expressed in the early re-establishment of a business over the road, even superior to any it has ever enjoyed; but the fact that this increment has accrued under the operation of a lower tariff than ruled during the previous year, and that it has been derived from tonnage transportation purely, displays a return of prosperity to our country, and a recuperative capacity in the road, which should encourage every confidence in that opinion. Besides, our receipts from tonnage transportation were cut short by at least $40,000, on account of the repeated and long continued interruptions in our western connections, by reason of the floods which prevailed in Tennessee during the very time that the inward trade of the west had fairly set in. If we were to take this into our consideration of the operations of the road for the year, we would be enabled to improve the gratifying result which we have already presented, to an extent that could not fail to secure the full satisfaction of our most sanguine expectations.

The current expenses of the company for the year as they now stand by the returns and records of the several departments which make up the executive organization of the road, have been $323,280 42, including one year's interest upon the entire funded debt of the company yet extant.

But this aggregate of the yearly expenses, favorable as it is in every view we may consider the result, is rightfully subject to a deduction of $20,119 90 on account of expenditures made by the road department, in the reconstruction of property, whose loss or replacement was not imposed by the operations of the road in that year.

The transfer of this amount to our war and property accounts, where it ought to have gone as it accrued, would show our net revenue as for the year to have been $26,979 84.

That is, the clear gain of the road, or the excess of its earnings over all the legitimate expenses of conducting its operations, embracing interest upon funded debt, has been in point of fact that sum.

The annual charges against the company for interest on account of its funded debt, amount, now, to but $56,914, while the net earnings of the road for the past year, without according to the result, the material sum which has been as heretofore explained, wrongfully charged to the account of current expenses, are ascertained to have been $63,773 94.

The cash receipts and expenditures during the year ending September 30, 1867, were:

RECEIPTS.

Cash on hand September 30, 1866	$8 582 83
Temporary loan	67,971 38
U. S. Government	7,396 61
Connecting lines	237,629 82
Express companies	897 56
Baggage masters	2,811 03
Conductor's	17,403 88
Agents throughout the line	194,995 96
Miscellaneous receipts	3,592 40
Bills receivable	4,890 03
Total	$546,171 50

EXPENDITURES.

Notes and acceptances	$110,406 63
Open accounts	381,220 50
Store house	5,462 08
Transportation, road and machinery	4,774 38
Executive department	13,407 44
Revenue	1,943 00
War account	11,744 54
Bills receivable	5,498 51
Rolling stock, etc.	3,463 35
Balance cash September 30, 1867	8,251 12
Total, as above	$546,171 50

The aggregate outlay in the fiscal year ending September 30, 1867, was as as follows:

Salaries and expenses	$14,956 25
Office expenses	4,364 47
Taxes and law fees	5,715 15
Discount	4,147 11
Interest	37,250 08
Losses—property	2,410 52
Profit and loss	13,170 64
Transportation department	122,337 14
Road department	80 528 29
Machinery department	31,857 49
Construction, rolling stock, etc	97,639 67
Store house purchases	121,167 68
War acount	27,437 93
	$562,982 42

Included in the above amount is the matured interest on coupon bonds carried to Interest Account on Funded debt for six months to July 1, 1867, constituting $25,377 of the floating debt as per annexed General Statement.

The funded debt of the company is as follows:

First mortgage 8 per cent. bonds, held in trust by the Board of directors, and of which only $77,000 have been issued	$709,000
Second mortgage 6 per cent., guaranteed by the city of Petersburg	300,000
Third mortgage 6 per cent	314,900
Fourth mortgage 8 per cent	42,000
Special mortgage, confined to City Point Branch 6 per cent	175,000
Total	$1,540,900

—upon which there will be due, say to July 1, 1868, $276,025 of past due interest, which added to the principal sum, would make the entire funded debt of the company at that date $1,816,925;

of which the company yet holds unissued $682,000 of first mortgage bonds. This aggregate amount of authorized debt would stand at about $800,000 eight per cents, and $1,000,000 in 6 per cent. bonds.

It is now proposed to form one general mortgage for $2,000,000, the bonds of which to be made at such dates in the future, and at such convenient intervals, as will ensue the prompt payment of the interest, and the retirement of the principal at maturity.

The length of the main line from Petersburg to Lynchburg is 123 miles; and of branch from Petersburg to City Point, 9½ miles.

The company have 15 locomotives, 6 passenger coaches, 2 mail and baggage, 96 box, 41 flat and 5 cattle cars. The number of miles run by engines with passenger trains has been 77,669; with tonnage trains, 80,308; with material trains, 29,476; switching trains, 12,605—total 200,058. Number of passengers carried 54,815; do., carried one mile, 1,861,846. Tons of freight carried, 77,650; do., carried one mile, 5,329,232.

CONDENSED BALANCE SHEET.

Cost of road and equipment	$3,628,950 45
New construction and equipment	97,689 67
Discount on coupon bonds, etc	13,170 64
Coupon and other interest	28,437 08
Supplies on hand	12,923 87
Expenditure, including discount	266,316 42
Due by connecting lines, U. S. Gov., etc.	31,948 74
Cash	8,251 12

	$4,087,637 99

President.—WILLIAM MAHONE.

Directors.—On the part of the State, R. B. Bolling, H. E. Warren, J. A. Johnston. On the part of private stockholders, R. D. McIlwaine, J. E. Venable.

Treasurer.—JAMES E. CUTHBERT.

Eastern Railroad Co.

The annual meeting of the stockholders of this company was held in Boston on the 3d inst. The following Board of Directors was chosen: George M. Browne, Samuel Hooper, Nathaniel Thayer, Franklin Haven and Benjamin E. Bates, of Boston; Wm. L. Dwight, of Portsmouth; Henry L. Williams, of Salem. A resolution was submitted by S. A. Chase, of Salem, that the directors be authorized to issue long bonds or stock according to the authorizing statute, to meet present or future liabilities of the company. The resolution, amended on motion of Peter T. Homer, by limiting the amount of bonds to $500,000 was adopted. The project of uniting the Eastern Railroad in New Hampshire with the corporation was taken up, and the report of the committee, recommending the union, read. A resolution offered by Lemuel Shaw, of Boston, was adopted, to the effect that the recommendations of the committee with reference to the union be approved, and that the directors be authorized to take measures for effecting the union. A vote was passed confirming the purchase of the Rockport Branch.

Car Wheels.

The annexed letter on the question of car wheels may be of interest to railroad managers, in the present season of wheel breaking. The writer says:

"It is very truly stated, in an article on car wheels, and causes of breakage, in the number of the AMERICAN RAILROAD JOURNAL, dated January 11th, that cast iron remelted in air furnaces will greatly increase in strength, but the same results are not found in melting in cupolas. The writer might have gone further, and stated by remelting charcoal cast iron in a cupola using mineral coal, that it always loses in strength. In fact, by trickling through anthracite coal while in process of melting, it assumes all the qualities and appearances, and has but the strength of anthracite iron. In nothing do railroad managers err more than in using car wheels made from cupola castings. Cold blast iron is preferable to warm blast, and when of good quality and only remelted in air furnaces, a wheel freer from defects can be produced than any wheel made from cupola castings. If railroad managers will take specimens from car wheels made from cupola castings, and submit these to the test of the Government testing machines at Watertown, Reading or Pittsburg, they will find the strength less than 20,000 lbs. to the square inch, while the same iron remelted in an air furnace, will produce castings generally exceeding 30,000 lbs. to the square inch. The practice of the Government, and never departed from, is to cast their heavy ordnance entirely from air furnaces, and now require the same for ordinary shot. If air furnace castings and cold blast metal only were used, we would have fewer accidents from the breakage of car wheels. C. M."

While we think the writer in general is correct, we believe the method usually followed in wheel foundries using cupolas, gives results more analagous to air furnace meltings than is generally supposed.

Soft iron increases in strength by being in fusion a long time. In making wheels, pig metal as near to the required temper as can be obtained, is melted and poured into large reservoirs, tempered and then poured into the moulds.

In casting from air furnaces it is our impression that to obtain any benefits of increased strength, as in casting guns, that the moment the metal is of the right temper it should be poured into the mould; while in casting wheels, say from 10 to 15 tons, or 40 or 60 wheels at a cast, the iron which would be of the right temper for the first period of casting would be too hard for the remainder, owing to the time required in pouring, as it is well known, that the changes in the grade of wheel iron, while hot, is very sudden from hard gray, the proper grade, to mottled, which in wheels would be too hard and brittle, equal if cast in plates to a white iron. This fact, we believe, has precluded the successful use of air furnaces in making car wheels.

It has been ascertained that pig iron melted in cupolas, and allowed to remain in large reservoirs, does not decrease in strength, but, if anything, increases, the process being analagous to the method of keeping the iron in a molten state as in an air furnace, but being free from the continued action of the flame of the furnace, is not subject to the same changes of temper when up to grade.

We have no data giving the relative strength of the same irons when melted in the cupola and allowed to temper in the reservoir, as compared with its being melted in an air furnace.

We agree with the writer in the great benefits which would be derived by railroad companies in having proper tests of all wheel irons. Safety to the traveling public and economy to railroads, demands the use of the strongest and best wheels made, independent of their cost.

Producing Capital and Labor—Call for a National Convention.

We have received a copy of a Circular calling for a National Convention under the auspices of the "National Cheap-Freight Railway League," to meet in the City of Cincinnati, Ohio, on the 19th of May next, to take measures to place the Government of the United States and its policy under the control of the producing interests. The Convention will be composed of such officers of the National and Auxiliary "Cheap-Freight Railway Leagues" as may be pleased to attend, together with five delegates to be sent from each Congressional District in the United States. Every earnest advocate of the producing classes who may be present, whether formally elected or otherwise, will be welcomed to a seat in the Convention.

We have been anticipating that this movement would sooner or later take place. There seems to be a fatality to great measures of statesmanship when reliance is made on mere party politicians. It is seldom the case that any party is strong enough, or harmonious enough, to inaugurate a State or National policy, unless such party is brought into existence, or organization, with the specific purpose of accomplishing it.

While we have regarded the proposed National system of Cheap-Freight Railways, the most powerful and beneficial agency we have ever contemplated as an aid to production and increase of wealth, we have not felt great confidence that it would be carried to a consummation until it made its own party. Politicians have so many matters to think of merely personal to themselves, that they have little time to devote to the great measures of statesmanship upon which the material interests of the whole Nation depend for development. It rejoices us to see this movement, and the proposed National organization in behalf of the producing industries. The good that may result from it is almost incalculable. We trust that it may be warmly supported by every producing class.

☞ The railroad which the Tillyfoster Iron Mine Company is constructing to connect their property with the Harlem Railroad, will be finished by the 1st of May. The road is two miles long and is to cost $150,000. The Tillyfoster and Brewsters mines are in full operation, and give employment to 300 men.

New Bedford and Taunton Railroad.

The gross receipts of this company during the past year were $285,022 95, of which $174,686 64 were the earnings of the main road, and $61,286 31 by the Fairhaven branch. On the main road the receipts were as follows: From passengers, $111,057 64; freight, $58,725 35; mails, $3,075; miscellaneous, $828 65. On the Fairhaven branch as follows: From passengers, $35,884 23; freight, $18,534 94; ferry, $4,785 90; mails, $2,031 24. The expenses, were $192,861 74, of which the Fairhaven branch and ferry were $42,112. The net profits were therefore $43,071 21. The number of passengers carried over both roads was 241,181, none of whom were injured. During the year a new locomotive has been added to the equipment at a cost of $13,580; also a new baggage car, costing $1,013 78; two passenger cars rebuilt at an expense of $4,000; and six new freight cars costing $3,843 38. During the year 220 tons of rails have been laid at a cost of $15,621 11. There are 12 miles of the track laid with the fished rails, and the remaining 9 miles will be relaid in the same manner as soon as it is necessary. There have been 8 miles of the track re-graveled to a depth of 8 inches during the year, and all but 2 miles of track has been re-graveled during the past two years, so that the road bed is in excellent condition. The funded debt of the corporation was reduced last year $10,000, and the whole debt is now $174,000, with no floating debt.

Compartment Cars on the Boston and New York Line.

The Boston and New York Express Line *via* Springfield have just had built for their use two elegant compartment cars. A party of twenty or thirty gentlemen comprising representatives of the leading Massachusetts railroads and members of the Boston press, made an excursion in one of these cars yesterday from Boston to Worcester and back, by invitation of Superintendent Firth of the Boston and Albany road. The cars contain six compartments, each of which will accommodate seven persons, and there can be no question that the benefits of such an arrangements for securing comfort and privacy in railway travel will be abundantly appreciated by invalids, families and pleasure parties who wish to be by themselves. The car in which yesterday's trip was made is called "The City of Boston," and the regular trips of this and its companion car will be commenced next week, one of them leaving Boston and the other New York each morning. The cars are beautifully finished and furnished both outside and inside, and their arrangement and construction reflect great credit upon the committee of railroad managers, under whose care they were builit, of which committee Superintendent Russell, of the Boston and Albany road, was Chairman, and also upon Wason & Co. of Springfield, the builders. The cost of the cars has been about $13,000 each, nearly three times the expense of the ordinary sixty seat passenger cars. In several important particulars these cars are believed to be an improvement upon other compartment cars both in this country and Europe. The additional charge to be made for traveling in the compartment cars will be one dollar per seat from Boston to New York, and the whole of any compartment can be secured for a party of six or less by the payment of six dollars.

One most important improvement put in operation in these cars is in regard to the mode of heating. They are heated by a new apparatus lately invented in New York, and which has been in use for several weeks in two of the ordinary passenger cars on the Albany road. This apparatus consists of a substantial wrought iron stove placed under the car, and in this stove is coiled a portion of heating tubes which extend along the sides of the car and under each seat about six inches from the floor. These pipes are filled with water saturated with salt, to prevent freezing, and the simple action of the fire in the stove causes this liquid to keep in circulation through the pipes, constantly returning to the stove to be reheated. This plan of heating cars is especially adapted to compartment cars, and it so well combines simplicity, economy and safety that it is quite likely to entirely supersede the present plan of heating cars by stoves. The water pipes bring the heat just where it is needed, and the stoves are so arranged that there would be little danger from fire in case of a collision or other accident.

The party yesterday were accompanied by Superintendent Firth and Depot Master Hobart as representatives of the Boston and Albany road, and at Worcester they were met by Hon. D. Waldo Lincoln, Vice President of the road, and taken to the Bay State House, where dinner was served. The car left this city at half-past twelve and returned at half-past five.—*Boston Journal, Feb.* 6.

Peninsular Railway.

To the Directors and Stockholders of the Peninsular Railway Company.

In accordance with the requirements of our By-laws, and as the President of the company I report to you "the condition and affairs of the company." But little work had been done, or material furnished previous to the last annual meeting.

The report of the Chief Engineer shows that, up to and including the 31st day of December, 1867, there had been completed 1,270 stations, of 100 feet each; that 168,628 cubic yards of earth, 12,955 cubic yards of hard-pan, 9,015 perch of stone and 177 cubic yards of earth below water, for foundations, had been moved; that 156 72-100 acres had been chopped and cleared, and that 9 36-100 acres had been grubbed and cleared; that 3,797 cubic feet of timber, not yet in the work, had been delivered, and that 12,724 cubic feet of timber in structures, had been delivered; that 16 bridges of the total length of 1,829 feet had been completed; that 13 culverts are completed; that 460 lineal feet of piles, not driven are delivered, and that 1,760 lineal feet of piles have been driven; that 4,576 feet of plank have been placed in cattle-guards and foundations, and that 26,154 cross ties have been delivered along the line of the road. His report further shows that the total amount of estimates for work done and material delivered during the year ending on and with the 31st day of December, 1867, amounts to the sum of $85,166 12.

The report of the Secretary shows that the total amount that has become due to the company upon assessments of stock subscribed, amounts to $101,200 00, and that the total amount of all orders drawn by him upon the Treasurer for any and all claims against the company up to and including the 11th day of January, 1868, is $107,393 67.

There have been voted by cities and townships, the following sums to aid the company in building their road, viz:

City of Battle Creek		$35,800
Township of	Battle Creek	14,600
"	Pennfield	10,700
"	Bellevue	12,100
"	Carmel	14,400
"	Eaton	13,900
"	Benton	7,800
City of	Lansing	22,200
Total		$131,500

The City of Battle Creek, delivered their bonds to the company on the 15th day of July, 1867, and the Township of Bellevue, on the 18th day of September, 1867. There have been sold by me 341 of the bonds of the City of Battle Creek, and of the Township of Bellevue, each, of the sum of $100 00 for the gross sum of $34,474 52. All of the bonds voted to the company by the above mentioned cities and townships bear interest at the rate of ten per centum per annum payable on the 15th day of February of each year. All of the bonds as yet sold have been sold at their par value, with accrued interest added, less the interest on that interest, from the date of such sale until the time the interest is due and payable, and no difficulty has been experienced and none is anticipated in making sales at that rate.

The report of the Treasurer shows that there has been collected upon subscriptions, the sum of $60,541 16, leaving on the 11th day of January, 1868, the sum of $40,658 84, as yet due and unpaid on assessments upon subscriptions. An effort has been made by the Treasurer and Collectors, to collect assessments upon subscriptions without resorting to legal proceedings, having due regard to the "tightness" of the money market; but all stockholders should bear in mind that the company cannot fulfil their agreement with their contractors without prompt payment of subscriptions, nor can the work progress on the road, any faster than money is paid by them, and that those who are the most in arrears in their payments, and they who have not subscribed at all are generally the ones who find the most fault with the company for any delay in not making payments of their liabilities, or that the work is not pushed rapidly enough to suit them. In justice to contractors and to those who are doing our work and furnishing material, and to the enterprise itself, I would respectfully recommend that as soon as the time for the payment of taxes has passed, vigorous measures be resorted to, to enforce the collection of arrears of subscriptions.

The total amount of claims against the company which have been audited, and for which orders have been drawn is $107,393 67
Amount due on bank note 5,000 00

Total $112,393 67
Amount paid by the Treasurer $61,816 17
Amount paid by sale of bonds 32,633 78

Total $94,449 95

Indebtedness of the company, January 11th, 1868, $17,948 72. The present resources of the company to meet that indebtedness, and immediately available consist of

Amounts due on subscriptions $40,658 84
Municipal bonds unsold 13,800 00

Total $54,458 84

leaving a balance of $36,515 12, in available assets and due after payment of all the liabilities of the company. In addition to the above balance there is yet to become due to the company from subscriptions and municipal aid, the sum of $108,900. Making a total sum of assets to complete the work, after paying the above indebtedness of $145,415 12.

By reference to the reports of the Secretary, Treasurer and Chief Engineer, it will be seen that more than two-thirds of the entire expense of constructing the road bed, purchasing ties and material for the same, right of way, and paying incidental expenses of the entire work from the City of Battle Creek, to the City of Lansing, has been incurred, and paid, leaving the means in our hands for a rapid completion of the work, if promptly paid, and a good surplus for extending our line westward, or for other necessary purposes.

About three-fourths of the entire right of way, including station grounds, (except station ground at Charlotte and Lansing,) have been secured for an aggregate of cash and stock payments of $12,798 33. Much of the right of way has been generously donated by those interested in the road, while others receiving far greater benefit from its construction have illiberally compelled us to resort to legal proceedings to secure it, and have in each instance received but nominal damages, and much less than had been offered them by the company's agents.

Two-thirds of the road bed is now completed, and nearly all the bridges are finished, and with our present progress, the entire line from this city to Lansing will be ready for iron by the first day of June next. Favorable negotiations for iron

and rolling stock are pending, and it is confidently expected that the company will be able to commence laying track in the Spring, and to continue it without interruption, until the same is laid by mid-summer, to Lansing.

The Peninsular Railway Extension Company completed its organization on the 2d and 3d inst., at this city. Contracts for grading and tieing that line from this city to the Indiana State line, are to be let on the 27th inst., and the work will commence on the State line immediately thereafter. The ties for the West end are already contracted.

An agreement was made and entered into, by and between the Directors of the Peninsular Railway Company, and the Directors of the Peninsular Railway Extension Company, on the 3d inst., for the consolidation of said companies, containing terms and conditions mutually satisfactory and advantageous to both contracting parties. The contract is to be submitted to the stockholders of each company for their sanction, at the City of Battle Creek, on the 18th day of February next. I recommend its sanction by the stockholders of this company.

The Peninsular Railroad Company of Indiana have already caused their line to be connected with ours at the State line, and contracts for its construction from South Bend, to connect with our road at that point, are to be let on the 12th day of February next. It is also expected that contracts for the balance of the line in Indiana, will be let as soon as the route shall be surveyed and located by the Board of Directors.

Arrangements are also substantially made for that part of the line which passes through a small part of Illinois and into Chicago.

The Port Huron and Lake Michigan Railroad Company, giving us an outlet from Lansing to Port Huron, have completed over fifty miles of road bed, and 2,000 tons of iron have arrived and are now ready for delivery. Arrangements, I am informed, have been made for the negotiation of sufficient construction bonds to iron and stock that road from Port Huron to Flint, during the Spring and Summer, and for the remainder of the line as fast as the same can be put in readiness for track laying.

The connections hereinbefore mentioned bid fair to give us at an early day, a new "through line" between Port Huron and Chicago.

The Jackson, Lansing and Saginaw Railroad Company have completed their road from Lansing to Saginaw and Bay City, furnishing us facilities for obtaining lumber from the Saginaw Valley, as soon as our road shall be completed to Lansing. The travel between Chicago and Saginaw, and also from Western Michigan to the State Capital, will also pass over the Peninsular Railway, making a saving of thirty-eight miles over the route by Jackson.

A preliminary arrangement has been entered into, by and between the President of the Peninsular Railroad Company of Indiana, the President of the Peninsular Railway Company of Michigan, and the Port Huron and Lake Michigan Railroad Company, subject to the approval of the Boards of said companies, for business purposes as a "through line" between Port Huron and Chicago, the details of which are to be agreed upon in the future.

From the time our line was first contemplated, we have been obliged to contend against the opposition and competition of rival lines, which opposition still continues and opposes obstacles to our progress at every point, where an effort can in any way avail. Our true and only course is to push our line rapidly forward, and by its completion, to put ourselves beyond the reach of competition and opposition from those sources.

I do not feel at liberty to close this report without a proper acknowledgement of the aid received from the directors, officers and employees of the company, since I have acted as your executive officer. The utmost good feeling and unanimity in action has prevailed. The Secretary, Treasurer and Collectors, have been faithful in the discharge of their duties. Directors Cummings and Potter have rendered valuable services for the company, while the other Directors have at all times been ready and willing to, and have, aided me with their counsel in the difficult discharge of the many duties that have devolved upon me.

To C. F. Miller, Esq., Chief Engineer, I cannot award too much praise for the ability displayed by him in his profession, and for his impartial discharge of his duties, and for the valuable assistance that he has rendered me. His assistants and the employees of the company, in his department, have given the utmost satisfaction.

The contractors on our work, Messrs. Britton & Russell, have so far performed their work in a manner entirely satisfactory to the Chief Engineer and myself, and have proved themselves fully justifying our most ardent expectations. Their work is of the first class, and will compare favorably with any work in any State. They are gentlemen of experience and ability.

All of which is respectfully submitted.

L. D. Dibble, President.

Battle Creek, Mich., January 15th, 1868.

Portland and Ogdensburg Railroad.

The projectors of the Portland and Ogdensburg Railroad have not as yet completed the preliminary arrangements for the formal presentation of the matter to the public, although nearly a year has elapsed since the first move in the affair. There has been considerable detail in the consideration of every part of the plan, both as to the surveys, contracts with connecting roads in New Hampshire, Vermont and New York, and we are informed on the best of authority that not until spring or early summer will matters be in a state to call the public meeting for the consideration of the enterprise and the subscription of stock. The special legislation asked of the Maine Legislature has raised up considerable opposition and a remonstrance has been presented to the City Government signed by some one hundred prominent persons, and a copy has been sent to Augusta. We are informed that said remonstrance was obtained through a misapprehension, it being aimed against the Legislature granting the city of Portland authority by a two-thirds vote to take stock or aid the said road, as desired. There exists already such authority, but the projectors desire a re-affirmation of the same so that their contracts may be the more definitely made. They also ask for authority to enter into contracts (or purchase or lease) with the several roads contemplated and existant between here and Ogdensburg; the same authority other long roads now have. This is in substance what is asked for and many of the remonstrants are now satisfied that they were alarmed without cause. The feasibility of the route *via* the Notch is much doubted by some, but the projectors are unanimous as to its successful result; no less than eight experienced engineers having indorsed it. Several parties have also made proposals for the construction of the road. Although it will take some time to complete the desired arrangements, the projectors, in conjunction with the railroad committee of citizens chosen last spring, are busy with the work, and will report as soon as possible.—*Portland Cor. Boston Journal.*

☞ A meeting of the Commissioners of the Deckertown and State Line Railroad was held at Deckertown on the 17th ult. Delegations were sent from Middletown and Goshen. It was voted to open books for subscriptions on the 24th of March, such subscriptions to be the capital stock of the company without designating a route.

☞ The Denton (Md.) *Union* states that at the meeting of the stockholders of the Queenstown and Harrington Railroad, recently held at Ridgely, the sum of $25,400 was subscribed to the capital stock of the road. The following officers were elected: President Thomas C. Hambly; Directors, Jno. F. Dawson, Col. R. C. Carter, A. P. Sorden, C. J. Mitchell and Wm. S. Ridgely, jr.

Ogdensburg and Lake Champlain Railroad.

In consequence of the erection of the elevator at Ogdensburg and the proposed increase of steamers by the Northern Transportation Company on the lakes, this company find it necessary to add largely to the equipment of the road, to give facilities to the increase of business which they must necessarily anticipate. For this purpose they are about to issue $300,000 of 8 per cent. equipment bonds. The earnings of the road the past year show a large increase over the previous year, and the company are thereby enabled to pay a dividend of 3 per cent., leaving a handsome surplus on hand. The bonds to be issued will be applied only to the purchase of cars and locomotives. The company have no preferred stock to dispose of, except for the exchange of first mortgage bonds.

The earnings for 8 months, ending Dec. 1, 1867, were	$726,782 75
And in the corresponding 8 months of 1866	675,402 07
Showing a gain of	$51,380 68

New Jersey Railroads.

The Pemberton and Hightstown Railroad has been completed, and formally opened for business. It connects with the Mount Holly and Pemberton Railroad, and through that road with the Burlington County Railroad, running from Mount Holly to Camden. The distance from Camden to Hightstown over the roads mentioned is about fifty miles. The Camden and Amboy Railroad Company have leased the new road, and it will be worked together with the Mount Holly and Pemberton, also leased by the same company.

☞ A meeting was held in Kingston on the 7th inst. to consider the proposed extension of the Walkill Valley Railroad from its present northern terminus to Kingston. The report of a survey made by Mr. Houston, the engineer employed some months since for that purpose, from Rosendale to Kingston, was presented, and the meeting was addressed by the Hon. Nathan Randall of New York, the Hon. J. Hardenbergh of Kingston and others.

☞ The *Tribune* says that the route of the Midland Railroad has not yet been decided on. There have been several routes surveyed. The shortest is by the way of Otisville and Munson's Gap, in New Jersey, which is said to be six miles shorter than the Middletown course, and ten miles less than the Port Jervis route. The rich grazing districts of Minnisink, Greenville, and Wawayanda are penetrated by the Otisville route.

☞ The people of the counties of Muscatine, Washington, Keokuk, Mahaska, Marion, Madison, Adair, Cass and Pottawattamie, Iowa, met in convention at Oskaloosa on the 23d ult., and determined to build a railroad from Muscatine to Council Bluffs, *via* Oskaloosa.

☞ The Central Railroad Co. of New Jersey will apply to the New Jersey Legislature for a charter to build a railroad from Elizabeth to Newark. A coal railroad from Rahway is also projected.

☞ It is proposed to build a railroad from Toledo to Crestline, Ohio, to connect with the Pittsburgh, Fort Wayne and Chicago Railway at the latter place.

American Railroad Journal.

Saturday, February 15, 1868.

Stock Exchange and Money Market.

The available supply of Money in this market has been steadily increasing, since our last, the domestic exchanges being in favor of this point and the consequent influx of currency quite respectable in volume. The city banks have been gaining in their legal tender and deposit averages, and the U. S. Sub-Treasury has been augmenting cash balances, the latter partly through the transfer of funds from the country national depositaries. The local demand for accommodation at bank and through private channels has been fair, but not urgent, and altogether inadequate to the absorption of the floating balances, which have been seeking secure and profitable employment. Speculation at the Stock Boards has shown a little more animation; but there has been a less confident movement in the Gold Room, and not much improvement in mercantile line, outside of cotton, cotton goods, and the leading articles dealt in at the produce exchange, in which there has been more activity. Call loans close easy to the dealers in the public funds at 3½@4 per cent., and to other street houses at from 4@6, generally at 4@5 per cent. per annum. Discounts are quoted at from 5½@7 per cent. per annum, as the extremes on choice to really good short date business paper. The city banks, last week, added over four and a half millions to their deposit, offset by an increase of nearly $4,140,000 in their loan averages. They enlarged their legal tender reserve, about $650,000. Their specie hoard was diminished about $132,000. The U. S. Sub-Treasury gained nearly 2¾ millions in cash, during the week, and the reserve, in this line, has been augmenting thus far, in the current week. The city bank deposits have risen to nearly 218 millions, since Dec. 7, when they were only about 174 millions, or 44 millions less than at the date of the last weekly exhibit. These deposits are now nearly 20 millions more than the aggregate of the same date last year. According to the last monthly statement of the Treasury Department, no reduction of the greenback circulation, or the volume of outstanding compound interest notes, was made in January. The outstanding plain legal tender notes on the 1st inst., amounted to $356,159,127, and the compound of all dates unredeemed, to $46,244,780, as on Jan. 1. The Department reduced both its coin and currency balances, during the month, the former full $3,939,090, and the latter $192,199. The diminution of the coin balance was due mainly to the heavy coin interest disbursements of the Treasury, in January. The disbursements of the Department in January have been semi-officially reported at $42,799,800, including the following items. Civil, miscellaneous and foreign intercourse, $4,688,100; interest on public debt, $29,818,200; war, $5,897,400; navy, $2,331,400; and interior, pensions and Indians, $565,700. The warrant issued for the redemption of the public debt are not included in these amounts. The coin in the Treasury on the 1st inst., was $98,491,163, against $108,430,254 on the 1st ult., and the currency, $25,578,150, against $25,770,350 a month previous. The aggregate cash balances of the Treasury on the 1st inst. were $124,069,313, of which the Sub-Treasury in N. York held $98,698,120. The specie reserve of the city banks is now $23,823,372, against $16,157,257 same time last year. The city bank deposits are now $217,844,548, against $198,241,835 week ending Feb. 9, 1867. The legal tender reserve amounts to $65,847,259, against $67,628,992 same time last year. The circulation now stands at $34,096,834, against $32,777,000 same time last year. The loans are now $270,555,536, against $250,268,825 at this date last year. The Bank Exchanges at the Clearing House, through the past week, averaged $99,540,433 a day, against a daily average of $106,241,504 the preceding week, and $88,067,204 the week ending with Jan. 25, 1868. The current week's exchanges average about $94,794,382 a day. The city banks, last week, gained $650,106 of legal tender, and $4,514,024 in the deposit line, while they lost $131,948 of their specie reserve. They increased their

loans, $4,189,923; and their circulation, $34,318.

The Philadelphia Bank movement the past week shows an increase in loans, of $67,529; an increase of $39,205 in specie; a decrease in legal tenders of $465; a decrease of $525,934 in deposits; and a decrease of $3,001 in circulation. The Bank Clearings show an increase of $3,040,743, and the balances, a decrease of $1,296.

National Bank notes to the amount of $152,080 were issued last week, making the total issue to 1,673 banks thus far, $306,130,831, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $6,527,715, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,845,790,) an actual circulation at this date of $299,603,116. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,150,950; and for the public deposits, $37,967,950—making a total of $378,918,900. The Treasury Department last week redeemed and destroyed $571,800 of worn and mutilated fractional currency, and issued $532,500 of new.

The U. S. Sub-Treasury receipts, week ending with Feb. 8, were $12,915,062, including $2,058,911 from customs duties; payments, $10,176,337, including $968,000 of coin interest; balance at the close of the week, $101,436,846, against $98,698,120, at the close of the preceding week, showing an increase of $2,738,725. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,831,021 including $285,266 from customs; and payments, $1,423,184; on Tuesday, receipts, $1,727,576 including $318,426 from customs, and payments, $614,574. The balance at the close of business on Tuesday stood at $102,957,685, against $99,584,225 a week previous; and $110,648,141 on Jan. 28, 1868.

The aggregate issue of coin certificates by the U. S. Sub-Treasury, in this city, up to date of latest local report was $245,369,740; aggregate redemptions, $209,565,000; leaving outstanding certificates to the amount of $35,804,740. The last national debt exhibit made the outstanding amount of coin certificates on the 1st inst., $29,619,280, against $20,104,580 on the 1st of January.

The revenues of the Government were rather more prolific last week, on both the customs and excises. The excises, last week, yielded over six million, against $2,730,000 the preceding week; customs at the port of New York $2,058,911, and at the outports, about $670,000 (in coin) more, making the grand total income for the week equal to about ten millions in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with July 30, 1867, were $265,920,474, against $310,906,984 the preceding fiscal year; and $211,129,529 fiscal year ending with June 30, 1865. The receipts thus far in the new fiscal year, which began on the 1st of July, have been about $123,000,000.

Government received $7,541,247 from customs, through the port of San Francisco, from Jan. 1, to Dec. 31, 1867, against $7,189,763 in 1866, $6,812,368 in 1865, and $6,378,385 in 1864. The receipts from the same source, during the first ten days of January, 1868, were $187,956, against $98,080 same time last year.

The Gold speculation has been less active, during the week, and the later dealings have shown decidedly less firmness in the market. The customs and export inquiries have been less urgent, since our last, and the investment demand has been much less confident. There were in circulation on Tuesday and Wednesday reports of the renewal of sales of Treasury Gold, but they were wholly unfounded. Government has gold to spare, to the amount of some 10 or 15 millions which may be sold presently, should the exigencies of the public service call for such a disposition of the surplus. The range of the price in the open market this week has been from 143⅜ down to 141⅛. The latest quotations were 141¼@141⅜. About $350,000 in specie were shipped hence to Europe during the first half of the current week. The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $280,866, against $155,514 same time last year. The customs demand for Gold last week, averaged $343,152 a day; thus far, this week, it has been equal to $299,346 a day, or equal to a weekly aggregate of $1,796,076. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $3,083, and from California, $1,255,333. The total customs revenue of the Government, in coin, at this port, during the calendar year of 1867, was $116,958,654, against $130,222,092 same time in the preceding calendar year. The customs revenue, at the port, thus far, in the current fiscal year, commencing with July 1, 1867, has been $66,379,723, against $75,076,889 same time in the preceding fiscal year. The total receipts of California gold at this port in 1867, were $27,677,556, against $42,740,913 in 1866, showing a decrease in 1867, of $15,063,357. The receipts of California gold, at this port, thus far, in the current fiscal year, commencing with July 1, 1867, have been $19,967,774 against $27,634,913 same time in the preceding fiscal year, showing a decrease of $7,667,139 in 1867-'68. The exports of specie from this port, last week, were $1,644,057, against $276,507 same week last year. The exports of specie, hence, since July 1, 1867, have been $36,180,674, against $20,458,637 same time in 1866-'7. The total outflow of specie from the port, in 1867, was $51,841,678, against $62,553,700 in 1866. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $968,000, and since July 1, 1867, $50,433,520, against $33,341,408 same time in 1866-'7. The total coin interest disbursements through the Government office, in 1867, was $61,871,848, against $48,680,377 in 1866. The specie exports from San Francisco, from Jan. 1, to Dec. 31, 1867, reached $40,671,797, against $44,865,668 1866, $44,426,172 in 1865, and $55,707,201 in 1864. The exports from San Francisco, from Jan. 1, to Jan. 21, 1868, were $2,307,702, against $2,122,360 same time last year.

Foreign exchange has been in much less demand, since our last, and though the supply of prime bills available in the open market has not been very large, prices have declined a fraction, closing weak and irregular. Bankers' 60 day bills on London closed on Wednesday at 109⅜@109¾, and on Paris to 5.20c.@5.13¾; sight bills on London to 109⅞@110⅛, and on Paris to 5.12½c.@5.11¼. The offering of produce bills have been less extensive this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,678,180, against $3,640,850 same week last year; total, since July 1, 1867, $110,399,778, against $115,112,138 same time in 1866-'67. The total value of exports of produce and merchandise in 1867, was $189,688,044, against $192,329,554 in 1866.

Government securities have been gradually improving in price, since our last, on very moderate offerings, especially of all the coin bearing bonds. The six per cents of 1881, of which there is an outstanding aggregate of $283,676,600 as on Jan. 1, have been in good request at the ruling prices. The Five-twenties of all issues have been in fair demand, those of 1862, 1864 and 1867 having attracted most attention. The outstanding issues of Five-twenties now amount to $1,898,488,850, against $1,873,804,750 on Jan. 1, showing an increase during the month, of $24,684,100. Ten-forty five per cents have been in unusual favor with both home and foreign investment buyers, and have shown much more buoyancy as regards price. There were $2,809,400 of five per cent. gold bearing bonds issued by the department in January, doubtless all in the Ten-forty form. Seven-thirties have been very steady in price and in quick request, mainly for banking purposes. There were $23,314,600 of these notes redeemed by the department in January, thus reducing the outstanding balance of this loan to $214,953,850, as against the original aggregate issue of 830 millions, through the Government Loan Agency of Mr. Cooke. The Compound Interest Notes have been in light supply and moderate demand at steady figures. New three per cent. certificates have been inquired for by banks and bankers, and have been quoted very firm. In January, $1,775,000 of these certificates were issued by the Treasury, augmenting the total issue to $25,040,000. The National Treasury in January disbursed nearly 43 millions, an amount largely ahead of the month's revenues from all sources, thus adding $19,189,728 to the net public indebtedness, which is now $2,527,315,378, against $2,508,125,650 on the 1st of January, 1868. The department accounts for the large increase in the debt by the very heavy payment of the semi-annual interest due on the 1st of January last, on the Five-twenty bonds and the bonds of 1881, amounting to $25,000,000, and the falling off in the receipts from customs and internal revenue during the month.

U. S. sixes of 1881 closed here on Wednesday at 112@112⅛; U. S. Five-twenties of 1862, 111⅛@111⅝; U. S. Five-twenties of 1864 at 109@109⅛; U. S. Five-twenties of 1865 at 110@110⅛; U. S. Five-twenties of 1865, consolidated, 108@108⅛; U. S. Five-twenties of 1867, 108@108⅛; U. S. Ten-forties at 104⅞@105⅛, and U. S. Seven-thirties at 107⅜@107¾. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

May, 1865 ..... 117⅛	September, 1865.. 116⅛
August, 1865.... 116⅛	October, 1865.... 115⅞
U. S. three per cent. certificates 100¼	

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 29.	Feb. 5.	Feb. 12.
Consols	93½	93⅜	93¼
U.S. 5-20's of 1862	72	72	71¾
Erie	48¾	48	48
Ill. Central	86½	87	88½

The railway and miscellaneous share market has been quite active, since our last, and higher prices have been made on nearly all the list, dealt in at the Boards, the extreme ease in money stimulating purchases for a rise. The later dealings were indicative of firmness and buoyancy, as the tendency of values was upward.

The New York exports, exclusive of specie, for the week ending Feb. 11, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$3,640,850	$2,678,180
Prev. reported	16,789,651	16,578,718
Since January 1	$20,430,501	$19,256,893

The New York imports for the week compare as follows:

	1867.	1868.
Dry goods	$2,414,479	$2,598,298
Gen. merchandise	3,314,829	2,448,706
Total for the week	$5,729,308	$5,047,004
Previously reported	19,163,477	13,505,613
Since January 1	$24,892,785	$18,552,617

The balance in the Sub-Treasury on Wednesday was $101,371,048 77.

Norfolk and Great Western Railroad.

The Norfolk (Va.) *Journal* states that $875,000 have already been subscribed to this road, as follows: Grayson, $150,000; Carroll, $200,000; Patrick, $200,000; Henry, $200,000; Danville, $125,000. Mecklenburg and Brunswick will each subscribe $300,000, which, with the proposed subscription by the city of Norfolk of $500,000, will make $1,975,000.

☞ Work was formally commenced on the Queen Anne's and Kent Railroad at Millington, Kent Co., Md., on the 6th inst. Addresses were made by Lloyd Tilghman, the President of the road, General Vickers, the President of the Kent Railroad, General Roberts and others. Colonel Roberts said that the road was to be constructed for the sum of $300,000 and explained that $240,000 was already raised.

☞ The Lehigh and Susquehanna Railroad has been opened for through travel. At Bethlehem the car for Philadelphia is switched and attached to the train on the North Pennsylvania Railroad. Those bound for New York are conveyed over the Morris and Essex Railroad. This road is new, and in splendid running order.

Railroad Earnings.---Weekly.

The earnings of the Toledo, Wabash and Western Railroad for the 1st week of Feb., 1868, were $64,338 59
Same week in 1867..... 50,623 54

Increase $13,715 05

The earnings of the Michigan Southern and Northern Indiana Road for the 1st week in Feb., 1868, were $70,932 00
Corresponding week of 1867 ..... 67,304 00

Increase $3,628 00

The earnings of the Michigan Central Railroad for the 1st week in Feb., 1868, were .. $65,325 90
Corresponding week of previous year.. 60,478 50

Increase $4,847 40

The earnings of the Chicago and Northwestern Railroad for 1st week in Feb., 1868.. $175,165 68
Corresponding week previous year .. 138,473 24

Increase $36,692 44

The earnings of the Detroit and Milwaukee Railroad for the week ending February 6, 1868, were $20,518 00
Corresponding week of 1867 ..... 22,487 00

Decrease $1,969 00

The earnings of the Western Union Railroad for the 1st week in Feb., 1868 ..... $9,214 25
Corresponding week previous year..... 7,854 67

Increase $1,359 58

☞ The grading of the Utica, Chenango and Susquehanna Valley Railroad is proceeding as rapidly as possible at this season of the year. Two hundred men are employed. The rails are now laid eight miles below Waterville, and the grading will be completed to Sherburne by the 1st of April. The town of Bridgewater has bonded itself $50,000 for the enterprise, and paid in ten per cent. The Colliersville Branch will be begun in a few days.

☞ The Rutland Railroad is soon to be changed in the vicinity of Vergennes, so that the road will run into and through that city. There is a steamer being built at Shelburne Harbor that may soon be conveying passengers and freight between Vergennes and Plattsburg. This arrangement will give the Rutland Railroad a direct communication with Canada and Northern New York.

☞ The Waterloo *Advertiser* is informed upon reliable authority that the Stanstead, Shefford and Chambly R. R. will be extended from Waterloo to Magog next summer. Hugh Allen, Esq., has taken the matter in hand, and is determined to push the road through.

☞ The New London Northern Railroad Company held their annual meeting at New London on the 5th inst. The old Board of Directors were re-elected. The officers for the ensuing year are: A. N. Ramsdell, President; Robert Coit, jr., Secretary and Treasurer; Geo. W. Bentley, Superintendent.

☞ The Morris and Essex Railroad Company earned for the last six months in 1866, $535,450 09, and in the last six months of 1867, $856,409 84. The increase in 1867 was $320,959 75.

☞ Two hundred and fifty men can find employment in grading the Derby Railroad by applying to the contractor in New Haven. The work is to be begun immediately.

Pittsburg and Connellsville Railroad.

We give below the decision of the Supreme Court of Pennsylvania in the case of The Commonwealth *vs.* The Pittsburg and Connellsville Railroad Company. The cause of action is fully stated in the opinion of the Court, and which was the unanimous opinion of all the Judges. It will be seen that the charter, of which the company had been deprived by the Legislature of the State, together with all its rights and franchises, has been restored. The rulings are all against the State, and the law repealing the charter declared unconsitutional. The opinion which was delivered on the 28th ult., by Justice SHARSWOOD, is as follows:

First. It is claimed, on behalf of the Commonwealth, that the defendants have forfeited their charter under the laws of Pennsylvania, by procuring a charter from the Commonwealth of Maryland. It has been contended that such an act is inconsistent with the allegiance which a corporation owes to the sovereign who created it; that it is *crimen laesæ majestatus*—a species of treason. No authority has been cited for this position. A corporation cannot transfer its allegiance by accepting a charter from another State. It does not thereby throw off its original charter, nor can it take shelter under the wing of its new relation from the consequences of any violation of its duties under its old one. The act can in no way harm the Commonwealth. The Courts will maintain and enforce all her rights against her own corporations, without regard to any immunities they may claim to possess beyond her territories and within the jurisdiction of another State. We are of the opinion that this cause of forfeiture is not sustained.

Second. Another ground on which the Common wealth demands judgment is that the defendants, under cover of their Maryland charter, have instituted proceedings in the Circuit Court of the United States for the Western district against another corporation created by this State and other persons praying that an act of the Legislature may be declared null and void. The premises for the purposes of this case may be safely admitted that a corporation which undertakes to drag its sovereign *ad forensicum examin* before the bar of the tribunals of another sovereign violates its first and paramount duty, and thereby subjects itself to the extremest consequences. But the next step in the argument fails. The Circuit Court of the United States is not the Court of another sovereign. The Federal Constitution is the Constitution of the State, having been ratified and adopted by the sovereign act of the people in convention December 12, 1787. "The Government of the United States," said Chief Justice McKean, "forms a part of the Government of each State." It follows that its Courts are the Courts of each State; they administer justice according to the laws of the State as construed and settled by its own supreme tribunal.

This has been more than once solemnly determined by the Supreme Court of the Union to be the rule of their decision, whenever the construction of the Constitution of the United States, treaties, or acts of Congress do not come in question. In this last class of cases the Supreme Court of the United States is the tribunal of the last resort, in which judgments and decrees of the higher Courts of the respective States upon such questions are to be reviewed. Indeed, upon being sued in an inferior Court of the United States upon a question involving the constitutionality of an act of Assembly, the grantees of the State have an advantage which in a State Court they do not possess. In the Supreme Court of the State, if the decision pronounced is against the constitutionality of the act of Assembly relied on, their judgment is final and conclusive. For by the 25th section of the Judiciary Act of Congress, passed September 24, 1789, it is only "when is drawn in question the validity of a statute of or an authority exercised under any State, on the ground of their being repugnant to the Constitution, treaties, or laws of the United States, and the decision is in favor of such their constitutionality," that a final judgment or decree in any suit in the highest Court of law or equity in a State can be carried for review to the Supreme Court of the United States.

Third. A third cause of forfeiture avowed is that the defendants intend to connect this road with a railroad in Maryland, and are engaged in constructing an extension with the purpose of connecting the same with the railroad of the Baltimore and Ohio Railroad Company. We might pass this point with the remark that no mere intention or purpose in a corporation to violate its duty can constitute a cause of forfeiture. Its officers and managers have, like individuals, *locus penitentece.* They may avail themselves of it. The design clearly evinced to do an unlawful act may justify the interposition of a Court of equity by a process of injunction, but it would be unjust before the act was consummated to visit the corporate body itself with the extreme penalty of civil death and confiscation. We propose, however, to rest our decision in this cause upon reasons which will make it final. Upon the proper construction of the various acts of Assembly authorizing these defendants to extend their road south and east from Connellsville, we are of the opinion that they are licensed by the Legislature to form a connection with the railroad of the Baltimore and Ohio Company.

Fourth. The fourth and last position which has to be encountered is that by the act of Assembly passed August 19, 1864, all the rights, powers, franchises and privileges conferred upon the defendants "for and in respect to all that portion of the lines of railway southwardly and eastwardly from Connellsville were resumed, revoked, repealed, and put an end to."

By the 20th section of the original act of incorporation of April 3, 1837, it is provided that "if the said company shall at any time misuse or abuse any of the privileges herein granted the Legislature may resume all and singular the rights and privileges hereby granted to the said corporation." The questions which naturally arise upon the construction of this provision are two—1. Is the Legislature constituted the sole and exclusive judge of the fact of misuse or abuse upon which their power to revoke is conditioned? And 2. If not, what effect ought to be given to their act? As to the first question upon the ordinary rules applied to the interpretation of language, no difficulty could arise. If this were a contract between man and man it could not be pretended that when one party reserves

the power to rescind in a certain event, he is thereby constituted the judge whether the event has occurred. It is a condition precedent to the exercise of the power, and the party exercising it must prove affirmatively the execution of the fact. The power of the Legislature in grants and contracts is not like the power of the English Parliament. It is limited and restrained by the provisions of the Federal and State Consitutions, so that it cannot impair contracts either made by itself or others. It corresponds more properly to the English crown—as to which it is certainly the established law of that country that the King cannot derogate from his own grant, and when an express power is reserved in a certain event or upon certain conditions, it must be proved affirmatively that the event has occurred, or the condition been fulfilled.

2d. What effect then are we to give to the act of August 19, 1864? The pleadings leave but one question open for consideration, namely, whether upon the true construction of the act of April 11, 1856, called in the argument the condoning act, all misuse or abuse of its corporate privileges by the company before that date was pardoned and released. We have no difficulty in saying that upon these pleadings it is admitted that no misuse or abuse had taken place, which would give any constitutional right to the Legislature under the twentieth section of the original act of incorporation, to resume the rights and privileges granted to the defendants, and that the right of eminent domain in this instance has not been constitutionally exercised. We have given to all the points presented by the Commonwealth the most careful consideration, and on the whole are of opinion that they have not been sustained. Judgment for the defendants.

☞ The Government of Nicaragua has appointed Senor Ozon, the Minister for Foreign Affairs, as a commissioner to negotiate with Colonel J. C. Woods the terms of a new railroad concession in the interest of Francis Morris and associates, of New York. These parties propose the construction of a road—partly under Captain Pim's grant—about eighty miles long in all, by which they claim that they can reach a good harbor at each terminus, and make the transit regularly in four hours.

☞ A company has been formed at Ellsworth, Kansas, to build a railroad thence to Fort Larned. The road will open up a fertile, rich and beautiful valley, along which a road can be constructed at a comparatively trifling expense. The distance from Ellsworth to the valley is about thirty-seven miles, and there are no engineering difficulties in this part of the route. After the valley is reached the route is a direct one on a level route to Fort Larned.

☞ The directors of the New Haven and Derby Railroad have broken ground for their contemplated new road, at the base of the range of hills just west of the old West Haven road, about a half mile south of the Milford Turnpike. The directors were accompanied by members of the press and Mr. Chapman, the contractor. The work of piling over the river at the West Meadows is now nearly completed. The entire line will soon be ready to place in the hands of the subcontractors.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States January 1, and February 1, 1868:

	Jan. 1, 1868.	Feb. 1, 1868.
DEBT BEARING COIN INTEREST.		
Five per cent. bonds	$204,929,500.00	$207,739,200.00
Six per cent. bonds of 1867 and 1868	14,690,941.80	9,458,391.80
Six per cent. bonds of 1881	283,676,600.00	283,676,600.00
Six per cent. Five-twenty bonds	1,373,804,750.00	1,398,488,850.00
Navy pension fund	13,000,000.00	13,000,000.00
Total	$1,890,102,091.80	$1,912,363,041.80
DEBT BEARING CURRENCY INTEREST.		
Six per cent. bonds	$20,713,000.00	$22,470,000.00
Three-year compound interest notes	46,244,780.00	46,244,780.00
Three-year seven-thirty notes	238,268,450.00	214,953,850.00
Three per cent. certificates	23,265,000.00	25,040,000.00
Total	$328,491,230.00	$308,708,630.00
MATURED DEBT NOT PRESENTED FOR PAYMENT.		
Three years Seven-thirty notes, due Aug. 15, 1867	$2,022,950.00	$1,742,650.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867	9,952,810.00	6,900,390.00
Bonds of Texas indemnity	257,000.00	256,000.00
Treasury notes, acts July 17, 1861, and prior thereto	162,811.64	162,311.64
Bonds, April 15, 1842	54,061.64	6,000.00
Treasury notes, March 3, 1863	716,192.00	716,192.00
Temporary loan	2,674,815.55	2,474,625.56
Certificates of indebtedness	31,000.00	30,000.00
Total	$15,871,640.83	$12,288,169.19
DEBT BEARING NO INTEREST.		
United States notes	$356,159,127.00	$356,159,127.00
Fractional currency	31,597,583.85	32,246,438.51
Gold certificates of deposit	20,104,580.00	29,619,280.00
Total	$407,861,290.85	$418,024,845.51
Total debt	$2,642,326,253.48	$2,651,394,686.50
AMOUNT IN THE TREASURY.		
Coin	$108,430,253.67	$98,491,162.70
Currency	25,770,349.71	25,578,150.61
Total	$134,200,603.38	$124,069,313.31
Amount of debt less cash in the Treasury	$2,508,125,650.10	$2,527,315,373.19

By comparing this with the statement of January 1, it is shown that the debt bearing coin interest has increased $22,260,950; the debt bearing currency interest has decreased $19,782,600; the matured debt not presented for payment has decreased $3,583,471 64; and the debt bearing no interest has increased $10,163,554 66—making the increase in the total debt since January 1, 1868, $9,058,433 02. The amount of coin in the Treasury during the same period has decreased $9,939,090 97, and the amount of currency has decreased $192,199 10—leaving the amount of debt less cash in the Treasury February 1, $19,189,723 09 more than on January 1.

☞ The contract for building the road bed of the Woodstock Railroad (from White River Junction to Woodstock, fourteen miles,) was given to Ralph Jones & Co., of Canada, on the 23d of January. They commence work upon it immediately, and will push it with energy and despatch to completion. It is expected that the road from Woodstock to Rutland will be commenced in the Spring.

Oil Creek and Allegheny River Railroad.

A consolidation has been effected of the Warren and Franklin, the Farmers', and Oil Creek Railroad companies, whereby the three corporations are merged into one, named "The Oil Creek and Allegheny River Railway Company," with a share capital of $4,259,000. The length of the road consolidated is:

	Miles.
Warren and Franklin Railroad—Irvineton to Oil City	51
Oil Creek Railroad—Corry to Petroleum Centre	38
Farmers' Railroad—Oil City to Petroleum Centre	8
Farmers' Railroad—Cherry Run Branch—Rousville to Plummer	3.11
Total	100

The consolidated company have purchased the Reno Railroad, and intend, it is said to take up its track, and use the rails to lay down the wide gauge from Petroleum Centre to Oil City, and the narrow gauge from Oil City to Franklin, thus making both gauges continuous and unbroken between Corry and Franklin. The merger stipulates that one common charge shall be imposed on oil irrespective of distance carried over the consolidated line; minimum specified fifty cents per barrel. Hence, according to present information, the charge will be the same on a barrel of oil, whether it be carried from Petroleum Centre to Oil City, eight miles, destined down the Allegheny Valley, or from Petroleum Centre or Corry, thirty-eight miles, destined for the Erie or Lake Shore roads, or from Petroleum Centre, by way of Oil City, to Irvington, fifty nine miles, destined for the Philadelphia and Erie Railroad.

Milwaukee and St. Paul Railway.

The lines of this company will in future be known and designated as follows:

From Milwaukee to Prairie du Chien and from Milton to Monroe, as the Prairie du Chien Division.

From Milwaukee to La Crosse via Watertown, and from Watertown to Sun Prairie, as the La Crosse Division.

From North Milwaukee to Portage, and from Horicon to Berlin and Omro, as the Northern Division.

From McGregor to Minneapolis, as the Iowa and Minnesota Division.

We annex a table showing the length of each of the four divisions above:

	Miles.
La Crosse Division	222
Prairie du Chien Division	235
Northern Division	148
Iowa and Minnesota Division	220
Total present length	825

Little Miami Railroad.

The following gentlemen have been elected directors of this company for the ensuing year: E. W. Woodward, Larz Anderson, John Kilgour, W. H. Clement, L. B. Harrison, Charles P. Cassilly, Edmund Dexter, Joseph C. Butler, Henry Hanna, John Bacon, of Springfield, Abraham Hivelong, of Xenia, and Joseph R. Swan, of Columbus. President, E. W. Woodward; Secretary, Charles P. Cassilly; Treasurer, S. E. Wright; Auditor, D. G. A. Davenport; General Superintendent, John Durand; Gen'l Ticket Agent, William L. O'Brian General Freight Agent, E. F. Fuller.

Railroads in Southern California.

The San Francisco *Bulletin* says that some practical movements for the construction of railroads are already under way in Southern California. The arrangement between Santa Clara county and the San Francisco and San Jose Railroad Company, whereby the latter is released of $100,000 of its obligation to the former on condition of extending its road to Gilroy, thirty miles southward, seems to ensure the speedy extension of railway communication to a point eighty miles from this port, touching the heart of one of the most fertile grain districts in the State. It is asserted that earnest efforts will be made to complete the road to Gilroy in season to transport the next crop. San Jose would then be the terminus of three railroads—the San Francisco, Western Pacific and Gilroy.

But the railroad southward will not stop at Gilroy. The section of thirty miles from San Jose to that point may be considered as the initial section of the Southern Pacific, which is certain sooner or later to traverse the whole southern end of the State. Watsonville—the centre of Pajaro Valley must next be reached. Already application has been made for a franchise to build a separate road from Watsonville to Monterey, around the bay of Monterey, a distance of about sixty miles. If the Watsonville and Monterey Railroad is built, it must ultimately connect across the mountains with the Gilroy and San Jose road, and a branch may ultimately be run to Santa Cruz. Still further south, a railroad is projected in Los Angelos County. The great desideratum is to reach the best market for surplus products in less time and at less expense. If any or all of these enterprises are seriously prosecuted, the immediate effect will be to stimulate immigration in that direction. The fact that no extensive floods are known in the counties especially referred to is greatly in their favor, and with the division of the large estates and the building of railroads, must hereafter bring them into more prominent notice.

Whitehall and Plattsburg Railroad.

The project for a railroad from Whitehall to Plattsburg, running along the west shore of Lake Champlain, through the Counties of Washington, Essex and Clinton, is one of the most important enterprises now in progress in this State. It will lead into the inexhaustible iron mines of that region, and afford an outlet for vast quantities of lumber and wood. The people along the line of the route are struggling to hurry it forward, and are raising the necessary means as rapidly as possible. The road will more than double the value of property through these counties. It will afford an outlet for travel and business at all times of the year and prove to be the most direct route from Albany to Montreal.

Ten miles of the road from the village of Plattsburg south, is already graded, and ten miles more is under contract, and a large amount of work is being done this winter on the heavy coultings. We understand that seventeen miles is Essex county will be placed under contract the coming spring. The construction of this road will be of great advantage to Albany, and our citizens should have a deep interest in its progress and completion.—*Albany Argus.*

☞ Colonel Paxton, Agent of the Covington and Ohio Railroad, promises that the road will be completed to the White Sulphur Springs in time for the next visiting season, and will then be pushed west rapidly.

Illinois Central Railroad.

The statement of this Company for the month ending January 31, 1868, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	13,163.55 for	$135,896 01
Acres Int. Fund Lands sold	426.78 for	6,121 93
Acres Free Lands sold	4,401.79 for	56,337 83
Total sales during month of January, 1868	17,992.12 for	$198,335 77
To which add Town Lot Sales		415 00
Total of all	17,992.12 for	$198,770 77
Cash collected in January		$252,685 05

TRAFFIC DEPARTMENT.

Receipts from Freight		$323,019 00

§ 1st July to 19th Nov. * No Returns. † Not complete.

From Lake Superior to the Pacific.

There is a bill pending in Congress that provides for extending the Sioux City branch of the Pacific railroad to the Northeast *via* Mankato and St. Paul to Lake Superior. It was introduced by Mr. Donnelly, and provides that the government subsidies and land grants that have been conferred on the Pacific road shall be granted also to the Minnesota Valley and to the Superior lines. The subsidy alone would go far toward completing the track from Sioux City to Mankato, and from here to the Lake.

These roads, when finished, will open up a rich and magnificent country, will add more than they cost the government to the value of the public lands, and the aid conferred will be the best investment that the United States can make in railroad enterprises. Nebraska, Iowa, Minnesota, Wisconsin and Michigan, with nearly 4,000,000 people, are directly interested in this line of railroad, and its benefits will extend to all the sections of the country that border upon the great lakes and the lines of navigation and land carriage with which they are connected.—*St. Paul Pioneer.*

Railroad Consolidation.

We have just learned from a reliable source that a consolidation of the railroads between Baltimore and Chicago, *via* Cincinnati, has been definitely settled within a few days. The understanding is that the Baltimore and Ohio Railroad will control and direct the line through, and that the Parkersburg Branch will be made the main stem of this short continuous route between the East and the West. With a view to accomplish this at as early a day as possible, arrangements have been concluded upon to put a force of 500 workmen on the Parkersburg bridge over the Ohio river on the first day of March proximo.—*Parkersburg Times.*

☞ The Lee and New Haven Railroad project, which proposed to connect Lee with Collinsville or Winsted, is still under consideration. Sandisfield people have subscribed $40,000, Tolland has voted as a town to take $10,000 of the stock, and Otis $25,000. The road can be built for $600,000.

☞ We learn that the engineers in charge of the extension of the Cumberland Valley railroad from Hagerstown to Williamsport, Maryland, have completed their survey and submitted their estimates. The construction of the road will probably be commenced next spring.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the ***MAIN TRACK IS NEVER BROKEN,*** and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns ***The Life and Limb of all Travelers upon Railroads:***

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

ENGINEERING WORKS.

ENGINEER'S FIELD BOOK,

By C. S. CROSS, Civil Engineer.

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. **Sent free by mail,** upon receipt of the price. For sale at this office. **Price $1.50.**

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No

Bridge over the Great Miami.

The building of the iron bridge over the Great Miami, on the Ohio and Mississippi Railroad, is considered a rapid feat in railroad construction. This structure required the driving of three thousand piles, the laying of 6,200 cubic yards of masonry, the dredging of four difficult foundations in a quicksand, and the construction and erection of 630 feet of iron bridge, in three spans, and weighing 1,100,000 pounds. The first train crossed on the 15th of December last—just 120 days from the time the first pile was driven, and *nine days and four hours* from the time the *last stone* was put in place. The work was carried on night and day, and telegraphic communication kept up throughout the whole of the basin drained by the Miami, so that all storms were prepared for, hours before they or their effects reached the bridge site. The stone for the mason work, which is all first class ashlar, was quarried fifty-two miles from the bridge. The truss is the iron Fink truss, and consists of three spans 210 feet each. The masonry and foundations were carried on under the personal direction of Messrs. T. D. Lovett and J. W. Conlogue, the Chief Engineer and Superintendent of the railway, and the construction and erection of the truss under Mr. Frederick H. Smith, Superintendent for Messrs. Smith & Latrobe, of Baltimore, contractors for the superstructure.

Boston and Albany Railroad.

At the annual meeting of the stockholders of this company held in Boston on the 12th inst., the following gentlemen were chosen directors for the ensuing year: Chester W. Chapin, of Springfield; Daniel Denny, of Boston; Josiah Stickney, of Watertown; Ignatius Sargent, of Brookline; Ginery Twichell, of Brookline; D. Waldo Lincoln, of Worcester; William Claflin, of Newton; James D. Colt, of Pittsfield. It was voted that the annual meeting of the company should be held on the second Wednesday of February in each year, in Boston. A new by-law was adopted to the effect that the by-laws shall not be altered or amended, unless notice of the alteration or amendment be inserted in the call for the meeting. The President stated that the business of the company in the two months that have elapsed since its organization, had been satisfactory and encouraging.

Rondout and Oswego Railroad.

This road will be 100 miles in length, extending from Rondout on the Hudson River to Collidersville, where the Albany and Susquehanna Railroad is crossed; adjoining this and extending to the vicinity of Cooperstown, a distance of 16 miles, the road is to be built by the Susquehanna Valley Railroad Company, and is now under contract; and from Cooperstown to Utica, 24 miles, the Utica, Chenango and Susquehanna Company cover the ground; of this latter road some 20 miles were opened last fall. The entire length of new road between Rondout and Utica will therefore be 140 miles. From Utica to Rome, the New York Central Railroad is to be used, a distance of 15 miles; from Rome to Richland the Rome and Watertown Railroad is to be used, a distance of 42 miles; from Richland to Oswego the Oswego and Rome Railroad is to be used, a distance of 29 miles; The total distance from Rondout to Oswego being 226 miles.

Of the Rondout and Oswego Railroad there is now located 73 miles, extending from Rondout on the Hudson river to Stamford, a town at the head of the west branch of the Delaware river. The road ascends from the valley of the Hudson to the table lands, then crosses the country until it reaches the valley of the Esopus creek, which it follows to its head; then crossing over a spur of the Catskill Mountains it reaches the East Branch of the Delaware river, near Margaretsville, which it follows to its head near Moresville; thence follows the valley of the Bearkill, a tributary of Schoharie creek, until it reaches Stamford.

On the eastern division, comprising the first 26 miles, the curves are mostly light—the smallest radius being 819 feet. On the mountain division, 22 miles in length, the smallest radius is 600 feet. On the Delaware division there is one curve of 675 feet radius—the radii of the others being over 1,000 feet.

The grade from the Hudson River to the table lands is 100 feet per mile. Crossing the Catskill Mountains it is 90 feet per mile for 10 miles ascending, and 80 feet per mile descending for 6½ miles. Ascending the Bearkill to Stamford the grade is 58 feet per mile for 5 miles. With these exceptions the grades are all under 40 feet per mile going west, and 26 feet per mile going east.

On the Mountain division there are several heavy pieces of work; a tunnel of 1,600 feet through Rose Hill; an embankment at the Smith Bushkill of 65 feet greatest height, and 125,000 cubic yards content; a rock cut at Mill brook of 50,000 cubic yards; an embankment at Birch creek 100 feet greatest height and 700 feet in length, containing 230,000 cubic yards.

On Delaware division the work is light, the estimated cost of grading and masonry on first sixteen miles being less than $6,000 per mile.

The estimated average cost per mile of the Eastern Division is $40,000; Mountain Division, $50,000; Delaware Division, $25,000.

The contract of the Eastern Division was awarded to Collins Bros. & McFadden of Philadelphia, who are now working a force of 200 men, which force is to be greatly increased when spring opens. The company now propose to place the whole of the 73 miles under contract during the next summer.

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the years ending October 31, 1866 and 1867, were as follows:

	1866.	1867.
From passengers	$1,685,815 98	$1,503,297 62

The company have 59 locomotives, (15 of which are in use on the New Castle and Wilmington, New Castle and Frenchtown, Delaware, and Eastern Shore Railroads;) miles run by locomotives, 892,376. The President in his report says:

The passenger business was smaller by more than ten per cent. than that of last year; but so soon as business at the South revives, a considerable increase of passenger receipts may reasonably be expected.

The freight and express receipts were larger by more than thirteen per cent. than the receipts from the same sources in 1866, and the increase was principally in local freight traffic.

The gross earnings from all sources, as compared with those of the preceding year, are the smaller by about twenty thousand dollars.

The operating expenses were larger than they were in the year preceding, by more than fourteen per cent. Nearly the whole of this excess is found in the item "Repairs of Road." These repairs have been made in the most thorough manner. A large quantity of ballast has been distributed, and new rails of steel or of iron have been extensively substituted for worn iron rails. The track has been left in such a condition as to render a smaller outlay necessary in 1868; although the policy adopted, of laying some steel rails every year, will for some years swell the cost of the repairs of track. Our experience after more than three years use of steel rails proves that true economy demands their substitution for iron, as rapidly as the receipts of the road will allow.

The Susquehanna Bridge proves to be as great a benefit as was anticipated, and has been in use without interruption during the year 1867. The successful resistance of its piers to ice and flood, in so exposed a situation, reflects great credit upon the engineering skill of Geo. A. Parker, Esq., who designed and constructed this great work. In a letter written about the 1st of December, 1867, by the consulting engineer, Benj. H. Latrobe, Esq., immediately after a thorough personal investigation, that distinguished engineer remarks: "The safe passage of the most exposed piers, through three winters, encourages the conviction that the bridge will safely withstand the danger from ice, heretofore regarded as the most serious which a bridge at the mouth of the Susquehanna would encounter"—"and that no injury to the bridge need be feared unless from windstorms of unprecedented violence."

The Delaware Railroad business resulted in a small direct profit: and, inasmuch as several branch roads which must prove valuable feeders to that road, are in various stages of completion: it is believed that henceforth the Philadelphia, Wilmington and Baltimore Railroad Company will annually derive a direct profit from the lease of the Delaware road.

The Chester Creek Railroad is under contract to be finished in 1868; and its grading is being vigorously pushed. That road will connect the Eastern terminus of the Philadelphia and Baltimore Central Railroad, with the Philadelphia, Wilmington and Baltimore Railroad, at Chester.

The Philadelphia and Baltimore Central Railroad is under contract and nearly completed so far as the Susquehanna River, where, by the means of the Columbia and Port Deposit Railroad, now in process of construction, a connection will be opened with the Philadelphia, Wilmington and Baltimore Railroad Company's Port Deposit Branch Railroad, and an outlet for all traffic leaving the Philadelphia and Baltimore Central Railroad both for the East and the West, will be found by way of the Philadelphia, Wilmington and Baltimore Railroad.

During the year, bonds to the amount of $415,000, payable in 1887, have been sold; and the proceeds applied towards payment of cost of constructing the Susquehanna Bridge and Port Deposit Branch. This series of bonds was limited by vote of the Board to $500,000, and it is believed that no further loan will be required, until the few miles still unfinished in the second track be completed, or some other work of "construction" be undertaken.

President.—Isaac Hinckley.

Directors.—Samuel M. Felton, Samuel Welsh, William Sellers, John A. Duncan, Jesse Lane, Joseph Bringhurst, Frederick A. Curtis, J. I. Cohen, Jr., Thomas Kelso, Columbus O'Donnell, Thomas Donaldson, Jacob Tome and Nathaniel Thayer.

Secretary and Treasurer.—Alfred Horner.

Superintendent.—H. F. Kenney.

European and North American Railway.

The Augusta, Me., correspondent of the Boston *Journal*, writing under date of February 14, 1868, says: "All the controversies affecting this company have been amicably adjusted, at a hearing before the Legislative Railroad Committee, and a bill has been reported that extends the time for completing the line to Lincoln; consolidates in view of the loan of $1,000,000 by the city of Bangor, in lieu of previous grants, and grants the fee of the public lands lying on the Penobscot and St. Johns waters, amounting to three-fourths of a million of acres. The loan act is more liberal in its terms than the previous ones as to time of

payment. Since the adjustment, the Bangor subscription of $300,000, the payment of which some refused, on account of the controversy in the board, will be paid without a doubt. Col. George H. Pierce, the contractor, retires from the contract, and the stockholders outside of Bangor sell their stock, so that the outside contractors, and others in Bangor, come into full possession of the line on the 3d of March next. The payment of the Massachusetts debt due on the lands will probably be waived by the State, in which event the company will issue $2,500,000 worth of land bonds, which will sell in the large markets of the country, or in England, and secure the completion of the line. The work is in progress at both ends, although the largest piece is in New Brunswick."

Eastern (Mass.) Railroad.

The receipts of this company for the fiscal years ending November 30, 1866 and 1867, have been as follows:

	1866.	1867.
From passengers	$1,009,563 04	$957,833 54
" freight	346,936 37	348,844 53

	$973,044 47	$922,416 26
Balance	$449,122 88	$524,630 42
Rent of B. & M. R. R.	$3,215 04	$3,215 04
Int. paid and accrued.	118,527 80	124,563 70
Total rent and interest.	$121,742 84	$127,778 74
Net income	$327,380 04	$306,851 68
Balance December 1, 1866		201,586 11
Premium on shares sold and taxes refunded		32,392 76
Property accounts		94,599 21
Total receipts		$725,430 76
Payments during the year—		
East Boston wharf		$830 50
Legal expenses		16,214 38
U. S. tax on repairs, and stamps		3,827 69
Exchange and premium on gold, etc.		11,559 45
Gravel pit at Rowley		200 00
Damages to freight		3,579 28
Loss in operating South Reading road		8,852 49
Tax to State of Massachusetts		53,022 42
Dividends January and July, 1867		325,784 00
U. S. tax on dividends		17,146 32
Rail iron		34,985 37
Balance to new account		249,428 71
Total, as above		$725,430 76

Compared with 1866, the gross earnings of 1867 show an increase of $24,879 33; with a decrease in expenses of $50,628 21—making the increase in net earnings, $75,507 54. The net income, after payments of rent and interest, is $69,471 64 greater.

The taxes paid by this company in 1866 and 1867, compare as follows:

	1866.	1867.
United States taxes	$59,934 38	$41,361 57
State of Massachusetts.	40,782 39	53,022 42
" New Hampshire	9,174 25	9,703 03
Town and city taxes	9,347 16	11,012 26
Totals	$119,238 18	$115,099 28

If to this sum be added the amount paid on materials and on cars and engines manufactured, it will considerably exceed three per cent. on the entire capital of the company. "It may be questioned," says the report, "whether any business can be prosecuted with success permanently under such a weight of taxation. Not that railroads are likely to be taxed out of existence; although the building of new ones may be checked, and the business of some localities remain undeveloped; but the burden must ultimately fall upon the internal traffic and travel of the country, in the form of increased rates of fares and freights."

The principal extraordinary expenditures in 1866, part of which are properly chargeable to capital account, are as follows:

New engines and cars	$202,078 12
Machine shop and machinery	49,238 43
Land and improvements	53,841 38
New railroad and bridges at Newburyport	145,671 05
Rebuilding Boston bridge	17,035 51
Rail iron	12,326 53
Loan to South Reading R. R	10,656 94
	$490,847 96

There were laid down in that year 1,200 tons of new iron and 600 tons of welded rails, and about 30,000 sleepers. Upwards of a mile of new side track was built, besides large ordinary repairs on the road bed. There were purchased 6 new engines, 4 were entirely rebuilt, 17 had large and complete repairs, and the remainder had all needful repairs from time to time. Two passenger cars were purchased and two built in the company's shops; 21 freight cars were purchased and 14 built by the company; 20 were rebuilt, and many others repaired and painted.

During the fiscal year 1866–'67, two new engines were purchased, and one built, and extensive and complete repairs put upon 26 others, while the remainder were more or less repaired as necessary. The company have now 41 engines in efficient working order, 14 of which have been added within the last four years. One other is in process of construction in the company's shops. During the same time, 2 passenger and 20 freight cars, and 1 express car have been purchased; 2 passenger, 2 baggage, 30 freight, 4 hand and 12 rail cars have been built; and 6 passenger, 37 freight and 3 hand cars rebuilt; and all the others more or less repaired.

The company have now 41 locomotives; 70 passenger, 1 passenger express, 20 baggage, 168 long box and 93 short-box freight cars; 130 platform, 191 coal, 24 cattle, 14 hay and 55 gravel cars, and 7 snow ploughs.

	1866.	1867.
Number of miles run	805,800	863,222
Passengers carried	2,644,679	2,488,848
Tons carried	273,695	250,450
Locomotives	38	41
Passenger cars	65	70
Freight, etc., cars	612	699
Miles of road	118	102

During the past year there have been laid down 2,845 tons of new rails and 537 tons of repaired rails, equal to laying 33.8 miles of new track; and 54,270 sleepers. Nearly 2 miles of turnouts have been built, and 18 miles of track raised and ballasted. The principal extraordinary expenditures in 1866–'67, were as follows:

New engines and cars, and rebuilding.	$149,471 91
New wharf at East Boston	20,294 75
Machine shop "	21,180 88
Newburyport bridge	123,898 67
New iron	101,408 18
Second track Salem and Beverly	43,900 85
Lands and improvements	92,025 48
	$552,180 72

President.—George M. Browne.

Directors.—George M. Browne, Samuel Hooper, Nathaniel Thayer, Franklin Haven and Benjamin E. Bates, of Boston; Wm. L. Dwight, of Portsmouth; Henry L. Williams, of Salem.

Treasurer.—John B. Parker.

Superintendent—Jeremiah Prescott.

New York and Albany Railroad.

We learn that the negotiations for the purchase of the Northern New Jersey Railroad by the Hudson River West Shore Railroad Company, have been successful, and the latter will enter upon possession shortly. This will have a powerful influence toward bringing to a successful issue the completion of the West Shore line.

The bill to facilitate the construction of the New York and Albany Railroad has been reported favorably in the Assembly at Albany, and indications are favorable to its successful passage. The President, Mr. Joseph H. Ramsey, is indefatigable in his efforts to bring about this result. The report of C. W. Wentz, Chief Engineer, indicates two routes for the projected road, one by way of the Wallkill Valley, and the other known as the Kingston route, nearer the Hudson River. The probability is that the one will be adopted which will enable the company to realize the largest amount in the way of subscriptions. The bill before the Assembly authorizes town subscriptions, like those in similar cases.

☞ The Lake Superior *Miner* says the construction of the Mississippi and Lake Superior Railroad, extending from St. Paul, Minn., to Lake Superior, is a fixed fact.

Baltimore and Ohio Railroad.

The regular monthly meeting of the directors of this company was held in Baltimore on the 12th inst.

A proposition was presented from the city of Cumberland for the transfer of certain lands to the company, providing a rolling mill for the manufacture and re rolling of rails should be erected in that city. The President stated that in view of the difficulty of securing iron of satisfactory and uniform quality, a number of railway companies in England and this country had decided upon manufacturing the rails required for their own use. After full and protracted investigations of the subject, the officers of the company were unanimous in expressing their judgment that the company should erect a rolling mill. Numerous sites had been proposed, and liberal offers made to supply the requisite land.

As Cumberland was a central location, near the region from which coal could be procured for the supply of the mill, and as the Connellsville road might be expected at an early day to be connected at this point, that city seemed to present a suitable location. The President felt sure it would gratify the Board to meet the unanimous wishes of the people of Cumberland in adopting that location, if it were determined to erect the mill, and thus aid in advancing the population and prosperity of the second city of the State of Maryland. The Committee of Finance had unanimously determined to recommend the erection of the mill, and the acceptance of the proposition of the city of Cumberland, in accordance with the recommendations in the report of the Master of Road. The President cordially joined in this recommendation.

It was stated that about twenty thousand tons of iron was now required annually by the road and its branches. Also, that it was due to the Abbott Iron Mill, a very extensive establishment, erected within the past two years in Baltimore, to state that the iron furnished by that mill had, as far as tested, proven to be of superior quality. But even with this additional facility, a mill, under the charge of the officers of the company, who would select the quality of iron to be placed in the rail, was deemed advantageous.

Subsequent to the remarks of the President, it was decided, without division, to accept the proposition and construct the mill.

Favorable action was also adopted upon the application of the Orange, Alexandria and Manassas Railroad Company for financial assistance for the construction of their road from Strasburg to Harrisonburg, explanations in reference to which, and of other subjects before the Board, were made in the following address of Mr. Garrett:

ADDRESS OF THE PRESIDENT.

Gentlemen—The present affords a suitable occasion to call attention to some important events which have recently occurred and are about to transpire, and which are, to an important degree, connected with the interests of this company and of this community.

The Marietta and Cincinnati Railroad Company which has heretofore not been successful financially, has proposed, through its chief officers and owners, that a new Board of Directors shall be elected, composed of leading citizens of Baltimore and Cincinnati, with representatives also of the local interests of that line. They further propose that the Vice President of this company, Mr. John King, Jr., shall be elected President of that company, in order to bring about a closely harmonious and co-operative policy in working that road in connection with the Parkersburg Branch and Baltimore and Ohio Company.

This company has steadily pursued the policy of perfecting the Parkersburg Branch road. The twenty-three tunnels on that line are being arched rapidly, although at enormous cost. The length of these tunnels is about three and a half miles. Two-thirds of this difficult work is already completed, and forces sufficiently large are engaged to insure that the remainder will be finished within the present calendar year. The expenditures in prosecuting this work continue to be fifty thousand dollars per month. Arrangements have also been made to proceed with the construction of the bridge to connect the Parkersburg road with the Marietta and Cincinnati road. Under these circumstances it was apparent that it was proper to enter into the proposed arrangements, so as to insure to Baltimore and Cincinnati, and the connected territories and railways west of Cincinnati, the most effective use of this great route.

The western combinations being formed by the managers of the New York Central and Pennsylvania roads, are creating the neccessity for alliances on the part of important Western lines with the Baltimore and Ohio road. Geographical relations, with the strong bonds of mutual interests require these alliances.

On the completion of the Metropolitan road the passenger from Cincinnati to Washington using this route will save 126 miles of travel compared with the routes *via* Pittsburg and the Pennsylvania road, as he can now save by this route to Baltimore, as compared with the Pennsylvania line, 59 miles. The completion and thorough working of these roads cannot fail to accomplish the most important results.

The Board has had the gratification of observing that the Supreme Court of Pennsylvania recently decided with unanimity that the repeal by the Pennsylvania Legislature of the charter of the Pittsburg and Connellsvile Railroad Company, was unconstitutional and therefore void. The Board has doubtless noted, too, the highly satisfactory action of the Legislature of Pennsylvania, which, upon learning the decision of the Supreme Court of that State, repealed the act rescinding the charter of the Pittsburg and Connellsville road, by a unanimous vote in both the Senate and House of Representatives.

Thus the incubus which has so long and so unjustly rested upon the Pittsburg and Connellsville Railroad has been swept away, and that grand avenue is now within the reach of Baltimore and Pittsburg.

You will remember that fifty-eight miles of that road, from Pittsburg to Connellsville, have been constructed, and that but ninety-nine miles, from Connellsville to Cumberland, remain to be built, and that much work has been done upon the Sand Patch Tunnel, which is the heaviest section of the unfinished line. The expenditure, however, to complete the road will be large, as much heavy work is to be encountered. Not less than four millions of dollars will be required to accomplish the object. The city of Baltimore aided the Pittsburg and Connellsville road to the extent of a million of dollars by a loan of its stock. Upon that million of dollars, in consequence of the non-completion of the road, that company has been unable to pay the interest, so that the debt now exists with the accumulated interest.

In 1856 the city of Baltimore enacted an ordinance which assented to the subordination of its lien upon the Pittsburg and Connellsville road in favor of a mortgage to be created for a sum sufficient to complete the road. This ordinance was subsequently repealed under hostile influences. The Pittsburg and Connellsville Company is about applying to the City Council for the renewal of legislation of a similar character, and the subject will doubtless at once become as prominent as its great importance demands.

It is hoped that the city of Baltimore will cordially co-operate and adopt such legislation as may be necessary to insure the early commencement and rapid prosecution of this great work. Prompt and judicious action on the part of the City Government will, without additional investment on the part of the city, aid that company in obtaining the necessary means for construction, and thus insure the advantages of the road, as well as the ultimate remunerative character of the investment which must result from the completion of the road.

There is no point in the West more important for a direct connection with the city of Baltimore than the city of Pittsburg. The population of the city and its suburbs has swollen until it is now estimated at two hundred and fifty thousand. It is the centre of an immense railway business—the Pittsburg and Fort Wayne, the Allegheny Valley, the Cleveland and Pittsburg, and other great roads terminating at Pittsburg.

Among the most interesting developments since the decision of the Supreme Court of Pennsylvania, has been the efforts of parties connected with those roads to arrange for the joint use of the Pittsburg and Connellsville road in connection with the Baltimore and Ohio Railroad. All can appreciate its vast importance and the advantages to Baltimore of that connection when attention is called to the fact that whilst the distance from Pittsburg to Philadelphia by the Pennsylvania road is but 355 miles, the distance from Pittsburg to Baltimore by the Connellsville road is but 326 miles. We thus obtain a *direct* line under Baltimore and Pittsburg influences—less so materially than the distance between Pittsburg and Philadelphia. We cannot only command this difference of twenty-nine miles, but with a line of superior grades.

Whilst the maximum grade of the Pennsylvania road is ninety-six feet to the mile, it is expected that the Pittsburg and Connellsville road will be constructed with a maximum grade of but fifty feet to the mile. Thus in the equation the distance will be further largely in favor of the Connellsville road. Pittsburg will thus obtain her *shortest path to the sea*, an advantage which must necessarily add to her prosperity. The entire Northwest will participate in this marked and practical advantage of securing the shortest and *cheapest* outlet to the ocean.

The Pittsburg and Connellsville road presents in a national point of view, a very important relation. The distance from Pittsburg to Cumberland *via* Connellsville is 148 miles; from Cumberland to the Point of Rocks, 109 miles; from the Point of Rocks to Washington, by the Metropolitan road, 42 miles, making the distance from Pittsburg to Washington *via* Connellsville road 299 miles. From Pittsburg to Washington *via* the Pennsylvania Central and Harrisburg and Northern Central roads the distance is 374 miles, making a difference in favor of the vast travel of the Northwest, as well as of Western Pennsylvania, from Pittsburg to Washington of 75 miles when the Pittsburg and Connellsville, and Metropolitan Railroads are completed.

The Baltimore and Ohio Company will be enabled to bring Western passengers, *via* the Metropolitan road and the city of Washington, to Baltimore—thus giving them the advantage of visiting or seeing the National Capitol *en route*, and avoiding the curves on the present line in the valley of the Patapsco, whilst, practically, the new line can be thus used with equal economy.

Surrounded by such facts and circumstances, it cannot be doubted that the city of Baltimore will join promptly and energetically in carrying out this great programme for the advancement of her interests.

The President stated that he had not the slightest hesitation in expressing, as a matter of deliberate judgment, that if the Pittsburg and Connellsville Road, be built, within a single year after its construction, the value of that road to the community in increasing the business that will fall into the lap of Baltimore will exceed the whole

amount the city of Baltimore has invested in that road.

The Committee of Finance authorized the purchase of the property of the Baltimore and Cuba Smelting and Mining Company, at Locust Point, for one hundred and fifty thousand dollars. That purchase has been made, and the improvements are in progress at that point which will be needed in connection with the general interests of the company.

The Board is aware that a contract was made a short time since with parties in New York, who have leased extensive grounds and are arranging facilities for a very large business in petroleum at Locust Point. It is confidently expected that when the Connellsville Road is built a very large portion of the oil business of Pennsylvania in addition to that from West Virginia, will concentrate at Baltimore as the most economical point of shipment; and these sagacious capitalists from New York made their contract having in view the large business in oil which the completion of the Connellsville Road would command from Pennsylvania to Baltimore. The President of the Allegheny Railroad Company, whose road reaches the most important oil regions, expresses much anxiety for the early completion of the Pittsburg and Connellsville Road, to which he looks as a leading outlet for the oil transported upon that line. The grain trade of Western Pennsylvania and the Northwest will also be induced to Baltimore by the economy and facilities of the line.

The policy of the Baltimore and Ohio Company has been to prepare for the Connellsville connection. Its faith has never faltered that ultimately obstructions would be removed and the road built. The company, therefore, pressed the construction of its double track, which has been completed at large cost, so that now, at the moment arrangements are being made to complete the Connellsville road, you offer a first-class double-tracked road from Cumberland to Baltimore, by which every possible accession of business can be conveniently and economically transported on the Baltimore and Ohio Road.

Extensive as the present arrangements at Locust Point are, it is evident that the demands of trade will require their immediate enlargement. Enterprising parties from Northern cities are arranging to erect warehouses for storage purposes, and to furnish receipts upon the system pursued in New York, so that advances can be obtained upon the goods so stored. Propositions are also pending for the erection of extensive grain elevators, so that the best and most economical facilities may be furnished for this important increasing trade.

The company entered into an engagement with the North German Lloyd Steamship Company for the construction of a pier at Locust Point, to be ready in season for the use of the steamers of the Bremen Line. The President had the gratification to state that four hundred feet of the pier have been completed and prepared for use, so that the first steamer which arrives will have ample and excellent accommodation. The plan adopted is to build the pier 650 feet in length by 85 feet in breadth, to be covered the entire distance, thus supplying 55,250 square feet of covered pier space.

The President had also the satisfaction to state that Messrs. Albert Schumacher & Co., the agents of the North German Lloyd, are officially advised that the first steamer of the Bremen line, the "Baltimore," will leave Bremen for Baltimore on the first of March, and the "Berlin" on the first of April, and that arrangements have been made for the return of these steamers from Baltimore to Bremen on the first of April and first of May, respectively, and regularly thereafter a steamer from each port on the first of each month. Each of these steamers will touch at Southampton on each voyage for passengers and freight.

The steamers of the Baltimore and Liverpool line, viz: the Worcester, Somerset and Carroll have their schedules arranged for the coming season, the first sailing on the 25th of this month. It is designed to so arrange the arrival and departure of the Bremen and Liverpool steamers that Baltimore will have a fortnightly arrival and departure of European steamers—that twice each month there will be communication between England and the Continent by steamers running directly between Baltimore and the European ports.

Under these circumstances, with so vast and comprehensive a system, long since planned by the managers of this company, and now about being put into execution, promising results so valuable, the President did not doubt the expectation would be realized that the community will cordially join in aiding those plans and securing the objects designed.

As the Baltimore and Ohio Company has still before it the cost of the completion of the arching of the tunnel on the Parkersburg road, the building of the great bridges to connect the Parkersburg road and the Marietta and Cincinnati road at the Ohio river, and the main stem of the Baltimore and Ohio with the Central Ohio road at Bellaire, which latter works will probably exceed in cost a million and a half of dollars, and has also the necessity of preparing large quantities of additional machinery to meet the necessities of its increasing business, it is evident that the resources of the company will be severely taxed to proceed with these improvements as rapidly as the interests of the community demand.

The community has not been asked for aid heretofore in carrying out many improvements benefitting largely the city of Baltimore. The Bremen line has been established without other contribution than that afforded by the Baltimore and Ohio Railroad. The capital for the Liverpool line has been supplied exclusively by the Baltimore and Ohio Railroad. And now, when our fellow citizens will be asked to aid by subscriptions to the Winchester and Strasburg Road to the extent of four hundred thousand dollars, and thus open a line extending one hundred miles from Harper's Ferry, through the great Valley of Virginia, and the city of Baltimore is asked to co-operate in arrangements to secure the early construction of the Pittsburg and Connellsville Road, it is trusted that such enery will be infused, and such efforts made as will accomplish both results at an early day.

Baltimore, by these means, can be placed in a position to realize all her geographical advantages, and thus prepare to accomplish the great commercial destiny that awaits her. Her business and connections can be rapidly increased and developed, and in time her great natural advantages, combined with proper energy and enterprise on the part of her citizens, will cause her to rank in the very first class of the commercial cities of the world.

The Board has decided to aid the Orange, Alexandria and Manassas Railroad in extending its line from Strasburg to Harrisonburg upon agreement for the working of that line in connection with the Baltimore and Ohio Road upon terms mutually satisfactory.

The company has also authorized the subscription of $100,000 to the stock of the Winchester and Strasburg Road. This road will be nineteen miles in length, extending from Winchester to Strasburg. The condition of the subscription is that $500,000 of stock must be subscribed before any of the subscriptions will be binding. That amount is estimated to be the cost of the road. By the completion of this short link of nineteen miles, as the Baltimore and Ohio Company now has permanent control of the Winchester and Potomac Road, in connection with the agreement with the Orange, Alexandria and Manassas Roads, the merchants of Baltimore will have opened for them a line extending from Harper's Ferry to Harrisonburg, being one hundred and one miles through the fertile Valley of Virginia. Subscriptions in this case will not be gratuities, as it is expected the road will be productive. It will doubtless be the policy of the Baltimore and Ohio Company, when the Winchester and Strasburg Road is constructed, to lease the line and pay interest upon its cost.

By immediate action on this subject, the line being remarkably free from difficulties, can be constructed in a brief period; so that within twelve months the line through to Harrisonburg can be in operation. When this road shall be opened, efforts can be properly made for the extension of the Valley line to connect with the Virginia and Tennessee road in the vicinity of Salem, and a route can be thus obtained which will afford to the productive region extending through to Louisiana, the advantage of transacting their business with Baltimore by an economical route.

Mr. Garrett having concluded, ex-Governor Bradford stated that he had listened with lively interest to the remarks of the chair, and felt the importance particularly of the policy of completing, at the earliest possible day, the Connellsville Road. He stated that all remembered that in its inception the Connellsville Road was a favorite project with the city of Baltimore, and that the delay in the completion of that road, brought about by the adverse legislative action of Pennsylvania, had caused us, perhaps, to some extent, to lose sight of the importance of this interest as we formerly contemplated it.

He advocated the appointment of the city directors as a special committee to aid the President of the Pittsburg and Connellsville Railroad by effecting the requisite arrangements with the city of Baltimore. He made a motion to this effect, which was unanimously adopted.

The Board then adjourned.

Detroit and Howell Railroad.

This road is now being pushed with an efficient force. The bridges are being rapidly constructed, and the ties and timber for culverts and cattle guards delivered along the line preparatory to still more energetic operations as soon as Spring shall open. The twenty miles between Detroit and Plymouth are to be ready for the iron on or before the 31st of July next, and the remainder on or before January 31st, 1869. The officers expect to be able to follow closely behind the contractors with the iron, as they have a considerable surplus of means above the contract price to apply toward iron and rolling stock, and a wealthy country at their back, only needing confidence in the safety of the investment to induce the furnishing of the means necessary to put the road in operation. The right of way is being secured for its extension to Lansing, together with a preliminary survey, and when opened up to that point, its prospects will be of the most encouraging character.

Iron Mountain Railroad.

Our dispatches announce the passage by the Senate of a bill which provides to restore to Mr. Allen the Iron Mountain Railroad. The strength of the vote in its favor shows that the views of the Senate are nearly unanimous. The vote was 23 ayes to 5 noes. The bill provides for the transfer of the ownership of the road to Thomas Allen and his heirs, and for a completion of the road to a junction with the Cairo and Fulton Railroad in two years, and to Belmont in three. It also provides that there shall be no forfeiture of the road in the future, except upon action taken thereon by the Legislature, and directs the Governor to release the road to Mr. Allen.—*St. Louis Rep. 12th.*

☞ The town of Rock Island, Ills., has subscribed $50,000 to the stock of the Peoria and Rock Island Railroad. The town of Moline, Ills., also proposes to subscribe $50,000 to the same project.
